CONSTITUTION OF BOTSWANA

Authorisation to Exercise Functions of Office of President

TO: HIS HONOUR SLUMBER TSOGWANE, M. P., VICE PRESIDENT

WHEREAS IT IS PROVIDED by section 36 (1) of the Constitution that whenever the President is absent from Botswana or considers it desirable so to do by reason of illness or any other cause he may, by directions in writing, authorise the Vice President to discharge such of the functions of the Office of President as he may specify, and the Vice President may discharge those functions until the President's return to Botswana or the revocation of such authorisation, as the case may be;

AND WHEREAS I intend to be absent from Botswana from 17th May, 2018 and I consider it desirable to issue directions as aforesaid;

NOW THEREFORE, in exercise of the powers vested in me as aforesaid I authorise you, SLUMBER TSOGWANE, in your capacity as Vice President, to discharge with effect from 17th May, 2018, all the functions of the Office of President, except —

- (a) the power to dissolve Parliament in accordance with the provisions of section 91 of the Constitution;
- (b) the power to appoint to the Office of Minister or Assistant Minister in accordance with the provisions of section 42 of the Constitution;

Provided, however, that you can appoint the present Ministers or Assistant Ministers to act in place of any Minister who is otherwise not available;

- (c) the power to remove a Minister or Assistant Minister from office in accordance with the provisions of section 43 of the Constitution;

until my return to Botswana or this authority is revoked by me, whichever happens first.

GIVEN under my hand and the Public Seal at GABORONE this 16th day of May, 2018.

MOKGWEETSI ERIC KEABETSWE MASISI,
President.

Government Notice No. 283 of 2018

ELECTORAL ACT

(Cap. 02:09)

(Section 34 (5))

Notice of Issue of Writ of Election for the Moshupa – Manyana Constituency By-election

IN PURSUANCE of the provisions of section 34 (5) of the Electoral Act, notice is hereby given that, on the 9th day of May, 2018, His Excellency the President of the Republic of Botswana issued a Writ of Election for the by-election of the Member of Parliament for the Moshupa – Manyana Constituency, addressed to the Returning Officer for that Constituency, directing the Returning Officer to receive nomination of candidates at Moshupa Senior Secondary School, Moshupa on the 25th day of May, 2018 between the hours of 9:00 a.m and 1:00 p.m and between 2:30 p.m to 5:00 p.m.

The Writ of Election further directs that any poll, which may become necessary, shall be taken on the 16th day of June, 2018.

DATED this 9th day of May, 2018.

K. A. ZUZE,
Secretary,
Independent Electoral Commission.

CHANGE OF NAME ACT (Cap. 15:02)

Applications for Authorisation of Change of Surname

IN PURSUANCE of the provisions of section 4 (2) of the Change of Name Act, notice is hereby given that applications have been made to the Minister of Nationality, Immigration and Gender Affairs by each of the persons listed hereunder, for the Minister's authority to assume the surnames specified in relation to their names and addresses.

Any person who objects to any or all of the applications may notify the Minister of such objection and the grounds thereof within thirty (30) days of publication of this Notice.

<i>Name and Address</i>	<i>Proposed Surname</i>	<i>Reasons Given for Wishing to Assume Proposed Surname</i>
Dikgang Mochekele, Private Bag 003, Gabane.	Seipone	Mochekele is his stepfather's surname while Seipone is his biological father's surname. Reason for change: The applicant wants to use biological father's surname.
Keneilwe Thandie Basiamang, P.O. Box 4, Thebephatshwa.	Maduo	Basiamang is her maternal grandfather's name while Maduo is her paternal grandfather. Reason for change: The parents want the child to use the proposed surname.
Nancy Matisha, P.O. Box 18, Bokaa.	Matisha-Bojosi	Matisha is her maiden surname while Bojosi is her husband's surname. Reason for change: The applicant wants to use her maiden surname and husband's surname as surname.
Marang Adele Masedi, P.O. Box 76, Moshupa.	One-Puss	Masedi is her maternal grandfather's name while One-Puss is her father's first name and surname. Reason for change: The father wants his daughter to use father's first name and surname as surname.
Chloe Thandie Masedi, P.O. Box 76, Moshupa.	One-Puss	Masedi is her maternal grandfather's name while One-Puss is her father's first name and surname. Reason for change: The father wants his daughter to use father's first name and surname as surname.
Mariam P. Madimabe, P.O. Box 898, Bobonong.	Moses	Madimabe is her maternal grandfather's surname while Moses is her husband's first name. Reason for change: The applicant wants to use her husband's first name as surname.
Dion Sean Madimabe, P.O. Box 898, Bobonong.	Moses	Madimabe is his maternal great grandfather's name while Moses is his biological father's first name. Reason for change: The mother wants his son to use biological father's first name as surname.
Neo Corneliah Leping, P.O. Box 1605, Molepolole.	Sebolao	Leping is her spousal surname while Sebolao is her maiden surname. Reason for change: The applicant wants to use her maiden surname.
Ketogetswe Moribola, P.O. Box 102, Seleka.	Olatotse-Seromo	Moribola is the applicant's maternal grandfather while Olatotse-Seromo is the applicant's husband's forename and surname. Reason for change: Applicant wants to use both husband's forename and surname.
Moemedi Gabautwe, P.O. Box 150129, Kanye.	Morekisi	Gabautwe is his maternal great grandfather while Morekisi is the applicant's grandfather. Reason for change: The applicant wants to use the surname to match his school certificates.
Zibo Nametsegang, P.O. Box 276, Serowe.	Mabua	Nametsegang is her paternal grandfather's surname while Mabua is her grandfather's first name. Reason for change: Applicant's mother wants her child to match surname on identity documents with academic certificates.

Setswakae Tabolwa, P.O. Box 1, Lerala.	Outule	Tabolwa is her maiden surname while Outule is the husband's forename. Reason for change: Applicant wants to use the husband's forename as surname.
Judith Phili, P.O. Box 2, Kasane.	Maphakela	Phili is her maiden surname while Maphakela is her husband's forename. Reason for change: The applicant wants to use her husband's name as surname.
Kgomotso Keagakwa, P.O. Box 2511, Mahalapye.	Kemiso	Keagakwa is her maternal great grandfather's name while Kemiso is her paternal great grandfather's name. Reason for change: The father wants his daughter to use paternal great grandfather's name as surname.
Keonyemodisa Mokhuiwa, P.O. Box 164, Digawana.	Dithupe	Mokhuiwa is his father's firstname while Dithupe is his paternal grandfather's name. Reason for change: The applicant wants to use his paternal grandfather's name as surname.
Mogotwane Kenosi, P.O. Box 288, Moshupa.	Serunya	Kenosi is his mother's maiden surname while Serunya is his paternal grandfather's name. Reason for change: The applicant wants to use his paternal grandfather's name as surname.
Baatse Irish Seepi, P.O. Box 82, Tobane.	Peterose	Seepi is her maternal great grandfather's name while Peterose is her father's firstname. Reason for change: The mother wants her daughter to use father's firstname as surname.
Lucky Molefe, P.O. Box 352, Mmopane Block 1.	Mudangule	Molefe is his paternal great grandfather's name while Mudangule is his paternal grandfather's name. Reason for change: The mother wants her son to use paternal grandfather's name as surname.
Nicole K. M. Kebotse, P.O. Box 18, Bokaa.	Omphithetse	Kebotse is her maternal great grandfather's name while Omphithetse is her father's firstname. Reason for change: The mother wants her daughter to use father's firstname as surname.
Tapologo Fane, P.O. Box 111, Lecheng.	Merafe	Fane is her stepfather's surname while Merafe is her father's surname. Reason for change: The applicant wants use her biological father's surname as surname.
Lepang J. Bojosi Matisha, P.O. Box 18, Bokaa.	Lefoko-Bojosi	Matisha is her maternal great grandfather's name while Lefoko-Bojosi is her father's full name. Reason for change: The mother wants her daughter to use the father's firstname and surname as surname.

DATED this 7th day of May, 2018.

STORY D. RAMORWA,
for Permanent Secretary,
Ministry of Nationality, Immigration and
Gender Affairs.

MODIKO MOLEOFI,
Road Transport Controller.

Government Notice No. 294 of 2018

ROAD TRANSPORT (PERMITS) ACT
(Cap. 69:03)

ROAD TRANSPORT (PERMITS) REGULATIONS
(Cap. 69:03 (Sub. Leg.))

Application for Road Transport Permits -“P”- Permits

NOTICE IS HEREBY GIVEN that in accordance with regulation 4 of the Road Transport (Permits) Regulations, the applicants for Road Transport Permits, listed in the first column of the Schedule to this Notice, will have their applications heard at a public sitting on 22nd June, 2018 at Kodisa Lodge Conference Room. The hearings will start at 0830 hours.

Representations and objections in respect to the said applications shall be made to the Transport Controller, Department of Road Transport and Safety, Private Bag 0052, Molepolole and to the applicants by registered mail so as to reach the addressees not later than 21 days after this Notice has appeared in the Government Gazette.

PUBLIC NOTICES

Public Procurement and Asset Disposal Board (PPADB)

EXPRESSION OF INTEREST

Profile

The Public Procurement and Asset Disposal Board (PPADB) was enacted by an Act of Parliament (Cap. 42:08) of 2001. PPADB is a parastatal organisation, operating under the Ministry of Finance and Economic Development (MFED). The primary mandate of PPADB is to adjudicate and award tenders for Central Government and any other institutions specified under the Act for the delivery of works, services and supplies related services.

Invitation

PPADB hereby invites companies or entities with substantial experience to submit an Expression of Interest (EOI) in performing load testing for the Integrated Procurement Management System (IPMS), a web application;

- In line with the Citizen Economic Empowerment (CEE) Policy, this EOI is reserved for 100% citizen owned companies registered with the Public Procurement and Asset Disposal Board (PPADB) under Code: 319 – ICT Consultancy, Sub-Codes: 01 – ICT Systems Development or Sub-Code: 03 – ICT Security Management or Sub-Code: 04 – ICT Risk Management.
- Companies interested in conducting the load testing should submit applications to PPADB at Plot No. 8913, Maakgadigau Way, Gaborone West Industrial, Gaborone before 1000 hours on 1st June, 2018 in the Tender Opening Hall.
- Response to the advert should be submitted in securely sealed envelopes marked with the following letters “PPADB 1/22/2 – EOI – LOADTESTING OF IPMS”. The submission should be addressed to: The ICT Manager, Public Procurement and Asset Disposal Board (PPADB), Private Bag 0058, Gaborone, Botswana and delivered to: PPADB Tender Opening Hall, Ground Floor, Plot No. 8913, Maakgadigau Way, Gaborone West Industrial Site.
- Submissions should be received not later than 1000 hours on 1st June, 2018.
- The name of the interested company should be stated on the outside of the envelope.

In consideration of the foregoing, established and reputable Information Technology companies are invited to express their interest and to submit their company details as described below for pre-qualification prior to tendering. Company information should include but not limited to the following for the assessment of the most appropriate expertise;

- Capability statement that includes a list of load testing projects carried out in the last five (5) years (The company must have concluded at least three (3) load testing assignments on a web application). Three traceable references, indicating the project conducted, date, value and a high-level description of the scope covered, are required for verification purposes.
- Expertise statement that includes resumes (curriculum vitae) of candidates to be involved within the project.
- The bidder is also required to submit current directorship and shareholding of the company.
- Demonstrate experience of using Industry Standard Load Testing tools such as load runner, rationale etc.

Scope

The broad Scope of Work would involve the following:

1. Performing the activity of load testing of the software (including stress/break point, endurance/soak, and spike) as and when required by PPADB.
2. Deployment of the required software licenses along with suitable personnel for carrying out the activity Load Testing.
3. The work would be carried out in PPADB Premises.
4. Training of users.

After completion of work, the bidder will be expected to submit a detailed test result report along with their recommendations.

Submissions received after the closing date and time shall not be considered. Queries or clarifications relating to the issued EOI may be addressed to: O. Raesima at Telephone No. (+267) 3602008 or email: oraesima@ppadb.co.bw and should be received not later than three (3) days before the closing date of the EOI.

Facsimile and emailed EOI will not be accepted.

Notwithstanding anything in the foregoing, PPADB is not bound to accept any offer or any part of it. Any expenses incurred in the preparation of the EOI will be borne by the interested company and not by PPADB.

*Board Secretary,
Public Procurement and Asset Disposal Board
(PPADB).*

**Public Procurement and Asset Disposal Board — Tender No. PPADB 2/1/1 I
Tender Addendum No. 1**

**PROVISION OF COMPREHENSIVE INSURANCE SERVICES TO PUBLIC PROCUREMENT
AND ASSET DISPOSAL BOARD (PPADB) FOR A PERIOD OF THREE (3) YEARS**

REFERENCE is made to the above-mentioned tender which was published on 27th April, 2018, in the *Government Gazette* "Provision of Comprehensive Insurance Services to Public Procurement and Asset Disposal Board (PPADB) for a Period of Three (3) Years" Vol. LVI, No. 25 (Page 3995) and on the Daily News newspaper on 2nd May, 2018, No. 081 (Page 25).

Bidders are informed that the above-mentioned tender has been amended as follows:

1. Under Scope of Work, Services Contracts, Page 2 of 4, Item 9 (c) technical architecture, the bidder wanted to know PPADB's expectation under this item. The requirement is removed.
2. Under Scope of Work, Services Contracts, Page 2 of 4, Item 10 (a) bullet number 4 acceptance testing approach, the bidder wanted to know PPADB's expectation under this item. The requirement is removed.
3. Returnable Documents; Bidders are allowed to reproduce some of the Returnable Documents by typing into their main response due to the limited space provided.
4. Director and officer's liability page 3 of 4 of the Pricing Instructions and Data. Bidders may provide the form to be completed by the affected PPADB Officers to complete their form.
5. Staff motors. The staff motor data is available at PPADB. Bidders should request for a copy of the staff motor data from PPADB.

Additional Information – The following additional information is provided to bidders:

1. Group Life Assurance & Permanent Health Insurance
 - The current benefit level is 4 times annual salary. Bidders are allowed to quote for 4 times annual salary as well as proposing better benefits if available.
 - The staff data is available at PPADB. Bidders should request for a copy of the staff data and shall be provided to bidders.
 - In relation to the 3 (three) year claim experience showing claims versus premiums paid. The insurances paid for the past three years can be sourced from PPADB published financial statement on the PPADB website. Unfortunately we do not have records of claims made in the past three years. PPADB makes claims mostly on staff cellphones and two PPADB employees passed on within the last three years.

*Board Secretary,
Public Procurement and Asset Disposal Board.*

North-East District Council — Tender No. NEDC/EDU/02/2018

THE PUBLIC IS HEREBY notified that the above-mentioned tender has been cancelled.
Any inconvenience concerning cancellation is regretted.

T. C. MOESI,
*LAPAD Secretary,
North-East District Council.*

**North-West District Council — Tender No. NW/HQ/ADMIN/02/2018-2020
Addendum**

**PROCUREMENT SERVICES FOR THE PROVISION OF CLEANING SERVICES TO FIVE OFFICE BLOCKS
AND TOILETS FOR THE NORTH-WEST DISTRICT COUNCIL (HEADQUARTERS – RAC)**

- PROSPECTIVE BIDDERS ARE INFORMED that the above-mentioned tender which appears in the Government *Gazette* dated 27th April, 2018 and 4th May, 2018 is hereby amended.

Amendments have been made to the tender:

- The site visit was not included in our Tender Notice and it has been rescheduled as follows: 29th May, 2018. (RAC – Customer Service Centre at 0900 hours).
- Provision of toilet paper: Ten (10) bales of 1ply toilet tissue and two (2) bales of 2 ply toilet tissue on monthly basis.
- Closing date will be 1st June, 2018.
- Any other conditions of the tender in the addendum or its attachment remain the same.

DATED this 14th day of May, 2018.

MARIETTA MAGASHULA,
for Registrar, Companies and Business Names.

Merger Decision No. 13:2018
Notice in Terms of Section 60 (4) (a) (ii) of the Competition Act

**DECISION ON THE PROPOSED ACQUISITION OF 100% OF THE EQUITY AND SHAREHOLDER LOANS
OF SOFTBEV (PTY) LTD BY THE BEVERAGE COMPANY BIDCO (PTY) LTD**

PURSUANT to section 60 (4) (a) (ii) of the Competition Act (Cap. 46:09), notice is hereby given on the decision made by the Competition Authority ("the Authority") in respect of the proposed acquisition of 100% of the equity and shareholder loans of SoftBev (Pty) Ltd by The Beverage Company BidCo (Pty) Ltd.

The Authority determined through the analysis of the facts of the merger, that the proposed transaction is not likely to result in the prevention or substantial lessening of competition, or endanger the continuity of the service, in the market for the supply of carbonated soft (non-alcoholic) drinks in Botswana. Furthermore, there are no negative public interest concerns that have been identified.

Pursuant to the provisions of section 55 of the Competition Act, the Authority has approved the proposed acquisition of 100% of the equity and shareholder loans of SoftBev (Pty) Ltd by The Beverage Company BidCo (Pty) Ltd.

However, as stated under section 66 of the Act, this approval does not override or negate any other mandatory statutory approvals or processes that any of the parties to this merger must comply with under the Laws of Botswana.

DATED at Gaborone this 9th day of May, 2018.

TEBELELO PULE, *Chief Executive Officer*, COMPETITION AUTHORITY, Private Bag 00101, Gaborone, Plot No. 28, Matsitama Road, Telephone No. 3934278, Fax No. 3121013.

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in Terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT STATEMENT (EIS) FOR THE
PROPOSED SHERWOOD FILLING STATION AND FARMER'S POINT TRUCK YARD

The major findings of an Environmental Impact Assessment (EIA) Study undertaken for the Proposed Sherwood Filling Station And Farmer's Point Truck Yard are as summarised hereunder:

Nature and Magnitude of the Activity

Total Botswana (Pty) Ltd has been operating a service station at Sherwood, Martin's Drift since November 1969. The filling station and farmer's point truck yard business operates in a property allocated for the same use as it falls within the compatible proposed and current use of the land. Total intends to remove the existing underground storage tanks (USTs) at Total Sherwood Filling Station and the above ground truck tanks at the Farmer's Point Truck Yard and replace these with new UST's, with increased capacity, along with refurbishing the site. The developer proposes to add additional two 45m³ underground double walled tanks for the filling station and two 60m³ underground double walled tanks for the farmer's point truck yard, and add all other associated connections for power and pipes. These developments will happen within the same plot to become part of the existing infrastructure.

Location of the Activity

The Total Sherwood filling station and Farmer's Point Truck Yard is located along Martin's Drift (B140) Road within the Central District in Sherwood, Martin's Drift.

Anticipated Impacts and Proposed Mitigation Measures

The environmental impacts and mitigation measures identified by the EIA study are presented in detail in the Environmental Impact Statement (EIS) and summarised in the table below. A detailed Environmental Management Plan to help manage and monitor potential impacts is included in the EIS.

Environmental Impact	Project Phase	Proposed Mitigation/Enhancement Measures
Negative Impacts		
Soil and water Pollution	Construction, Operational and Decommissioning	<p>Mixing of cement should be undertaken on a temporary platform to avoid leaching of excess water into the soil.</p> <p>All repairs and servicing of machines and vehicles should be performed within a paved workshop.</p> <p>Machinery should be refuelled using drip trays so that the fuel that spills can be collected.</p> <p>Oil and other polluting materials should be stored in leak proof containers and a temporary concrete bund constructed for the storage of containers.</p> <p>The Contractor should not discharge used oil into sewers, drainage ditches, septic tanks, or streams.</p> <p>The Contractor should not dispose of used oil in landfills or mix used oil with waste that will be disposed of in landfills. Use DWMPC licensed waste collectors for used oil and hydrocarbons.</p> <p>The Contractor should train all staff members on hazard recognition, response plan implementation, safety, clean up procedures, and reporting.</p>

Air Pollution	Construction and Decommissioning	<p>Site works area should be continually dampened to suppress dust.</p> <p>Erection of road signs to limit vehicle speeds.</p> <p>The fuel channels (pipes, pumps, dispensers) should be well maintained to note any leakage.</p> <p>Only authorised operators should dispense products to customers.</p> <p>Pumps should be locked when not in use.</p>
Noise Pollution	Construction and Operational	<p>Use plant and machinery with manufacturer's silencers.</p> <p>Turning off construction machines and vehicles while not in use.</p> <p>Use BOBS approved personal protective equipment (PPE).</p> <p>Contractors to work between the hours of 8:00 am -5:00pm.</p> <p>Any work outside these times must be approved by the lead consultant and communicated to surrounding affected parties.</p>
Waste Generation	Construction, Operational and Decommissioning	<p>Installation of waste bins at all construction sites to avoid littering.</p> <p>Ensure all waste materials are disposed of at registered landfill.</p> <p>The Contractor should promote Re-using of materials, recycling and reduction of waste.</p> <p>Ensure that waste is collected twice a week so that there is no over spilling from bins.</p> <p>Fire hydrants should be inspected.</p> <p>The developer should keep dry sand buckets in place in case of outbreaks.</p>
Safety and Health	Construction and Decommissioning	<p>All workers must be provided with BOBS approved personal protective equipment (PPE).</p> <p>PPE to be worn at all times when on-site.</p> <p>Fire escape routes to be marked clearly.</p> <p>Provide first aid kits within the project site and have at least two workers trained in First Aid.</p>

Conclusions and Recommendations of the Study

It is recommended that the development be undertaken in accordance with the EIA guidelines detailed in this report. It is vital that all persons responsible as described by the EIA guidelines are informed of their responsibilities and have the relevant mitigation guidelines issued to them by the developer's environmental consultation. It can be concluded that the proposed project will result in the economic benefits for the country whilst the negative potential environmental and social impacts are manageable. Therefore, the report recommends that the project may proceed subject to the Department of Environmental Affairs approval of this report.

Environmental Impact Statement Placement

Copies of the EIS can be reviewed at the following locations:
 Department of Environmental Affairs (Serowe)
 Sherwood Filling Station and Farmer's Point Truck Yard
 Lerata Kgotsa

Written comments or objections from those likely to be affected by the project and other interested persons should be submitted to the Department of Environmental Affairs by the 1st June, 2018.

Correspondences

All correspondences should be addressed to: The District Coordinator, Department of Environmental Affairs, Private Bag 0028, Serowe, and Telephone No. 4630174 Fax No. 4631307.

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in Terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

**NOTIFICATION FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT ASSESSMENT(EIA) REPORT
FOR MINING OF PIT SAND AT A PLOT 2KM WEST OF NXAMASERI VILLAGE: OKAVANGO SUB-
DISTRICT BY TIRONTE BUILDING, MOULDING AND MAINTENANCE (PTY) LTD**

The major findings of an Environmental Impact Assessment Study (EIA) undertaken for the proposed sand burrow pit are as summarised hereunder. The EIA study was undertaken by Longlit Environmental Assessment Consulting Pty Ltd led by Ndobano Lokae of BEAPA No. 20130063 on behalf of Tironte Building, Moulding and Maintenance (Pty) Ltd.

Nature and Magnitude of the Activity

In respect of this sand burrow pit project; the mining company Tironte Building, Moulding and Maintenance (Pty) Ltd is set to extract sand in a 100m x 100m. Equipment and personnel resources for the production process include the following:

- 2 x (5 cubic meters) tipper truck
- 1 x (10 cubic meters) tipper truck
- Fencing material for the burrow pit
- A hired mobile toilet
- A plastic bag at the burrow pit for waste collection
- 1 x record keeping man based at the burrow pit
- 4 x drivers for the tipper trucks
- 1 x managing directors: Mr Peter Maipheto
- 2 x office/procurement people based in Shakawe

Rationale for the Project

Tironte Building, Moulding and Maintenance (Pty) Ltd is a private company registered to carry out business in Botswana and the director for this company is Mr Peter Maipheto. Mr Maipheto through the above business company has been conducting business in industrial minerals including river sand, gravel, bricks and construction business for the past 20 years. The focus of the business is local communities who are supplied with complete bricks of various sizes, lintels, ream beams, raw gravel and sand and concrete/quarry stones. The project can benefit the construction of Shakawe Primary Hospital that is being built at the moment, the Mohembo Bridge, the new mall in Shakawe that is being built and ESP projects in the district.

Location of the Activity

The gravel burrow pit allocated for Tironte Building, Moulding and Maintenance (Pty) Ltd near Nxamaseri is accessible at the following coordinates: 18 34 25.85 S and 021 58 52.30 E. The total area for the burrow pit 100m² and all the rights are given to Tironte Building, Moulding and Maintenance (Pty) Ltd.

Anticipated Impacts and Proposed Mitigation Measures

The environmental impacts and mitigation measures identified by the EIA study are presented in detail in the Environmental Impact Assessment (EIA) Report and summarised in the table below. A detailed Environmental Management Plan to help manage and monitor potential impacts is included in the EIA.

Environmental Impact

Loss of vegetation

Project Phase

Construction

Proposed Mitigation/Enhancement Measures

Site clearing activities should be limited to the project site. Since the clearing of vegetation is inevitable, this should be done in a manner that minimizes impacts on the surroundings vegetation. Therefore the activities of construction vehicles must as far as possible be confined to the areas that are completely cleared.

Selective cutting of tree species is recommended

All vegetative debris from clearing activities should be temporarily stored at the location that will not interfere with construction. Vegetation will be availed for woods needs to local people around the Nxamaseri area.

Air pollution	Construction Operation and Decommissioning	<p>Adequate dust suppressant measures including regular sprinkling of water especially on loose dirt, un- vegetated areas and stripped road surfaces should be undertaken regularly to control fugitive dust generated during site preparation and construction activities.</p> <p>Stringent material handling/overhauling procedures should be put in place and enforced.</p> <p>Stock piling of earth materials for construction should be carried out within temporarily constructed enclosures to limit fugitive dust.</p> <p>All construction equipment should be maintained accordingly to ensure that exhaust emissions are minimized. They should comply with BOBS Vehicle Emission Standards.</p> <p>All construction vehicles should be tuned and maintained regularly to ensure that emission levels are kept within permissible limits.</p> <p>All construction machinery should be in a good working condition and engines switched off when not in use.</p> <p>Workers should be provided with adequate protective clothing during construction activities to prevent them from contracting respiratory diseases.</p> <p>Ensure that the site and all stockpiled reserves at the site including soil resources to be retained for rehabilitation in addition to top soil are properly enclosed.</p> <p>All stockpiled sand or spoils should not be kept for long periods otherwise they should be covered with tarpaulin to prevent it from being blown away by winds.</p>
Noise Pollution Issues	Construction, Operation and Decommissioning	<p>The project management must ensure that the machinery including all equipment used for the project internally and externally as long as it directly has to do with the sand mining is fitted with acoustic covers to avoid unnecessary noise.</p> <p>Construction activities should be planned to avoid prolonged noise generation activities.</p> <p>Machinery should always be switched off when not in use, rather than being left to cause unnecessary noise and in some instance environmental pollution.</p> <p>Noisy equipment should be sited whenever possible away from residential properties and noise-disruption should be minimized.</p> <p>Workers should be provided with mufflers to minimize the noise impact from operation of machinery/trucks.</p> <p>Workers should be provided with earplugs and be engaged in diversified activities to prevent prolonged exposure to noise levels of more than 85dB per 8 hour shift.</p> <p>Speed limits of 40km/h along the project routes should be enforced to attenuate noise from construction vehicles that would be plying the roads.</p>
Oil from Vehicles and equipment usage	Construction, Operation and Decommissioning	<p>Construction vehicles and heavy plant standing for extended periods of time (e.g. weekends and holidays) shall have drip trays placed beneath them.</p> <p>Topsoil and vegetation to be removed in areas designated for storage, and stockpiled appropriately.</p> <p>Disposal of contents of drip trays to be in accordance with relevant hazardous materials disposal requirements. There are used oil collectors in Maun who are ready to collect this oil at no cost.</p> <p>Minor repair or servicing of machinery and vehicles are to be undertaken at appropriate workshop areas in Shakawe.</p> <p>Equipped with drip trays and a basic spill cleanup kit.</p>

Establishment of the burrow pit project; reaping off the overburden layer and excavations of the sand reserves

Construction,
Operation and possible
Decommissioning
phase

Workers should be provided with appropriate Personal Protective Equipment (PPE) to avoid unnecessary accidents. Dust masks, ear muffs, eye protection and safety shoes are some of the important PPEs for this project.

Provision of safe equipment and vehicles for use by workers. Disease vector control for such diseases as malaria.

Provision of emergency health response systems and first aid.

Provision of potable water and sanitary facilities for workers.

Provision of adequate ablution facilities, mobile toilet facilities to be used.

Workers should be inducted on proper use of machinery and equipment.

Health and safety education and awareness should be provided to workers on the project.

A First Aid Box stocked to the specifications as prescribed in the (Factories Regulations) should be readily available on site daily.

Implement good housekeeping practices, such as the sorting and placing loose construction materials or demolition debris in established areas away from foot paths.

The project promoter must implement appropriate mitigation measures, which must include the following.

"Stop-go" controls at burrow pit site road access points

Warning signs

Safety barriers

Noise and Dust Control

Developer to provide method statement of site specific dust control measures.

Dust suppression can be undertaken by, but not limited to, watering relevant areas. Watering of erosion prone areas must be conducted in moderation and with an erosion monitoring system in place.

Hazardous Materials

Information on all hazardous materials (Material Safety Data Sheets, MSDS) must be kept on site and available to all. This must include safety information such as how to handle these materials or treat injuries as a result of these materials

Hazardous materials shall be stored in a contained, stable and safe environment with relevant labels placed on storage containers and lids firmly applied to prevent spillage.

Storage facility is to comply with relevant safety and hazardous material regulations.

Staff training is to be provided for all those handling and working with hazardous materials.

Fire Prevention

Fire prevention measures shall be taken in the vicinity of vehicles and in areas where fuel is present e.g. near the tipper trucks.

"No-smoking" signs to be placed in areas used for storage of oil and fuel.

Basic firefighting equipment shall be readily available on site
Construction workers shall be made aware of the procedures in the event of a fire.

Conclusions and Recommendations of the Study

The EIA report prepared for Tironte Building, Moulding and Maintenance (Pty) Ltd represented the final Environmental Impact Assessment Study for the sand burrow pit 2km west of Nxamaseri village in Okavango Sub-District belonging to Mr Peter Maipheto.

The recommendations made by the consultant are as follows; Consideration must be given to extension of the surface rights period for the sand burrow pit within which the project promoter had to obtain acquisition of clearances and permits for extension of the time period if need arise.

DEA should approve this project to be implemented to help address sand material shortages in Shakawe and the surrounding areas.

An Environmental Practitioner should be engaged to monitor the implementation of the operations and clearing stages.

During construction all works for the proposed sand operation and related activities must be conducted in an environmentally friendly manner in order to promote sustainable development as well as conserve the environment; All the legislations, policies, regulations and plans in this report should be adhered to at all times by the project promoter.

All mitigation measures and recommendations in the EIA report must be implemented in totality.

Any sensitive issue which in any way may harm the environment but not captured in this report must be reported to management and project coordinator or EAP and have it attended to well in time and also engage the EAP for assessment.

There will also be need for DEA to audit the project to ensure compliance with the EIA and national laws.

All the legislations, policies, regulations and plans in this report is adhered to at all times by directors of Tironte Building, Moulding and Maintenance (Pty) Ltd.

The consultant therefore concludes that based on the findings especially the existing legal requirements (licenses and certificates) as well as the project proponent having knowledge in the industry for over 20 years up to date, the EIA study conducted is adequate and up to standard to guide construction activities and the project can therefore be given a go ahead to resume operations once all permits and licenses are issued.

Environmental Impact Statement Placement

Copies of the EIS can be reviewed at the following locations:

Department of Environmental Affairs offices in Maun near Motovac, Light Industrial site Nxamaseri main *Kgotla*

Written comments or objections from those likely to be affected by the project and other interested persons should be submitted to the District Environment Coordinator, Department of Environmental Affairs starting from the 20th of April, 2018 to 11th of May, 2018.

Correspondences

All correspondences should be addressed to: The District Coordinator, Department of Environmental Affairs, P.O. Box 35, Maun, Botswana, and Telephone No. 6801237, Fax No. 6862503 or Maun Office Department of Environmental Affairs, light Industrial Site Opposite Motovac.

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in Terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT ASSESSMENT STUDIES FOR
THE PROPOSED TAU, NARI AND ELEPHANT CAMPS IN NG 18

Nature and Magnitude of the Activity

The proposed projects consist of two 2-star camps in the Northern Zone (Nari and Elephant), while Tau which will be a 4-star camp is located in the Southern zone of NG 18. The proposed Nari and Elephant camps are to be located next to seasonal water pools where boreholes have been dug to provide wild animals with water supply during dry periods. Tau Camp is to be located on an island on the flood plains of the Southernmost part of NG 18. A borehole will be dug for water supply at the proposed Tau Camp. The Camps will comprise of infrastructural developments and activities which are consolidated under the following main components.

Each camp has 16 commercial bedded tents – these are the eight decked tents which are fully en-suited in which clients will be lodged.

Staff village – this includes 2 management tents, 4 guides tents at the Nari and Elephant camps while the Tau camp will have 5 management tents and 5 guides tents. In addition, the staff village will have a kitchen, ablution facility and an entertainment area

Power for each camp will be provided from Solar Farm units (one for camp and one for staff village), with back – up generators.

For Nari and Elephant Camps, water will be supplied from existing boreholes while Tau camp will be supplied from the borehole to be dug.

Domestic reverse osmosis systems will be installed onsite for each camp to process and clean water to supply portable water.

Activated sludge and wastewater treatments system will be installed on each site for water treatment. This system has been found to be able to treat waste water to acceptable standards before discharge into the environment. The waste water should meet the BOBS 93:2012 standards prior to disposal.

There will be a waste shelter for holding solid waste temporarily on site before disposal at the Maun Landfill. The camps will be accessed via existing earth tracks (). These tracks were created during the time when the concession was used for hunting. The Tau camp on the other hand will be accessed using boats during rainy season as it is located on an island on the flood plains

There will be provision of a garage for safari vehicles and carports for all the three camps
Envisaged activities for all the camps include boat cruises and game viewing

Rationale for the Project

Considering that there is only one 16 bedded camp in the northern zone of NG 18, which occupies 90% of the concession area landscape, and that the only camp has been directly operated by the proponent, the proponent has built a clientele that would like to explore the interlinkage of water pools and lagoons of the northern NG18. Most of the clients are the former hunters in the same concession area, who would like to spend continuous nights under the stars, in camps located at the same water pools where they used to hunt. The proposed camps therefore become responsive to the clientele, bringing nostalgic memories. As it is currently, when these clients come they only stay at the existing Hyena Pan Camp, but they would like to go out to explore the vastness of the dry northern zone of NG18, as well as upmarket southern zone which is rich with flora and fauna. In addition, the developer intends to provide employment opportunities and to boost the revenue performance for the beneficiary of the local community.

Location of the Activity

The 3 camps are located in the concession area NG 18. Nari and Elephant Camps are proposed to be located in the Northern Zone while Tau Camp is located in the Southern Zone.
Anticipated Impacts and Proposed Mitigation Measures.

Environmental Component/ Impact	Project Phase	Proposed Mitigation/Enhancement Measures
Biophysical Aspects		
Soil Contamination	Construction/Operational	<p>Avail spill kits to clean up accidental spillages and use at all times.</p> <p>All soils contaminated with hydro carbons should be immediately scooped and stored on areas covered with an impermeable cover sheet.</p> <p>Workers must undergo induction to ensure that they are prepared for rapid clean-up and decontamination procedures.</p>
Pollution of Water Resources	Construction/Operational	<p>All waste materials and waste containers should be removed from site.</p> <p>Construction crew should use mobile waterborne toilets only which should be properly managed and disposed.</p> <p>No pit latrine should be set up on site.</p> <p>Contaminated soils should be excavated, rehabilitated and replaced.</p>
Socio-Economic Aspects		
Direct Employment of Locals	Construction/Operational	<p>Publicise job opportunities locally through the Khwai Development Trust.</p> <p>Develop and implement a recruitment procedure that abides by the provisions of the Employment Act.</p> <p>Develop a recruitment strategy that takes into consideration locally available skills.</p> <p>Employ women to facilitate gender balance in the work force.</p> <p>All employees should be adequately paid in line with their skills and qualifications.</p>
Boost of the Local Economy	Construction/Operational	<p>The contractor should source goods locally where possible.</p> <p>Citizen owned SMMEs should be engaged where possible as sub contractors to facilitate the Citizen Economic Empowerment Drive.</p>
Increased Social Ills	Construction	<p>Raise awareness amongst the local communities on social ills that may result due to the presence of migrant workers.</p> <p>Sensitise the construction workers who are foreign to the local communities to respect the preservation of family values and norms.</p> <p>Raise awareness amongst employees on professional conduct.</p>
Health & Safety Aspects		
Increased Prevalence of HIV/ AIDS and Other Communicable Diseases	Construction/Operational	<p>The proponent should liaise with local health facilities for provision of holistic health care for HIV/AIDS and other communicable diseases.</p> <p>Conduct continuous employee awareness about safe sex practises and facilitate provision of free condoms at the staff residence at the proposed camp</p> <p>Encourage condoms usage at all times.</p> <p>Provision of care and support for those living with HIV/AIDS and other communicable diseases.</p>

Environmental Component/ Impact	Project Phase	Proposed Mitigation/Enhancement Measures
Noise Nuisance	Construction	Construction vehicles and machinery to be operated within normal working hours i.e. 6am to 6pm to minimise noise. Equip machinery and vehicles with silencers where necessary to reduce noise levels.
Dust Nuisance	Construction	Provide dust masks for construction crews and ensure appropriate use. Should dust levels be elevated, apply dust suppression measures such as water spraying.
Possible Risks & Injuries to Workers	Construction/ Operational	Provision of appropriate PPE for all workers. Provision of Occupational Health and Safety Induction before initial construction activities. Regular Safety and Health briefings.
Waste Management Aspects		
Pollution	Construction	Provide litter collecting receptacles for different forms of waste at strategic locations at the camp. Provide disposal bags on vehicles used for tour guides. All solid waste to be properly loaded on vehicles and disposed at Maun landfill.

Conclusions and Recommendations of the Study

The studies have assessed the potential impacts of the proposed camps and have concluded that with the suggested mitigations, impacts will be managed and the receiving environment will not be compromised. The studies recommend project implementation with commitment by the proponent to uphold the provisions of the EMP and above all effect public disclosure meetings to keep stakeholders abreast of development while getting feedback from them as well.

Environmental Impact Assessment Report Placement

Copies of the EIS reports are placed at the following areas for public review:
Department of Environmental Affairs – Maun Office
Khwai Tribal Office
Khwai Development Trust Office

Correspondences

All correspondences and enquiries regarding the public review of the findings of the EIA studies should be addressed to The District Environment Coordinator, Department of Environmental Affairs, P.O. Box 35, Maun, and Telephone No. 680 1237, Fax No. 680 1246 between 3rd of May and 29th May, 2018.

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in Terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF THE ENVIRONMENTAL MANAGEMENT PLAN (EMP) FOR
THE PROPOSED LEADWOOD CAMP IN KHWAI

Nature and Magnitude of the Activity

Ntsogotho Holdings (Pty) Ltd proposes to develop an 18 bed photographic tented camp on the fringes of the Khwai River bordering NG 19 and Moremi Game Reserve. The proposed camp will be marketed to both national and international clients with guests arriving by air or road transfer. Guests will be offered game drives, boating and mokoro activities. In addition to the aforementioned activities, the guests may be taken to Khwai village to take part in cultural activities. The proposed camp will be developed from non-permanent materials, primary canvas structures built on raised wooden decks. Major developments are outlined hereunder:

- Five (5) twin/ double guest units (10 beds)
- Two (2) family units (8 beds)
- Main area and viewing deck
- 4 x management staff units
- 3 x Guides units
- Kitchen, office and storerooms
- Solar farm
- Workshop
- Laundry
- 2 x 5000 litre diesel storage tanks
- Bio Rock Sewerage Treatment Plant and its associated infrastructure
- Staff quarters and ablution facility

It is noteworthy that all of the accommodation units detailed above are to be interconnected with raised walkways to allow for ease access by the hippopotamus amphibious and to further enhance the safety of guests and employees at the proposed camp.

Rationale for the Project

Promoters of Ntsogotho Holdings (Pty) Ltd have been allocated surface over land in NG 19 to develop a tourist camp. The proposed project is necessary as it will advance the tourism sector at a national level and provide employment opportunities for the Khwai residents during construction and operation of the proposed camp. In addition, this EMP is crucial as it is aligned to the EA Act of 2011 and its ensuing EA Regulations of 2012 more so that the previous EIA was done as per the requirements of the EIA Act No.6 of 2005.

Location of the Activity

The proposed camp site is located on the fringes of the Khwai River bordering NG 19 and Moremi Game.

Anticipated Impacts and Proposed Mitigation Measures

Environmental Component/ Project Phase

Impact

Biophysical Aspects

Soil Contamination

**Construction/
Operational/
Decommissioning**

Proposed Mitigation /Enhancement Measures

Avail spill kits to clean up accidental spillages and use at all times.

All soils contaminated with hydro carbons should be immediately scooped and stored on areas covered with an impermeable cover sheet.

Workers must undergo induction to ensure that they are prepared for rapid clean-up and decontamination procedures.

Environmental Component/ Project Phase Impact		Proposed Mitigation /Enhancement Measures
Pollution of Water Resources Construction/ Operational/ Decommissioning		All waste materials and waste containers should be removed from site. Construction crew should use mobile waterborne toilets, only which should be properly managed and disposed No pit latrine should be set up on site. Contaminated soils should be excavated, rehabilitated and replaced.
Socio-Economic Aspects Direct Employment of Locals Construction/ Operational		Publicise job opportunities locally through the Khwai Development Trust. Develop and implement a recruitment procedure that abides by the provisions of the Employment Act. Develop a recruitment strategy that takes into consideration locally available skills. Employ women to facilitate gender balance in the work force. All employees should be adequately paid in line with their skills and qualifications.
Boost of the Local Economy Construction/ Operational		The contractor should source goods locally where possible. Citizen owned SMMEs should be engaged where possible as sub contractors to facilitate the Citizen Economic Empowerment Drive.
Increased Social Ills Construction		Raise awareness amongst the local communities on social ills that may result due to the presence of migrant workers. Sensitise the construction workers who are foreign to the local communities to respect the preservation of family values and norms. Raise awareness amongst employees on professional conduct.
Risk of Congestion Operation		Guided tours should be carried out strategically such that animal viewing is done once other guides have vacated the spot. Once the NG 19 management plan has been developed, it must be adhered to.
Cultural Rights Vs Camp Activities Operation		There should be constant communication between the operator and the community to allow for both parties to be on the same page in terms of utilization of the resource in the project area. Employment of Khwai community members where possible to compensate for having limited access to natural resources the project area.
Health & Safety Aspects Increased Prevalence of HIV/AIDS and Other Communicable Diseases Construction/ Operational/ Decommissioning		The proponent should liaise with local health facilities for provision of holistic health care for HIV/AIDS and other communicable diseases. Conduct continuous employee awareness about safe sex practises and facilitate provision of free condoms at the staff residence at the proposed camp.
Noise Nuisance Construction/ Decommissioning		Encourage condoms usage at all times. Provision of care and support for those living with HIV/ AIDS and other communicable diseases. Construction vehicles and machinery to be operated within normal working hours i.e. 6am to 6pm to minimise noise. Equip machinery and vehicles with silencers where necessary to reduce noise levels.

Environmental Component/ Project Phase Impact**Dust Nuisance**Construction/
Decommissioning**Proposed Mitigation /Enhancement Measures**

Provide dust masks for construction crews and ensure appropriate use.

Should dust levels be elevated, apply dust suppression measures such as water spraying.

Provision of appropriate PPE for all workers.

Provision of Occupational Health and Safety Induction before initial construction activities.

Regular Safety and Health briefings.

Possible Risks & Injuries to WorkersConstruction/
Operational/
Decommissioning**Archaeology**Disturbance of Archaeological
ResourcesConstruction,
Operation/
Decommissioning

Recommendations of the Archaeological Impact Assessment should be adhered to in the event of archaeological chance finds.

All archaeological chance finds should be reported to the Department of National Museum & Monuments.

Waste Management Aspects**Pollution**Construction/
Operation/
Decommissioning

Provide litter collecting receptacles for different forms of waste at strategic locations at the camp.

Provide disposal bags on vehicles used for tour guides.

All solid waste to be properly loaded on vehicles and disposed at Maun landfill.

Conclusions and Recommendations of the Study

The study has assessed potential impacts of the proposed camp and has concluded that with the suggested mitigations, impacts will be managed and the receiving environment will not be compromised. The study recommends project implementation with commitment by the proponent to uphold the provisions of the EMP and above all effect public disclosure meetings to keep stakeholders abreast of development while getting feedback from them as well.

Copies of the EMP reports are placed at the following areas for public review:

Department of Environmental Affairs -Maun Office

Khwai Tribal Office

Correspondences

All correspondences and enquiries regarding the public review of the findings of the EIA studies should be addressed to The District Environment Coordinator, Department of Environmental Affairs, P.O Box 35 Maun, and Tel: 680 1237, Fax 680 1246 between the 23rd of April and 28th May, 2018.

Public Notice

REPUBLIC OF BOTSWANA

NOTIFICATION FOR PUBLIC REVIEW OF THE ENVIRONMENTAL IMPACT STATEMENT FOR THE CONSTRUCTION AND OPERATION OF A LODGE IN MATEBELENG

In compliance with section 10 of the Environmental Assessment (EA) Act No. 10 of 2011, this public notice presents the major findings of the Environmental Impact Assessment Study for the above mentioned project.

Nature and Magnitude of the Study

The proponent, Mr Esfandiar Ghodrati intends to construct and operate a lodge at Matebeleng. The components of the lodge will include the following:

- 224 rooms double bed, and 56 rooms single bed
- 2 conference facilities
- Bar
- Restaurant
- Dining area
- Gym
- Hair saloon
- Administration block
- Parking area

Location of Project Activity

The proposed site is located on the outskirts of Matebeleng village; the site is approximately 2.5km from Oodi junction, and about 1km from Matebeleng Kgofla. The site is accessed through the paved road that passes through the village and the gravel road that passes by Matebeleng Primary School.

Anticipated Environmental Impacts and Proposed Mitigation Measures

A summary of the major findings of the study associated with the implementation of the proposed project together with the mitigation measures proposed to respond to the anticipated environmental impacts are presented in the following table.

Environmental Impact	Project Phase	Proposed Mitigation/Enhancement
Air pollution	Decommissioning	Construction workers should be provided with adequate protective clothing Use serviced machinery to avoid emissions of fumes. Dampen the work area with water to suppress dust and cover all air movable materials during haulage.
Soil contamination	Decommissioning	Empty the tanks before the removal to avoid spillages. All residual liquid and sludge should be removed and disposed of properly. In the event of a spill, the oil/diesel/petrol contaminated soil should be scooped into drums and the rubble/concrete should be collected into a skip for treatment and disposal by a licensed and registered waste management company.
Land pollution	Decommissioning	All metal equipment that is not going to be re-used should be salvaged for scrap value. No waste in any form should be allowed to remain on site. The rubble waste must be disposed of with permission from the Council.
Employment opportunities	Construction	Proponent should have a recruitment plan that should be circulated to the information disseminating authorities like advertising at the District Council. There should be a fair recruitment and fair wages as per Labour regulations.

Air pollution	Construction	Hauling trucks should be covered to prevent dust generation along the roads during transportation. Workers should be provided with adequate protective clothing to prevent respiratory diseases.
Noise pollution	Construction	There should be proper scheduling of activities during the construction and residents in close proximity informed in advance of the impending construction activities. The contractor should ensure that all equipment used on site is fitted with efficient silencers and mufflers to reduce noise.
Soil contamination	Construction	Waste oil containers and other spill response equipment should be provided on site. Machine and equipment operators should be trained about proper handling of used oil on site.
HIV/AIDS infections	Construction	Condoms should be provided to construction workers or strategically placed in temporary toilet facilities. The health facility should be accessible to construction workers so that they can have a constant supply of condoms, ARVs, counselling and testing if needed.
Employment opportunities	Operation	Contractor should have a recruitment plan that should be circulated to the information disseminating authorities like advertising at the city council notice boards. There should be a fair recruitment and fair wages as per Labour regulations.
Water contamination	Operation	Servicing points should be paved to prevent contamination. Waste oil containers and other spill response equipment should be provided on site. Leak detectors should be installed around the tanks to send signals in cases of any leaks. Appropriate absorbent material should be stored on site to deal with spillages. Training of personnel to effectively handle and operate the dispensing facilities.
Risk of fire	Operation	There should be provision of fire extinguishers, fire hydrant, and first aid boxes. Proper signage prohibiting smoking and use of cellular phones should be visible on site.
Land pollution	Decommissioning	All hazardous material should be transported to a registered hazardous waste site for disposal by a licensed contractor. Solid waste must be properly managed and disposed of in a licensed waste disposal facility.
Occupational hazards	Decommissioning	All contractors, consultants and laborers must ensure that the necessary personal protective equipment (PPE) is worn on site. Appropriate health and safety signage must be displayed on site.
Noise pollution	Decommissioning	Install silencers on machinery and Adhere to working hours and permissible noise levels.

Conclusion and Recommendations of the study

The conclusions from the findings of the EIS are that all the negative impacts identified can be mitigated and their severity minimized through the implementation of the mitigation measures and recommendations made in the Environmental Management Plan. It is therefore recommended that the project be allowed to proceed.

Third Publication

Public Notice

REPUBLIC OF BOTSWANA

Notice issued in terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

**NOTIFICATION FOR PUBLIC REVIEW OF AN ENVIRONMENTAL MANAGEMENT PLAN STUDY FOR
THE PROPOSED CONSTRUCTION OF 324 HOUSING UNITS & ASSOCIATED INFRASTRUCTURE AT
LOT 59029, BLOCK 7, GABORONE**

Pursuant to section 10 of the Environmental Assessment (EA) Act No. 10 of 2011, the public notice hereby presents major findings of the Environmental Management Plan study for the proposed construction of 324 BHC housing units.

The rationale behind undertaking this project is to give youth opportunity to rent or buy these flats through Instalment Purchase Scheme (IPS).

Nature and Magnitude of the Activity

The proposed project will be done on a plot that was allocated for residential purposes. BHC has been allocated 3.8 hectares (Ha) of land in Gaborone West at Block 7 to develop three hundred and twenty-four (324) high density dwelling units for youth and Instalment Purchase Scheme (IPS).

Location of the Activity

The study area is located in the Block 7 neighbourhood in Gaborone, on the north side of the project site there are already existing BHC Flats and on the eastern part of the plot there is a church called Glory Time Church. The site can be accessed through western bypass highway (approximately 1.5km west), which is one of the main routes linking the entire city centre and the suburbs of Gaborone and other secondary roads from Block 8 and Block 6.

Anticipated Environmental impacts of the Activity and proposed mitigation measures to respond to the negative environmental impact

The environmental impacts and mitigation measures identified by the Environmental Management Plan (EMP) study are presented in detail in the EMP study and summarised in the table below. A detailed EMP to help manage and monitor potential impacts is included in the study.

Project Phase	Environmental Impact Mitigation measure/Enhancement
Pre-Construction	<p>Loss of Vegetation</p> <p>The mature trees outside the plot should not be disturbed. Remove only vegetation affected by the works. Plant indigenous vegetation to replace removed plants. Due care will be exercised to ensure that bush clearing is limited to the proposed area and building footprints.</p>
	<p>Soil contamination</p> <p>Specific sites should be gazetted for onsite maintenance of machinery. Spillages should be cleaned immediately with the appropriate absorbents or chemicals. Machine and equipment operators/mechanics should be trained on proper handling of used oil on site.</p>
	<p>Noise Pollution</p> <p>All the drained oils must be properly stored in leakage free containers and transported to oil depots. Contractor should be careful when selecting the working equipment, in order of avoiding use of old equipment or even damaged equipment, with high level of noise emissions that would definitely have a negative impact in the environment. There should be proper scheduling of activities during the construction phase in order to minimize the noise nuisance. The contractor should ensure that all equipment used on site is fitted with efficient silencers or mufflers, which should be routinely maintained to minimize noise.</p>
	<p>Air Pollution</p> <p>The construction site should be barricaded to reduce noise levels. Adequate dust suppressing measures should be employed including sprinkling grey water on the access road to reduce dust. All construction vehicles should be maintained (servicing) regularly to minimize exhaust emissions. Stock piling of earth materials for construction should be carried out within temporarily constructed enclosures to limit fugitive dust. All soil stockpiles should be sprayed with water at least twice daily to reduce air pollution especially if construction is to take place during the dry winter months.</p>

Project Phase	Environmental Impact Mitigation measure/Enhancement
Construction phase	<p data-bbox="230 197 1041 401"> Employment creation The local community should be given priority during recruitment for the construction of the BHC flats. Recruitment process should be transparent and fair as far as possible, that is, to be carried at <i>Kgotla</i> areas. Consideration should be given to gender balance during the recruitment exercise. Construction activities should be labour intensive so as to absorb unskilled local job seekers. </p> <p data-bbox="230 413 1041 562"> Land Pollution Provide litter collecting receptacles for different forms of waste at strategic locations. Dispose waste at designated waste sites. Waste separation at source will allow for possible reuse. Label the different receptacles for proper waste separation. </p> <p data-bbox="230 575 1041 749"> Soil contamination Re-fuelling must take place in nearby filling stations. Spill kits to clean up accidental spills from earthmoving machinery must be always available on site. Workers must undergo induction to ensure that they are prepared for rapid cleanup procedures. No fuel should be stored on site. </p> <p data-bbox="230 761 1041 1017"> Pollution of Water Resources Storm water should be captured using storm water trenches to prevent spread of contaminants through run off. Portable toilets should be provided on site to prevent disposal of sewage indiscriminately. Hydrocarbons like fuel, oil, grease and other hazardous materials should be stored within bunded facilities during construction phase. Hazardous waste should be transported off site immediately to avoid spillages and indiscriminate disposal. </p> <p data-bbox="230 1030 1041 1186"> Air Pollution The work surfaces should be wetted to suppress the amount of dust to be generated. Excavations should be confined to the project site only. Protective clothing (masks) should be worn, if the need arise. Cover stockpiled material, which could be blown by wind. </p> <p data-bbox="230 1198 1041 1471"> Elevated Noise Levels Light trucks should be used as much as possible to bring building material to the site. Any other machinery that is noisy should be fitted with silencers during construction phase. Construction works should be done on weekdays only and should be restricted from 07.30am to 5.00pm on weekdays. Proper servicing of contractor's machinery and vehicles will reduce the impact of noise and vibration of the equipment at the works site. </p> <p data-bbox="230 1483 1041 1657"> Work Related Accidents The construction workers should be properly trained on safety measures on site. First aid equipment should as much as possible be made available on site. The site should be barricaded. The construction workers should be provided with protective clothing. </p>

Project Phase	Environmental Impact	Mitigation measure/Enhancement
	Potential spread of HIV and AIDS and STIs	Provide condoms (both male and female) at both the project site to prevent the spread of STIs, including HIV. Conduct continuous public awareness.
	Disruption to Traffic Movement	The contractor to liaise with local health facilities in providing health care for the workers.
		Construction works should be scheduled to minimise traffic disruption by using non-peak traffic times for movement of material and heavy equipment.
		Public notices by the print and electronic media should be posted in order to make the general public aware of the construction schedule and to provide construction updates.
Operation Phase	Risks of fire	Properly trained flag men should be placed at strategic locations along the access road.
		Appropriate and adequate road side signs should be placed along the road in order to alleviate discomfort to commuters.
	Increase in criminal activities	The flats should be equipped with smoke detectors, fire extinguishers and fire hydrants.
		There should be a fire drill indicating the exact location in case of fire. Electrical appliances should be fitted with the proper and functional adaptors to avoid faults. Open flames should be handled with care to avoid accidents and should not be left unattended. Good lighting system should help deter some of the crime incidents. All crime incidents to be reported to the police. BHC should engage services of security officers to safe guard the premises and occupants.
Decommissioning Phase	Elevated noise levels	Light trucks should be used as much as possible to haul debris out of site.
		Any other machinery that is noisy should be fitted with silencers during construction phase. Construction works should be done on week days only and should be restricted from 07.30am to 5.00pm on weekdays. Proper servicing of contractor's machinery and vehicles will reduce the impact of noise and vibration of the equipment at the works site.
	Air Pollution	Where necessary, dust should be suppressed by wetting the site surface at least twice a day for the duration of demolition works. Workers should be provided with adequate protective clothing including nose masks and it should be ensured that they use them to prevent any health problems. Machinery and equipment should be well serviced.
		Movement of demolition machinery and equipment should be controlled to minimise dust generation.
	Land Pollution	BHC management should hire the service of a licensed waste management and disposal specialist to undertake clean-up of the site and the equipment to be reused and recycled.
Prior to decommissioning, BHC personnel should identify all equipment which will be reused and recycled. These should be clearly marked for easy identification. All waste materials should be sorted out first such as contaminated soil and rubble, metal, wood and other waste materials so that they are disposed off appropriately. Foundation should be removed and manholes backfilled with clean topsoil.		

Environmental Management Plan Placement

Copies of the EMP can be reviewed at the following locations:

Department of Environmental Affairs (Gaborone)

National library

Block 8 Kgofla

Written comments or objections from those likely to be affected by the project and other interested persons should be submitted to the Department of Environmental Affairs, Gaborone office by 10th June, 2018.

Correspondences

All correspondences should be addressed to: The Director, Department of Environmental Affairs, Private Bag 0068 Gaborone and Telephone No. 3902050, Fax No. 3902051 or hand-delivered to Travaglini House, Plot No. 1271, Second Floor, Old Lobatse road.

Further enquiries regarding public review of this document may be lodged to; The Director, Department of Environmental Affairs, email add: envirobotswana@gov.bw

Kitsiso Mo Setshabeng

Kitsiso e ntshiwa mabapi le Karolo ya Lesome (Section 10) ya molao wa Tshekatsheko Seemo sa Tikologo wa Ngwaga wa 2011

TALETSO YA KANOKO KE SETSHABA MABAPI LE TSHEKATSHEKO TIKOLOGO MABAPI LE KAGO YA MATLO A BOROKO LE DITLAMELO KO SETSHENG SA NOMORE YA 59029, BLOCK 7 MO GABORONE

Go diragatsa tsetla ya bolesome ya molao wa Tshekatsheko Tikologo (EA Act No. 10) wa 2011, sechaba se itsisiwe ka tshoboko ya maduo a dipatlisiso tse di bonweng fa go dirwa tshekatsheko ya tikologo mabapi le go aga Matlo a boroko ko Block 7 mo Gaborone. Maikaelelo magolo a tlhabololo e ke go fokotsa tlhalelo ya boroko mo bananeng le banni ba Gaborone ka kakaretso ke ba komponi ya Botswana Housing Corporation (BHC).

Public Notice

REPUBLIC OF BOTSWANA

Notice issued in terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT STATEMENT (EIS) FOR:
THE REFURBISHMENT OF KWARA CAMP IN NG/20

The major findings of an Environmental Impact Study (EIS) undertaken for the proposed Refurbishment of Kwara camp in NG/20 are as summarised hereunder.

Nature and Magnitude of the Activity

Kwara and Little Kwara camps operate on adjacent sites within a continuous band of riparian vegetation in the southern region of NG/20 near to the boundary with the Moremi Game Reserve. Kwando Safaris propose to rationalise the site of the current Kwara and Little Kwara camps to allow for a single upgraded camp to operate on the site. The refurbished Kwara camp will provide accommodation for up to 18 guests in a unique and well designed camp which provides increased guest luxury and privacy. The proposed project will involve the refurbishment of front of house facilities including guest rooms, central guest lounge and dining area as well as the back of house facilities and staff village. The refurbished camp will be principally developed on the site of the existing Kwara camp. However, to allow for a slight expansion in the size of each guest unit and improved spacing between units the final refurbished camp will extend into the current Little Kwara site.

The refurbishment of Kwara camp will include the following activities:

- Extensive decommissioning of existing developments at both Kwara and Little Kwara camps.
- Removal of all concrete from the site – estimated 170 tonnes.
- Installation of a BioRock waste treatment plant for all liquid waste.
- Installation of a hybrid solar power plant with backup 30 kVa diesel generator.
- Development of nine guest units including one family unit.
- Development of one pilot/private guide unit.
- Development of one main guest dining and lounge area and one private dining and lounge area.
- Development of 40 single occupancy staff accommodation with en-suite ablutions for managers, guides and junior staff.
- Extensive refurbishment of back of house supporting infrastructure including vehicle workshop and fuel storage.

Rationale for the Project

The purpose of this project is to rationalise the site of the Kwara and Little Kwara camps to allow for a single upgraded camp to operate on the site. The proposed refurbishment of Kwara camp and decommissioning of Little Kwara camp will reduce the environmental impacts both at the development site and in the surrounding area. This is as a result of reducing the total bed night capacity at the site from 26 to 18 beds as well as the removal of the duplicated back of house facilities. It will ensure that Kwando Safaris continue to maintain the standards expected of them as well as guaranteeing the long-term viability of the camp. Refurbishing the camp will also allow Kwando Safaris to improve the environmental efficiency of the camp through the installation of a solar plant and a modern above-ground sewage treatment plant and grey water reticulation system together with energy efficient lights and equipment throughout.

Location of the Activity

Kwara camp is located at GPS S 19.107961° GPS E 23.264368° (Decimal degrees, WGS 1984) in the south of NG/20, along the northern border of the Moremi Game Reserve. The 175,000Ha concession is a commercial photographic Controlled Hunting Area (CHA) under the management and operation of Kwando Safaris.

Anticipated Impacts and Proposed Mitigation Measures

The environmental impacts and mitigation measures identified by the EMP study are presented in detail in the Environmental Impact Statement (EIS) and summarised in the table below. A detailed Environmental Management Plan to help manage and monitor potential impacts is included in the EIS.

Environmental Impact**Project Phase: Pre-Construction and Construction****Proposed Mitigation/Enhancement Measures****Physical and Chemical impacts**

Soil contamination

Re-fuelling/oiling/servicing of construction/maintenance of equipment to occur on bunded surface.

All chemicals to be stored in well-maintained containers in secure, bunded storeroom.

Storage of solid waste in secure bunded area, with regular removal to nearby landfill or recycling centre.

Soil Erosion

Limited removal of vegetation, apart from where absolutely necessary, and rehabilitate affected areas.

Use designated pathways and tracks.

Ensure drivers read, sign and abide by the code of conduct.

Dust Creation

Limit removal of vegetation.

Minimise use of vehicles, particularly short journeys through proper planning.

Ensure drivers read, sign and abide by the code of conduct.

Biological and Ecological Impacts

Wildlife habitat alienation

Ensure any adjustment to the camp footprint is carefully managed with limited vegetation removal.

Switch off all machinery and vehicles when not in use and keep noise levels down.

Vegetation destruction

Limited removal of vegetation, apart from where absolutely necessary, and rehabilitate affected areas.

Limit new road building and make efforts to rehabilitate roads no longer used.

Fire

All machinery/vehicles/appliances to be regularly serviced and turned off when not in use.

Fire extinguishers and fire hoses to be positioned around camp.

All staff to be trained in firefighting and fire prevention.

Sociological and Cultural Impacts

Disease transmission

Education of staff and visitors on dangers of disease transmission.

Ensure supply of condoms is available.

Environmental constraints

Ensure all staff receive appropriate guidance for working in a remote environment in challenging conditions.

Ensure sufficient water availability for all staff.

Visual impact

Developments to be incorporated within the surrounding vegetation to ensure natural look is maintained.

Decor should be subtle and suitable for the bush.

Project phase: Operation**Physical and Chemical impacts**

Soil contamination

Re-fuelling/oiling/servicing of construction/maintenance of equipment to occur on bunded surface.

Storage of solid waste in secure bunded area, with regular removal to nearby landfill or recycling centre.

Soil erosion and dust creation

Limited removal of vegetation, apart from where absolutely necessary and rehabilitate affected areas.

Use designated pathways and tracks.

Ensure drivers read, sign and abide by the code of conduct.

Encourage non-vehicle activities.

Biological and Ecological Impacts

Wildlife habitat alienation

Limit footprint of camp and extent of camp activities.

Use of local natural resources

Extinguish all fires in camp when no longer needed to minimise use of firewood

Do not collect firewood within close proximity of camp.

Ecological monitoring

Improved wildlife monitoring through compliance with Standardised Wildlife Monitoring Protocols.

Sociological and Cultural Impacts

Disease transmission	Education of staff and visitors on dangers of disease transmission Ensure supply of condoms is available
Fire	All machinery/vehicles/ appliances to be regularly serviced and turned off when not in use Fire extinguishers and fire hoses to be positioned around camp All staff to be trained in firefighting and fire prevention
Economic and operational Employment	Permanent staff to be employed from the local region with trickle down benefits
Project Phase: Decommissioning Physical and Chemical impacts	

Soil contamination	Re-fuelling/oiling/servicing of construction/maintenance of equipment to occur on bunded surface. Storage of solid waste in secure bunded area, with regular removal to nearby landfill or recycling centre. Ensure all waste is packaged appropriately so there is no spillage during transport.
Soil compaction, erosion and dust creation	Limited removal of vegetation, apart from where absolutely necessary and rehabilitate affected areas. Use designated pathways and tracks. Ensure drivers read, sign and abide by the code of conduct.

Biological and Ecological Impacts

Wildlife habitat alienation	Switch off all machinery and vehicles when not in use and keep noise levels down. Rehabilitate the camp footprint following decommissioning.
Vegetation destruction	Limit removal of vegetation wherever possible. Limit new road building and make efforts to rehabilitate roads no longer used.
Vegetation change	Identified alien species removed.
Fire	All machinery/vehicles/appliances regularly serviced and turned off when not in use. Fire extinguishers and fire hoses to be positioned around camp. All staff to be trained in firefighting and fire prevention.

Sociological and Cultural Impacts

Disease transmission	Education of staff and visitors on dangers of disease transmission. Ensure supply of condoms is available.
Noise disturbance	Ensure generator is sound proofed and only run generator when necessary. Minimise use of vehicles unless absolutely necessary.
Environmental constraints	Ensure all staff receive appropriate guidance for working in a remote environment in challenging conditions. Ensure sufficient water availability for all staff.
Economic and operational	
Financial costs of decommissioning	Operator to ensure sufficient budget available to fully decommission and rehabilitate camp.
Employment	Decommissioning staff to be employed from the local region to create short-term benefits.

Conclusions and Recommendations of the Study

The consultants recommend that the redevelopment of Kwara camp goes ahead according to the proposed plans and recommendations as laid out in the EIS. The proposed developments will significantly improve the use of the Kwara site and provide an improved tourism product for guests whilst also improving living and working conditions for all staff. Moreover, the developments will help to ensure the long-term success of the operation, thus safeguarding jobs and revenue. The refurbishment will improve the environmental credentials of the camp with the removal of the concrete from the site and through the installation of an above-ground liquid waste treatment plant together with the installation of a solar plant and solar geysers.

As with all projects there are a number of impacts that will need mitigation. In this project they include: the risk

of soil erosion, compaction and contamination through use of machinery and supply trucks, risk of air and noise pollution from machinery use, risk of vegetation destruction and wildlife disruption from activity on the sites and risk to staff of working in extreme wilderness areas. The EMP report provides detailed Impact identification, Mitigation strategies and Monitoring Plans for all phases of the project which the construction team and operator should follow during both refurbishment and operation of the camp.

Environmental Impact Statement Placement

Copies of the EIS can be reviewed at the following locations:
Department of Environmental Affairs, Maun office

Written comments or objections from those likely to be affected by the project and other interested persons should be submitted to The Department of Environmental Affairs on or within four (4) consecutive weeks from the first appearance of this notice.

Correspondences

All correspondences should be addressed to: The District Environment Coordinator, Department of Environmental Affairs, PO Box 35, Maun and Telephone No. 6801237, Fax No. 6862503 or hand-delivered to Department of Environmental Affairs, Maun Office, Plot No. 527, Light industrial near to Motovac.

Public Notice

REPUBLIC OF BOTSWANA

NOTIFICATION FOR PUBLIC REVIEW FOR THE ENVIRONMENTAL IMPACT ASSESSMENT OF THE PROPOSED FUEL DEPOT AT AREA G IN FRANCISTOWN

In compliance with Section 10 of the Environmental Assessment (EA) Act No 10 of 2011

The major findings of the Environmental Impact Assessment for the above project are as summarised below:

Nature and Magnitude of the Activity

The project proponent, Sky Bridge Capital (Pty) Ltd, has proposed to develop a fuel depot within an existing industrial plot at Area G in Francistown. The proposed project will include development and operation of two diesel tanks, a bund wall and associated fuel dispensing equipment and buildings.

Rationale for the Project

The main objective of the project is to supply diesel to service buses and trucks with 500PPM and 50PPM diesel.

Location of the Activity

The proposed project will be located at Plot No. 15769, Area G in the City of Francistown. The area has been zoned for industrial use.

Anticipated Environmental Impacts and Proposed Mitigation Measures

The table below presents a summary of the impacts associated with proposed development together with the proposed mitigation measures for each, as per the project EMP.

Environmental Impacts Predicted	Proposed Mitigation Measure
Negative impacts	
Ground and surface water contamination	Ground water contaminants such as chemicals and fuels must be stored in areas located away from water sources. Substances such as fuels must be stored on concrete base to avoid contaminating surface and ground water sources.
Soil contamination	Soil contaminants found on site such as fuel and chemicals must be placed on concrete bases with bund walls or impermeable PVC lining whilst awaiting treatment. Equipment such as oil spillage kits must be made available onsite for treating any immediate oil spillages. Maintenance of machines and vehicles must be done regularly to prevent fuel spillages.
Noise pollution	Use regularly maintained equipment that does not produce excessive noise. Noise producing activities should be undertaken during the day time only. Blasting activities (if required for foundations must be carried after consulting with nearby communities to minimise disturbance of activities practiced.
Air pollution	Gaseous emissions from site machinery and vehicles must be reduced or prevented by regular maintenance. Dust suppression techniques must be applied to prevent generation of excessive dust during excavation works.

Environmental Impacts Predicted

Increased waste generation

Proposed Mitigation Measure

Use the designated waste holding areas at the mine for the waste from the site.

Waste produced from the site must be disposed at legal and licensed waste facilities.

Awareness campaigns regarding waste must be presented the construction workers.

Recyclable waste must be separated and stored for recycling at licensed and legal recycling facilities.

Waste vegetation must be cut up and left as compost.

Occupational health and safety risks

A health and safety policy must be developed by the contractor.

Fencing of construction areas to keep unauthorised people out.

Signage at site entrance.

Adequate protective equipment and clothing must be provided to the construction workers.

Risks of disturbance of archaeological sites

An archaeological induction with construction personnel must be conducted to inform on procedures to be followed in the event of an archaeological discovery.

Discovery of archaeological remains such as subsurface artefacts and archaeological sites must be reported to the BNMM immediately.

Traffic disruption

Dust suppression should therefore be undertaken on the gravel haulage route and speed limit should be controlled.

Positive Impacts

Employment creation

Acquisition of unskilled labour from communities near the project site, train for required skills where possible.

Establish transparent and agreed means of hiring, firing and skills development.

Utilise local supplies and local subcontractors where possible.

Conclusion

Conclusions drawn from the Environmental Impact Study are that negative environmental impacts may arise as a result of the implementation of the project; the impacts are manageable and can be minimised by implementing the proposed mitigation measures. Positive impacts such as employment opportunities are also expected. Mitigation measures have been proposed to curb the adverse impacts and enhance the positive impacts of operation, and if correctly implemented, most of the identified negative impacts will be minimised or eliminated.

Recommendation

Following the undertaking of the Environmental Impact Study for the project, it is recommended that the project be allowed to proceed with due implementation of all the mitigation measures recommended.

Environmental Impact Study placement

Copies of the detailed Environmental Impact Study have been placed at the following places for reviewing by the general public and the Interested & Affected Parties (IAPs).

Department of Environmental Affairs in Francistown

Written comments or objections from those likely to be affected by the project and other interested persons should be submitted to: The District Environmental Coordinator, Private Bag F020, Francistown, Telephone No. 2417363, Fax No. 2417108 or hand-delivered to DEA office in Francistown by the 18th May, 2018.

Public Notice

REPUBLIC OF BOTSWANA

Notice issued in terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT STATEMENT (EIS) FOR THE PROPOSED QUARRY AT LETLHAKANE

The major findings of an Environmental Impact Assessment (EIA) Study undertaken for the proposed Quarry Mine in Letlhakane are as summarized hereunder.

Nature and Magnitude of the Activity

The project proponent, Keseneetswe Kebolatlhetswe intends to mine and supply quarry stone. The proposed quarry mine covers an area of 3.1315 ha. The lifespan of the mine operation will depend on the duration of the mining license and the availability of the resource.

The Rational for the Project

The proposed quarry project will ensure there is availability of construction aggregate in Letlhakane and the surrounding areas, as well as creation of employment and boost to the local economy.

Location of the Activity

The proposed quarry mine is located at the Keazoa Lands. The project is 5km south of Letlhakane Village and 3km West of A14 road. The site is accessible through an existing dirt sandy road.

Anticipated Impacts and Proposed Mitigation Measures

The environmental impacts and mitigation measures identified by the EIA study are presented in detail in the Environmental Impact Statement (EIS) and summarized in the table below. A detailed Environmental Management Plan which comprises both the Mitigation Plan and the Monitoring Plan to help manage and monitor potential impacts is also included in the EIS.

Project Phase	Potential Impacts	Mitigation Measures
Pre-Operation	Loss of vegetation	Clearing should as much as possible be limited to the project site and during roads preparations be cleared where very necessary.
	Dust Pollution	Workers should be provided with disposable respiratory masks and goggles and it should be ensured that they are used always.
	Noise Pollution	Water suppression measures such as providing water bars with spray nozzles, target sprayers for high dust sites, washers for rock screening equipment and water trucks to control dust on haul roads or access roads.
		Normal working hours should be adhered to from 0600 hours to 1800 hours. All loud machinery to be used should be fitted with silencers.
		Noise from trucks should not exceed 85dB (decibel) as stipulated by the Mines Department. Hearing damage may occur if is continuous for about 8 hours.

Operation	Creation of employment	This is a positive impact and it must be enhanced by giving priority to locals who qualify for special/technical skill jobs. For non-technical jobs, employment will be fully reserved for Lethakane locals.
	Increased traffic	A temporary road should be graded to avoid congestion and inconvenience where the current road has been blocked for construction purposes.
Operation and decommissioning	Generation of dust	Water suppression measures such as providing water bowsers with spray nozzles, target sprayers for high dust sites, washers for rock screening equipment and water trucks to control dust on haul roads or access roads. Workers should be provided with disposable respiratory masks and it should be ensured that they are used always.
	Increased potential for soil erosion	Water sprinkling on working ground should be done. Excavation activities should be limited to the proposed site.
	Noise pollution	Normal working hours should be adhered to, they should be from 0800hrs to 1800hrs. Noise from trucks should not exceed 85dB (decibel) as stipulated by the Mines Department.
	Waste Generation	For oil spillages, ensure the use of rubber mats on the ground to prevent contact of the hydro carbons with the ground during minor maintenance of vehicles. A bonded area should be created for the repair of machinery and construction vehicles and covered receptacles should be placed conveniently at each working area for disposal of solid waste. Spills on the ground should be removed immediately and placed in the receptacles. The receptacle should be emptied regularly at designated point within the village. Waste should be collected and disposed at designated dumping site in the village. Separate portable toilets should be placed on site for male and female workers.

Conclusions and Recommendations of the Study

The proposed sandstone mining project will have both positive and negative environmental impacts at local and regional levels. Following the undertaking of the detailed EIA Studies for the project on the area it is recommended that the project be allowed to proceed with appropriate implementation of the mitigation measures recommended

Environmental Impact Statement Placement

Public Notice

REPUBLIC OF BOTSWANA

NOTIFICATION FOR PUBLIC REVIEW OF THE ENVIRONMENTAL IMPACT STATEMENT FOR THE CONSTRUCTION OF A FILLING STATION IN MOCHUDI, BOSEJA WARD

In compliance with Section 10 of the Environmental Assessment (EA) Act No 10 of 2011, this public notice presents the major findings of the Environmental Impact Assessment Study for the above mentioned project.

Nature and Magnitude of the Study

The proponent, Mr Wilson Thulari intends to construct and operate a filling station with Quick shop at Mochudi. The components of the filling station include the following:

- 2 by 23 000 liters of underground unleaded petrol tank
- 23 000 liters of underground diesel tank
- 200 liters of underground paraffin tank
- Forecourt for dispensing fuel
- Quick shop

Location of Project Activity

The plot is located in the outskirts of Mochudi (Boseja Ward) along Mochudi-Sikwane Road; on the other side of the road is Raserura English Medium Private School. The project site is located next to Zakhem Construction premises.

Anticipated Environmental Impacts and Proposed Mitigation Measures

A summary of the major findings of the study associated with the implementation of the proposed project together with the mitigation measures proposed to respond to the anticipated environmental impacts are presented in the following table.

Environmental Impact	Project Phase	Proposed Mitigation/Enhancement
Air pollution	Decommissioning	Construction workers should be provided with adequate protective clothing. Use serviced machinery to avoid emissions of fumes. Dampen the work area with water to suppress dust and cover all air movable materials during haulage.
Soil contamination	Decommissioning	Empty the tanks before the removal to avoid spillages. All residual liquid and sludge should be removed and disposed of properly. In the event of a spill, the oil/diesel/petrol contaminated soil should be scooped into drums and the rubble/concrete should be collected into a skip for treatment and disposal by a licensed and registered waste management company.
Land pollution	Decommissioning	All metal equipment that is not going to be re-used should be salvaged for scrap value. No waste in any form should be allowed to remain on site. The rubble waste must be disposed of with permission from the Council.
Employment opportunities	Construction	Proponent should have a recruitment plan that should be circulated to the information disseminating authorities like advertising at the District Council. There should be a fair recruitment and fair wages as per Labour regulations.
Air Pollution	Construction	Hauling trucks should be covered to prevent dust generation along the roads during transportation. Workers should be provided with adequate protective clothing to prevent respiratory diseases.

Noise Pollution	Construction	There should be proper scheduling of activities during the construction and residents in close proximity informed in advance of the impending construction activities. The contractor should ensure that all equipment used on site is fitted with efficient silencers and mufflers to reduce noise.
Soil contamination	Construction	Waste oil containers and other spill response equipment should be provided on site. Machine and equipment operators should be trained about proper handling of used oil on site.
HIV/AIDS infections	Construction	Condoms should be provided to construction workers or strategically placed in temporary toilet facilities. The health facility should be accessible to construction workers so that they can have a constant supply of condoms, ARV's, counselling and testing if needed.
Employment Opportunities	Operation	Contractor should have a recruitment plan that should be circulated to the information disseminating authorities like advertising at the city council notice boards. There should be a fair recruitment and fair wages as per Labour regulations.
Water contamination	Operation	Servicing points should be paved to prevent contamination Waste oil containers and other spill response equipment should be provided on site. Leak detectors should be installed around the tanks to send signals in cases of any leaks. Appropriate absorbent material should be stored on site to deal with spillages Training of personnel to effectively handle and operate the dispensing facilities
Risk of fire	Operation	There should be provision of fire extinguishers, fire hydrant, and first aid boxes. Proper signage prohibiting smoking and use of cellular phones should be visible on site.
Land pollution	Decommissioning	All hazardous material should be transported to a registered hazardous waste site for disposal by a licensed contractor. Solid waste must be properly managed and disposed of in a licensed waste disposal facility
Occupational hazards	Decommissioning	All contractors, consultants and laborers must ensure that the necessary personal protective equipment (PPE) is worn on site. Appropriate health and safety signage must be displayed on site
Noise pollution	Decommissioning	Install silencers on machinery and Adhere to working hours and permissible noise levels

Conclusion and Recommendations of the study

The conclusions from the findings of the EIS are that all the negative impacts identified can be mitigated and their severity minimized through the implementation of the mitigation measures and recommendations made in the Environmental Management Plan. It is therefore recommended that the project be allowed to proceed.

Correspondences

Copies of the Environmental Impact Statement have been placed at the following locations for review by the public:
Department of Environmental Affairs (Gaborone)
Mochudi, Boseja Ward 2
Kgatleng District Council

All comments should be addressed to: The Director, Department of Environmental Affairs, Private Bag 0068, Gaborone, Telephone No. 3902050, Fax No. 3902051 or hand-delivered to Travaglini House, Plot No. 1271, Second Floor, Old Lobatse road. Comments should reach the Department before 18th May, 2018.

- The Cabinet Directive CAB No. 11 of 2010 on Economic Diversification Drive (EDD) as per Guidelines on the diversification and stimulation of local economy through preference margins based on the turnover and thresholds shall be implemented in the evaluation of the tender. The successful bidder(s) will be required to abide by the undertakings given on the diversification and stimulation of 2010 published by Ministry of Investment, Trade and Industry.
- Bidders should be registered with Ministry of Investment, Trade and Industry and attached a certified copy of EDD certificated for eligibility to receive preference under this tender.
- Preferences in accordance with the provisions of the Public Procurement and Asset Disposal Act, 2001 shall apply to the contract, as per the applicable Presidential Directives. Presidential Directive 19 (B) 2013. The Local Procurement Scheme is in line with the Citizen Economic Empowerment (CEE) Policy and section 66 (3) of the PPADB Act, both of which advocate for the economic empowerment of women, youth and people with disabilities in general and specifically in the rural areas. The scheme provides for a preference of 15% for anyone of the criteria in the target group (woman, youth and people with disability (PWD), rural setting and employment. Bidders should attach relevant documentation for the entitlement to the scheme, (certified copies of National Identity, Certificate of disability or sworn declaration for the entitlement of the scheme).
- The Presidential Directive CAB No. 17 (B) of 2013 on amendment of the preservation and price preference Schemes, CAB Memo 131 FDPS 1/3/41 directs that the bidders in a joint venture partnership between foreign owned and citizen-owned companies, which may range from majority to minority citizen owned joint ventures, including consortia and associations between citizen and foreign-owned companies be awarded a price preference incentive of up 4% less at financial stage.
- The tender follows an Open International Bidding Method.
- The physical address for collection of Tender Documents is: Thebephatshwa Air base, Air Arm Headquarters, Office No. G23.
- Documents may be collected during working hours after 0900 hours on week days with effect from 21st May, 2018 on payment of a non-refundable tender fee of P250.00 (Two Hundred and Fifty Pula only. Youth registered companies will pay a non-refundable fee of P125.00 (One Hundred and Twenty-Five Pula only).

- Payments to be made to WO II Ennetse at Telephone No. 3665499 at Air Arm Headquarters, Thebephatshwa Airbase.
- Queries relating to the issuance of these documents may be addressed to: Col. M.C. Maruping, Capt. G. L. Moreri at Telephone Nos. (+267) 3665646 or 427584, Fax No. (+267) 5921024 and for technical issues Lt Col. S. Molefhe or Maj. T. Marman at Telephone No. (+267) 3665385/584.
- A Two-Envelope Procedure will be followed where submissions will consist of two submissions; one for technical proposal consisting of one original and two copies clearly marked "Technical" and the other for financial proposal also consisting of one original and two copies marked "Financial" in separate envelopes but put together in one sealed envelope. The sealed envelope must be clearly marked: "Tender No. DJS/MTC/BDF: 026/2018-2019 — Tender for the Supply of Spares, Publications, Maintenance and Training Services for BF-5 Aircraft for (36) Thirty-Six Months". Early tender offers shall be delivered to: The Secretary, Ministerial Tender Committee, Ministry of Defence Justice and Security, Central Business District, Plot No. 54381, Square House, Fourth Floor, Phase 2, Gaborone, until Monday, 18th June, 2018 at 1630 hours. Tender offers submitted on the closing day 26th June, 2018, shall be delivered to: The Secretary Ministerial Tender Committee, Ministry of Defence Justice and Security, Central Business District, Plot No. 54381, Square House Eighth Floor, Phase 2, Gaborone, where interested parties are invited during opening session.
- The closing time and date for receipt of tender offers shall be 0900 hours on 19th June, 2018.
- Late tender offers will not be accepted.
- Telegraphic, telex, telephonic or emailed tender offers will not be considered.
- Tender offers will be opened in the presence of bidders wishing to attend.
- Names and addresses of bidders must be reflected on the outer envelope.

The Public Procurement and Asset Disposal Board's Standardised Conditions of Tender apply to this procurement, for which all the applicable Tender Data is contained in the Tender Documents.

Notwithstanding anything in the foregoing, the Government of Botswana is not bound to accept the lowest or any tender offer. The tenderer shall bear the costs for preparation of the tender.

- The Procuring Entity is Department of Veterinary Services.
- Procurement Method is: Open Domestic Bidding Method (Restricted to 100% Citizen owned companies or individuals).
- Tenderers must, in order to be considered for award of the tender, be registered with the Public Procurement and Asset Disposal Board (PPADB) Code: 134 — Health Services, Sub-Code: 05 — Veterinary Services, and Licensed/approved and registered with Botswana Veterinary Surgeons Council, or individuals with Botswana Veterinary Surgeons Council exemption documents are eligible to submit tender offers.
- The physical address for collection of Tender Documents is: Procurement Office No. 002, Livestock Advisory Centre, Department of Veterinary Services, Ministry of Agricultural Development and Food Security, Plot No. 4701, Station Road.
- Documents may be collected during working days between 0730 hours and 1245 hours and from 1400 hours to 1630 hours, with effect from 21st May, 2018.
- This tender is reserved for 100% citizen owned companies or individuals.
- The Local Procurement Scheme, Presidential Directives CAB 19 (B) 2013 shall be implemented and applied to vulnerable groups who should provide proof to qualify for the same in the recommendation for award at 3% price preference for each group.
- A non-refundable deposit of P500.00 (Five Hundred Pula only) payable in cash or by bank guaranteed cheque made out in favour of the Government of Botswana is required on collection of the Tender Documents. Other vulnerable groups will be allowed to purchase this Tender Document at 50% price.
- Queries or clarifications relating to the issuance of these documents may be addressed, in writing, no later than ten (10) days before the tender closing date to: Mr G. Gaopatwe, Telephone No. 3689517, Fax No. 3903744, E-mail: ggaopatwe@gov.bw.

- The closing date and time for receipt of sealed tender offers is 15th June, 2018 at 1000 hours.
- Late tender offers will not be accepted.
- The Bid Submission Method is Two-Envelope Submission Method, in which a tenderers financial and technical offer is submitted in two separated sealed envelopes, clearly labelled technical and financial respectively and enclosed in an outer large envelope.
- The two envelopes shall indicate the tender identification details, name and address of the bidder while the outer envelope shall only indicate the tender details.
- One (1) original Tender Document marked "Original" and two (2) copies of the original document marked "Copy" in one sealed envelope clearly marked: "Tender No. MOA: MTC/DVS/PT 13 2018/2019 — Tender for Provision of Anthrax and Quarter Evil Vaccination Services in Cattle and Rabies in Dogs and Cats for the Department of Veterinary Services", shall be delivered to: Ministry of Agricultural Development and Food Security Headquarters, Office No. 015, Ground Floor, Plot No. 4701, Station Road, Gaborone.
- The name and address of the bidder should be clearly marked on the envelope.

The Public Procurement and Asset Disposal Board's Standardised Conditions of Tender for supplies apply to this procurement, for which all the applicable Tender Data is contained in the Tender Document.

Notwithstanding anything in the foregoing, the Government of Botswana is not bound to accept the lowest or any tender offer, nor incur expenses in preparation thereof.

*The Secretary,
Ministerial Tender Committee,
Ministry of Agricultural Development and Food
Security.*

Public Procurement and Asset Disposal Board — Tender No. PPADB 1/26/2 I
PROVISION OF DESIGN AND PRINTING SERVICES OF THE PPADB ANNUAL
REPORTS FOR A PERIOD OF THREE (3) YEARS

- REFERENCE IS MADE to the above-mentioned tender which was published on 20th April, 2018, in the Government Gazette Vol. LVI No. 24 (Page 3368) and on the Daily News newspaper on 2nd May, 2018, No. 081 (Page 26).
- Bidders are informed that the above-mentioned tender has been amended as follows:
- The advert stated that "the tender is reserved for 100% citizen-owned companies. Price Reference Scheme shall be applied in line with the Citizen Economic Empowerment Policy (CEE) of 2012 and the Local Procurement Scheme".
- Bidders are advised that reservation of the tender to 100% citizen-owned companies does not apply to this tender.
- The requirement is therefore corrected to remove the reservation of the tender to 100% owned companies read as "Price Reference Scheme shall be applied in line with the Citizen Economic Empowerment Policy (CEE) of 2012 and the Local Procurement Scheme".

Any inconvenience caused by this is highly regreted.
All other conditions of the tender remain the same.

P. MOTSWAGOLE,
*Board Secretary,
Public Procurement and Asset Disposal Board.*

Republic of Botswana — Tender No. MTC 08/05/01-2018/19
Corporate Services

A FRAMEWORK CONTRACT FOR THE SUPPLY AND DELIVERY OF COMPUTER HARDWARE AND PERIPHERALS FOR THE MINISTRY OF LOCAL GOVERNMENT AND RURAL DEVELOPMENT

- TENDER OFFERS ARE INVITED for the supply and delivery of computer hardware and peripherals for the Ministry of Local Government and Rural Development to be delivered over the duration of twelve (12) months.
- This tender will constitute a framework agreement with the awarded suppliers.
- The Procuring Department is Corporate Services.
- The Presidential Directive CAB 34 (B) 2014 on Procurement of locally produced goods and services shall be implemented in the evaluation of the tender. To qualify for Economic Diversification Drive (EDD) price preference, submit a copy of relevant and valid EDD Certificate.
- Local Procurement Scheme of Presidential Directive No. 19B, 2013 will be applied in this tender. Therefore bidders who qualify under this scheme are required to provide national identity (*Omang*) numbers. In addition disabled bidders are required to submit any document that confirms their disability. This is subject to the prevailing DATC threshold if the value of the tender exceeds the DATC approval authority then the price preference will not apply.
- Bidders must, in order to be considered for award of the contract, be registered with PPADB in the following categories:
 Code: 203 — Electronic and ICT Supplies, Sub-Code: 01 — Electronic Equipment, Spares and Accessories (includes ICT, Photographic Equipment and others).
- This is an Open Domestic Bidding reserved for 100% citizen owned companies only.

Republic of Botswana — Ministry of Environment, Natural Resources Conservation and Tourism

CALL FOR PROPOSALS — THE NATIONAL ENVIRONMENTAL FUND (NEF)

1. THE MINISTRY OF ENVIRONMENT, NATURAL RESOURCES CONSERVATION AND TOURISM (MENT) has established the National Environmental Fund (NEF) through Statutory Instrument No. 70 of 2010 to promote and provide financial support for projects that are geared towards the protection and conservation of the environment.
2. The NEF provides for;
 - a. Sustainable;
 - (i) Development, (ii) use of natural resources, and (iii) use of biodiversity and activities related thereto;
 - b. development and implementation of community based natural resource management activities;
 - c. support to the eco-tourism sector and to the development of national heritage sites;
 - d. rehabilitation of degraded ecosystems;
 - e. promotion of activities related to:
 - (i) Protection of the urban environment, (ii) climate change mitigation and adaptation, (iii) waste management and pollution control, (iv) environmental awareness and education, and (v) environmental research and monitoring;
 - f. capacity building and training programmes in environmental management and sustainable development; and
3. The Fund is administered and managed through the Board with the Department of Environmental Affairs (DEA) as the NEF Secretariat.
4. The NEF therefore invites legally registered and Botswana based Community Based Organisations (CBO's), Non-Governmental Organisations (NGO's), research organisations and societies to submit proposals for possible funding that address the NEF mandate.
5. The applicant shall only use the prescribed format (See Annex 1 attached to the Guidelines – April, 2018 Version). Proposals that do not adhere to the Proposal Format shall not be considered.
6. Proposals should be accompanied by declaration form and information paper. Proposals without these documents will not be accepted.
7. Submission of proposals to be done from 7th May, to 14th June, 2018.
8. All submissions should be done during working hours from 0800 hours to 1600 hours from Monday to Friday. The closing time for submissions will be 1000 hours on 14th June, 2018. Proposals brought after this time shall not be accepted, and this also applies to proposals submitted through Registered Mail.
9. Proposals that are hand-delivered should be signed for in a registry book provided by the Secretariat.
10. Note that all proposals that are not submitted through the prescribed methods will be disqualified that is Project proposals submitted by any other means that is by fax or by email or delivered to other addresses will be rejected.
11. Applicants should submit an original copy and two (2) copies
12. Detailed Guidelines and Proposal Format (April, 2018 Version), can be obtained from the following Offices of the Ministry of Environment, Natural Resources Conservation and Tourism department across the country between 0730 hours and 1600 hours on Monday to Friday;

Industrial Court, Gaborone Notice of Public Auction

- THE PUBLIC IS HEREBY INFORMED that Industrial Court shall sell unserviceable items by public auction at Gaborone West Supplies Depot, Plot No. 14412, Maakgadigau Way on 4th June, 2018 at 1000 hours.

Conditions of Sale

- List of unserviceable items can be obtained from Industrial Court, Plot No. 62439, CBD, opposite Dikgosi Monument, during working hours on weekdays between 0800 hours and 1600 hours from 25th May to 28th May, 2018.
- Lots shall be sold as they are without any warranty expressed or implied and no negotiations shall be permitted.
- Bidders wishing to participate in the auction shall pay a refundable deposit fee of P100.00 at the auction site at the time of registration on 4th June, 2018.
- Registration starts from 0730 hours to 0945 hours on 4th June, 2018 for those who are interested in bidding. Viewing of items for auction shall be on 1st June, 2018 from 1400 hours to 1600 hours, one (1) day before the auction sale. There will be no viewing of items on the day of auction.
- Payment of a Lot shall be made in cash or by bank guaranteed cheque immediately after the auction. Lots not paid for will be re-auctioned at a later date.
- Lots will only be removed upon presentation of the official payment receipt of full purchase price.
- The successful bidder shall become the owner of the Lot upon payment for the Lot. All ownership risks shall be transferred to the successful bidder from the close of business on the day upon which payment is made.
- Ownership of a Lot will revert to the Industrial Court if such a Lot is not removed within two (2) working days after the date of auction without any compensation to the buyer.
- Industrial Court will not be responsible for the safe custody of the sold Lots.
- Industrial Court reserves the right to refuse or reject bids in the event of a dispute. If the bidder is not satisfied with his/her bid, this should be communicated to the Auctioneer during the sale.
- Further clarification and information may be obtained from Procurement Unit, Officers O. Nkele or M. Motshabi at Telephone Nos. 3659348 or 3659338, Fax No. 3900567.

Ministry of Transport and Communications — Tender No. WOR 7/17/7 I
Roads Department

CONSTRUCTION OF THE THALAMABELE VETERINARY GATE TO MOSU ROAD

- TENDER OFFERS ARE INVITED for the construction of Thalamabele Veterinary Gate to Mosu Road including access roads to Makgadikgadi Junior Secondary School, Mosu Primary School and the Kgotla – Mmatshumo section.
- The Procuring Ministry is the Ministry of Transport and Communications through the Roads Department.
- The following works are to be constructed:
 - Construction of about 25.5km x 10m (7m carriageway x 1.5m shoulders both sides) main road;
 - Construction of about 0.447km x 7m (5m carriageway x 1.0m shoulders both sides) access road to Makgadikgadi Junior Secondary School;
 - Construction of about 0.269km x 7m (5m carriageway x 1.0m shoulders both sides) access road to Mosu Primary School;
 - Construction of about 2.487km x 7m (5m carriageway x 1.0m shoulders both sides) access road from the Kgotla to Mmatshumo (only 2.487km to be constructed);
 - Construction of Culverts and side drains;
 - Road Markings;
 - Installation of road signs;
 - Relocation and protection of existing services;
 - Construction of Bus stops;
 - Provision of Services Sleeves for future reticulation.
- Tenderers must be domiciled in Botswana in order to be considered for award of the tender and be registered with the Public Procurement and Asset Disposal Board (PPADB) in the following Codes:
 - Code: 03 — Civil Engineering: Sub-Code: 01 — Construction Roads under Grade E and Sub-Code: 04 — Road Surfacing under Grade D or above.
 - Bidders who do not have Sub-Code: 04 — Road Surfacing should subcontract contractors who are registered under this Code under Grade D or above.
- The project is part of the Government Economic Stimulus Programme which is designed to provide business opportunities for local enterprises and hence special conditions apply to the works contract. Locally produced materials must be used in this contract unless the contractor requests for an exception with full justification and the employer approves.
- Tender offers should refer to the following policy documents and mandatory requirements for key additional information on the Economic Stimulus Programme:
 - Economic Diversification Drive (EDD) Revised Guidelines March, 2017.
- In order to support the Citizen Economic Empowerment Policy, a mandatory minimum 30% of the value of the works being subcontracted to 100% citizen owned contractors by foreign owned bidding entities applies to this tender. Contractors to submit memorandum of understanding between the main contractor and citizen owned contractors. Value and type of works to be sub-contracted to be indicated. Non-compliance with this provision will lead to rejection of the tender bid.
- The Pre-Tender Estimate for this Project is P275,170,449.34. (Two Hundred and Seventy Five Million, One Hundred and Seventy Thousand, Four Hundred and Forty-Nine Pula, Thirty Four Thebe) inclusive of VAT and Contingencies.
- The physical address for collection of Tender Documents is: Roads Department Headquarters, Second Floor, Office No. 217, Plot No. 54690, Phase 2, West Gate Mall, Gaborone, Botswana, during working days between 0800 hours and 1245 hours and from 1345 hours to 1500 hours with effect from 28th May, 2018.
- A non-refundable deposit of P7,500.00 (Seven Thousand Five Hundred Pula only) payable by a bank guaranteed cheque made out in favour of the Government of Botswana or in cash is required on collection of the Tender Document.
- Queries relating to the issuance of these documents may be addressed to the following in fourteen (14) days before the closing date: Mr Mosupi Moile, Morgan, Ris & Wells Consult (Pty) Ltd, P.O. Box 601699, Gaborone, Telephone Nos. 3117155 or Cellphone No. 71397277, Fax No. 311 7155, E-mail: morgan-ris@info.bw or moilemosupi@gmail.com and copied to: Mr Prince Moalosi and Mr O. Basimanebotho, Roads Department, Private Bag 0026, Gaborone, Telephone No. 3913511, Fax No. 3915952 or 3191711, E-mail: pmoalosi@gov.bw or obasimanebotho@gov.bw.
- A compulsory site visit will be held on 12th June, 2018 at the site (Thalamabele Veterinary Gate) at 1000 hours followed by a meeting at Roads Department Regional Offices, Ntsho House, Third Floor, Office No. 410 in Francistown.
- One (1) original and three (3) of the original copies of completed Tender Document should be delivered to: The

Board Secretary, Public Procurement and Asset Disposal Board (PPADB), Private Bag, 0058, Plot No. 8913, Maakgadigau Way, G/West Industrial Site, Gaborone, Botswana not later than 1000 hours on 27th June, 2018. The Tender Documents are to be submitted in sealed parcels (one (1) original and three (3) copies), clearly marked: "Tender No. WOR 7/17/7 I — Construction of the Thlamabele Veterinary Gate to Mosu Road". Tender offers received or delivered after the above-mentioned date and time will not be considered nor will any telephonic, telex, facsimile, electronic mail or telephonic submissions.

Notwithstanding anything in the foregoing, the Government of Botswana is not bound to accept the lowest or any tender offer nor reimburse any expenses in preparation thereof.

P. MOTSWAGOLE,
Board Secretary,

BEFORE THE BOTSWANA ENERGY REGULATORY AUTHORITY SITTING AT GABORONE

In the Application of;

BOTSWANA OIL LIMITED

Applicant

AUTHORITY DECISION

Before the Botswana Energy Regulatory Authority, having read the documents before the Authority and having considered the submissions made and the record of the Public Inquiry, it is this 8th day of May, 2018 decided as follows;

a) **Decision**

- Botswana Oil Limited has failed to make out a case to demonstrate the necessity of an exclusive license.
- The application of Botswana Oil Limited for an exclusive Import License for petroleum is hereby rejected.
- Botswana Oil Limited may if dissatisfied with this decision, appeal to the High Court within 30 days from the date of receipt of the decision.

b) **Summary of Reasons for the Decision**

- The decision of the Authority is based on the failure by the Applicant to meet the requirements as stipulated in section 39 (2) (d) being evidence of the financial and technical capability of the Applicant. Such evidence has been summarised as follows;

4.1 **Financial Capability**

- 4.1.1. Botswana Oil Limited has not submitted a business case in support of the proposed changes in the current arrangements for the importation of petroleum and petroleum products in the country, therefore making it difficult to assess the costs and benefits of the proposal. This failure does not help Botswana Oil Limited's position that they are financially capable of being the sole importer because in the absence of such their application is based on speculation.
- 4.1.2. In terms of section 39 (2) (d) (i), an Applicant ought to provide evidence of their financial capability at the time of making the application, however, such evidence is lacking.

4.2 **Technical Capability.**

- 4.2.1. The Applicant's submission is that it is negotiating contracts and agreements at various levels with potential stakeholders. Submissions made are to the effect that Botswana Oil Limited's capacity is dependent upon them being granted the exclusive licence, however, the requirement of section 39 (2) (d) is that at the time of application one must have capacity. A demonstration of capacity is a prerequisite of the issuance of a licence.
- 4.2.2. The applicant does not have sufficient storage capacity to secure 60 days of uninterrupted supply. Contrary to the submissions made by the Applicant, Government's planned bulk petroleum products storage programme clearly indicates that the construction of the Tshele Hills project, expansion of the Francistown Depot and development of the new storage depot will only fulfil the 60 days stock cover by the year 2022.
- 4.3.3. Section 39 (2) (d) (ii) requires an applicant to demonstrate the requisite ownership rights or usage rights over

facilities at the time of application. Even though Botswana Oil Limited has been mandated by Government to manage strategic storage facilities and has provided projections of the intended increase of storage facilities, it is evident from the existing facilities that BOL does not have the requisite capacity to be the sole importer.

4.3. Necessitating factors

- 4.3.1. The considerations under section 38 is whether it is necessary for Botswana Oil Limited to be given an exclusive licence, therefore the issue of security of supply is critical and cannot be over looked and could be one above many other considerations. Botswana Oil Limited has failed to demonstrate that there are no other alternatives that could be employed to attain the same objectives without the issuance of an exclusive licence.
- 4.3.2. The manner and form proposed by Botswana Oil Limited for a quota of 50% in an exclusive licence which they themselves have admitted will ipso facto entitle them to 100% share market of the import, that same be phased, initially giving them 50% supply while IOC's are given six months to renegotiate their agreements preparing to exit the import market. An exclusive licence once granted will as a matter of necessity immediately exclude all other players. This remains untenable for one or more of the following;
 - i. An exclusive licence grants the grantee hundred percent rights not to be shared by anyone else except by the grantee's own operations.
 - ii. Under the exclusive licence there will be nothing that compels the IOC's to continue supplying the remaining 50% which the Applicant proposes could be set aside for them for a period of two years while Botswana Oil Limited still capacitates itself.
- 4.3.3. The fact that the Applicant is not ready to assume hundred percent implementation of the license immediately poses a great risk to the security of supply should the license be granted to them in the form and nature proposed by them.
- 4.3.4. It appears that indeed the Applicant is on the right track towards citizen empowerment, however, what is lacking in terms of figures is the projected impact and number of opportunities that might arise in this respect so as to impact the country. A compelling case in projections would have been made out if figures of citizens likely to be empowered was submitted. For now, it remains difficult for the Authority to establish with certainty whether or not the intended empowerment will impact the country, as it stands, this is one of the necessary factors that if weighed with what currently obtains in the market would have painted a clear picture of the benefits. The benefits remain speculative because a comparison cannot be made against what IOC's claim to have been their contribution vis a vis the intended contribution by the Applicant.

DATED at Gaborone on this 8th day of May, 2018.

BERNARD NDOVE,
Chairperson of the Authority.

Public Notice

REPUBLIC OF BOTSWANA

NOTIFICATION FOR PUBLIC REVIEW OF AN ENVIRONMENTAL MANAGEMENT PLAN FOR CHITABE CAMP, NG 31

Notice issued in terms of section 10 of the Environmental Assessment Act, No. 10 of 2011, the major findings for the revised Environmental Management Plan (EMP) for Chitabe Camp are summarized below:

Nature and Magnitude of the Activity

Chitabe Camp in NG/31 zone 1 operated by Flamingo Investments (Pty) Ltd consists of a camp of 30 beds, main areas, kitchen, office, solar plant with backup generator and an above ground sewage treatment plant. The Chitabe main area and walkways are being refurbished due to age and condition of structures.

Location of the Activity

Chitabe Camp is located in NG/31 at: 19°31'38.03"S & 23°22'37.09"E and is split into two separate main areas referred to as Chitabe Camp (16 beds) and Chitabe Lediba camp (14 beds). Nearest settlement is Maun 80km away by road.

Anticipated Environmental impacts of the Activity and proposed mitigation measures

The environmental impacts and mitigation measures identified by the EMP study are presented in detail in the full report and summarised in the table below.

Project Phase	Environmental Impact	Mitigation measure/Enhancement
Pre-Construction and Construction Phase	Vegetation clearing	Ensuring minimal clearing of vegetation only, design of buildings around trees
	Unsafe conditions for wildlife	Staff and equipment to be on site. No unsafe infrastructure to be left unattended.
	Air Pollution (Dust)	Construction vehicles should maintain a maximum speed of 40 km/hr
	Littering from construction materials	All materials transported on trucks must be secured to avoid spillage.
	Pollution by hazardous substance spills	Hazardous substances should be secured and handled in accordance with the international standards and legal requirements.
	Soil pollution	Construction staff to use bunded areas to avoid contamination from spilt fuels and oils. Proper maintenance of all machinery to minimise fuel leaks.
	Noise pollution	Operations must be carried out during the daytime to minimize noise disturbance. Construction staff to keep noise levels down during construction.
Operational Phase	Pollution from electrical consumables	Staff education on correct disposal of electrical equipment and consumables, damaged batteries suitably packed and returned to disposal facility in Maun.
	Pollution from servicing of vehicles	All consumables to be disposed of in solid waste stream. Used oils containerised and returned to Maun for proper disposal with registered oil disposal company.
	Pollution of surrounding soil and or groundwater.	Ensure waste is correctly handled and stored in contained waste management and storage area.
	Pollution: Noise, dust, exhaust emissions	Correct maintenance on vehicles. Slow driving speeds enforced.
	Bush fire outbreak	Firebreaks to be maintained around all facilities. Fire fighting equipment to be available on site at all times. Staff to be trained and provided with adequate equipment at fire stations.

Project Phase	Environmental Impact	Mitigation measure/Enhancement
Decommissioning Phase	Unsafe conditions for wildlife	Staff and equipment to be on site. No unsafe infrastructure to be left unattended.
	Scarring, soil erosion, pollution	All components and waste generated to be removed to Maun landfill. Building footprints to be ripped and allowed to naturally regenerate.

Conclusions and Recommendations of the study

Regular internal audits should continue being conducted by the Environmental Department of Wilderness Safaris. Recording of audits, findings and rectification measures where applicable are essential. The proposed mitigation measures during the, construction, operation and decommissioning phases reduce the potential environmental impacts to a level of low environmental significance. Delegation of mitigation and monitoring responsibilities to specific personnel is crucial to the success of the EMP. Implement Road Users Code of Conduct as part of managing vehicle impacts. Train staff regarding the handling, storage and disposal of hazardous materials and the procedures in case of spills and accidents. Ensure regular maintenance of grease traps and oil traps. It is recommended that the EMP is embedded as part of the contract between any contractor and the project developer and that a copy of the EMP is shared with each contractor prior to any development or construction taking place. Good record keeping, and the regular assessment of records by management will also assist in recognising potentially negative patterns as they emerge, enabling swift mitigation action.

Environmental Management Plan Placement

Department of Environmental Affairs (Maun)

Written comments or objections from those likely to be affected by the project and other interested persons should be submitted to the Department of Environmental Affairs, within four weeks of the date of the first issue of the notice.

Correspondences

All correspondences should be addressed to: The Director, Department of Environmental Affairs, P. O. Box 35, Maun, Telephone No. 6801237, Fax No. 6862503 or hand-delivered to DEA Office, Mophane Road, Maun – next to Motovac.

Public Notice

REPUBLIC OF BOTSWANA

Notice issued in terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT STATEMENT (EIS) FOR:
Baines' Camp in NG/32 Zone 1

The major findings of an Environmental Impact Study (EIS) undertaken for the proposed development of additional guest rooms and the operations of Baines' Camp in NG/32 Zone 1.

Nature and Magnitude of the Activity

Sanctuary Retreats propose to increase the capacity of Baines' Camp from 10 to 12 beds through the addition of one new guest room developed to the north-east of the line of the existing guest units. This unit will be constructed to the same design and specification of the existing guest units with raised wooden deck flooring, adobe walls and a thatch roof. Additional front of house developments will include an extension to the decked dining area, a covered interactive kitchen and a new management office and curio shop. Additionally, all concrete (approximately 50m³) in non-approved locations will be removed which will necessitate the rebuilding of staff accommodation units as well as the guest kitchen and laundry. All developments follow the recommendations of the NG/32 Management Plan.

Rationale for the Project

Baines' Camp is a small and exclusive safari camp, with just 10 beds, located in Management Zone 1 of the NG/32 concession and provides access to some of the Delta's best wildlife. The NG/32 Management Plan of 2013 makes provision for the existing Baines' Camp to increase its current footprint by two (2) beds, giving a total of 12 beds. The formal lease agreement requires Sanctuary Retreats to undertake these developments.

Location of the Activity

Baines Camp is located in the north of the NG/32 concession at -19.581658, 23.217291 (decimal degrees, WGS 84) close to the boundary with the Moremi Game Reserve. It overlooks the channels associated with the Boro River. All guest activities occur within Zone 1 of NG/32.

Anticipated Impacts and Proposed Mitigation Measures

The environmental impacts and mitigation measures identified by the EMP study are presented in detail in the Environmental Impact Statement (EIS) and summarised in the table below. A detailed Environmental Management Plan to help manage and monitor potential impacts is included in the EIS.

Environmental Impact**Proposed Mitigation / Enhancement Measures****Project Phase: Pre-Construction and Construction****Physical and Chemical impacts**

Air contamination and dust creation	Ensure all vehicles are well maintained and keep usage to a minimum to reduce emissions.
	Use the designated transport route for the movement of all materials.
Soil compaction and erosion	Limited removal of vegetation, apart from where absolutely necessary, and rehabilitate affected areas.
	Use the designated transport route for the movement of all materials and existing pathways within camp.
Biological and Ecological Impacts	Ensure drivers read, sign and abide by the code of conduct.

Vegetation destruction

Limit removal of vegetation, apart from where absolutely necessary, and rehabilitate affected areas.

Wildlife habitat alienation

Switch off all machinery and vehicles when not in use and keep noise levels down.

Restrict development activities to the development site and limit impact on the surrounding area.

Sociological and Cultural Impacts

Disease transmission

Education of staff and visitors on dangers of disease transmission
Ensure supply of condoms is available.

Noise pollution

Ensure generator is sound proofed and only run generator when necessary.
Minimise use of vehicles and machinery unless absolutely necessary.
Restrict construction activities to daylight hours only.

Visual impact

Developments to be incorporated within the surrounding vegetation to ensure natural look is maintained.

Decor should be subtle and suitable for the bush.

Project phase: Operation

Physical and Chemical impacts

Soil contamination

Re-fuelling/oiling/servicing of construction/maintenance of equipment to occur on bunded surface.

Storage of solid waste in secure bunded area, with regular removal to nearby landfill or recycling centre.

All liquid waste to be treated using the above-ground liquid waste treatment plant.

Soil compaction and erosion

Use the designated transport route for the movement of all materials and existing pathways within camp.

Rehabilitate areas where necessary.

Ensure drivers read, sign and abide by the code of conduct.

Biological and Ecological Impacts

Wildlife habitat alienation

Limit footprint of camp and extent of camp activities.

Use of local natural resources

Limit size and extent of camp activities and ensure all firewood is collected from areas outside of the National Park with varying collection locations.

Ecological monitoring

Improved wildlife monitoring through compliance with Standardised Wildlife Monitoring Protocols.

Sociological and Cultural Impacts

Disease transmission

Education of staff and visitors on dangers of disease transmission.

Ensure supply of condoms is available.

Fire

All machinery/vehicles/ appliances regularly serviced and turned off when not in use.

Fire extinguishers and hoses to be positioned around camp with staff trained in fire-fighting and prevention.

Economic and operational

Employment

Permanent staff to be employed from the local communities with trickle down benefits.

Project Phase: Decommissioning

Physical and Chemical impacts

Soil and surface water contamination

Ensure all septic tanks and fuel tanks are completely emptied prior to removal to prevent spills.

Storage of solid waste in secure bunded area, with regular removal to nearby landfill or recycling centre.

Soil compaction, erosion and dust creation

Limited removal of vegetation, apart from where absolutely necessary and rehabilitate affected areas.

Use the designated transport route for the movement of all materials from camp.

Ensure drivers read, sign and abide by the code of conduct.

All waste to be stored securely on site prior to transportation to Maun for disposal/recycling.

Ensure all waste is covered on vehicles to prevent waste falling during transportation.

Solid waste / litter pollution

Switch off all machinery and vehicles when not in use and keep noise levels down.

Rehabilitate the camp footprint following decommissioning.

Biological and Ecological Impacts

Wildlife habitat alienation

Vegetation destruction	Limit removal of vegetation wherever possible and make efforts to rehabilitate roads no longer used.
Vegetation change	Identified alien species removed.
Wildlife problem animals	Ensure that animals do not gain access to any unnatural food or water sources that are present as a result of the camp's decommissioning. Ensure all solid waste is stored securely to prevent wildlife access.
Fire	All machinery/vehicles/appliances regularly serviced and turned off when not in use. Fire extinguishers and hoses to be positioned around camp with staff trained in fire-fighting and prevention.
Sociological and Cultural Impacts	
Disease transmission	Education of staff and visitors on dangers of disease transmission. Ensure supply of condoms is available.
Noise disturbance	Ensure generator is sound proofed and only run generator when necessary. Minimise use of vehicles unless absolutely necessary.
Economic and operational	
Financial costs of decommissioning	Operator to ensure sufficient budget available to fully decommission and rehabilitate camp.
Employment	Decommissioning staff to be employed from the local communities to create short-term benefits.

Conclusions and Recommendations of the Study

The consultants recommend that the proposed developments at Baines' Camp go ahead according to the proposed plans and recommendations as laid out in the EIS. The proposed developments will use only semi-permanent materials (canvas, timber, thatch, adobe walls) and will also involve the removal of significant quantities of concrete. The proposed developments will maximise the potential for the site whilst also rationalising the current site and ensuring a reduced future impact at the time of decommissioning. As with all projects there are a number of impacts that will need mitigation. In this project they include: the risk of soil erosion and compaction through use of machinery and supply trucks, risk of air and noise pollution from machinery use, risk of vegetation destruction and wildlife disruption from activity on the sites and risk to staff of working in extreme wilderness areas. The EIS provides detailed Impact identification, Mitigation strategies and Monitoring Plans for all phases of the project which the construction team and operator should follow during both the construction and operational phases and operation of the camp.

Environmental Impact Statement Placement

Copies of the EIS can be reviewed at the following locations:

Department of Environmental Affairs, Maun office

Customary Court, Boro

Customary Court, Daonara

Written comments or objections from those likely to be affected by the project and other interested persons should be submitted to the Department of Environmental Affairs on or within four (4) consecutive weeks from the first appearance of this notice.

Correspondences

All correspondences should be addressed to: The District Environment Coordinator, Department of Environmental Affairs, P.O. Box 35, Maun and Telephone No. 6801237, Fax Nos. 6862503 or 6801246 or hand-delivered to: Department of Environmental Affairs, Maun Office, Plot No. 527, Light Industrial near to Motovac.

Public Notice

REPUBLIC OF BOTSWANA

Notice issued in terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

**NOTIFICATION FOR PUBLIC REVIEW OF AN ENVIRONMENTAL IMPACT STATEMENT (EIS) FOR
RIVER SAND EXTRACTION IN RAKABESWA RIVER AT RAKABESWA VILLAGE**

The major findings of an Environmental Impact Assessment (EIA) Study undertaken for the proposed river sand extraction are summarised hereunder.

Nature and Magnitude of the Activity

Mr Bernard Sejakgomo is currently undertaking the Environmental Impact Assessment for extraction of river sand at Rakabeswa River in Rakabeswa in Central District. The proposed area measures about 0.01 km². Sand extraction is estimated to last for 3 years with probabilities of extension.

Rationale for the project

The material will be used for commercial (construction) purposes and supplied to the residents and other nearby villages for construction purposes.

Location of the Activity

The proposed project is located at Rakabeswa River at Rakabeswa village in the Central District.

Anticipated Environmental impacts of the Activity and proposed mitigation measures to respond to the negative environmental impact

The environmental impacts and mitigation measures identified by the EIA study are presented in detail in the Environmental Impact Statement (EIS) and summarized in the table below. A detailed Environmental Impact Assessment to help manage and monitor potential impacts is included in the EIS.

CONSTRUCTION PHASE

Environmental impact	Mitigation
Loss of vegetation	Clearing should be limited to the area required for mining activities. No mining activities will occur within the 2m distance from the river bed as per the Department of Mines Regulations. This will ensure the protection of the river bank from slumping.
Creation of access road	Limit clearance of vegetation for the access road to the proposed site
Recruitment of workers	As much as possible residents of Rakabeswa area should be considered when recruiting labour.

OPERATION PHASE

Soil erosion

All disturbed slopes must be stabilized immediately to prevent erosion and safety risks.

Excavation activities should be limited to the proposed site.

Progressive rehabilitation should always be undertaken to avoid degrading the river bed

Increase in ambient noise levels

All equipment should be maintained to ensure quieter running/operation.

Speed limits of 40km/hr along the haul route should be enforced to attenuate noise from the haul vehicles that would be plying the access roads including the A1 Road.

Workers should make use of hearing protectors

Reduced air quality	Workers should be provided with adequate protective clothing including nose masks. Adequate dust restraining measures including sprinkling of water should be regularly done. Hauling trucks should be covered as per directive from the Department of Waste Management and Pollution Control to prevent air pollution by dust.
Waste generation and disposal	At least one waste receptacle with a lid should be provided on site. At least one portable flush chemical toilet should be provided on site.
Potential soil, surface and ground water pollution	Portable spills containment and clean up equipment should be provided at the mining site. In the event of accidental spill, the contractor should expedite the clean-up of the area to prevent spread of the pollutant. All fuel, lubricants and hydraulic oil should be stored in clearly marked containers with lids.
Potential archaeological finds	Prior to site preparation and excavation activities, the project archaeologist should sensitise the contractor and employees on the possibility of chance finds and educate them on what to do in the event of such sightings. In the event of any chance findings the Department of National Museum and Monuments should be informed immediately.
Soil and water pollution	DECOMMISSIONING Proper maintenance of all equipment used during decommissioning. All holes to be filled with soil and compacted after all has been completed.
Vegetation regeneration after rehabilitation	Restoration should be done immediately after completion.

Conclusions and Recommendations

The conclusion from the findings of the EIA is that the benefits of the proposed sand mining outweigh the disadvantages as the project will provide sand for construction purposes to the residents and other surrounding areas. Therefore, the consultant recommends that the project be allowed to proceed with appropriate implementation of the mitigation measures recommended.

Environmental Impact Statement Placement

Public Notice

REPUBLIC OF BOTSWANA

Notice issued in terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT STATEMENT (EIS) FOR
PROPOSED GRAVEL MINING BURROW PIT AT MMATSHIPA NEAR OODI

The major findings of an Environmental Impact Assessment (EIA) Study undertaken for the proposed gravel mining project in Mmatshipa near Oodi are as summarized hereunder.

Nature and Magnitude of the Activity

The project proponent, Peter Ramosako intends to mine and supply about 145 000 tonnes per annum of the gravel aggregate for a period of 2 years. Open pit mining method will be used which will have a depth not exceeding 2.6m in an environmentally friendly and a socially acceptable manner. Front end loaders and tipper trucks will be used to extract the gravel from the area and transport it in a safe manner to demand centres within the greater Gaborone area.

Location of the Activity

The proposed borrow pit site is located at Mmatshipa Lands. The site is about 2km to the north east of the junction of A1 road and the Oodi road in the Kgatleng District.

Anticipated Impacts and Proposed Mitigation Measures

The environmental impacts and mitigation measures identified by the EIA study are presented in detail in the Environmental Impact Statement (EIS) and summarized in the table below. A detailed Environmental Management Plan which comprise both the Mitigation Plan and the Monitoring Plan to help manage and monitor potential impacts is included in the EIS.

Project Phase	Potential Impacts	Mitigation Measures
Air pollution by dust	Pre-construction, construction and post construction	Workers should be provide with masks and it should be ensured that they are used always. Water trucks to control dust on haul roads or access roads should be used to sprinkle water on haul roads.
Noise pollution	Pre-construction, construction and post construction	Normal working hours should be adhered to, they should be from 0600 hours to 1800 hours. Noise from trucks should not exceed 85Db,(decibel) as stipulated by the mines department. Machinery should be fitted with silencers to keep the noise at minimal levels. Hearing damage may occur if it is continuous for about 8 hours. Prior to any activity that may cause unwanted noise; residents of nearby villages and livestock owners near the proposed site should be informed of the activity. Workers are to be provided with ear plugs.

Contamination due to oil spillages	Pre-construction, construction and post construction	<p>Use of vehicles and machines in good working conditions and the use of a single offsite fueling point will ensure that hydrocarbon spillages are minimized both on site and along haulage roads.</p> <p>A rubber mat should be placed at fueling point as a base for the fuel tanks to be placed on for the machinery to park on as they fuel up in case they are spillages, the mat will be a barrier to prevent fuel from contacting the soil.</p> <p>If the vehicles breaks down along hauling route, a plastic cover must be placed below the vehicle during minor maintenance of that to prevent the spilling oils contacting the ground. A container must also be used to collect the draining oil. Major maintenance must be done at the workshop by touring or loading the truck and transporting it to the workshop.</p> <p>Water should be sprinkled on the ground to prevent erosion where there is a lot of movement of machinery and to make the soils on the sides of the road to settle to prevent vehicles getting stuck.</p> <p>Haulage route from the site up to the tarred road must be strictly followed, no diversions, this is to ensure that the effect of soil compaction is restricted to the project site and designated haulage route only.</p> <p>Harrowing of the soils at the haulage routes and at the project site once a month will mitigate against the soils being permanently compacted. This will at the end of the project improve vegetation growth as the land recovers.</p> <p>Fencing of the pit to prevent movement of animals into the pit.</p> <p>Draining the water in the pit every day to use the water for the suppression of dust at the project site and on haulage routes.</p> <p>Work area procedures and road transport safety need to be strictly followed in order to obviate the risk of accidents.</p> <p>Safety induction of the workers will be done when they are employed, and safety meetings will be conducted every week.</p> <p>Personal protective equipment will be issued to every employee before they commence with work.</p> <p>Safety signs must be mounted on every machinery that might cause danger if precautions are not followed.</p> <p>Disciplinary action must be taken to any employee who does not follow safety precautions.</p> <p>Works should be provided with protective clothing and it should be ensured that they are used always when on site.</p> <p>Condoms must be availed on site to employees as well as public education on health to be embarked upon.</p> <p>There is need to raise awareness of both the local community and the construction workers about dangers of casual relationships through intensive education campaigns/sessions. Condoms should be made available to workers.</p> <p>First aid kit stocked with medical supplies should always be on site to cater for any emergencies that might arise.</p> <p>The top soil that is removed should be piled aside appropriately so that it can be used during decommissioning for the areas aesthetics to improve.</p> <p>Revegetation of the land must be done during the rehabilitation.</p>
Increased potential soil erosion	Pre-construction, construction and post construction	
Disturbance of soil structure	Pre-construction, construction and post construction	
Spread of animal diseases	Operation	
Occurrence of accidents	Pre-construction, construction and post construction	
Spread of diseases among employees	Pre-construction, construction and post construction	
Destruction of aesthetic appearance of the landscape due to land alteration	Pre-construction, construction	

Loss of vegetation	Pre-construction	Clearing of vegetation should as much as possible be limited to the project site Movement of excavation machinery must be limited to the fenced site only. Re vegetation must be done at the end of the project.
Destruction of items or object with archaeological/cultural/historical significance.	Pre-construction, operation	Close monitoring must be done by an archaeologist during the ground breaking up to the depth of 2m of excavation. If any item of archaeological significance is discovered during mining, the mining activities must be stopped immediately and inform DNMM.
Increased employment opportunities	Pre-construction, operation	As much as possible locals from Oodi Matebeleng should be considered when recruiting labour during the operational phase of the project.
Added impetus to the economy	Pre-construction, operation, operation, post operation	Locals must be given employment priority. The pit employees must source food services and accommodation from the project village.

Conclusions and Recommendations of the Study

The proposed pit sand and gravel mining project will have both positive and negative environmental impacts at local and regional levels. Following the undertaking of the detailed EIA Studies for the project on the area it is recommended that the project be allowed to proceed with appropriate implementation of the mitigation measures recommended

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in terms of Section 10 of the Environmental Assessment Act No.10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF AN ENVIRONMENTAL IMPACT ASSESSMENT (EIA) FOR THE PROPOSED CONSTRUCTION AND OPERATION OF BOBBSIE'S POULTRY FARMING, POULTRY ABATTOIR, AND WASTE WATER TREATMENT PLANT AT FARM NO.37OQ, TSHESHEBE VILLAGE, NORTH EAST DISTRICT, BOTSWANA.

The major findings of an Environmental Impact Assessment (EIA) study undertaken for the proposed construction and operation of Bobbsie's poultry farming, abattoir and waste water treatment plant are summarised hereunder:

Nature and Magnitude of the Project

The project entails construction and operation of Bobbsie poultry farming, abattoir and waste water treatment at farm 37 OQ in the North East District. The existing Poultry farming (breeding) section covers a total area of 3,840m² and the proposed site to be developed into a Waste Water Treatment Plant measures 7500m². The proposed site has been developed before and it is located on freehold farm near Tshesebe Village.

Location of the Activity

The proposed project site is situated in Tshesebe village, Farm No. 37OQ in the North East District, Botswana.

Anticipated Environmental impacts of the Activity and Proposed Mitigation Measures

A summary of major findings of the study associated with the implementation of the proposed project together with the mitigation measures proposed to respond to the negative environmental impacts are presented hereunder.

Environmental Component/ Impact	Project Phase	Proposed Mitigation/Enhancement Measures
Environmental Aspects		
Employment	Pre-Construction	The management must make use of local labour as much as possible in order to stimulate the socio-economic status of the local population around North East District especially around Tshesebe and surrounding villages. Hire locals for unskilled and semi-skilled labour.
Environmental awareness	Pre-Construction	All the employees should be sensitized on environmental issues and the significance of environmental protection.
Air pollution	Construction	Adequate dust suppressant measures including regular sprinkling of water especially on loose soil. Movement of construction vehicles should be controlled in order to reduce the impact of increased dust pollution. All construction haul trucks should be covered as per directive from Department of Waste Management and Pollution Control to prevent dust generation and materials from falling on the road during transportation. No burning of waste should take place onsite. Ensure that all machinery are switched off when not in use to avoid unnecessary noise and environmental pollution.
Noise pollution and vibrations	Construction	Workers should be provided with ear plugs and mufflers to minimise the impact of noise.

Land pollution	Construction	<p>Skips and bins covered for waste collection should be strategically placed around the construction site.</p> <p>Adequate mobile chemical toilets by licensed waste management companies should be made available to cater for workers while on site which should be disposed off at least twice a week depending on the frequency of use.</p> <p>In the case of accidental spillages all contaminated soil must be removed to avoid surface water contamination. Do not leave cement bags, paint containers, plastics etc. lying around the premises.</p> <p>Collect and store waste in designated areas such as skips/ bins/ transfer stations.</p>
Increased waste generation and improper waste disposal	Construction	<p>Employees should be trained on use of equipment to avoid human injuries.</p> <p>Monitor unauthorized movement of the construction crew.</p>
Human injury	Construction	<p>Fire training and evacuation procedures will need to be inculcated in the workforce.</p> <p>Fire Extinguisher and Fire Hydrants at the premises should be provided.</p> <p>Warning signs at the construction site and during operation should be erected.</p> <p>Display emergency contact numbers for Fire Department and the Police.</p> <p>Fire Assembly Point at the premises should be visible.</p>
Potential Fire risk and Explosion at the premises	Construction/Operation	<p>Use recycled water for landscaping purposes.</p>
Increased water demand	Construction	
Social Aspects		
Potential spread of diseases, social disruption and work related injuries	Construction/Operation	<p>Health issues including HIV/AIDS and safety education should be provided to all workers on the project site at least on a monthly basis for the duration of the construction phase.</p> <p>At least one First Aid Box stocked to the specifications as prescribed in the Factories Act Regulations should be readily available on site all the time.</p> <p>Protective clothing should be provided to all staff that would be employed at the construction site.</p>
Threat to Public Health	Construction/Operation	<p>Educate the construction crew on food hygiene.</p> <p>Encourage the construction crew to handle and prepare food in a hygienic manner.</p>
Increased crime	Operation	<p>Access into the premises must be controlled. Rights of admission should be reserved.</p>
Boosting the local economy	Operation	<p>Developer to adhere to government regulations on operation of the factory.</p>
Provision of good quality poultry products	Operation	<p>Developer to adhere to Botswana Bureau of Standards government regulations on operational standards of the factory.</p>

Conclusions

The project will have both positive and negative impacts. Overall the positive impacts outweigh the negative ones in view of the fact that the overall goal of the project is to construct and operate a Poultry Farm, Abattoir and Waste Water Treatment Plant at Tshesebe Farm No 37 OQ in the North East District. It is important to note that the poultry farming (breeding) and the abattoir are existing and operational. Moreover the identified potential negative impacts can be mitigated as indicated in the mitigation plan.

The absence of archaeological remains during field study does not mean that such remains cannot be found during

development activities such as excavation of foundations, clearing and others. If archaeological remains are found during development, the Department of National Museum and Monuments should be informed immediately

Recommendations

Following the undertaking of the Environmental Impact Assessment (EIA) for the proposed project, it is recommended that the project be allowed to proceed with due implementation of all recommended mitigation measures.

Environmental Impact Statement Placement

Copies of the EIS have been placed at the following locations for review by the general public and Interested and Affected Parties (IAPs):
Department of Environmental Affairs (Francistown).
Rural Administration Centre (Masunga)
Tshesebe Kgotla.

Correspondence

All correspondences should be addressed to: The District Environmental Coordinator, Department of Environmental Affairs, Private Bag F020, Francistown, and Telephone No. 2417108, Fax No. 2417130 or hand-delivered to DEA offices Nos: 2.109, 2.110 and 2.111, Plot No. 1271, First Floor- Ntse House Building.

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in terms of Section 10 of the Environmental Assessment Act No.10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF THE ENVIRONMENTAL MANAGEMENT PLAN (EMP) FOR PROPOSED OPERATION OF A MEDICAL HOSPITAL WITH A BIOLOGICAL SHREDDER ON PLOT 424 BAINES AVENUE, CITY OF FRANCISTOWN.

The major findings of an Environmental Management Plan (EMP) study undertaken for the proposed operation of a Medical hospital with a biological shredder are summarised hereunder:

Nature and Magnitude of the Project

The project entails the Operation of a Medical Hospital with a Biological Waste Shredder in Central Ward Plot No. 424 Baines Avenue, in the City of Francistown. The facilities that are under consideration are The Biological Waste Shredder, The Laboratory, The X-Ray Unit and The Kidney Dialysis Unit.

Location of the Activity

The proposed project site is situated Central Ward Plot No. 424 Baines Avenue, in the City of Francistown.

Anticipated Environmental impacts of the Activity and Proposed Mitigation Measures

A summary of major findings of the study associated with the implementation of the proposed project together with the mitigation measures proposed to respond to the negative environmental impact assessment are presented hereunder.

Environmental Component/ Impact Environmental Aspects	Project Phase	Proposed Mitigation/Enhancement Measures
Employment	Operation	Locals should be given priority when employing the both skilled and semi-skilled force. Advertise professional jobs on local newspapers. Job Adverts should be placed at public places like Donga Kgotla.
Environmental awareness	Operation	All the employees should be sensitized on environmental issues and the significance of environmental protection.
Boosting the local economy	Operation	The Developer to adhere to government regulations on operation of a shredder and other hospital units.
Increased crime (house break-ins/ robbery)	Operation	Access into the premises must be controlled. Rights of admission should be reserved.
Threat to Public Health	Operation	Proper waste management system to be put in place.
Human injury	Operation	Employees should be trained on use of equipment to avoid human injuries. Only competent personnel should be allowed to use equipment.
Noise pollution and disturbance	Operation	There is virtually no noise of significance the machines are designed to be of low level noise.
Increased waste generation and improper waste disposal	Operation	Provide adequate refuse skips/bins on site for proper solid waste disposal. Educate business owners and promote proper waste disposal even to the customers.

Fire risk and explosion	Operation	<p>Fire training and evacuation procedures will need to be inculcated in the workforce.</p> <p>Fire Extinguisher and Fire Hydrants at the premises should be provided.</p> <p>The fire extinguishers must functional at all the times, ensure regular service.</p> <p>Display emergency contact numbers for Fire Department and the Police.</p>
-------------------------	-----------	---

Conclusions

The other facilities namely Dialysis Unit, Laboratory and X-ray Unit are already functioning at optimal levels under a robust hospital management policy and the shredder will complement these facilities to ensure desired high service.

The project will have both positive and negative impacts. Overall the positive impacts outweigh the negative ones in view of the fact that the overall goal of the project is to operate a modern shredder and other hospital facilities. Moreover the identified potential negative impacts can be mitigated as indicated in the mitigation plan.

Recommendations

Following the undertaking of the Environmental Management Plan (EMP) for the proposed project, it is recommended that the project be allowed to proceed with due implementation of all recommended mitigation measures.

Environmental Impact Statement Placement

Copies of the EMP have been placed at the following locations for review by the general public and Interested and Affected Parties (IAPs):

Department of Environmental Affairs (Francistown).

City of Francistown Council

Correspondence

All correspondences should be addressed to: The District Environmental Coordinator, Department of Environmental Affairs, Private Bag F020, Francistown, and Telephone No. 2417108, Fax No. 2417130 or hand-delivered to DEA Offices Nos. 2.109, 2.110 and 2.111, Plot 1271, First Floor-Ntse House Building.

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in Terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011**NOTIFICATION FOR PUBLIC REVIEW OF THE DETAILED ENVIRONMENTAL IMPACT ASSESSMENT (EIA) AND ENVIRONMENTAL MANAGEMENT PLAN FOR THE PROPOSED GOODHOPE SUB DISTRICT WATER SUPPLY AUGMENTATION SCHEME PHASE II**

Pursuant to Section 10 of the Environmental Assessment (EA) Act No.10 of 2011 the public notice hereby presents major findings of the EIA/EMP Study for the proposed Goodhope Sub District Water Supply Augmentation Scheme Phase II.

Nature and Magnitude of the Activity

The proposed project entails construction of a total of 246km of water pipeline constituted by disjoint sections between the target villages; the longest section occurs between Pitsane and Sekhutlane and runs through the villages along the Botswana and South African border i.e. Rakhuna, Ramatlabama, Hebron, Phihitshwane, Ditharapa, Mokatako, Phitsane-Molopo, Lepurung, Mmakgori, Tshidilamolomo and Mabule; the other sections connects villages in the sub-district interior i.e. Metlobo, Tswaaneng, Sedibeng, Mokgomane, Metlojane, Magoriapitse and Mmathethe and smaller sections between Lorwana and Mogojwagojwe and Lorwana and Gopong. A total of twenty-one (21) galvanized steel elevated Storage Tanks will also be constructed as per the number of main supply villages i.e. Sekhutlane, Mabule, Tshidilamolomo, Mmakgori, Lepurung, Phitsane-Molopo, Mokatako, Ditharapa, Phihitshwane, Hebron, Ramatlabama, Rakhuna, Metlojane, Magoriadipitse, Mmathethe, Mokgomane, Sedibeng, Tswaaneng, Metlobo and Mogojwagojwe, Gopong. The proposed pipelines will terminate at the respective storage tanks. The project also includes construction of two Booster Stations at Bethle and Phitshane Molopo.

Rationale for the Project

Goodhope Sub District has experienced rapid development since the last water demands projection in 2007, and currently water demand far exceeds supply. Therefore, the initial designs and forecasts have been revisited and it has been realized that not only demand has increased, but the network coverage also needs to be upgraded to include new buildable areas. A number of concerns in some of the Sub-District localities such as inadequate water supplies in Lorwane, Phitshane Molopo, Pitsane, Hebron and Mabule, poor water quality at Mokgomane and prolonged borehole pumping especially at Ramatlabama have necessitated that water be sought from external sources. Through this project the Proponent intends to link the current system after upgrading, to the North-South Water Carrier so as to service other villages in the Sub District beyond Goodhope.

Location of the Activity

The project area covers the main centers in Goodhope Sub-District and their localities. These villages which are linked by a network of tarred and gravel roads include; Sekhutlane, Mabule, Tshidilamolomo, Mmakgori, Lepurung (Sekwerenyane), Phitsane-Molopo, Mokatako, Ditharapa (Molete), Phihitshwane, Hebron (Borobadilepe, Logagane and Marojane), Ramatlabama (Matlasalalo, Papatlo, and Makokwe), Rakhuna (Ngwatsau), Metlojane (Madingwane and Tswaaneng), Magoriadipitse (Kangwe), Mmathethe, Mokgomane (Mosi), Sedibeng, Tswaaneng, Metlobo, Mogojwagojwe and Gopong.

Anticipated Impacts and Proposed Mitigation Measures

Environmental Component/ Impact	Project Phase	Proposed Mitigation/Enhancement Measures
Biophysical Aspects		
Soil erosion	Construction	<p>Access routes must be defined and all trucks and equipment confined to the routes to prevent proliferation of unnecessary tracks.</p> <p>Provide gabion inflow protection to create a stable transport of concentrated runoff down steep slopes to prevent channel erosion.</p> <p>Continually wet the work sites to minimize wind induced erosion.</p> <p>Rip sloppy areas to reduce run-off speed.</p> <p>Stabilize bare soils on the site by constructing retaining walls.</p>
Soil contamination	Construction/Operation	<p>Re-fuelling must take place in a designated area properly designed to contain hydrocarbon spillages.</p> <p>Spill kits to clean up accidental spills from earthmoving machinery must always be available on site.</p> <p>Workers must undergo induction to ensure that they are prepared for rapid clean-up procedures.</p> <p>Contaminated soil should immediately be collected and stored on impervious surface.</p> <p>Keep small amounts of lubricants on site to avoid large spillages.</p>
Surface and Groundwater Pollution	Construction	<p>Hydrocarbon spillage should be attended to immediately and treated with an appropriate absorbent.</p> <p>Always use spillage trays for re-fuelling and oiling on site.</p> <p>All soils contaminated with oils/lubricants and fuels should be immediately scooped and stored on a paved and banded area, treated and disposed of at the nearest waste management facility.</p> <p>No fuel should be stored on site although fuelling strictly for heavy machinery may be allowable.</p> <p>Personnel should be trained on the proper clean up procedure.</p> <p>All hydrocarbon powered equipment should be parked on impervious surfaces to prevent soil pollution.</p> <p>Equipment should be regularly serviced to reduce leakages.</p> <p>Always avail hydrocarbon spillage cleaning kit on site to get rid of accidental spillages.</p>
Socio-Economy		
Local economic upliftment	Construction/Operation	<p>Sub construction should give preference to citizen owned SMMEs in line with Citizen Economic Empowerment Drive (CEDD).</p> <p>Goods and Services should be sourced locally where possible.</p>

Environmental Component/ Impact	Project Phase	Proposed Mitigation/Enhancement Measures
Employment creation	Construction/Operation	<p>Develop a recruitment strategy that takes into account locally available skills.</p> <p>Ensure that the recruitment procedure abides by the provisions of the Employment Act.</p> <p>Publicise job opportunities locally.</p> <p>Employ female to facilitate gender balance in the workforce.</p>
Increased Social Ills, HIV/ AIDS & Sexually Transmitted Infections	Construction	<p>Awareness should be raised to sensitise the construction crew who are foreign to the local communities to respect the preservation of family values and norms.</p> <p>Project specific CoC should be adhered to.</p> <p>Awareness should be raised amongst local communities on social ills that are likely to emerge due to interaction of locals with migrant workers.</p>
Public and Occupational Health and Safety		
Increased Prevalence HIV/ AIDS & Sexually Transmitted Infections	Construction	<p>Conduct continuous employee awareness about safe sex practices and provide free condoms to workers.</p> <p>Health posters educating people on diseases such as HIV/AIDS & STD's displayed at strategic places or entertainment joints in the project villages to sensitize inhabitants.</p> <p>Care and support to those living with HIV/AIDS.</p> <p>Provide sexual education to all crew members.</p> <p>Avail condoms to construction crew and encourage the use thereof.</p> <p>Engage the services of DMSAC and DHMT to fight against STI and HIV/AIDS.</p>
Possible Risks and Injuries to Workers Potential Injuries to Employees due improper operation of equipment and use of dynamite	Construction	<p>Employees must be provided with full PPE including masks.</p> <p>Induction of all new workers on site.</p> <p>Provide safety briefing for workers to Create awareness of risk factors.</p> <p>Promote safe working practices on site.</p> <p>Always provide first aid kit on site.</p> <p>Consistent servicing of equipment to ensure proper functioning.</p> <p>Induction of all visitors to construction site.</p> <p>Engage a registered Blasting Licence Holder for all blasting works.</p> <p>Avail the blasting protocol to all employees to create safety awareness.</p> <p>The community should be informed well in time on intentions to blast.</p> <p>A blast notification sign should be placed few hours before blasting for residents to avoid walking or driving near the affected area.</p> <p>Inspection of all properties likely to be affected by blasting and take pictures for evidence.</p> <p>All those affected should be compensated accordingly before project closure.</p> <p>Cushion sections to be blasted to minimize fly-rock.</p> <p>Engage a registered Blasting Licence Holder for all blasting works.</p>
Potential property damage, and compromised safety due to blasting	Construction	

Environmental Component/ Impact	Project Phase	Proposed Mitigation/Enhancement Measures
Traffic Related Accidents	Construction	<p>Truck drivers should be sensitized about road safety and the need to keep safety first especially when traversing public areas.</p> <p>Traffic warning signs must be placed strategically at road turn offs to warn other road users of on-going activities.</p> <p>Truck drivers to be briefed on road traffic rules and regulation.</p>
Dust Nuisance	Construction	<p>Haulage trucks should be covered to minimise fly stones and dust generated from haulage material.</p> <p>Provision of and compulsory use of PPE (nose masks and goggles) must be emphasised for onsite workers.</p> <p>Where practical especially close to homesteads wetting must be encouraged and stabilizing agents be employed to suppress dust.</p> <p>Vegetation clearance should be confined to areas required for the purpose of construction only.</p>
Noise Nuisance	Construction	<p>Operation of machinery and construction vehicles should be within normal working hours i.e. 6am to 6pm.</p> <p>The machinery and vehicles should be equipped with silencers to reduce noise.</p> <p>Employees exposed to noise should be provided with ear plugs.</p> <p>Give notification of blasting to encourage readiness by community.</p> <p>Provide cushioning to muffle the noise generated from blasting activities.</p>
Waste Management and Pollution Aspects		
Littering/Pollution from waste	Construction/ Decommissioning	<p>All waste should be disposed of at authorized waste management facilities.</p> <p>Place waste receptacles strategically on the site.</p> <p>Provide portable toilets and engage a licensed carrier for collection and disposal.</p>

Conclusions and Recommendations of the Study

The identified impacts are mitigable and the envisaged benefits if project is implemented out-weigh identified potential impacts. This notwithstanding, Department of Water Affairs needs to commit to the following :
Implementation of the provisions of the EIA/EMP in totality; and
Continued disclosure through on-going stakeholder engagement as outlined in the Public Disclosure Plan

Environmental Impact Statement (EIS) Placement

Copies of the EIS can be accessed at the following areas for review by the public:
Department of Environmental Affairs – Gaborone Office (www.eis.gov.bw)
Tribal Administration Offices in Sekhuthane, Mabule, Tshidilamolomo, Mmakgori, Lepurung, Phitsane-Molopo, Mokatako, Ditlharapa, Phibitshwane, Hebron, Ramatlabama, Rakhuna, Metlojane, Magoriadipitse, Mokgomane, Sedibeng, Tswaaneng, Metlobo and Gopong.

Correspondences

All correspondences should be addressed to: The Director, Department of Environmental Affairs, and enquiries regarding public review of this document may be lodged directly with DEA officers as per below by 15th June, 2018.

Public Notice

REPUBLIC OF BOTSWANA

NOTIFICATION FOR PUBLIC REVIEW FOR THE UPDATED ENVIRONMENTAL IMPACT STATEMENT FOR MORUPULE COAL MINE (MCM) PROCESSING PLANT EXPANSION

In compliance with Section 10 of the Environmental Assessment (EA) Act No 10 of 2011, the major findings of the updated Environmental Impact Statement for the above project are as summarised below:

Nature and Magnitude of the Activity

MCM currently operates a drum dense medium separation (DMS) processing plant with capacity of 1 mtpa for washing its coal. MCM had planned to expand this plant but did not do so due to coal market depression. Due to favourable coal markets, MCM intends to expand this plant in two phases as follows:

Phase 1 – installation of a semi-movable DMS drum plant of 1.0 mtpa operational capacity near the existing processing plant.

Phase 2 – installation of a cyclone DMS coal washing module of 1.5 mtpa operational capacity in close proximity to the existing processing plant. This phase will take a longer period to construct and commission and its development will be undertaken simultaneously with Phase 1 above.

The total increased capacity will be approximately 2.5 mtpa operational capacity. The installed capacity after expansion (including existing plant module) will total 3.5 mtpa. The expansion is entirely within the mine lease area, adjacent to the existing plant.

Rationale for the Project

The objective of the expansion is to increase the coal washing capacity for MCM, leading to an increased production of good quality coal for the Morupule Power Station, as well as other local and export markets. This project will increase revenue and foreign currency earnings for MCM, and ensure there is adequate coal for the power station.

Location of the Activity

The expansion project is within the Morupule Coal Mine lease area and adjacent to the existing operational processing plant. The mine is in the Central District of Botswana, in the outskirts of Palapye along the Serowe to Palapye road. The mine is approximately 280km north of Gaborone and approximately 14km west of Palapye in Eastern Botswana.

Anticipated Environmental Impacts and Proposed Mitigation Measures

The table below presents a summary of the impacts associated with proposed development together with the proposed mitigation measures for each, as per the project EMP.

Environmental Impacts Predicted Proposed Mitigation Measure

Negative impacts

Loss of vegetation

All areas to be cleared should be precisely demarcated. Bush clearing should only be carried out within the project footprint.

Construction vehicles must remain on the access roads and not drive in the un-cleared bush.

Removal of vegetation must not be carried out using herbicides, without the Department of Forestry and Range Resources approval.

Open fires must be prohibited and only allowed in fire permitted areas, as they can easily spread and destroy fauna habitats.

Risk of introduction of invasive and alien species

Regular monitoring for alien plant species as they may be introduced to the site through seeds transported on construction vehicles or machinery.

All construction vehicles and machinery brought to site must be cleaned using high pressure water sprays to remove seeds that may be attached or stuck to them.

Existing invasive species that may be identified during construction must be removed from the site.

Environmental Impacts Predicted
Loss, injuries and disturbance of fauna

Proposed Mitigation Measure

Excavations must be well barricaded to limit the possibility of fauna falling into them.

Employees must be inducted/trained on how to manage fauna and avifauna encountered on site.

Intentional killing and poaching of wildlife must be strictly prohibited.

Construction vehicle speed limits should be monitored and should not exceed 60km/h at the project site.

Possible soil contaminants found on site such as fuel, oils, and chemicals must be placed on concrete bases with bund walls or impermeable PVC lining, to avoid spillage on the soil.

Maintenance of construction machines and vehicles must be done regularly to prevent fuel spillages onsite and at a maintenance workshop with spillage containment and oil/water separators.

Coal and discard stockpile areas must be lined with adequately compacted calcrete to prevent vertical flow of contaminants. Toe drains must be put in place to collect runoff water from the stockpiles to a pollution control dam for treatment and reuse if necessary.

Soil contamination

Soil erosion

Ensure that damaged ground surface during site preparatory and construction works is rehabilitated swiftly, to avoid long term erosion risks.

Cleared areas no longer required for construction activities should be allowed to regrow with locally found grasses and shrubs in order to help stabilize the soil.

Construction vehicles must remain on the official access roads and not drive in the un-cleared bush, as this loosens the soil making it prone to soil erosion.

Unnecessary removal of vegetation must be avoided to minimise erosion problems.

Ensure fuels, lubricants and chemicals are stored on impermeable surfaces with bund walls to prevent any leakage or spillage to the environment, which can lead to water pollution.

Servicing of plant and equipment must be done at the dedicated workshop with a concrete base and equipped with oil/water separators to prevent contamination.

Routine maintenance of construction equipment must be carried out to avoid leakage of oil and lubricants from the construction machinery.

Coal and discard stockpile areas must have a base of adequately compacted calcrete to prevent vertical flow of pollutants.

Water quality must be monitored from the MCM boreholes and the Morupule River to check if mitigation measures used are effective.

Formulate and implement a water conservation strategy.

Reuse process water as much as possible.

Where possible, harvest storm water for use in coal processing.

To reduce dust generation, dampening (wet suppression) of the construction areas and haulage roads must be done regularly if construction works are carried out during dry seasons.

Gaseous emissions from site machinery and vehicles must be reduced by regular maintenance.

Implement speed restrictions for haulage trucks to minimise vehicle entrained dust.

Use noise control devices, such as temporary noise barriers and deflectors for high impact activities, and exhaust muffling devices and silencers for combustion engines.

Ensure equipment is well-maintained to avoid additional noise generation.

Surface and ground water contamination

Increased water use and demand at the study area

Air pollution

Increased ambient noise

Environmental Impacts Predicted**Proposed Mitigation Measure**

Risk of fire occurrence

All areas and equipment with flammable liquids must be provided with firefighting equipment.

Workers using the flammable substances must be well trained in order to prevent fire incidents.

Risk of employees developing respiratory diseases

A fire break should be maintained around the processing area, including coal and discard stockpile areas.

A respiratory protection programme must be put in place. This plan must include implementation of pre-employment, periodic, and post-employment medical screening and surveillance.

Increased waste generation

Adequate protective clothing and equipment must be provided to employees.

Use the designated waste holding areas at the mine for the waste from the site.

Waste produced from the site must be disposed at legal and licensed waste facilities.

Continue to use the current MCM waste management systems.

A health and safety management plan to be formulated and implemented for construction activities.

Development of an emergency response plan and provide adequate PPE.

Regularly indulge toolbox talks.

An archaeological induction with construction personnel must be conducted to inform on procedures to be followed in the event of an archaeological discovery.

Discovery of archaeological remains such as subsurface artefacts and archaeological sites must be reported to the BNMM immediately.

The acquisition of local labourers must be practiced.

Give equal opportunities to women during the employment process.

Implement the MCM HIV and AIDS policy for operational activities.

Occupational health and safety risks

Risks of disturbance of archaeological sites

Social impacts

Positive Impacts

Employment creation

Local hiring and training must be implemented where possible.

Increased power supply

Ensure sustainable utilisation of coal resources needed for electrical power generation.

Conclusion

Conclusions drawn from the Environmental Impact Study are that negative environmental impacts may arise as a result of the implementation of the project; the impacts are manageable and can be minimised by implementing the proposed mitigation measures. Positive impacts such as employment opportunities are also expected. Mitigation measures have been proposed to curb the adverse impacts and enhance the positive impacts of operation, and if correctly implemented, most of the identified negative impacts will be eliminated or minimised.

Recommendation

Following the undertaking of the Environmental Impact Study for the project, it is recommended that the project be allowed to proceed with due implementation of all the mitigation measures recommended.

Environmental Impact Statement placement

Copies of the detailed Environmental Impact Study have been placed at the following places for reviewing by the general public and the Interested & Affected Parties (IAPs).

Department of Environmental Affairs in Serowe

Palapye Kgotla

Palapye Library

Written comments or objections from those likely to be affected by the project and other interested persons should be submitted to: The District Environmental Coordinator, P O Box 0028, Serowe, Telephone No. 4630174, Fax No. 4631307 or hand-delivered to DEA office in Serowe by the 15th June, 2018.

Kitsiso

KITSISO MO SECHABENG, MABAPI LE NTSHAFATSO YA PEGO YA KAMEGO YA TIKOLOGO EE KA TSISIWANG KE KATOLOSO YA MADIRELO A MOEPO WA MCM3 KWA MORUPULE GO BAPA LE PALAPYE

Go diragatsa temana ya lesome (section 10) ya molao wa tshekatsheko tikologo mabapi le go dirwa ga dithabolo (Environmental Assessment Act No 10. Of 2011)

Kitsiso e e tsibosa sechaba le banaleseabe ka maduo a tshekatsheko tikologo e e dirilweng ke baitsaanape ba tikologo mabapi le tiro e e nankotsweng fa godimo:

Sebopego le bogolo jwa Ditiragalo

Moepo wa Morupule o ikaelela go atolosa madirelo a Drum Dense Media (DMS) a a tlhatswang magala a selekanyo sa 1mtpa. Tiro e kabo e sa bolo go dirwa mme ene ya busetswa morago ke go tlhoka go dira sentle ga mebaraka ya theko ya magala. Moepo wa Morupule o ikaelela go dira tiro e, ba simolola ka go aga pitsa e tlhatswanang magala ya selekanyo sa 1.0mtpa e latelwa key a selekanyo sa 1.5mtpa. madirelo a, a tla agiwa go bapa le a a setseng ale mo tirisong. Katoloso e, e tla bo e oketsa madirelo go ka ntsha magala a selekanyo sa 3.5mtp ka ngwaga.

Maikaelelo a Tlhabololo e

Maikaeleloa tiro e ke go oketse selekanyo sa madirelo a a tlhatswang magala ko MCM. Se se tla oketsa le go netefatsa gore moepo o ntsha magala a a nang le boleng go ka fetlha motlakase le go oketsa letseno mo moepong wa Morupule.

Lefelo la Ditiragalo

Tlhabololo e, e tla dirwa mo kgaolong ya Legare la Botswana, kwa ntle ga motse wa Palapye, mo bokone jwa tsela e tswang Palapye e ya Serowe. Moepo o bokgakala jwa 280km mo bokone jwa Gaborone gammogo le 14km mo bophirima jwa Palapye mo bothabatsatsi jwa lefatshe la Botswana.
