Public Notice

REPUBLIC OF BOTSWANA

NOTIFICATION FOR PUBLIC REVIEW OF AN ENVIRONMENTAL MANAGEMENT PLAN FOR CHITABE CAMP, NG 31

Notice issued in terms of section 10 of the Environmental Assessment Act, No. 10 of 2011, the major findings for the revised Environmental Management Plan (EMP) for Chitabe Camp are summarized below:

Nature and Magnitude of the Activity
Chitabe Camp in NG/31 zone 1 operated by Flamingo Investments (Pty) Ltd consists of a camp of 30 beds, main areas, kitchen, office, solar plant with backup generator and an above ground sewage treatment plant. The Chitabe main area and walkways are being refurbished due to age and condition of structures.

Location of the Activity
Chitabe Camp is located in NG/31 at: 19°31'38.03"S & 23°22›37.09»E and is split into two separate main areas referred to as Chitabe Camp (16 beds) and Chitabe Lediba camp (14 beds). Nearest settlement is Maun 80km away by road.

Anticipated Environmental impacts of the Activity and proposed mitigation measures
The environmental impacts and mitigation measures identified by the EMP study are presented in detail in the full report and summarised in the table below.

Project Phase	Environmental Impact	Mitigation measure/Enhancement
Pre-Construction and Construction Phase	Vegetation clearing	Ensuring minimal clearing of vegetation only, design of buildings around trees
	Unsafe conditions for wildlife	Staff and equipment to be on site. No unsafe infrastructure to be left unattended.
	Air Pollution (Dust)	Construction vehicles should maintain a maximum speed of 40 km/ hr
	Littering from construction materials	All materials transported on trucks must be secured to avoid spillage.
	Pollution by hazardous substance spills	Hazardous substances should be secured and handled in accordance with the international standards and legal requirements.
	Soil pollution	Construction staff to use bunded areas to avoid contamination from spilt fuels and oils. Proper maintenance of all machinery to minimise fuel leaks.
	Noise pollution	Operations must be carried out during the daytime to minimize noise disturbance. Construction staff to keep noise levels down during construction.
Operational Phase	Pollution from electrical consumables	Staff education on correct disposal of electrical equipment and consumables, damaged batteries suitably packed and returned to disposal facility in Maun.
	Pollution from servicing of vehicles	All consumables to be disposed of in solid waste stream. Used oils containerised and returned to Maun for proper disposal with registered oil disposal company.
	Pollution of surrounding soil and or groundwater.	Ensure waste is correctly handled and stored in contained waste management and storage area.
	Pollution: Noise, dust, exhaust emissions	Correct maintenance on vehicles. Slow driving speeds enforced.
	Bush fire outbreak	Firebreaks to be maintained around all facilities. Fire fighting equipment to be available on site at all times. Staff to be trained and provided with adequate equipment at fire stations.

Project Phase	Environmental Impact	Mitigation measure/Enhancement
Decommissioning Phase	Unsafe conditions for wildlife	Staff and equipment to be on site. No unsafe infrastructure to be left unattended.
	Scarring, soil erosion, pollution	All components and waste generated to be removed to Maun landfill. Building footprints to be ripped and allowed to naturally regenerate.

Conclusions and Recommendations of the study
Regular internal audits should continue being conducted by the Environmental Department of Wilderness Safaris. Recording of audits, findings and rectification measures where applicable are essential. The proposed mitigation measures during the, construction, operation and decommissioning phases reduce the potential environmental impacts to a level of low environmental significance. Delegation of mitigation and monitoring responsibilities to specific personnel is crucial to the success of the EMP. Implement Road Users Code of Conduct as part of managing vehicle impacts. Train staff regarding the handling, storage and disposal of hazardous materials and the procedures in case of spills and accidents. Ensure regular maintenance of grease traps and oil traps.
It is recommended that the EMP is embedded as part of the contract between any contractor and the project developer and that a copy of the EMP is shared with each contractor prior to any development or construction taking place. Good record keeping, and the regular assessment of records by management will also assist in recognising potentially negative patterns as they emerge, enabling swift mitigation action.

Environmental Management Plan Placement
Department of Environmental Affairs (Maun)
Written comments or objections from those likely to be affected by the project and other interested persons should be submitted to the Department of Environmental Affairs, within four weeks of the date of the first issue of the notice.

Correspondences
All correspondences should be addressed to: The Director, Department of Environmental Affairs, P. O. Box 35, Maun, Telephone No. 6801237, Fax No. 6862503 or hand-delivered to DEA Office, Mophane Road, Maun – next to Motovac.

Public Notice

REPUBLIC OF BOTSWANA

Notice issued in terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT STATEMENT (EIS) FOR:
Baines' Camp in NG/32 Zone 1

The major findings of an Environmental Impact Study (EIS) undertaken for the proposed development of additional guest rooms and the operations of Baines' Camp in NG/32 Zone 1.

Nature and Magnitude of the Activity
Sanctuary Retreats propose to increase the capacity of Baines' Camp from 10 to 12 beds through the addition of one new guest room developed to the north-east of the line of the existing guest units. This unit will be constructed to the same design and specification of the existing guest units with raised wooden deck flooring, adobe walls and a thatch roof. Additional front of house developments will include an extension to the decked dining area, a covered interactive kitchen and a new management office and curio shop. Additionally, all concrete (approximately 50m^3) in non-approved locations will be removed which will necessitate the rebuilding of staff accommodation units as well as the guest kitchen and laundry. All developments follow the recommendations of the NG/32 Management Plan.

Rationale for the Project
Baines' Camp is a small and exclusive safari camp, with just 10 beds, located in Management Zone 1 of the NG/32 concession and provides access to some of the Delta's best wildlife. The NG/32 Management Plan of 2013 makes provision for the existing Baines' Camp to increase its current footprint by two (2) beds, giving a total of 12 beds. The formal lease agreement requires Sanctuary Retreats to undertake these developments.

Location of the Activity
Baines Camp is located in the north of the NG/32 concession at -19.581658, 23.217291 (decimal degrees, WGS 84) close to the boundary with the Moremi Game Reserve. It overlooks the channels associated with the Boro River. All guest activities occur within Zone 1 of NG/32.

Anticipated Impacts and Proposed Mitigation Measures
The environmental impacts and mitigation measures identified by the EMP study are presented in detail in the Environmental Impact Statement (EIS) and summarised in the table below. A detailed Environmental Management Plan to help manage and monitor potential impacts is included in the EIS.

Environmental Impact	**Proposed Mitigation / Enhancement Measures**
Project Phase: Pre-Construction and Construction	
Physical and Chemical impacts	
Air contamination and dust creation	Ensure all vehicles are well maintained and keep usage to a minimum to reduce emissions. Use the designated transport route for the movement of all materials.
Soil compaction and erosion	Limited removal of vegetation, apart from where absolutely necessary, and rehabilitate affected areas. Use the designated transport route for the movement of all materials and existing pathways within camp. Ensure drivers read, sign and abide by the code of conduct.
Biological and Ecological Impacts	
Vegetation destruction	Limit removal of vegetation, apart from where absolutely necessary, and rehabilitate affected areas.
Wildlife habitat alienation	Switch off all machinery and vehicles when not in use and keep noise levels down. Restrict development activities to the development site and limit impact on the surrounding area.

Sociological and Cultural Impacts	
Disease transmission	Education of staff and visitors on dangers of disease transmission Ensure supply of condoms is available.
Noise pollution	Ensure generator is sound proofed and only run generator when necessary. Minimise use of vehicles and machinery unless absolutely necessary. Restrict construction activities to daylight hours only.
Visual impact	Developments to be incorporated within the surrounding vegetation to ensure natural look is maintained. Decor should be subtle and suitable for the bush.
Project phase: Operation **Physical and Chemical impacts**	
Soil contamination	Re-fuelling/oiling/servicing of construction/maintenance of equipment to occur on bunded surface. Storage of solid waste in secure bunded area, with regular removal to nearby landfill or recycling centre. All liquid waste to be treated using the above-ground liquid waste treatment plant.
Soil compaction and erosion	Use the designated transport route for the movement of all materials and existing pathways within camp. Rehabilitate areas where necessary. Ensure drivers read, sign and abide by the code of conduct.
Biological and Ecological Impacts	
Wildlife habitat alienation	Limit footprint of camp and extent of camp activities.
Use of local natural resources	Limit size and extent of camp activities and ensure all firewood is collected from areas outside of the National Park with varying collection locations.
Ecological monitoring	Improved wildlife monitoring through compliance with Standardised Wildlife Monitoring Protocols.
Sociological and Cultural Impacts	
Disease transmission	Education of staff and visitors on dangers of disease transmission. Ensure supply of condoms is available.
Fire	All machinery/vehicles/ appliances regularly serviced and turned off when not in use. Fire extinguishers and hoses to be positioned around camp with staff trained in fire-fighting and prevention.
Economic and operational	
Employment	Permanent staff to be employed from the local communities with trickle down benefits.
Project Phase: Decommissioning **Physical and Chemical impacts**	
Soil and surface water contamination	Ensure all septic tanks and fuel tanks are completely emptied prior to removal to prevent spills. Storage of solid waste in secure bunded area, with regular removal to nearby landfill or recycling centre.
Soil compaction, erosion and dust creation	Limited removal of vegetation, apart from where absolutely necessary and rehabilitate affected areas. Use the designated transport route for the movement of all materials from camp. Ensure drivers read, sign and abide by the code of conduct.
Solid waste / litter pollution	All waste to be stored securely on site prior to transportation to Maun for disposal/recycling. Ensure all waste is covered on vehicles to prevent waste falling during transportation.
Biological and Ecological Impacts	
Wildlife habitat alienation	Switch off all machinery and vehicles when not in use and keep noise levels down. Rehabilitate the camp footprint following decommissioning.

Vegetation destruction	Limit removal of vegetation wherever possible and make efforts to rehabilitate roads no longer used.
Vegetation change	Identified alien species removed.
Wildlife problem animals	Ensure that animals do not gain access to any unnatural food or water sources that are present as a result of the camp's decommissioning. Ensure all solid waste is stored securely to prevent wildlife access.
Fire	All machinery/vehicles/appliances regularly serviced and turned off when not in use. Fire extinguishers and hoses to be positioned around camp with staff trained in fire-fighting and prevention.
Sociological and Cultural Impacts	
Disease transmission	Education of staff and visitors on dangers of disease transmission. Ensure supply of condoms is available.
Noise disturbance	Ensure generator is sound proofed and only run generator when necessary. Minimise use of vehicles unless absolutely necessary.
Economic and operational	
Financial costs of decommissioning	Operator to ensure sufficient budget available to fully decommission and rehabilitate camp.
Employment	Decommissioning staff to be employed from the local communities to create short-term benefits.

Conclusions and Recommendations of the Study

The consultants recommend that the proposed developments at Baines' Camp go ahead according to the proposed plans and recommendations as laid out in the EIS. The proposed developments will use only semi-permanent materials (canvas, timber, thatch, adobe walls) and will also involve the removal of significant quantities of concrete. The proposed developments will maximise the potential for the site whilst also rationalising the current site and ensuring a reduced future impact at the time of decommissioning. As with all projects there are a number of impacts that will need mitigation. In this project they include: the risk of soil erosion and compaction through use of machinery and supply trucks, risk of air and noise pollution from machinery use, risk of vegetation destruction and wildlife disruption from activity on the sites and risk to staff of working in extreme wilderness areas. The EIS provides detailed Impact identification, Mitigation strategies and Monitoring Plans for all phases of the project which the construction team and operator should follow during both the construction and operational phases and operation of the camp.

Environmental Impact Statement Placement

Copies of the EIS can be reviewed at the following locations:
Department of Environmental Affairs, Maun office
Customary Court, Boro
Customary Court, Daonara
Written comments or objections from those likely to be affected by the project and other interested persons should be submitted to the Department of Environmental Affairs on or within four (4) consecutive weeks from the first appearance of this notice.

Correspondences

All correspondences should be addressed to: The District Environment Coordinator, Department of Environmental Affairs, P.O. Box 35, Maun and Telephone No. 6801237, Fax Nos. 6862503 or 6801246 or hand-delivered to: Department of Environmental Affairs, Maun Office, Plot No. 527, Light Industrial near to Motovac.

Public Notice

REPUBLIC OF BOTSWANA

Notice issued in terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OFAN ENVIRONMENTAL IMPACT STATEMENT (EIS) FOR RIVER SAND EXTRACTION IN RAKABESWA RIVER AT RAKABESWA VILLAGE

The major findings of an Environmental Impact Assessment (EIA) Study undertaken for the proposed river sand extraction are summarised hereunder.

Nature and Magnitude of the Activity
Mr Bernard Sejakgomo is currently undertaking the Environmental Impact Assessment for extraction of river sand at Rakabeswa River in Rakabeswa in Central District. The proposed area measures about 0.01km^2. Sand extraction is estimated to last for 3 years with probabilities of extension.

Rationale for the project
The material will be used for commercial (construction) purposes and supplied to the residents and other nearby villages for construction purposes.

Location of the Activity
The proposed project is located at Rakabeswa River at Rakabeswa village in the Central District.

Anticipated Environmental impacts of the Activity and proposed mitigation measures to respond to the negative environmental impact
The environmental impacts and mitigation measures identified by the EIA study are presented in detail in the Environmental Impact Statement (EIS) and summarized in the table below. A detailed Environmental Impact Assessment to help manage and monitor potential impacts is included in the EIS.

CONSTRUCTION PHASE

Environmental impact	**Mitigation**
Loss of vegetation	Clearing should be limited to the area required for mining activities.
	No mining activities will occur within the 2m distance from the river bed as per the Department of Mines Regulations. This will ensure the protection of the river bank from slumping.
Creation of access road	Limit clearance of vegetation for the access road to the proposed site
Recruitment of workers	As much as possible residents of Rakabeswa area should be considered when recruiting labour.
	OPERATION PHASE
Soil erosion	All disturbed slopes must be stabilized immediately to prevent erosion and safety risks.
	Excavation activities should be limited to the proposed site.
	Progressive rehabilitation should always be undertaken to avoid degrading the river bed
Increase in ambient noise levels	All equipment should be maintained to ensure quieter running/operation.
	Speed limits of 40km/hr along the haul route should be enforced to attenuate noise from the haul vehicles that would be plying the access roads including the A1 Road.
	Workers should make use of hearing protectors

Reduced air quality	Workers should be provided with adequate protective clothing including nose masks. Adequate dust restraining measures including sprinkling of water should be regularly done. Hauling trucks should be covered as per directive from the Department of Waste Management and Pollution Control to prevent air pollution by dust.
Waste generation and disposal	At least one waste receptacle with a lid should be provided on site. At least one portable flush chemical toilet should be provided on site.
Potential soil, surface and ground water pollution	Portable spills containment and clean up equipment should be provided at the mining site. In the event of accidental spill, the contractor should expedite the clean-up of the area to prevent spread of the pollutant. All fuel, lubricants and hydraulic oil should be stored in clearly marked containers with lids.
Potential archaeological finds	Prior to site preparation and excavation activities, the project archaeologist should sensitise the contractor and employees on the possibility of chance finds and educate them on what to do in the event of such sightings. In the event of any chance findings the Department of National Museum and Monuments should be informed immediately.
	DECOMMISSIONING
Soil and water pollution	Proper maintenance of all equipment used during decommissioning. All holes to be filled with soil and compacted after all has been completed.
Vegetation regeneration after rehabilitation	Restoration should be done immediately after completion.

Conclusions and Recommendations
The conclusion from the findings of the EIA is that the benefits of the proposed sand mining outweigh the disadvantages as the project will provide sand for construction purposes to the residents and other surrounding areas. Therefore, the consultant recommends that the project be allowed to proceed with appropriate implementation of the mitigation measures recommended.

Environmental Impact Statement Placement
Copies of the EIS can be reviewed at the following locations:
Department of Environmental Affairs (Serowe)
Rakabeswa main *Kgotla*

Public Notice

REPUBLIC OF BOTSWANA

Notice issued in terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT STATEMENT (EIS) FOR PROPOSED GRAVEL MINING BURROW PIT AT MMATSHIPA NEAR OODI

The major findings of an Environmental Impact Assessment (EIA) Study undertaken for the proposed gravel mining project in Mmatshipa near Oodi are as summarized hereunder.

Nature and Magnitude of the Activity

The project proponent, Peter Ramosako intends to mine and supply about 145 000 tonnes per annum of the gravel aggregate for a period of 2 years. Open pit mining method will be used which will have a depth not exceeding 2.6m in an environmentally friendly and a socially acceptable manner. Front end loaders and tipper trucks will be used to extract the gravel from the area and transport it in a safe manner to demand centres within the greater Gaborone area.

Location of the Activity

The proposed borrow pit site is located at Mmatshipa Lands. The site is about 2km to the north east of the junction of A1 road and the Oodi road in the Kgatleng District.

Anticipated Impacts and Proposed Mitigation Measures

The environmental impacts and mitigation measures identified by the EIA study are presented in detail in the Environmental Impact Statement (EIS) and summarized in the table below. A detailed Environmental Management Plan which comprise both the Mitigation Plan and the Monitoring Plan to help manage and monitor potential impacts is included in the EIS.

Project Phase	Potential Impacts	Mitigation Measures
Air pollution by dust	Pre-construction, construction and post construction	Workers should be provide with masks and it should be ensured that they are used always. Water trucks to control dust on haul roads or access roads should be used to sprinkle water on haul roads.
Noise pollution	Pre-construction, construction and post construction	Normal working hours should be adhered to, they should be from 0600 hours to 1800 hours. Noise from trucks should not exceed 85Db,(decibel) as stipulated by the mines department. Machinery should be fitted with silencers to keep the noise at minimal levels. Hearing damage may occur if it is continuous for about 8 hours. Prior to any activity that may cause unwanted noise; residents of nearby villages and livestock owners near the proposed site should be informed of the activity. Workers are to be provided with ear plugs.

Contamination due to oil spillages	Pre-construction, construction and post construction	Use of vehicles and machines in good working conditions and the use of a single offsite fueling point will ensure that hydrocarbon spillages are minimized both on site and along haulage roads. A rubber mat should be placed at fueling point as a base for the fuel tanks to be placed on for the machinery to park on as they fuel up in case they are spillages, the mat will be a barrier to prevent fuel from contacting the soil. If the vehicles breaks down along hauling route, a plastic cover must be placed below the vehicle during minor maintenance of that to prevent the spilling oils contacting the ground. A container must also be used to collect the draining oil. Major maintenance must be done at the workshop by touring or loading the truck and transporting it to the workshop.
Increased potential soil erosion	Pre-construction, construction and post construction	Water should be sprinkled on the ground to prevent erosion where there is a lot of movement of machinery and to make the soils on the sides of the road to settle to prevent vehicles getting stuck.
Disturbance of soil structure	Pre-construction, construction and post construction	Haulage route from the site up to the tarred road must be strictly followed, no diversions, this is to ensure that the effect of soil compaction is restricted to the project site and designated haulage route only. Harrowing of the soils at the haulage routes and at the project site once a month will mitigate against the soils being permanently compacted. This will at the end of the project improve vegetation growth as the land recovers.
Spread of animal diseases	Operation	Fencing of the pit to prevent movement of animals into the pit. Draining the water in the pit every day to use the water for the suppression of dust at the project site and on haulage routes.
Occurrence of accidents	Pre-construction, construction and post construction	Work area procedures and road transport safety need to be strictly followed in order to obviate the risk of accidents. Safety induction of the workers will be done when they are employed, and safety meetings will be conducted every week. Personal protective equipment will be issued to every employee before they commence with work. Safety signs must be mounted on every machinery that might cause danger if precautions are not followed. Disciplinary action must be taken to any employee who does not follow safety precautions.
Spread of diseases among employees	Pre-construction, construction and post construction	Works should be provided with protective clothing and it should be ensured that they are used always when on site. Condoms must be availed on site to employees as well as public education on health to be embarked upon. There is need to raise awareness of both the local community and the construction workers about dangers of casual relationships through intensive education campaigns/sessions. Condoms should be made available to workers. First aid kit stocked with medical supplies should always be on site to cater for any emergencies that might arise.
Destruction of aesthetic appearance of the landscape due to land alteration	Pre-construction, construction	The top soil that is removed should be piled aside appropriately so that it can be used during decommissioning for the areas aesthetics to improve. Revegetation of the land must be done during the rehabilitation.

Loss of vegetation	Pre-construction	Clearing of vegetation should as much as possible be limited to the project site Movement of excavation machinery must be limited to the fenced site only. Re vegetation must be done at the end of the project.
Destruction of items or object with archaeological/cultural/ historical significance.	Pre-construction, operation	Close monitoring must be done by an archaeologist during the ground breaking up to the depth of 2m of excavation. If any item of archaeological significance is discovered during mining, the mining activities must be stopped immediately and inform DNMM.
Increased employment opportunities	Pre-construction, operation	As much as possible locals from Oodi Matebeleng should be considered when recruiting labour during the operational phase of the project.
Added impetus to the economy	Pre-construction, operation, operation, post operation	Locals must be given employment priority. The pit employees must source food services and accommodation from the project village.

Conclusions and Recommendations of the Study
The proposed pit sand and gravel mining project will have both positive and negative environmental impacts at local and regional levels. Following the undertaking of the detailed EIA Studies for the project on the area it is recommended that the project be allowed to proceed with appropriate implementation of the mitigation measures recommended

Environmental Impact Statement Placement

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in terms of Section 10 of the Environmental Assessment Act No.10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF AN ENVIRONMENTAL IMPACT ASSESSMENT (EIA) FOR THE PROPOSED CONSTRUCTION AND OPERATION OF BOBBSIE'S POULTRY FARMING, POULTRY ABATTOIR, AND WASTE WATER TREATMENT PLANT AT FARM NO.37OQ, TSHESEBE VILLAGE, NORTH EAST DISTRICT , BOTSWANA.

The major findings of an Environmental Impact Assessment (EIA) study undertaken for the proposed construction and operation of Bobbsie's poultry farming, abattoir and waste water treatment plant are summarised hereunder:

Nature and Magnitude of the Project
The project entails construction and operation of Bobbsie poultry farming, abattoir and waste water treatment at farm 37 OQ in the North East District. The existing Poultry farming (breeding) section covers a total area of 3,840m^2 and the proposed site to be developed into a Waste Water Treatment Plant measures 7500m^2. The proposed site has been developed before and it is located on freehold farm near Tshesebe Village.

Location of the Activity
The proposed project site is situated in Tshesebe village, Farm No. 37OQ in the North East District, Botswana.

Anticipated Environmental impacts of the Activity and Proposed Mitigation Measures
A summary of major findings of the study associated with the implementation of the proposed project together with the mitigation measures proposed to respond to the negative environmental impacts are presented hereunder.

Environmental Component/ Impact	Project Phase	Proposed Mitigation/Enhancement Measures
Environmental Aspects		
Employment	Pre-Construction	The management must make use of local labour as much as possible in order to stimulate the socio-economic status of the local population around North East District especially around Tshesebe and surrounding villages. Hire locals for unskilled and semi-skilled labour.
Environmental awareness	Pre-Construction	All the employees should be sensitized on environmental issues and the significance of environmental protection.
Air pollution	Construction	Adequate dust suppressant measures including regular sprinkling of water especially on loose soil. Movement of construction vehicles should be controlled in order to reduce the impact of increased dust pollution. All construction haul trucks should be covered as per directive from Department of Waste Management and Pollution Control to prevent dust generation and materials from falling on the road during transportation. No burning of waste should take place onsite.
Noise pollution and vibrations	Construction	Ensure that all machinery are switched off when not in use to avoid unnecessary noise and environmental pollution. Workers should be provided with ear plugs and mufflers to minimise the impact of noise.

Land pollution	Construction	Skips and bins covered for waste collection should be strategically placed around the construction site. Adequate mobile chemical toilets by licensed waste management companies should be made available to cater for workers while on site which should be disposed off at least twice a week depending on the frequency of use. In the case of accidental spillages all contaminated soil must be removed to avoid surface water contamination.
Increased waste generation and improper waste disposal	Construction	Do not leave cement bags, paint containers, plastics etc. lying around the premises. Collect and store waste in designated areas such as skips/ bins/ transfer stations.
Human injury	Construction	Employees should be trained on use of equipment to avoid human injuries. Monitor unauthorized movement of the construction crew.
Potential Fire risk and Explosion at the premises	Construction/Operation	Fire training and evacuation procedures will need to be inculcated in the workforce. Fire Extinguisher and Fire Hydrants at the premises should be provided. Warning signs at the construction site and during operation should be erected. Display emergency contact numbers for Fire Department and the Police. Fire Assembly Point at the premises should be visible.
Increased water demand	Construction	Use recycled water for landscaping purposes.
Social Aspects		
Potential spread of diseases, social disruption and work related injuries	Construction/Operation	Health issues including HIV/AIDS and safety education should be provided to all workers on the project site at least on a monthly basis for the duration of the construction phase. At least one First Aid Box stocked to the specifications as prescribed in the Factories Act Regulations should be readily available on site all the time. Protective clothing should be provided to all staff that would be employed at the construction site.
Threat to Public Health	Construction/Operation	Educate the construction crew on food hygiene. Encourage the construction crew to handle and prepare food in a hygienic manner.
Increased crime	Operation	Access into the premises must be controlled. Rights of admission should be reserved.
Boosting the local economy	Operation	Developer to adhere to government regulations on operation of the factory.
Provision of good quality poultry products	Operation	Developer to adhere to Botswana Bureau of Standards government regulations on operational standards of the factory.

Conclusions

The project will have both positive and negative impacts. Overall the positive impacts outweigh the negative ones in view of the fact that the overall goal of the project is to construct and operate a Poultry Farm, Abattoir and Waste Water Treatment Plant at Tshesebe Farm No 37 OQ in the North East District. It is important to note that the poultry farming (breeding) and the abattoir are existing and operational. Moreover the identified potential negative impacts can be mitigated as indicated in the mitigation plan.

The absence of archaeological remains during field study does not mean that such remains cannot be found during

development activities such as excavation of foundations, clearing and others. If archaeological remains are found during development, the Department of National Museum and Monuments should be informed immediately

Recommendations
Following the undertaking of the Environmental Impact Assessment (EIA) for the proposed project, it is recommended that the project be allowed to proceed with due implementation of all recommended mitigation measures.

Environmental Impact Statement Placement
Copies of the EIS have been placed at the following locations for review by the general public and Interested and Affected Parties (IAPs):

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in terms of Section 10 of the Environmental Assessment Act No.10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF THE ENVIRONMENTAL MANAGEMENT PLAN (EMP) FOR PROPOSED OPERATION OF A MEDICAL HOSPITAL WITH A BIOLOGICAL SHREDDER ON PLOT 424 BAINES AVENUE, CITY OF FRANCISTOWN.

The major findings of an Environmental Management Plan (EMP) study undertaken for the proposed operation of a Medical hospital with a biological shredder are summarised hereunder:

Nature and Magnitude of the Project
The project entails the Operation of a Medical Hospital with a Biological Waste Shredder in Central Ward Plot No. 424 Baines Avenue, in the City of Francistown. The facilities that are under consideration are The Biological Waste Shredder, The Laboratory, The X-Ray Unit and The Kidney Dialysis Unit.

Location of the Activity
The proposed project site is situated Central Ward Plot No. 424 Baines Avenue, in the City of Francistown.

Anticipated Environmental impacts of the Activity and Proposed Mitigation Measures
A summary of major findings of the study associated with the implementation of the proposed project together with the mitigation measures proposed to respond to the negative environmental impact assessment are presented hereunder.

Environmental Component/ Impact	**Project Phase**	**Proposed Mitigation/Enhancement Measures**
Environmental Aspects		
Employment	Operation	Locals should be given priority when employing the both skilled and semi-skilled force. Advertise professional jobs on local newspapers. Job Adverts should be placed at public places like Donga *Kgotla*.
Environmental awareness	Operation	All the employees should be sensitized on environmental issues and the significance of environmental protection.
Boosting the local economy	Operation	The Developer to adhere to government regulations on operation of a shredder and other hospital units.
Increased crime (house break-ins/ robbery)	Operation	Access into the premises must be controlled. Rights of admission should be reserved.
Threat to Public Health	Operation	Proper waste management system to be put in place.
Human injury	Operation	Employees should be trained on use of equipment to avoid human injuries. Only competent personnel should be allowed to use equipment.
Noise pollution and disturbance	Operation	There is virtually no noise of significance the machines are designed to be of low level noise.
Increased waste generation and improper waste disposal	Operation	Provide adequate refuse skips/bins on site for proper solid waste disposal. Educate business owners and promote proper waste disposal even to the customers.

Fire risk and explosion	Operation	Fire training and evacuation procedures will need to be inculcated in the workforce. Fire Extinguisher and Fire Hydrants at the premises should be provided. The fire extinguishers must functional at all the times, ensure regular service. Display emergency contact numbers for Fire Department and the Police.

Conclusions
The other facilities namely Dialysis Unit, Laboratory and X-ray Unit are already functioning at optimal levels under a robust hospital management policy and the shredder will complement these facilities to ensure desired high service.

The project will have both positive and negative impacts. Overall the positive impacts outweigh the negative ones in view of the fact that the overall goal of the project is to operate a modern shredder and other hospital facilities. Moreover the identified potential negative impacts can be mitigated as indicated in the mitigation plan.

Recommendations
Following the undertaking of the Environmental Management Plan (EMP) for the proposed project, it is recommended that the project be allowed to proceed with due implementation of all recommended mitigation measures.

Environmental Impact Statement Placement
Copies of the EMP have been placed at the following locations for review by the general public and Interested and Affected Parties (IAPs):
Department of Environmental Affairs (Francistown).
City of Francistown Council

Correspondence
All correspondences should be addressed to: The District Environmental Coordinator, Department of Environmental Affairs, Private Bag F020, Francistown, and Telephone No. 2417108, Fax No. 2417130 or hand-delivered to DEA Offices Nos. 2.109, 2.110 and 2.111, Plot 1271, First Floor-Ntshe House Building.

Kitsiso Mo Sechabeng

Kitsiso e, e ntshiwa ka Temana yabo lesome (10) ya Molao wa Tshekatsheko Tikologo wa bosome (10) wa ngwaga wa 2011 (EIA Act, No 10 of 2011, section 10(2)).

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in Terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF THE DETAILED ENVIRONMENTAL IMPACT ASSESSMENT (EIA) AND ENVIRONMENTAL MANAGEMENT PLAN FOR THE PROPOSED GOODHOPE SUB DISTRICT WATER SUPPLY AUGMENTATION SCHEME PHASE II

Pursuant to Section 10 of the Environmental Assessment (EA) Act No.10 of 2011 the public notice hereby presents major findings of the EIA/EMP Study for the proposed Goodhope Sub District Water Supply Augmentation Scheme Phase II.

Nature and Magnitude of the Activity

The proposed project entails construction of a total of 246km of water pipeline constituted by disjoint sections between the target villages; the longest section occurs between Pitsane and Sekhutlane and runs through the villages along the Botswana and South African border i.e. Rakhuna, Ramatlabama, Hebron,Phihitshwane, Ditlharapa, Mokatako,Phitsane-Molopo, Lepurung, Mmakgori, Tshidilamolomo and Mabule; the other sections connects villages in the sub-district interior i.e Metlobo, Tswaaneng, Sedibeng, Mokgomane, Metlojane, Magoriapitse and Mmathethe and smaller sections between Lorwana and Mogojwagojwe and Lorwana and Gopong. A total of twenty-one (21) galvanized steel elevated Storage Tanks will also be constructed as per the number of main supply villages i.e. Sekhutlhane, Mabule, Tshidilamolomo, Mmakgori, Lepurung, Phitsane-Molopo, Mokatako, Ditlharapa, Phihitshwane, Hebron, Ramatlabama, Rakhuna, Metlojane, Magoriadipitse, Mmathethe, Mokgomane, Sedibeng, Tswaaneng, Metlobo and Mogojwegojwe, Gopong. The proposed pipelines will terminate at the respective storage tanks. The project also includes construction of two Booster Stations at Bethele and Phitshane Molopo.

Rationale for the Project

Goodhope Sub District has experienced rapid development since the last water demands projection in 2007, and currently water demand far exceeds supply. Therefore, the initial designs and forecasts have been revisited and it has been realized that not only demand has increased, but the network coverage also needs to be upgraded to include new buildable areas. A number of concerns in some of the Sub-District localities such as inadequate water supplies in Lorwane, Phitshane Molopo, Pitsane, Hebron and Mabule, poor water quality at Mokgomane and prolonged borehole pumping especially at Ramatlabama have necessitated that water be sought from external sources. Through this project the Proponent intends to link the current system after upgrading, to the North-South Water Carrier so as to service other villages in the Sub District beyond Goodhope.

Location of the Activity

The project area covers the main centers in Goodhope Sub-District and their localities. These villages which are linked by a network of tarred and gravel roads include; Sekhutlhane, Mabule, Tshidilamolomo, Mmakgori, Lepurung (Sekwerenyane), Phitsane-Molopo, Mokatako, Ditlharapa (Molete), Phihitshwane, Hebron (Borobadilepe, Logagane and Marojane), Ramatlabama (Matlasalalo, Papatlo, and Makokwe), Rakhuna (Ngwatsau), Metlojane (Madingwane and Tswaanyaneng), Magoriadipitse (Kangwe), Mmathethe, Mokgomane (Mosi), Sedibeng, Tswaaneng, Metlobo, Mogojwegojwe and Gopong.

Anticipated Impacts and Proposed Mitigation Measures

Environmental Component/ Impact	Project Phase	Proposed Mitigation/Enhancement Measures
Biophysical Aspects		
Soil erosion	Construction	Access routes must be defined and all trucks and equipment confined to the routes to prevent proliferation of unnecessary tracks.
		Provide gabion inflow protection to create a stable transport of concentrated runoff down steep slopes to prevent channel erosion.
		Continually wet the work sites to minimize wind induced erosion.
		Rip sloppy areas to reduce run-off speed.
		Stabilize bare soils on the site by constructing retaining walls.
Soil contamination	Construction/Operation	Re-fuelling must take place in a designated are properly designed to contain hydrocarbon spillages.
		Spill kits to clean up accidental spills from earthmoving machinery must always available on site.
		Workers must undergo induction to ensure that they are prepared for rapid clean-up procedures.
		Contaminated soil should immediately be collected and stored on impervious surface.
		Keep small amounts of lubricants on site to avoid large spillages.
Surface and Grounwater Pollution	Construction	Hydrocarbon spillage should be attended to immediately and treated with an appropriate absorbent.
		Always use spillage trays for re-fuelling and oiling on site.
		All soils contaminated with oils/lubricants and fuels should be immediately scooped and stored on a paved and banded area, treated and disposed of at the nearest waste management facility.
		No fuel should be stored on site although fuelling strictly for heavy machinery may be allowable.
		Personnel should be trained on the proper clean up procedure.
		All hydrocarbon powered equipment should be parked on impervious surfaces to prevent soil pollution.
		Equipment should be regularly serviced to reduce leakages.
		Always avail hydrocarbon spillage cleaning kit on site to get rid of accidental spillages.
Socio-Economy		
Local economic upliftment	Construction/Operation	Sub construction should give preference to citizen owned SMMEs in line with Citizen Economic Empowerment Drive (CEDD).
		Goods and Services should be sourced locally where possible.

Environmental Component/ Impact	Project Phase	Proposed Mitigation/Enhancement Measures
Employment creation	Costruction/Operation	Develop a recruitment strategy that takes into account locally available skills. Ensure that the recruitment procedure abides by the provisions of the Employment Act. Publicise job opportunities locally. Employ female to facilitate gender balance in the workforce.
Increased Social Ills, HIV/ AIDS & Sexually Transmitted Infections	Construction	Awareness should be raised to sensitise the construction crew who are foreign to the local communities to respect the preservation of family values and norms. Project specific CoC should be adhered to. Awareness should be raised amongst local communities on social ills that are likely to emerge due to interaction of locals with migrant workers.
Public and Occupational Health and Safety		
Increased Prevalence HIV/ AIDS & Sexually Transmitted Infections	Construction	Conduct continuous employee awareness about safe sex practices and provide free condoms to workers. Health posters educating people on diseases such as HIV/AIDS & STD's displayed at strategic places or entertainment joints in the project villages to sensitize inhabitants. Care and support to those living with HIV/AIDS. Provide sexual education to all crew members. Avail condoms to construction crew and encourage the use thereof. Engage the services of DMSAC and DHMT to fight against STI and HIV/AIDS.
Possible Risks and Injuries to Workers Potential Injuries to Employees due improper operation of equipment and use of dynamite	Construction	Employees must be provided with full PPE including masks. Induction of all new workers on site. Provide safety briefing for workers to Create awareness of risk factors. Promote safe working practices on site. Always provide first aid kit on site. Consistent servicing of equipment to ensure proper functioning. Induction of all visitors to construction site. Engage a registered Blasting Licence Holder for all blasting works. Avail the blasting protocol to all employees to create safety awareness.
Potential property damage, and compromised safety due to blasting	Construction	The community should be informed well in time on intentions to blast. A blast notification sign should be placed few hours before blasting for residents to avoid walking or driving near the affected area. Inspection of all properties likely to be affected by blasting and take pictures for evidence. All those affected should be compensated accordingly before project closure. Cushion sections to be blasted to minimize fly-rock. Engage a registered Blasting Licence Holder for all blasting works.

Environmental Component/ Impact	Project Phase	Proposed Mitigation/Enhancement Measures
Traffic Related Accidents	Construction	Truck drivers should be sensitized about road safety and the need to keep safety first especially when traversing public areas. Traffic warning signs must be placed strategically at road turn offs to warn other road users of on-going activities. Truck drivers to be briefed on road traffic rules and regulation.
Dust Nuisance	Construction	Haulage trucks should be covered to minimise fly stones and dust generated from haulage material. Provision of and compulsory use of PPE (nose masks and goggles) must be emphasised for onsite workers. Where practical especially close to homesteads wetting must be encouraged and stabilizing agents be employed to suppress dust. Vegetation clearance should be confined to areas required for the purpose of construction only.
Noise Nuisance	Construction	Operation of machinery and construction vehicles should be within normal working hours i.e. 6am to 6pm. The machinery and vehicles should be equipped with silencers to reduce noise. Employees exposed to noise should be provided with ear plugs. Give notification of blasting to encourage readiness by community. Provide cushioning to muffle the noise generated from blasting activities.
Waste Management and Pollution Aspects		
Littering/Pollution from waste	Construction/ Decommissioning	All waste should be disposed of at authorized waste management facilities. Place waste receptacles strategically on the site. Provide portable toilets and engage a licensed carrier for collection and disposal.

Conclusions and Recommendations of the Study

The identified impacts are mitigable and the envisaged benefits if project is implemented out-weigh identified potential impacts. This notwithstanding, Department of Water Affairs needs to commit to the following :
Implementation of the provisions of the EIA/EMP in totality; and
Continued disclosure through on-going stakeholder engagement as outlined in the Public Disclosure Plan

Environmental Impact Statement (EIS) Placement

Copies of the EIS can be accessed at the following areas for review by the public:
Department of Environmental Affairs – Gaborone Office (www.eis.gov.bw)
Tribal Administration Offices in Sekhutlhane, Mabule, Tshidilamolomo, Mmakgori, Lepurung, Phitsane-Molopo, Mokatako, Ditlharapa, Phihitshwane, Hebron, Ramatlabama, Rakhuna, Metlojane, Magoriadipitse, Mokgomane, Sedibeng, Tswaaneng, Metlobo and Gopong.

Correspondences

All correspondences should be addressed to: The Director, Department of Environmental Affairs, and enquiries regarding public review of this document may be lodged directly with DEA officers as per below by 15th June, 2018. Public Notice

REPUBLIC OF BOTSWANA

NOTIFICATION FOR PUBLIC REVIEW FOR THE UPDATED ENVIRONMENTAL IMPACT STATEMENT FOR MORUPULE COAL MINE (MCM) PROCESSING PLANT EXPANSION

In compliance with Section 10 of the Environmental Assessment (EA) Act No 10 of 2011, the major findings of the updated Environmental Impact Statement for the above project are as summarised below:

Nature and Magnitude of the Activity

MCM currently operates a drum dense medium separation (DMS) processing plant with capacity of 1mtpa for washing its coal. MCM had planned to expand this plant but did not do so due to coal market depression. Due to favourable coal markets, MCM intends to expand this plant in two phases as follows:

Phase 1 – installation of a semi-movable DMS drum plant of 1.0 mtpa operational capacity near the existing processing plant.

Phase 2 – installation of a cyclone DMS coal washing module of 1.5 mtpa operational capacity in close proximity to the existing processing plant. This phase will take a longer period to construct and commission and its development will be undertaken simultaneously with Phase 1 above.

The total increased capacity will be approximately 2.5 mtpa operational capacity. The installed capacity after expansion (including existing plant module) will total 3.5mtpa. The expansion is entirely within the mine lease area, adjacent to the existing plant.

Rationale for the Project

The objective of the expansion is to increase the coal washing capacity for MCM, leading to an increased production of good quality coal for the Morupule Power Station, as well as other local and export markets. This project will increase revenue and foreign currency earnings for MCM, and ensure there is adequate coal for the power station.

Location of the Activity

The expansion project is within the Morupule Coal Mine lease area and adjacent to the existing operational processing plant. The mine is in the Central District of Botswana, in the outskirts of Palapye along the Serowe to Palapye road. The mine is approximately 280km north of Gaborone and approximately 14km west of Palapye in Eastern Botswana.

Anticipated Environmental Impacts and Proposed Mitigation Measures

The table below presents a summary of the impacts associated with proposed development together with the proposed mitigation measures for each, as per the project EMP.

Environmental Impacts Predicted	**Proposed Mitigation Measure**
Negative impacts	
Loss of vegetation	All areas to be cleared should be precisely demarcated. Bush clearing should only be carried out within the project footprint.
	Construction vehicles must remain on the access roads and not drive in the un-cleared bush.
	Removal of vegetation must not be carried out using herbicides, without the Department of Forestry and Range Resources approval.
	Open fires must be prohibited and only allowed in fire permitted areas, as they can easily spread and destroy fauna habitats.
Risk of introduction of invasive and alien species	Regular monitoring for alien plant species as they may be introduced to the site through seeds transported on construction vehicles or machinery.
	All construction vehicles and machinery brought to site must be cleaned using high pressure water sprays to remove seeds that may be attached or stuck to them.
	Existing invasive species that may be identified during construction must be removed from the site.

Environmental Impacts Predicted	Proposed Mitigation Measure
Loss, injuries and disturbance of fauna	Excavations must be well barricaded to limit the possibility of fauna falling into them.
	Employees must be inducted/trained on how to manage fauna and avifauna encountered on site.
	Intentional killing and poaching of wildlife must be strictly prohibited.
	Construction vehicle speed limits should be monitored and should not exceed 60km/h at the project site.
Soil contamination	Possible soil contaminants found on site such as fuel, oils, and chemicals must be placed on concrete bases with bund walls or impermeable PVC lining, to avoid spillage on the soil.
	Maintenance of construction machines and vehicles must be done regularly to prevent fuel spillages onsite and at a maintenance workshop with spillage containment and oil/water separators.
	Coal and discard stockpile areas must be lined with adequately compacted calcrete to prevent vertical flow of contaminants. Toe drains must be put in place to collect runoff water from the stockpiles to a pollution control dam for treatment and reuse if necessary.
Soil erosion	Ensure that damaged ground surface during site preparatory and construction works is rehabilitated swiftly, to avoid long term erosion risks.
	Cleared areas no longer required for construction activities should be allowed to regrow with locally found grasses and shrubs in order to help stabilize the soil.
	Construction vehicles must remain on the official access roads and not drive in the un-cleared bush, as this loosens the soil making it prone to soil erosion.
	Unnecessary removal of vegetation must be avoided to minimise erosion problems.
Surface and ground water contamination	Ensure fuels, lubricants and chemicals are stored on impermeable surfaces with bund walls to prevent any leakage or spillage to the environment, which can lead to water pollution.
	Servicing of plant and equipment must be done at the dedicated workshop with a concrete base and equipped with oil/water separators to prevent contamination.
	Routine maintenance of construction equipment must be carried out to avoid leakage of oil and lubricants from the construction machinery.
	Coal and discard stockpile areas must have a base of adequately compacted calcrete to prevent vertical flow of pollutants.
	Water quality must be monitored from the MCM boreholes and the Morupule River to check if mitigation measures used are effective.
Increased water use and demand at the study area	Formulate and implement a water conservation strategy.
	Reuse process water as much as possible.
	Where possible, harvest storm water for use in coal processing.
Air pollution	To reduce dust generation, dampening (wet suppression) of the construction areas and haulage roads must be done regularly if construction works are carried out during dry seasons.
	Gaseous emissions from site machinery and vehicles must be reduced by regular maintenance.
	Implement speed restrictions for haulage trucks to minimise vehicle entrained dust.
Increased ambient noise	Use noise control devices, such as temporary noise barriers and deflectors for high impact activities, and exhaust muffling devices and silencers for combustion engines.
	Ensure equipment is well-maintained to avoid additional noise generation.

Environmental Impacts Predicted	Proposed Mitigation Measure
Risk of fire occurrence	All areas and equipment with flammable liquids must be provided with firefighting equipment.
	Workers using the flammable substances must be well trained in order to prevent fire incidents.
	A fire break should be maintained around the processing area, including coal and discard stockpile areas.
Risk of employees developing respiratory diseases	A respiratory protection programme must be put in place. This plan must include implementation of pre-employment, periodic, and post-employment medical screening and surveillance.
	Adequate protective clothing and equipment must be provided to employees..
Increased waste generation	Use the designated waste holding areas at the mine for the waste from the site.
	Waste produced from the site must be disposed at legal and licensed waste facilities.
	Continue to use the current MCM waste management systems.
Occupational health and safety risks	A health and safety management plan to be formulated and implemented for construction activities.
	Development of an emergency response plan and provide adequate PPE.
	Regularly indulge toolbox talks.
Risks of disturbance of archaeological sites	An archaeological induction with construction personnel must be conducted to inform on procedures to be followed in the event of an archaeological discovery.
	Discovery of archaeological remains such as subsurface artefacts and archaeological sites must be reported to the BNMM immediately.
Social impacts	The acquisition of local labourers must be practiced.
	Give equal opportunities to women during the employment process.
	Implement the MCM HIV and AIDS policy for operational activities.
Positive Impacts	
Employment creation	Local hiring and training must be implemented where possible.
Increased power supply	Ensure sustainable utilisation of coal resources needed for electrical power generation.

Conclusion

Conclusions drawn from the Environmental Impact Study are that negative environmental impacts may arise as a result of the implementation of the project; the impacts are manageable and can be minimised by implementing the proposed mitigation measures. Positive impacts such as employment opportunities are also expected. Mitigation measures have been proposed to curb the adverse impacts and enhance the positive impacts of operation, and if correctly implemented, most of the identified negative impacts will be eliminated or minimised.

Recommendation

Following the undertaking of the Environmental Impact Study for the project, it is recommended that the project be allowed to proceed with due implementation of all the mitigation measures recommended.

Environmental Impact Statement placement

Copies of the detailed Environmental Impact Study have been placed at the following places for reviewing by the general public and the Interested & Affected Parties (IAPs).

Department of Environmental Affairs in Serowe

Palapye *Kgotla*

Palapye Library

Written comments or objections from those likely to be affected by the project and other interested persons should be submitted to: The District Environmental Coordinator, P O Box 0028, Serowe, Telephone No. 4630174, Fax No. 4631307 or hand-delivered to DEA office in Serowe by the 15th June, 2018.

Kitsiso

KITSISO MO SECHABENG, MABAPI LE NTSHAFATSO YA PEGO YA KAMEGO YA TIKOLOGO EE KA TSISIWANG KE KATOLOSO YA MADIRELO A MOEPO WA MCM3 KWA MORUPULE GO BAPA LE PALAPYE

Go diragatsa temana ya lesome (section 10) ya molao wa tshekatsheko tikologo mabapi le go dirwa ga ditlhabolo (Environmental Assessment Act No 10. Of 2011)

Kitsiso e e tsibosa sechaba le banaleseabe ka maduo a tshekatsheko tikologo e e dirilweng ke baitsaanape ba tikologo mabapi le tiro e e nankotsweng fa godimo:

Maikaeleloa tiro e ke go oketse selekanyo sa madirelo a a thatswang magala ko MCM. Se se tla oketsa le go netefatsa gore moepo o ntsha magala a a nang le boleng go ka fetlha motlakase le go oketsa letseno mo moepong wa Morupule.

Lefelo la Ditiragalo
Tlhabololo e, e tla dirwa mo kgaolong ya Legare la Botswana, kwa ntle ga motse wa Palapye, mo bokone jwa tsela e tswang Palapye e ya Serowe. Moepo o bokgakala jwa 280km mo bokone jwa Gaborone gammogo le 14km mo bophirima jwa Palapye mo botlhabatsatsi jwa lefatshe la Botswana.

Ditlamorago tse di solofetsweng le Metlhale ya go leka go tila/go fokotsa manokonoko a tse di maswe
Moalo (table) o fa tlase o supa tshoboko ya ditlamorago tse di amanngwang le tiro e, ga mmogo le metlhale e e akanyeditsweng go fokotsa manokonoko a tlamorago nngwe le nngwe, go remeletswe mo ditshekatshekong tsa tiro e.

Environmental Impacts Predicted	**Proposed Mitigation Measure**
Negative impacts	
Tatlhego ya ditlhare/dimela	Go tshwanetswe ga kgaolwa ditlhare fela fa go tlhokafala. Dikoloi tsa tiro di tshwanetse go tsamaya fela mo ditseleng tse di rebotsweng. Kgaolo ya ditlhare ga e a tshwanelwa go dirwa ke botlhole ntle le go rerisa lephata la ditlhare. Melelo e e sa sirelediwang ga e a tshwanelwa go letlelelwa ka e na le bokgoni jwa go fisa naga.
Kgorogo ya mehero mo lefelong latiro	Kananoko ya dimela tse di mo lefelong la tiro e tshwanetse go dirwa go fema go nna teng ga mhero eek a tsisiwang ke dikoloi tsa tiro. Dikoloi tsotlhe tsa tiro di tshwanetse go phepafadiwa pele fa di tla mo lefelong la tiro.
Tatlhego/kgobalo ya diphologolo	Mesima yotlhe e tshwanetse go sirelediwa go itsa diphologolo go ka wela mo go yone. Babereki ba tshwanetse go rutuntshiwa gore ba dire jang fa ba kopana le diphologolo mo lefelong la tiro. Go tsoma diphologolo mo go seng ka fa molaong ga go a tshwanelwa go letlelelwa. Lebelo la dikoloi tsa tiro le tshwanetse go beelwa seelo sa 60km/hr.
Kgotlelesego ya mmu	Dipe tse di kgotlelang mmu, jaaka leokwane le dikhemikhale di tshwanetse tsa bewa mo lefelong lele babalesigileng. Dikoloi le didirisiwa tse dingwe di tshwanetse tsa baakangwa go itswa go dutla ga leokwane. Ditotoma tsda magala di tshwanetse go nna fa go faphegileng go itsa kgotlhelesego ya mmu yo o ka fa tlase ga tsone.

Environmental Impacts Predicted	Proposed Mitigation Measure
Kgotlhego ya mmu	Netefatsa fa mafelo otlhe a a nang le mmu oo gotlhegileng a baaknngwa go itsa gotlhego ee feteletseng.
	Netefatsa fa mafelo a a kgaotsweng ditlhare ka nako ya tiro mme a sa tlhole a dirisiwa a letlelelwa go mela ditlhare ntle le kgoreletsego.
	Netefatsa fa go kgaolwa ditlhare fela fa go tlhokafalang teng.
Kgotlelesego ya metsi	Dipe tse di kgotlelang metsi, jaaka leokwane le dikhemikhale di tshwanetse tsa bewa mo lefelong lele babalesigileng.
	Paakanyo ya dikoloi le didirisiwa tsa tiro e tshwanetse go direlwa mo lefelong lele faphegileng la paakanyo.
	Ditotoma tsda magala di tshwanetse go nna fa go faphegileng go itsa kgotlhelesego ya metsi.
	Kanoko ya boleng jwa metsi e tshwanetse go dirwa go tswa mo didibeng le noka ya Morupule.
Koketsego ya tiriso metsi mo lefelong la tiro	Netefatsa fa go tsenngwa mo tirisong lenaneo la go babalela metsi.
	Pusetso mo tirisong ya metsi e tshwanetse ya dirwa fa go kgonagala.
	Fa go kgonagala metsi a pula a tshwanetse beeletswa go ka dirisiwa mo tirong.
Kgotlhalesego ya phefo	Dikoloi le didirirsiwa di tshwanetswe tsa tlhodumelwa go tlhomamisa gore mosi e tswang mo go tsone ke ya selekanyo se se letlelesegang.
	Ditselana tsa go retibatsa lerole jaaaka go kgatshakgatsha metsi di tshwanetse go tsenngwa mo tirisong go itsa lorole le le feteletseng.
	Lebelo la dikolo tsa tiro le tshwanetse go laolwa go fokotsa lerole.
Modumo o o feteletseng	Didirisiwa tse di fokotsang modumo di tshwanetse go tsenngwa mo tirisong.
	Dikoloi le didirisiwa tse dingwe di tshwanetse tsa baakangwa go tila modumo o o feteletseng.
Kgonagalo ya molelo	Mafelo otle aa nang le leokwane a tshwanetse go nna le ditimamolelo.
	Babereki botlhe baba berekang ka dikapamolelo ba tshwanetse go rutuntshiwa gor b aka itshireletsang jang.
	Lefelo la go kganela molelo le tshwanetse go nna teng go dikologa mabeelo a magala.
Kgonagalo ya malwetsi a mafatlha	Go tshwanetse go tsenngwa mo tirisong lenaneo la go tlhatlhoba botsogo jwa badiri go netefatsa fa bas a tsenwe ke malwetsi a mafatlha ka lebaka la tiro.
	Badiri ba tshwanetse go apelwa dilwana tsa itshireletso mo tirong.
Koketsego ya matlakala	Go tshwanetse ga dirisiwa mabeelo a matlakala a a mo moepong.
	Matlakala a tshwanetse go latlhelwa kwa mafelong a a ka fa molaong.
	Go tshwanetse ga rutuntshiwa badiri ka tshwaro le tatlho ya matlakala.
	Melawana ya moepo ya tshwaro matlakala e tshwanetse ya tsenngwa mo tirisong ka nako ya tiro.
Botsogo le pabalesego ya badiri	Lenaneo la botsogo le pabalesego ya badiri le tshwantse la dirwa ke moikopedi go ka dirisiwa mo tirong.
	Badiri ba tshwanetse go abelwa dilwana tsa tiro tsa itshireletso tse di feletseng.
	Badiri ba tshwanetse go rutuntshwa ka ipabalelo mo tirong.
Kgoreletsego ya matlotlo a tsa tlholego	Pele ga go ka simololwa go gopa kana go epa, badiri ba tla rutuntshwa ka ditsatlholego le matlotlo.
	Fa go na le ditsatlholego kana matlotlo a a bonetseng, ba lephata la matlotlo le ditsatlholego (National Museum).

Environmental Impacts Predicted	Proposed Mitigation Measure
Ditlamorago tse di busula mo matshelong a batho	Moikopedi o rotloetswa go tlhapa/hira badiri mo mafelong a a mabadi jaaka Serowe le Palapye. Borre le bomme ba tshwanetse go fiwa monyetla oo lekanang fa go thapiwa Lenaneo la moepo la HIV/AIDS le tshwanetse la obamelwa kgotsa la tsenngwa mo tirisong.
Positive Impacts Tshono ya go bona mmereko	Go rotloetswa moikopedi gore a thape mo metseng e mabapi bogolo jang ba ba senang botsipa bope, mme ebile o rotloetswa go rutuntsha badiri ba gagwe.
Koketsego ya go anamisa motlakase	Netefatsa fa magala a dirisiwa a dirisiwa go tlhotlha motlakase.

Kwa Motsubong
Tshwetso e e tserweng mo lenaneong la pabalelo tikologo le le dirilweng ke gore, ditlamorago tse di bosula di tla nna teng ka ntlha ya tiro e. Ditlamorago tse, di tla kgona go laolesega mme gape di ka kgona go fokotswa manokonoko ka go diragatsa metlhale ya go fokotsa manokonoko ee nankotsweng. Ditlamorago tse di ntle jaaka ditshono tsa tiro, di tla nna teng go tswa mo tirong e. Metlhale ya go fokotsa manokonoko a ditlamorago tse di bosula le go nonotsha tse dintle tsa tiro e, di nankotswe, mme ga di ka diragatswa sentle, bontsi jwa ditlamoroago tse di bosula di tla fokotswa kgotsa go nyeletswa.

Thotloetso
Morago ga ditshekatsheko tsa pabalelo tikologo tse di dirilweng, go rotkloediwa gore tiro e tswelele mme go diragadiwe mananeo a paakanyo a go gakolotsweng ka one.

Peo ya meriti ya pego
Meriti ya pego e, e ka bonwa mo mfelong a a latelang go ka tlhodumelwa ke botlhe ba ba amegang kgotsa bana le kgatlhego.

Fourth Publication

Public Notice

REPUBLIC OF BOTSWANA

Notice issued in terms of Section 10 of the Environmental Assessment Act, 2011

NOTIFICATION FOR PUBLIC REVIEW FOR DEVELOPMENT OF AN ENVIRONMENTAL MANAGEMENT PLAN FOR ACACIA PRIMARY SCHOOL EXPANSION IN JWANENG

Nature and Magnitude of the Activity

The project entails construction of a two-storey block comprising four classrooms as an expansion for Acacia Primary School. The School is currently running 3 streams but they will be moving to 4 streams in 2019. This expansion is meant to cater for the anticipated increase in the student population as a result of the Cut 9 project.

Rationale of the Study

The proposed expansion will enable the school to provide conducive learning for learners and provide quality education that will prepare them for post primary education. The project is a support service to ensure stability of tenure of staff in the Jwaneng mining operations. Moreover, to attract the best service providers during the anticipated Cut-9 project, there is need to for Jwaneng Mine to ensure sufficiency of quality education infrastructure.

Location of the Activity

The proposed project is located within Acacia Primary School in Unit 1 of Jwaneng Township.

Anticipated Environmental Impacts and Proposed Mitigation Measures

Environmental Component/ Impact	Project Phase	Proposed Mitigation Measures
	Bio-Physical Environment	
Soil Contamination	Pre-construction and Construction	Plant, equipment and vehicles should be parked on paved surfaces to prevent soil pollution. Spill kits should always be onsite and spillages attended to immediately. Always use spillage trays for re-fuelling and oiling on site.
Poaching	Pre-construction and Construction	Construction workers should be thoroughly educated against poaching during induction. This should be followed up with periodic anti-poaching campaigns. Any poaching incident should be immediately reported to the Environmental Officer who should investigate and in turn report to Department of Wildlife and National Parks and Botswana Police Service.
Groundwater pollution	Pre-construction and Construction	No fuel should be stored on site although fuelling strictly for heavy machinery may be allowable. Personnel should be trained on the proper clean up procedure. All hydrocarbon powered equipment should be parked on impervious surfaces to prevent soil pollution.

Environmental Component/ Impact	Project Phase	Proposed Mitigation Measures
Socio-economic		
Creation of employment	Construction and Operation	Non-skilled labour should be drawn from Jwaneng Township. Recruitment process to adhere to the provisions of the Employment Act and should be publicized in advance. Gender balance should be maintained where possible
Increased social disruption	Construction	Sensitize the construction workers who are foreign to the local communities to respect the preservation of family values and norms. Raise awareness amongst the local communities on social ills that may result due to the presence of migrant workers.
Improved Educational Services	Operation	Enrolment should include both students from Mine employees and from the local community. Ensure low teacher: student ratio.
Health and Safety		
Dust Nuisance	Construction	Dust suppression measures to be employed at site e.g. using water to supress dust. Vehicles transporting loose construction materials i.e. pit-sand, river sand etc. should be covered.
Elevated Noise	Construction	Employees must be provided with full PPE including ear plugs and masks. Limit construction vehicle movement (e.g. trucks) to and from site to normal working hours only i.e. 6am to 6pm.
Risks and Injuries to Workers	Construction	Regular Safety and health briefings. Provision of a fully equipped first aid kit with a trained First Aid Representative. Awareness on preventative measures of occupational risks and injuries. Adherence to requisite legislation i.e. Worker's Compensation Act.
Project traffic related accidents	Construction	All heavy construction equipment should be transported on site during the low traffic peak hours. Traffic warning signs should be placed strategically at road turn off to warn oncoming traffic of presence of construction vehicular movement.
Waste Management		
Solid waste generation and management	Construction	Provide litter collecting receptacles for different forms of waste at strategic locations at the construction sites. Provide portable toilets at construction sites. Dispose waste at designated waste sites.
Increased Waste Water Generation	Operation	Practice wastewater treatment and re-use

Conclusions and Recommendations of the Study

The identified impacts are mitigable and the envisaged benefits if project is implemented out-weigh identified potential impacts. However, Debswana needs to commit to the following:

Wholesale implementation of the provisions of the EMP

Continued disclosure through on-going stakeholder engagement as outlined in the Public Disclosure Plan

Environmental Impact Statement Placement
Copies of the EMP can be inspected at the following locations:
Department of Environmental Affairs – Gaborone Office
Jwaneng Town Council
Acacia Primary School Library
Please note that all comments regarding this EMP must be received by the Department of Environmental Affairs in Gaborone by no later than close of business on the 29th June, 2018.

Written comments or objections from those likely to be affected by the project and other interested persons should be submitted to: The Director, Department of Environmental Affairs, Private Bag 0068, Gaborone, Telephone No. (+267) 3902050, Fax No. (+267) 3902051 or hand-delivered to Travaglini House, Plot No. 1271, Second Floor, Old Lobatse road.

KITSISO YA SECHABA

Kitsiso e, e ntshiwa go ya ka Temana ya bolesome (10) ya Molao wa Tshekatsheko Tikologo wa 2011(EA Act, 2011)

KITSISO MO SETSHABENG KA KANOKO YA MOKWALO WA TSHEKATSHEKO YA SEEMO SA TIKOLOGO MABAPI LE KOKETSO YA MANTLO A BORUTELO KWA SEKOLONG SE SE BOTLANA SA ACACIA KO JWANENG

Popego le Boleng ba Tlhabololo
Tiro e akaretsa go atlolosa matlo a borutelo kwa sekolong se se botlana sa Acacia ka go aga matlo a borutelo a a tlhatlaganeng ga bedi, ana le diphaposi tsa borutelo dile nne (4). Mo nakong ya gompieno sekolo se, se kgaogantswe ka ditlhopha tse tharo mme maikaelelo ke gore ka 2019 se bo se kgaogantswe ka ditlhopha tse nne. Dikago tse di leng teng di lekane ditlhopha tse tharo ka jalo koketso ya sekolo e direlwa gore e tle e lekane palo ya bana e e solofetsweng go oketsega ka mabaka a tiro e e solofetsweng mo moepong ya Cut 9.

Mabaka a a Bakang Tlhabololo e
Koketsego e ya go thusa sekolo go tlamela baithuti ka thuto e e na le boleng go ba baakanyetsa dithuto tse dikgolwane. Tiro e,e tshegetsa bodiredi ka go tlhomamisa go itshetlela ga babereki mo ditirong tsa moepo wa Jwaneng. Mo godimo ga seo, go ngoka bodiredi jo bo gaisang jwa tiro e e solofetsweng ya Cut 9, go tlhokega gore moepo wa Jwaneng o tlhomamise gore ditlamelo tsa thuto ya boleng di lekane.

Lefelo la Tiro
Lefelo la tiro e le mo teng ga sekolo se se botlana sa Acacia mo Unit 1 mo toropong ya Jwaneng. Molelwane wa tiro e e kopilweng o mo toropong ya Jwaneng, ka gore ditiro tsotlhe di ya go direlwa mo teng ga sekolo se se botlana sa Acacia, se se itebagantseng thata le go tsenya bana ba batsadi ba bone ba berekang mo moepong.

Ditlamorago le methale ya go difokotsa kgotsa go di nonotsha

Ditlamorago	**Legato la Tiro**	**Dintlha tse di ka Fokotsang Manokonoko mo Tikologong**
	Tse di amang Tikologo	
Kgotlelesego ya mmu	Pele ga kago le ka nako ya kago	Dikoloi, madirelo le didirisiwa di tshwanetsa tsa bewa fa go didilweng teng gore di seka tsa kgotlela mmu. Didirisiwa tsotlhe tse di kganelang go tshologa di tshwanetse go nna teng mo lefelong le go berekelwang mo go lone ka nako tsotlhe, mme fa go nale sengwe se se tshologang se tlhatswiwe gone fela foo. Terei e e kganelang go tshologa e dirisiwe ka nako tsotlhe fa go tshelwa leokwane.

Go utswa diphologolo	Pele ga kago le ka nako ya kago	Babereki ba rutiwe ka go nna kgatlhanong le bogodu jwa diphologolo ka letsatsi la bone la dithuto.Thuto e, e salwe morago ke mananeo a ka gale a a kgatlhanong le bogodu jwa diphologolo. Tiragalo ya go utswiwa ga diphologolo e tshwanetse go begelwa mmereki yoo lebaganeng le tsa tikologo, yo o tshwanetseng go tlhotlhomisa tiragalo e a bo a begela ba lephata la diphologolo le makgabisa naga, le ba sepodise.
Kgotlelesego ya metsi	Pele ga kago le ka nako ya kago	Leokwane le seka la letlelewa mo lefelong la tiro. Didirisiwa tse di tona ke tsone fela di ka letelelwang go tshelwa leokwane ko setsheng sa tiro. Babereki ba rutiwe go nna ba ipaakanyeditse go tlhatswa le go phepafatsa mmu ga tshoganetso. Didirisiwa tsotlhe tse di tshelwang wele kana leokwane di bewe fa bodilong jo bo kitlaneng go kganela kgotlelesego ya mmu.

Itsholelo le Matshelo a Batho

Go tlhamiwa ga mebereko	Nako ya kago, le nako ya madirelo a bereka	Babereki ba ba senang boitseanape ba tsewe mo toropong ya Jwaneng. Khiro ya babereki e tshwanetse go sala morago molao wa phiro gape e bapadiwe nako e santse e le teng. Go hirwe bomme le bo rre ka tekatekanyo fa go lebanyeng.
Kamego e e sa eletsegeng ya matshelo a batho mo gae	Nako ya kago	Babereki ba ba tswang kwa ntle ga toropo ba rutuntshiwe ka maitshwaro le dikeletso tsa banni ba toropo. Tlhagisa banni ba toropo ka mathata a a ka bakiwang ke batho ba ba tswang gosele.
Seemo sa thuto se se tokafetseng	Nako ya madirelo a bereka	Kwadiso e akaretse ya bana ba batsadi ba bone ba berekang mo moepong le bana ba banni ba toropo. Palo ya bana e nne e kwa tlase mo morutabaneng a le mongwe.

Botsogo le Pabalesego

Go tshwenya ga lerole	Nako ya kago	Dikgato tsa go emisa lerole di tshwanetse go dirisiwa mo lefelong la tiro jaaka go gasagasa metsi go emisa lerole. Dikoloi tse di rwalang didirisiwa tse di agang tse di ka bakang lerole jaaka motlhaba di khurumediwe.
Koketsego ya modumo	Nako ya kago	Babereki ba tshwanetse go neelwa diaparo tse di feletseng tsa ipabalelo jaaka sethibo sa ditsebe, sesira-sefatlhego. Lekanyetsa motsamao wa dikoloi tsa kago (diteraka) tse di tswang le tse di tsenang mo lefelong la tiro mo dinakong tsa tlwaelo tsa tiro i.e. 6 am to 6 pm.
Diphatsa le dikgobalo tsa babereki	Nako ya kago	Rutuntsha babereki ka bokhutshwane ka tsa botsogo le ipabalelo. Go tlamela ka didirisiwa tse di feletseng tsa thuso ka potlako, le go nna teng ga motlamedi wa thuso ka potlako yoo rutuntshitsweng. Go lemotsha babereki ka dikgato tse di leng teng tse di ka hemang diphatsa le dikgobalo. Didirisiwa di baakanngwe gore di kgone go bereka sentle. Go obamela molao jaaka molao wa babereki wa phimolo dikeledi.

Dikotsi tse di ka bakwang ke pharakano ya dikoloi tsa tiro e	Nako ya kago	Didirisiwa tsotlhe tse di bokete tse di tlang mo lefelong la tiro di tshwanetse go tlisiwa ka nako e pharakano e leng kwa tlase. Matshwao otlhe a tsela a a tlhagisang bakgweetsi ka motsamao wa dikoloi tsa kago a tshwanetse go bewa ka thulaganyo. Bakgweetsi ba tsibosiwe ka ipabalelo tseleng.

Tshomarelo ya Matlakala le Kgotlelesego ya Tikologo

Go nna teng ga matlakala	Nako ya kago	Didirisiwa tsotlhe tse di tsenyang matlakala ka go farologane di bewa mo lefelong la tiro ka thulaganyo. Go nne le matlwana a boitiketso kwa lefelong la kago. Matlakala otlhe a latlhelwe kwa go dumalanweng teng ebile go letlelesegile ka fa molaong.
Koketsego ya metsi a a leswe	Nako ya madirelo a bereka	Metsi a a leswe a tlhatlhobiwe abo a dirisiwa gape.

Tshoboko le Dikgakololo tsa Patlisiso

Dipatlisiso disupa fa ditlamorago tse di sa nnang sentle di ka thibelesega mme tiro ya dirwa go lebilwe dipoelo tsa yone. Le fa go le jalo, ba kompone ya Debswana ba tshwanetse go itlama go dira tse dilatelang:
Go diragatsa tse EMP e reng di dirwe.
Go lekodisa batsaya karolo ka tlhabololo ya bone le go tsaya maikutlo a bone jaaka go laotswe

Mafelo a go Beilweng Bukana

Meriti ya bukana e ka bonwa kwa mafelong a a latelang:
Lephata la tsa Merero ya Tikologo (DEA) mo Gaborone
Khansele ya toropo ya Jwaneng
Motlobo wa dibuka wa sekolo se se botlana sa Acacia ko Jwaneng

Dikakgelo le Makwalo

Dikakgelo le dingongorego go tswa mo go ba ba amegang kgotsa ba ba nang le kgatlhego ka tiro e, di ka romelwa ka mokwalo kwa Lephateng la tsa merero ya tikologo pele ga di 29 Seetebosigo 2018, jaaka go supilwe fa tlase.

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in Terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTICE FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT STATEMENT FOR THE PROPOSED CONSTRUCTION AND OPERATION OF TELECOMMUNICATION TOWERS WITHIN GABORONE

The major findings of an Environmental Management Plan (EMP) study undertaken for the proposed telecommunication tower are as summarized hereunder:

The nature and magnitude of the project

Mascom Wireless (Pty) Ltd is proposing to develop a telecommunication tower to improve network coverage and capacity within Gaborone and surrounding areas. The proposed developments are 25m high monopole towers on 10m by 10m open space plots. The towers will be located at Gaborone Taung, Extension 27, Extension 9, next to Princess Marina, Old Tsholofelo, Gaborone west Phase 1, near Mabapi Estates and Extension 5. The development includes the following activities: Clearing of the site and digging, Concrete (Civil works) for shelter and tower foundations, Construction of the boundary palisade fence, Tower rigging, Installation of Radio Frequency (RF) Cables, Construction of Equipment Shelter, Installation of antennas and microwaves.

The location of the project/development

The proposed telecommunication towers are located in Gaborone and all plots measure 10m x10m.

The anticipated environmental impacts of the project and the proposed mitigation measures to respond to the negative environmental impacts.

The following anticipated impacts are likely to occur during the construction and operation stages:

Negative Impacts	**Stage/Phase**	**Mitigation Measures**
Waste generation	Construction	Separate waste and dispose it to designated land fill and waste bins should be on site.
Visual intrusion	Operation	Erect a mast or tower which conforms to Civil Aviation Authority standards.
Increased Work related accidents	Construction	Implement safety and health measures, employees to adhere to mitigation measures put in place.
Emission of radiofrequency radiation	Operation	Emission should be within the range limit recommended by BOCRA.
Positive Impacts		
Increased employment opportunities	Construction	Follow labour/employment laws during recruitment.
Improved telecommunication network coverage	Operation	

Environmental Impact Statement Placement

The major findings of an Environmental Management Plan (EMP) study undertaken for the proposed telecommunication tower are as summarized hereunder:

The nature and magnitude of the project

Mascom Wireless (Pty) Ltd is proposing to develop a telecommunication tower to improve network coverage and capacity in Vaalhoek, Ngwatle, Khuis and surrounding areas. The proposed developments are 36m high lattice tower at Khuis, 18m at Vaalhoek and 56m at Ngwatle. The towers will be on 10m by 10m open space plots. The development includes the following activities: Clearing of the site and digging, Concrete (Civil works) for shelter and tower foundations, Construction of the boundary palisade fence, Tower rigging, Installation of Radio Frequency (RF) Cables, Construction of Equipment Shelter, Installation of antennas and microwaves.

The location of the project/development

The proposed telecommunication towers are located in Vaalhoek, Ngwatle and Khuis. All the site plots measure 10m x10m.

The anticipated environmental impacts of the project and the proposed mitigation measures to respond to the negative environmental impacts.

The following anticipated impacts are likely to occur during the construction and operation stages:

Negative Impacts	**Stage/Phase**	**Mitigation Measures**
Waste generation	Construction	Separate waste and dispose it to designated land fill and waste bins should be on site.
Visual intrusion	Operation	Erect a mast or tower which conforms to Civil Aviation Authority standards.
Increased Work related accidents	Construction	Implement safety and health measures, employees to adhere to mitigation measures put in place.
Emission of radiofrequency radiation	Operation	Emission should be within the range limit recommended by BOCRA.
Positive Impacts		
Increased employment opportunities	Construction	Follow labour/employment laws during recruitment.
Improved telecommunication network coverage	Operation

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in Terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTICE FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT STATEMENT FOR THE PROPOSED CONSTRUCTION AND OPERATION OF TELECOMMUNICATION TOWER AT NEWSTANCE WARD, KAZUNGULA VILLAGE

The major findings of an Environmental Impact Assessment Study undertaken for the proposed telecommunication tower are as summarized hereunder:

The nature and magnitude of the project
Orange Botswana is proposing to develop a telecommunication tower at Newstance ward, Kazungula village to improve network coverage and capacity within Kazungula and the surrounding areas. The proposed development is a 36m high lattice tower on a 10m by 10m open space plot. The development includes the following activities: Clearing of the site and digging, Concrete(Civil works) for shelter and tower foundations, Construction of the boundary palisade fence, Tower rigging, Installation of Radio Frequency (RF) Cables, Construction of Equipment Shelter ,Installation of antennas and microwaves.

The location of the project/development
The proposed telecommunication tower is located at Newstance ward, Kazungula village on the plot measuring 10m by 10m.

The anticipated environmental impacts of the project and the proposed mitigation measures to respond to the negative environmental impacts.
The following anticipated impacts are likely to occur during the construction, operation and decommissioning phases:

Negative Impacts	**Stage/Phase**	**Mitigation Measures**
Waste generation	Construction	Separate waste and dispose it to designated land fill and waste bins should be on site. Liquid waste/effluent should be disposed of in ways that do not pollute the environment.
Visual intrusion	Operation	Erect a mast or tower which conforms to Civil Aviation Authority standards.
Increased Work related accidents	Construction	Implement safety and health measures, employees to adhere to mitigation measures put in place.
Emission of radiofrequency radiation	Operation	Emission should be within the range limit recommended by BOCRA.
Positive Impacts		
Increased employment opportunities	Construction	Follow labour/employment laws during recruitment.
Improved telecommunication network coverage	Operation	Proper constant maintenance should be done during operation to enhance and maintain network coverage.

Public Notice

REPUBLIC OF BOTSWANA

NOTIFICATION FOR PUBLIC REVIEW FOR THE ENVIRONMENTAL IMPACT STATEMENT FOR THE PROPOSED KASANE BORROW PIT BY KAZUNGULA BRIDGE CONSULTANTS-JOINT VENTURE

In compliance with Section 10 of the Environmental Assessment (EA) Act No 10 of 2011, the major findings of the Environmental Impact Statement (EIS) for the above project are as summarised below:

Nature and Magnitude of the Activity
The proposed borrow pit will mainly be used for the supply of gravel material for the expansion (construction) of the Kazungula Bridge project. The borrow pit is located to the South East of Kasane village. The proposed borrow pit measures approximately 9Ha and 73,000m^3 of gravel material can be extracted from the borrow pit.

Rationale for the Project
The proponent has proposed to establish a borrow pit for the supply of aggregates for the construction of the Kazungula Bridge construction project.

Location of the Activity
The proposed development is in the Chobe District of Botswana, south east of Kasane village. The borrow pit is located 250m south west of Kasane prison and 350m to the west of Kasane landfill.

Anticipated Environmental Impacts and Proposed Mitigation Measures
The table below presents a summary of the impacts associated with proposed development together with the proposed mitigation measures for each, as per the project EMP.

Environmental Impacts Predicted	**Proposed Mitigation Measure**
Negative impacts	
Loss of vegetation	Vegetation clearance should be limited to allocated site. A buffer should be constructed around the Zambezi teak to protect it. Vegetation clearance should not be carried out through the use of herbicides without approval.
Risk of soil erosion	Progressive rehabilitation must be implemented, to re-establish vegetation as soon as possible plants and grasses which hold the soil together. Gentle slopes of about 10° should be maintained for access into the pit.
Risks of disturbance of archaeological sites	An archaeological induction with construction personnel must be conducted to inform on procedures to be followed in the event of an archaeological discovery. Discovery of archaeological remains such as subsurface artefacts and archaeological sites must be reported to the DNMM immediately.
Disturbance of fauna (animal route)	The borrow pit site should be fenced to deter wildlife from traversing through it.
Loss of fauna habitat	Incidents of animal sightings should be reported immediately so they can be removed from site. Killing of animal found within the project site must be strictly prohibited.
Air pollution: Dust and emissions from equipment	Dust suppression techniques must be applied to prevent generation of excessive dust during excavation and haulage works Gaseous emissions from site machinery and vehicles must be reduced or prevented by regular maintenance.

Environmental Impacts Predicted	Proposed Mitigation Measure
Noise pollution	Use regularly maintained equipment that does not produce excessive noise
	Noise producing activities should be undertaken during the day time only.
Increased waste generation	Waste produced from the project must be disposed at legal and licensed waste facilities.
	Illegal waste dumping must be prohibited.
	Awareness campaigns regarding waste handling must be presented the construction workers.
Risk of soil and water contamination	Equipment such as oil spillage kits must be made available onsite for treating any immediate oil spillages.
	Maintenance of machines and vehicles must be done regularly to prevent fuel spillages.
Occupational health and safety risks	Adequate protective equipment and clothing must be provided to the construction workers.
	SHE policy should be implemented.
	Dust suppression should be implemented at the project site.
	Ensure signage erection at site entrance and haulage areas.
Risk of road accidents	Haulage trucks should adhere to the stipulated speed limit.
	Materials should be covered during haulage.
Risk of illegal mining by others	Fencing of the borrow pit area, ensure gates are locked.
	Rehabilitation must be carried out without delay.
Positive Impacts	
Employment creation	Local hiring and training must be implemented where possible.
Availability of aggregates for bridge construction	Local sourcing of aggregates for bridge construction.

Conclusion

Conclusions drawn from the Environmental Impact Statement are that negative environmental impacts may arise as a result of the implementation of the project; the impacts are manageable and can be minimised by implementing the proposed mitigation measures. Positive impacts such as employment opportunities and support of the development of the overall bridge construction are predicted. Mitigation measures have been proposed to curb the adverse impacts and enhance the positive impacts of operation, and if correctly implemented, most of the identified negative impacts will be minimised or eliminated.

Recommendation

Following the undertaking of the Environmental Impact Statement for the project, it is recommended that the project be allowed to proceed with due implementation of all the mitigation measures recommended.

Environmental Impact Statement placement

Copies of the detailed Environmental Impact Statement have been placed at the following places for reviewing by the general public and the Interested & Affected Parties (IAPs).

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in Terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT STATEMENT (EIS) FOR THE PROPOSED SANDSTONE MINE AT SEROWE

The major findings of an Environmental Impact Assessment (EIA) Study undertaken for the proposed Sandstone Mine in Serowe are as summarized hereunder.

Nature and Magnitude of the Activity

The project proponent, Unique Interventions (Pty) Ltd intends to mine and supply Sandstone. The preliminary resource quantification estimates indicate that a maximum of 127 500 tons can be extracted from the proposed mine covering an area of 61500 square metres and depth of 12 meters. The lifespan of the mine operation will depend on the duration of the mining license and the availability of the resource.

Location of the Activity

The proposed Sandstone mine is located at the Matlhwareng Lands near Leitho, Makolojwaneng ward about 2km to the North West of Serowe village. The site is accessible through an existing dirt sandy road.

Anticipated Impacts and Proposed Mitigation Measures

The environmental impacts and mitigation measures identified by the EIA study are presented in detail in the Environmental Impact Statement (EIS) and summarized in the table below. A detailed Environmental Management Plan which comprises both the Mitigation Plan and the Monitoring Plan to help manage and monitor potential impacts is also included in the EIS.

Project Phase	Potential Impacts	Mitigation Measures
Pre-Operation	Loss of vegetation	Clearing should as much as possible be limited to the project site and during roads preparations be cleared where very necessary.
	Dust Pollution	Workers should be provided with disposable respiratory masks and goggles; it should be ensured that they are used always.
		Water suppression measures such as providing water bars with spray nozzles, target sprayers for high dust sites, washers for rock screening equipment and water trucks to control dust on haul roads or access roads.
	Noise Pollution	Normal working hours should be adhered to from 0600 hours to 1800 hours. All loud machinery to be used should be fitted with silencers.
		Noise from trucks should not exceed 85dB, (decibel) as stipulated by the Mines Department. Hearing damage may occur if is continuous for about 8 hours.
Operation	Creation of employment	This is a positive impact and it must be enhanced by giving priority to locals who qualify for special/technical skill jobs. For non-technical jobs, employment will be fully reserved for Serowe locals.
	Increased traffic	A temporary road should be graded to avoid congestion and inconvenience where the current road has been blocked for construction purposes.

Operation and decommissioning	Generation of dust	Water suppression measures such as providing water bowsers with spray nozzles, target sprayers for high dust sites, washers for rock screening equipment and water trucks to control dust on haul roads or access roads.
		Workers should be provided with disposable respiratory masks and it should be ensured that they are used always.
	Increased potential for soil erosion	Water sprinkling on working ground should be done. Excavation activities should be limited to the proposed site.
	Noise pollution	Normal working hours should be adhered to, they should be from 0800hrs to 1800hrs. Noise from trucks should not exceed 85dB, (decibel) as stipulated by the Mines Department.
	Waste Generation	For oil spillages, ensure the use of rubber mats on the ground to prevent contact of the hydro carbons with the ground during minor maintenance of vehicles.
		A bonded area should be created for the repair of machinery and construction vehicles and covered receptacles should be placed conveniently at each working area for disposal of solid waste.
		Spills on the ground should be removed immediately and placed in the receptacles. The receptacle should be emptied regularly at designated point within the village.
		Waste should be collected and disposed at designated dumping site in the village.
		Separate portable toilets should be placed on site for male and female workers.

Conclusions and Recommendations of the Study
The proposed sandstone mining project will have both positive and negative environmental impacts at local and regional levels. Following the undertaking of the detailed EIA Studies for the project on the area it is recommended that the project be allowed to proceed with appropriate implementation of the mitigation measures recommended

Intention to Change Marriage Property Regime
In terms of Section 8 (1) (f) of Married Persons Property Act, 2013

1. John Christer Johnson Karlberg and Priscillah Mawela Karlberg, married in community of property on the 3rd day of November 2011, in Gaborone, wish to change their property regime to out of community of property.

2. The parties intend to apply to the Iiigh Court of Botswana after the expiration of the three (3) weeks statutory notice from the date of first publication hereof.

3. Any person, Creditor or Debtor, who may have an interest in the assets and/or liabilities of the parties estate, should they have objections to the parties changing their property regime, are to inform the parties, Attorneys, Rantao Kewagamang Attorneys, Plot No. 54734, Grand Union Building, Second Floor, Unit 5B, Central Business District, Gaborone, before the expiration of the said 3 weeks period, or make representations before the High Court of Botswana once the contemplated application is lodged.

DATED at Gaborone this 24th April, 2018.

RANTAO KEWAGAMANG ATTORNEYS.

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in Terms of section 10 of the Environmental Assessment Act, No: 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT STATEMENT (EIS) FOR THE PROPOSED ABATTOIR, MEAT CUTTING PLANT AND ASSOCIATED INFRASTRUCTURE IN GHANZI TOWNSHIP, BOTSWANA

Major findings during the preparation of the Environmental Impact Statement/Assessment study for the proposed abattoir project are summarised below. The Environmental Impact Assessment study was undertaken by Longlit Environmental Assessment Consulting (Pty) Ltd led by Mr Ndobano Lokae BEAPA member registration number 20130063 on behalf of the developer.

Nature and Magnitude of the Proposed Activity

Chibuya Investments (Pty) Ltd intends to construct a fully fledged abattoir with an annex housing meat cutting and processing plant. The abattoir will have Holding Pens, Lairage; slaughter house, Cutting and Meat processing plant, refrigeration units, water supply; solid waste holding facilities, compositing area, primary and secondary effluent treatment facilities, power supply, offices and staff canteen.

Rationale of the Project/Justification

The main objective is to develop an abattoir in Ghanzi to provide a needed facility and service to livestock farmers within the Ghanzi District.

This project can be justified because findings of the EIS study revealed that Ghanzi District is renowned for livestock farming, particularly cattle production. In spite of this there is no abattoir in Ghanzi district at the moment. Farmers in the district who have the means take their cattle to the Botswana Meat Commission (BMC) abattoir in Lobatse. Some who do not have sell to some butchery outlets in the district. The cost of transporting cattle over to Lobatse is costly to farmers and reduces profitability of cattle farming in the district especially for small scale cattle farmers. The fact that farmers are prepared to take and transport cattle all the way to Lobatse in spite of the exorbitant cost is an indication that there is need for an abattoir in the district. Chibuya Investments (Pty) Ltd is determined to exploit this opportunity by building a fully fledged abattoir and meat cutting plant in Ghanzi Township. The proposed development will provide a facility where farmers can sell, slaughter and process livestock from their farms for a fee. The end products can then be sold to butchery owners in the village and beyond or sold to individuals. There is therefore need for the proposed facility.

Location of activity

Specific coordinates for the project plot are S21°195.115 E02, 747.102.

Anticipated Environmental Impacts and proposed mitigation measures are detailed below in line with what is contained in the Environmental Impact Assessment Study/Report.

The Pre-Construction phase

Activity/abattoir Operations	Negative impacts	Mitigation measures
Setting up of the first five guests units and the ablution blocks	Vegetation destruction during setting up; slope developments and dust generation, soil erosion.	Clearance activities confined to construction area only.
Stock piling of construction materials onsite.	Slope developments, dust generation and soil erosion.	Use designated area for stockpiling materials to ensure soil compaction and damage to vegetation is limited to a small scale area. A store room for securing all construction materials will be onsite.
Movement of trucks into and out of the project site.	Carbon footprint of construction vehicles as it relates to access routes and vehicle tracks.	Adapt low speed of 20km/hr for haulage trucks.
		Use of only existing access routes into and out of the project area. Most importantly, the project construction vehicles and operations should use the existing road networks including the A3 Kang – Ghanzi Road.

The Construction and Operation Phases

Activity/abattoir Operations	Negative Impacts	Mitigation measures
Site establishment to develop various infrastructures as proposed in the abattoir plans and the EIA document and in (A) above.	Loss of vegetation and disturbance to habitat due to site preparation activities for building the proposed developments. Movement of trucks bringing construction materials and equipment used to clear and levelling of the project footprint can result in dust nuisance. Dust Nuisance. Spillage and leakage of hydrocarbons from vehicles and equipment used during clearing exercise resulting in contamination of underground water resources and soils. Use of heavy equipment, power tools and vehicle movement can cause noise nuisance.	Remove only vegetation on project footprint; Removed vegetation to be cut into small pieces and stockpile for use as firewood (allow public access and consumption of waste wood). Reduce erosion and runoff impacts on the soils surfaces by providing storms drains to channel water off the construction site to natural drainage lines. Reduce or completely eliminate spillages and leakages by providing drip trays during refuelling of equipment and deploy only well serviced vehicles that do not have oil leaks. Reduce impacts on workers and neighbouring communities by deploying vehicles fitted with noise abating equipment (silencers) and provide staff using heavy equipment with ear plugs.
Activities at various operations of the abattoir such as at the administration block, staff canteen, ablutions, waste blood & waste water housing facilities and other areas.	Disturbance to aesthetic value of the area. Possible outbreak of diseases Environmental pollution therefore leading to possible contamination of water resources, soils and negative impacts/effects to vegetation metabolism.	The project management must avail waste bags and dust bins and proper sewage for both waste water and waste blood or consider establishment of blood meal/manure for commercial gain. The management have adopted a procedure to start with building of the ablution facility and important preliminary facilities such that the built facilities are available to be used for the construction phase. The said developments shall continue into project operation stage to service the abattoir project. The management to avail spill collection kits, containment facilities, drip trays under construction vehicles over long standing periods to collect leaks; fat traps at kitchens and laundry. The management to train relevant staff very well, such that initiatives such as separation of waste at source, implementing the codes of practice/conduct for Chibuya Investments (Pty) Ltd like conservation initiatives, flagging sensitive areas and labelling them as no go area; are all carried out by staff.
Transporting materials into the project area and movement of utility/project vehicles into the abattoir and out of the project area to other places.	Risk of accidents and spillage of construction materials on the road posing a danger to other motorists	Reduce accidents and spillage risk by ensuring vehicles maintain speeds of ≤30 KMPH. Eliminate danger to other motorists. Ensuring that materials being taken to the construction site are appropriately secured using either a shade net or tarpaulin.

Waste from the business infrastructures generated within various abattoir departments.	Landscape blight and possible pollution due to ineffective solid waste and liquid waste management strategies.	Ensure secured waste dumpsters are provided on site at strategic locations and regularly serviced. Provide a vermin proof containment facility where all waste generated should be stored prior to being ferried out of the abattoir for disposal at Ghanzi dumping site by a licensed waste dealer where necessary. Encourage recycling and re-use at all costs especially in items such as cattle by-products i.e. skins, hooves, bones etc... get and establish a market for this.
Interactions by different workers	Potential increase in sexually transmitted diseases and social instability due to influx of people from outside in search of work on the project site.	Ensure workers are sensitised on issues of HIV and AIDS, STIs at start of construction activities in line with Botswana governments guidelines on HIV/AIDS prevention guidelines. Ensure condom dispensing facilities are on site.
Sanitation Issues	Contamination of surface and underground water resources due to lack of appropriate ablution facilities.	Water system toilets installed and properly managed and in house training will be provided to the environmental manager and the relevant personnel. This project in addition to this recommended mitigation measures; IT principally needs a SHEQ person in order to maximize compliance and retain the needed environmental standards.
Fuel spillage at the potential generator room and any area related to the handling of fuel and chemicals.	Accidental fires, possible spillages leading to environmental harm, contamination of soils and water resources especially ground water resources.	Spillage of all flammable and combustible liquids must be contained within an on-site containment system and controlled in a manner that prevents environmental harm (other than trivial harm) and maintained in accordance with Section 5.8 of AS 1940 – Storage and Handling of Flammable and Combustible Liquids of 2004. Daily inspection of the generator area and any area where fuel is used before any activity/work can be started. Erection of warning signs such as "No smoking", "Flammable liquids".

Positive Impacts In Construction Phase

Increase in employment opportunities;

Licensed vendors of construction materials to benefit immensely from the project especially people selling food and related goods.

Increase in job opportunities leading to improved livelihoods and alleviation of poverty;

Increase in government revenue through taxes and levies.

Operational Phase Negative Impacts

Stunning, slaughtering and bleeding. Blood drained from slaughtered animals	Blood waste and its poor management will lead to environmental harm, bad odours and possible outbreak of diseases	Prevent blocking of drains for both water mixed with blood and waste water. Provide bleeding receptacles and also ensure that there are separate installed drains for water and blood contaminated waste water. To facilitate bleeding and minimise risk of carcass contamination provide hoisting facilities and ensure carcases spend at least 7 minutes over bleeding receptacles.
Scalding and skinning resulting in pieces of fleshing with fats pieces blocking drains	Fat waste, waste carcass and mismanagement may lead to establishment/occurrence of certain vector disease causing organisms.	Prevent blocking of drains due coagulation of fats. Provide receptacles for storing skins whilst at the same time preventing contamination of carcasses. Install fat traps and filters throughout the slaughter house.
Generation of solid waste in the stockyard, which if not properly managed can result in generation of odour leading to reduction in air quality.	Pollution, build up of smell and an inconvenient and unbearable condition for the welfare of workers, customers and the public at large.	Reduce and minimise generation of offensive smell produced at the plant by. Providing air tight bags and bins. Install enclosed conveying and filling system; Adopting good housekeeping practices at all times. Establishing composting pits with lined bunkers to compost pouch contents. In the holding pens; Odour produced from manure or urine can be reduced by scrapping up and removing manure then washing down using low volume high pressure sprays. Collecting manure daily and storing the same in vermin proof containers. In unsealed areas lime should be added to the soil.

Decommissioning Impacts

All waste materials should be sorted out first such as contaminated rubble, including pavers, wood and other waste materials so that they are disposed of appropriately.

For health reasons, and to avoid dispersion of waste, the project decommissioning area must be clearly marked and secured.

All non-hazardous solid waste generated should be appropriately disposed of at the nearest landfill or refuse dump as may be appropriate.

Where spoil is contaminated, this should be treated and disposed of by a licensed and registered company that deals in hazardous waste collection and disposal.

The provision of PPEs.

Safety Health and Environmental awareness training for all workers prior to commencement of works

Provision of well serviced equipment.

Training of workers and assignment of labor to tasks of their skills.

Conclusions and Recommendations of the Study

The conclusions drawn from the EIA study is that the project can be implemented and operated with minimal negative impacts. Adequate mitigation measures have been provided to ensure the environment is sustained.

Positive aspects of the project are huge as the project will create jobs in an area where there are few job opportunities;

It is hoped that this project will be a catalyst for further investment and thereby assist in attainment of the tenets of the Rural Development Policy and assist in the economic diversification;

It is recommended that the DEA approve the project;

The proponent is encouraged to adopt adaptive management so that issues which may harm the environment but not captured in the EIA report are addressed so that the environment is sustained;

Implement all mitigation measures in the EMP section 10 of the EIA report in totality.

Environmental Impact Statement Placement
Copies of the EIS/EIA report can be reviewed by interested and affected parties at:
Department of Environmental Affairs – Ghanzi Office

Written Comments or objections from those likely to be affected by the project or any other persons should be submitted to the District Coordinator; Department of Environmental Affairs in Ghanzi between the 18th of May and 8th June, 2018.

Correspondence
All correspondences should be addressed to: The District Environment Coordinator, Department of Environmental Affairs, Private Bag 0024, Ghanzi, Telephone No. 6596101, Department of Tourism House across Airfield Filing Station in Ghanzi between the 18th of May and 8th June, 2018.

7.0. Action by an Architectural Professional in the Case of a Dispute

8.0. Definitions and Interpretation
8.1. Definitions
8.2. Interpretation

1.0. Preamble:

1.1. Development and Purpose of the Framework:

The Architects Registration Act, hereinafter referred to as the Act, provides for the Architects Registration Council, hereinafter referred to as the Council, to determine in consultation with the Minster, the Tariff of Fees. The Framework for the Delivery of Architectural Services and Use of the Tariff of Fees (The Framework) describes the basis and use of the Tariff of Fees, rules, conditions regarding payments and contractual obligations of the parties, the architectural services and the context within which such services are to be rendered.

The Framework is subject to review by the Council from time to time, as may be necessary, whereas the Tariff of Fees shall be published annually by Notice of the Council, in the Government Gazette.

1.2. Context and Basis of Client/Architectural Agreement:

(1) The Client appoints the Architectural Professional to provide architectural services for a project in terms of the Consultancy Services Agreement (The Agreement) between the parties. Standard agreements developed or sanctioned by the Council shall, where available, be used for this purpose.

(2) The Architectural Professional accepts the appointment to exercise reasonable professional skill, care and diligence in the performance of the duties, for a fee, as defined in the written Agreement and in which the rights and obligations of the parties to one another, the terms and conditions of service and fee basis are clearly recorded.

(3) In the Agreement the following shall be adequately provided for;

a Particulars of the project and its scope;
b The services, to be rendered, and selected from the Framework, including the frequency of site inspections and meetings held on site to ascertain the progress of the works and conformity with technical and/or construction documentation;
c Aspects of the Framework that, by necessity and mutual agreement, have been varied or omitted;
d Obligations and rights of the parties upon change to the scope of the Works;
e Agreement of the parties to fix the Fee, if applicable;
f Negotiated fees in respect of Additional Services as provided for under clause 2.1 (6);
g Fast tracking of the project, if applicable;
h Architectural Professionals firm, practice, partnership or body corporate constituted, therein, as a legal person;
i Authority of the Principal Agent (The Agent);
j The share or ownership of intellectual property or copyright;
k Limits to the responsibilities and authority of the parties;
l Maximum period of liability from the date of practical completion of the Works;, excluding common law liability, of the Architectural Professional for patent or latent defects, which period shall not exceed five (5) years;
m Indemnification of the parties and limit of cover of professional indemnity insurance, if above the minimum set by the Council from time to time;
n Submission and due date of payment of invoices;
o Circumstances and conditions under which payment of fees or reimbursable expenses may be withheld or the provision of architectural services suspended;
p Interest on overdue invoices,
q Disputed invoices, suspension or deferment;
r Termination of the Agreement;
s Action and responsibilities in terms of security and upon damage to or destruction of the Works;
t Rights and obligations of the parties in the event of Force Majeure (Acts of God); and
u Dispute resolution process.

(4) The Architectural Professional is, in terms of this Framework, authorized to act for the Client when providing an architectural service. For the construction stage of the project, standard forms of contracts as sanctioned by the Council are to be employed. For this stage, the relationship between the Client, Building Contractor and Architectural Professional as Principal Consultant and/or Principal agent is to be defined in the Building Contract.

(5) The Architectural Professional shall enter into a contract with the Client in a formal agreement.

Typical agreements provide for a Standard Services or for Partial Services described in the Framework as per 3.0 or 4.0, hereunder, respectively.

(6) Standard Services comprise appointment as Architectural Professional, Principal Consultant and Principal Agent. The parties to the agreement shall select the Architectural Professional's services applicable to the project. Services additional to the Standard Services may be selected. These Additional Services shall be selected as the parties may deem appropriate and as described herein-in per 5.0, below.

(7) The Tariff of Fees is deemed to provide a fair and reasonable remuneration to the Architectural Professional in order to render an appropriate quality of service. Deviation from the Tariff of Fees Table for a Cost Based Fee and the Framework is permitted only for projects commissioned on the basis of a fee bid in accordance with the Public Procurement and Asset Disposal Act or in accordance with the formal invitation to tender issued by the Client.

(8) The Framework sets-out rules for the architectural professional, forms part of the Agreement between the parties and provides for matters not explicitly stated or prescribed in the Framework or varied by mutual agreement of the parties. In the event of any discrepancy between the Agreement and the Framework, the Agreement shall take precedence.

2.0 Fees Basis and Remuneration:

(1) The calculation of Fee based on the Tariff of Fees table and its apportionment in accordance with the Framework represents the normal and the accepted basis for the remuneration of the Architectural Professional during the delivery of the services, and is hereby referred to as the Project Cost Based Fee.

(2) The alternative to the Project Cost Based Fee is the Time Based Fee or Fee Bid (herein-after collectively or singularly referred to as the Fee), whereby the Fee Bid is to be determined through a process of tendering in accordance with clause 1.2 (7).

2.1 Project Cost Based Fee:

(1) Where a Fee Bid does not apply, the Project Cost Based Fee shall be used provided that the scope of service for the Architectural Professional is well defined and the Total Construction Cost exceeds Cost Bracket 1 (the lowest Cost Bracket in the Tariff of Fees table).

(2) Where the Fee is calculated as a Project Cost Based Fee, the Fee shall, in accordance with Tariff of Fees table, consist of a Primary Fee and a percentage of part of Total Construction Cost. The Fee calculation is the same regardless of complexity.

(3) A template for the use of the Tariff of Fees and method of calculation of the Fee shall be provided by the Council.

(4) Where the Architectural Professional is not the Principal Consultant, a reduction of 10% (ten percent) to the Fee portion for Work-Stages 1 through to 4b, both inclusive, shall apply.

(5) Where the Architectural Professional is not the Principal Agent, a reduction of 10% (ten percent) to the Fee portion for Work-Stages 5 and 6 shall apply.

(6) Where the Architectural Professional is required to include, as an integral part of the Standard Services, Green Building/Environmental Design or other such Additional Services, a negotiated increase to the Fee, commensurate with the scope of such integrated additional services, and not exceeding 10% (ten percent) of the total of the Fee portions for Work-Stages 1 through to 4b, both inclusive, should apply.

(7) The total of the Fee, if not fixed, shall be subject to adjustment based only on the adjustment of the components of the Fee and criteria as follows;

Fee Component	Criteria for Adjustment
Fees for Pre-contract (work-stages 1 through to 4b, both inclusive)	Subject only to upward adjustment based on Total Construction Cost as at work-stage 4b for Work-Stages already accomplished. But not adjustment due to post- contract escalations on the value of Total Construction Cost after work stage 4b.
Fees for Pre-contract (work-stages 1 through to 4b, both inclusive	Subject to downward adjustment on account of reduction in the scope of work and taking into account only work-stages not yet authorized to commence, by the Client.
Post-contract (work-stages 5and 6)	Subject to upward or downward adjustment due to changes in the scope of Works, i.e. based on project final account of Total Construction Cost.

(8) The Fee shall be apportioned by work-stage as per section 3 of the Framework below and Partial Services shall be paid for in accordance with such apportionment.

(9) The Fee payable for the Works up to and including Close Out shall be based on the Tariff of Fees table

currently in force at the time of signing of the Agreement or date of written appointment, whichever comes first.

(10) For purposes of calculation of the amounts payable at pre-contract stage (Work-Stages 1 though to 4b, both inclusive, based on the Project Cost Based Fee, and except for a fixed Fee, Total Construction Cost excluding Value Added Tax (VAT), Contingencies and Budget Provisions shall apply. The amount of Contingencies and Budget Provisions not expended shall, in all cases and in exception of a fixed Fee, be omitted from the Fee calculation for Work-Stages 5 and 6.

(11) For interim fee claims based on the Project Cost Based Fee, an estimate of Total Construction Cost component of the Budget for the Works shall be used. Such estimate shall be updated at every work-stage.

(12) For projects with a Total Construction Cost exceeding the lowest cost bracket in the Tariff of Fees table (Cost Bracket 1), and where a price offer by the Building Contractor is not available, an estimate of Total Construction Cost provided by a Registered Quantity Surveyor shall be used.

(13) Where there is budget certainty, and scope, time and cost have been aligned to the budget, the Project Cost Based Fee may be fixed by mutual and written agreement of the parties.

2.2 Project Cost Based Fee:

(1) Where a Fee Bid does not apply and provided that the scope of service is not clearly defined, and the service relates to a small scale project (Total Construction Cost less than Cost Bracket 1 (the lowest Cost Bracket in the Tariff of Fees table), or the service is of an unusual, short duration of weeks or days, or of a specialized nature, a Time Based Fee may be used as the basis for remuneration. The lower of the two forms of remuneration (Project Cost Based Fee and Time Based Fee) shall be selected.

(2) Where the Fee for architectural services is a Time Based Fee, in a direct appointment or competitive fee offer, hourly rates as published by Notice of the Council shall apply.

(3) Whenever these rates are revised, the new rates shall apply only to an Agreement effective and signed on or after the date of publication of those hourly rates or to an appointment in writing effective on or after such date of publication.

(4) The categories to which the hourly rates apply are:

Category of Registration or Staffing	Rate: (Pula/Hour)
Principal Consultant or Principal Agent	By Notice of the Council
Specialist- e.g. landscape architect, environmental designer engaged	By Notice of the Council
Principal/Director of the firm, partnership or body corporate	By Notice of the Council
Associate partner of the firm, partnership or body corporate with practicing certificate	By Notice of the Council
Senior Architect with Practicing Certificate	By Notice of the Council
Architect with Practicing Certificate	By Notice of the Council
Registered Architect without Practicing Certificate	By Notice of the Council
Senior Architectural Technologist with Practicing Certificate	By Notice of the Council
Architectural Technologist with Practicing Certificate or Candidate Architect	By Notice of the Council
Registered Architectural Technologist without Practicing Certificate	By Notice of the Council
Senior Architectural Draftsperson with Practicing Certificate	By Notice of the Council
Architectural Draftsperson with Practicing Certificate	By Notice of the Council
Registered Architectural Draftsperson without Practicing Certificate	By Notice of the Council
Salaried staff (Technical and Non-technical) directly involved in project delivery	By Notice of the Council

(5) In the above table under 2.2 (4), "Principal" means the proprietor, partner, director or member in a firm, partnership or body corporate who is in possession of valid practicing certificate, shall bear the risks arising from the provision of the services and shall take full responsibility for the potential liabilities, thereof.

(6) The hourly rates are deemed to include establishment charges and charges for time expended by clerical

staff indirectly involved in the project.

(7) Staff and other resources, tasks, nature and extent or duration of deployment, by work-stage, shall be agreed ahead of commencement of the services or clearly tabulated in a fee bid.

(8) Apportionment of the Fee by Work-Stage and the arrangement of Work-Stages shall be by prior agreement of the parties to the Agreement or indicated in the fee bid.

(9) Where there is budget certainty, and scope, time and cost have been aligned to the budget, the Time Based Fee may be fixed by mutual and written agreement of the parties.

2.3. Adjustment of Fee and Reimbursable Expenses:

a Determination of the Fee and reimbursable expenses shall be based on the following parameters;
b Scope of services as outlined in the Agreement;
c Scope of the project or works;
d Project timelines but not delays attributable to the Architectural Professional;
e Cost of the project or works;
f Appointment and coordination of other consultants;
g Appointment of contractor and management of the building contract.

(2) Should any material variation to the parameters as stated under sub-clause 2.3 (1) occur, the Architectural Professional shall be entitled to adjustment of the Fee and the amount of reimbursable expenses. The parties to the agreement shall be entitled to adjustment of the Fee in accordance with clause 2.1 (7) of the Framework.

(3) Adjustments to the Project Programme to speed-up delivery of the services and execution of the Works, commonly known as „fast tracking, that requires the application of additional resources by the Architectural Professional, shall attract remuneration in addition to the Fee which should be agreed by the parties prior to commencement of such "fast tracking".

3.0. Standard Services by Architect, Architectural Technologist or Architectural Draftsperson:

(2) Where the Architectural Professional is employed in the category of Architect, to provide Standard Services, if selected, and such a Professional is appointed to fulfil the obligations provided for as an Architectural Professional, Principal Consultant and Principal Agent, this shall be deemed to be a full service attracting a Standard Fee without any reduction at clause 2.1 (4) and (5). Partial and/or Additional Services may be selected.

(3) Where the Architectural Professional is employed in the capacity and category of Architectural Technologist or Architectural Draftsperson, the services to be rendered and functions to be fulfilled are to be guided by the reservation of work for Architectural Professionals as provided for by Section 48 of the Act or by means of an exemption in accordance with Section 51, thereof. Such an Architectural Professional may be engaged to perform the Work of an Architect in excess of the stated sizes and in terms of Section 48 thereof, provided that a person registered in the category of Architect and in possession of a valid Practicing Certificate has been appointed as the principal consultant on the Project.

(4) The standard services and essential functions of each work-stage relevant to the service are identified herein as follows;

Workstage 1 (Inception):

(1) Receive, appraise and issue a written report on the client's requirements with particular regard to the following:

a The client's brief, quality policy and scope of the works and consultancy;
b The site: rights, existing services, features, characteristics and constraints;
c Outline of planning and statutory regulations and how these will impact the project;
d Confirmation of client's Budget, constraints and availability of funds;
e The need for the appointment of consultants;
f Project programme and critical milestones with reasonable allowance for client's work-stage approvals;
g Methods of contracting, procurement and strategy for project delivery;
h Organizational framework and capacity (both client and consultants) for the delivery of the project; and
i Outline of any anticipated risks, likely to negatively impact the project, as well as the anticipated level of impact.

Workstage 2 (Design Concept):

(1) After documenting any amendments to the Stage 1 report and re-submitting accordingly and for own record, receive, from the client, written confirmation of approval of Work-Stage 1 report and instruction to

proceed to prepare a Design Concept. Advice, illustrate and issue a written report on the following:

a The intended space provisions and planning relationships;
b Proposed materials and intended type of building services;
c Technical, functional and aesthetic attributes of the Design Concept;
d Anticipated or proposed framework for Building Capacity Management during the operational phase of the building(s);
e Review of the anticipated scope, estimated total project cost in relation to the budget;
f Conformity of the Design Concept to the rights to the use of the land and statutory provisions;
h Review of the Project Programme and its alignment to critical milestones and statutory requirements.
g Review of the status of risks, with consultants, and their likely impact on the scope, timelines and cost.

Workstage 3 (Design Development):

a After documenting any amendments to the Stage 2 report and re-submitting accordingly and for own record, receive, from the client, written confirmation of approval of work-stage 2 report and instruction to proceed to Design Development stage. Advice, illustrate and report on the following:
b Review of the design and scope, initiation of consultations and submissions to local and statutory authorities;
c Development of the Design Concept, construction methods, materials and components;
d Incorporation and co-ordination of all services and the work/designs of consultants;
e Review and confirmation of the planned Building Capacity Management framework;
f Review of the project rogramme with the other consultants and its alignment to critical milestones and statutory approvals;
g Alignment of design, project scope and cost to the approved Budget;
h Review of the status of risks, with Consultants, and their likely impact on the scope, timelines and cost.
i Prepare and submit Stage 3 report.

Workstage 4 (Technical and Construction Documentation):

(1) After documenting any amendments to the Stage 3 report and re-submitting accordingly and for own record, receive, from the client, written confirmation of approval of Work-Stage 3 report and instruction to proceed to Technical Documentation stage. and produce documentation on the following:

Work-stage 4a (Technical Documentation):

a Technical documentation and requirements for local and statutory authority submissions;
b Technical documentation of architectural work coordinated with the work (designs and technical documentation) of consultants;
c Technical documentation and specifications for the works sufficient for dependable costing and measurement by the quantity surveying consultant, if appointed;
d Summary of alignment to budget of the design, project scope, and anticipated cost (pretender estimate) and project risks;
f Submission for Work-Stage 4a, to client for consideration and approval.

Work-Stage 4b (Construction Documentation):

a Obtain, as a prerequisite for proceeding
b Obtain client's written authority to prepare documents to procure offers for the execution of the works;
c Complete Construction Documentation and proceed to call for tenders:
d Obtain offers for the execution of the Works.
e With the input of Consultants, adjudicate and evaluate offers and recommend on the award of the Building Contract;
f Prepare Contract Documentation and facilitate the signing of the Building Contract.

(2) The Architectural Professional shall be held liable for failure to obtain statutory approvals only in relation to;

a Matters directly under his or her control in terms of the scope of architectural services captured in the Agreement, duties and responsibilities, thereof; and
b (b) Explicit provisions of relevant legislation and statutory requirements directly impacting the design and technical documentation, and in force at the time of submission to statutory authorities.

(3) The Architectural Professional does not provide any guarantee that statutory approvals will be granted, by the authorities in time to facilitate commencement, in accordance with the programme of work-Stage 4b, save that it shall be the duty of the Architectural Professional to submit the required information timeously.

Workstage 5 (Construction):

(1) In accordance with the services selected and roles played as Principal Consultant and/or Principal Agent;
- a Hand-over possession of the site to the Building Contractor;
- b Issue Construction Documentation;
- c Administer the Building Contract and issue monthly progress reports;
- d Initiate and/or check sub-contract design and Construction Documentation as appropriate;
- e Hold meetings, normally once a month and as part of the Standard Services, with the Building Contractor and inspect the Works for conformity to the Contract Documentation and acceptable quality in terms of industry standards;
- f Administer and perform the duties and obligations assigned to the Principal Agent as provided for in the Building Contract;
- g Issue the Certificate of practical completion for use or beneficial occupation of the facilities;
- h Lead the process and assist the client to obtain the Occupation Certificate from local authorities.
- i Prepare and submit, to the Council, an End-of-Activity Report in accordance with Regulation 27 of the Architects' Registration Regulations.

(2) The Architectural Professional does not provide any guarantee that the Occupation Certificate will be issued, by the authorities, in time to facilitate occupation and use of the facilities as planned.

Workstage 6 (Close Out):

(1) In accordance with the services selected and roles played as Principal Consultant and/or Principal Agent;
- a Facilitate the Project Close Out including the preparation of the necessary documentation to effect completion, handover and operation of the Project;
- b After fulfilment of the Building Contractor's obligations with respect to the Building Contract, issue the certificates related to Contract completion;
- c Provide the client with as-built drawings, operating and maintenance manuals, Building Capacity Management Framework relevant technical and contractual undertakings and/or warranties by the contractor, suppliers and sub-contractors.

4.0. Partial Services:

(1) The Framework provides for the appointment of an Architectural Professional to fulfil each or any stage of the Standard Services or parts thereof.
(2) Partial Services may be agreed. The most commonly utilized and permissible options being;

- a Appointment as an Architectural Professional and Principal Consultant (but not as Principal Agent);
- b Appointment as an Architectural Professional for design only;
- c Appointment as an Architectural Professional to review designs and documentation by others (can be part of the duties of a Principal Agent);
- d Appointment as Principal Agent only;
- e Appointment as an Architectural Professional for Work-Stage 4b (documentation to obtain offers from Building Contractors;
- f Appointment to perform any of the Additional Services.

5.0. Additional Services:

(1) The following are additional to the Standard Services and qualify for remuneration over and above the Standard Fee. The services may be added individually or in varying combinations and shall be provided by prior agreement between the Client and the Architectural Professional:

5.1. Special Design Services

(1) The preparation of special designs within, or in relation to, the facilities which are contemplated as part of Standard Services, which may include:
- a Rationalization of designs produced by another Consultant and participation in the preparation of such

rationalized designs;

b Urban Design including participation in the amendment or production of urban development plans and guidelines, precinct plans or schemes and the amendment of title conditions, consolidations or subdivisions, negotiations with interest groups and authorities;

c Green Building or Environmental Design: assessment of designs by others, recommendations and offer of solutions, but not design by the Architectural Professional;

d Master planning: defining and planning the layout of future development of buildings and/or services on the same site;

e Landscape Design: participation in landscape planning and construction;

f Interior design - the detailed design of interiors and the selection of furnishings, fixtures and special finishes;

g Liaison with special designers and specialist consultants or experts;

h Purpose-made items: the design and documentation of purpose-made items;

i Promotional material and artwork: participation in the preparation of promotional material;

h Plant operation and production layouts: participation in defining plant operation layouts.

5.2. Special Management Services:

(1) The following are additional to the Standard Services and qualify for additional remuneration over and above the Standard Fee. The services may be added individually or in varying combinations and shall be provided by prior agreement between the client and the Architectural Professional;

a Elaboration of the Architectural Professionals services including inter alia: the preparation of detailed Quality Manuals (project need statement, broad and specific Project objectives, detailed Project Scope, capital budgeting, development of quality management frameworks), cash flow forecasts, processing of payments to third parties, management of variations and communication channels/protocols;

b Cost and valuation services-participation in the administration of costs and preparation of payment certificates where a quantity surveyor has not been appointed;

c Special inspections- more intensive inspections and assessment of the Works exceeding expectations and obligations as outlined in the Framework to assess compliance with specifications;

d Sectional Title Management and preparation of documentation, thereto, or other additional work from the requirements of the Sectional Title Act.

5.3. Special Studies:

(1) The following are additional to Standard Services and qualify for additional remuneration over and above the Standard Fee. These services may be added individually or in varying combinations and shall be provided by prior agreement between the Client and the Architectural Professional:

a Preparation of the client's brief and assisting the Client in the preparation of requirements with regard to the Quality Policy and operation of the Project;

b Site Selection: research on the suitability and location of a site for the proposed Project;

c Feasibility Studies: participation in technical, financial, market or economic feasibility studies;

d Environmental Studies: participation in environmental studies;

e Energy Analysis and Studies: participation in studies of energy performance, economics, and efficiency;

f Market Surveys: participation in market surveys;

g Traffic Studies: participation in traffic flow studies;

h Green Building designs and the establishment of performance criteria and standards.

5.4 Work on Existing Premises:

(1) The following are additional to Standard Services and qualify for additional remuneration over and above the Standard Fee. These services may be added individually or in varying combinations and shall be provided by prior agreement between the Client and the Architectural Professional:

a Condition audits, surveys and inspection - inspect, survey, measure and prepare documentation of existing buildings, with the input of other consultants as may be required;

b Restorations and renovations - services in connection with work on existing buildings;

c Heritage/historic buildings - services in connection with work on heritage or historic buildings;

d Services in connection with demolition of existing buildings.

5.5. Other Services:

(1) Other services that may be added to Standard Services and by prior arrangement between the parties to the

Agreement are;

a Participation in litigation and dispute resolution associated with a project;

b Any other mutually agreed additional services.

6.0. Fees For Architectural Services:

6.1 Basis of Fees

(1) The Client, hereby, agrees to pay the Architectural Professional a Fee for the services as recorded in the Agreement entered into by the parties and on the basis of the Tariff of Fees table, in the case of a Project Cost Based Fee, or hourly rates in the case of a Time Based Fee.

6.2 Apportionment of Fee by Work-Stages:

(1) The Fee portion applicable to each work-stage shall, unless otherwise stated in the Framework or the Agreement, be apportioned according to the table below;

Work Stages	*Proportion of fee*	*Cumulative total*
1 Inception	*5%*	*5%*
2 Design Concept	*15%*	*20%*
3 Design Development	*20%*	*40%*
4a Technical Documentation	*20%*	*60%*
4b Construction Documentation	*10%*	*70%*
5 Construction	*27%*	*97%*
6 Close Out	*3%*	*100%*

(2) In project specific cases requiring the completion of documentation at earlier Work-Stages, an appropriate increase of the fee apportionment to the initial stages may be agreed. Work-Stages may be combined or varied by agreement between the parties.

(3) The Time Based Fee shall be apportioned according to man-hours allocated to each work-stage.

6.3. Fee for Additional Services:

(1) Unless otherwise provided for in the Framework or in the Agreement, the fee for Additional Services shall be a Time Based Fee.

(2) In the case of a Time Based Fee, the tasks, resources to be deployed for such services and the number of man-hours to perform each task shall be outlined and submitted by the Architectural Professional for consideration and approval by the client prior to delivery of the service.

(3) Whenever the hourly rates are revised, the new rates shall apply to work or tasks performed after or on the date of publication of such hourly rates.

6.4. Fee for Additional Services and/or Alterations:

(1) The Project Cost Based Fee for work that includes alterations shall be based on Total Construction Cost of the Works comprising or affected by alterations and increased, for that portion of the Works, by 30% (thirty percent) to 130% (one hundred and thirty percent) of the Fee.

(2) A Time Based Fee may be selected in accordance with the Framework and as per clause 2.2 (1) above.

6.5. Fees for services provided with respect to the restoration of Buildings Subject to Heritage or Historic Legislation:

(1) Fees are to be based on a Project Cost Based Fee. The Fee shall be reduced by 15% (fifteen percent) to exclude the element of Design Concept (Work Stage 1). The remainder shall be increased by 40% (forty percent) to 140% (one hundred and forty percent) as the premium to provide for the additional expertise and input expected of the Architectural Professional, i.e. (100% - 15%) x 140% of Fee.

(2) A Time Based Fee may be selected in accordance with the Framework and as per clause 2.2 (1).

6.6. Fees for a Project that Includes Prototypes and Repeated Buildings:

(1) For a project consisting of a number of repeated buildings, originated by the architectural Professional, and erected under a single building contract for a single client and whereby the buildings are;

a Built on one site or a series of adjoining or closely related sites either wholly apart from each other or

linked with screen walls, common walls or other similar means;

b Repeats of one or more prototype designs for units, blocks or elements and built from the repeated use of one or more sets of drawings and related documents with nominal or no modification for each re-use;

c The total fee payable shall provide for a full Standard Fee for the origination of the first buildings, prior to the repeated buildings, hereby known as "Prototypes". Thereafter, the fee adjustment shall be applied to the repeated buildings.

(2) The Project Cost Based Fee payable for repeated buildings applicable to Work-Stages 1 through 4b, both inclusive shall be 32% (thirty two percent) of the Standard Fee. The Fee portion for repeat buildings and the said Work-Stages shall be deemed to include preparation of Site Plans, using the Prototypes, and any minor modification to drawings and related documents, thereto, save for modifications to the designs, Technical or Construction Documentation. No reduction to the Fee shall apply for Work-Stages 5 and 6 for which the Fee portion shall be maintained at 30% (thirty percent) of the Standard Fee (27% and 3%: construction and Closeout respectively).

(3) Any modifications to designs, Technical and Construction Documentation for repeated buildings shall be on the basis of a Time Based Fee. The number of hours required to carry-out modifications and an outline of such modifications shall be agreed prior to delivery of the service.

6.7 Fees for Buildings Repeated Under Separate Building Contracts:

(1) Where repeated buildings, originated by the same Architectural Professional, are erected under separate building contracts and the drawings and related documents for the Works are re-used for simultaneous or subsequent building Contracts with minor modifications, thereto, save for modifications to the designs, Technical or Construction Documentation, the Fee portion for Work-Stages1 through to 4b, both inclusive, shall be 32% (thirty two percent) of the Standard Fee.

(2) The total Fee for services rendered in terms of clause 6.7 (1) above shall be determined by separately calculating the Fee component in respect of each Building Contract based on its Total Construction Cost.

(3) The Fee for such a project and the said work-stages shall be deemed to include preparation of Site Plans and any minor modification to existing drawings and related documents, save for modifications to the designs, Technical or Construction Documentation, No reduction to the Fee shall apply for Work-Stages 5 and 6 and for which the Fee portion shall be maintained at 30% (thirty percent) of the Standard Fee at 27% and 3%: Construction and Closeout respectively.

6.8. Fees for the Use of Designs, Technical and Construction Documentation Originated by Others:

(1) Where there is no requirement to render any services in respect of the re-use of drawings and related documents originated by the Professional and where another Professional may be appointed for a subsequent project, the agreement as to which party retains copy-right and payment of any royalty for the re-use of such drawings and related documents shall be determined by mutual agreement of the parties.

(2) Where only repeated buildings originated by another Professional, herein referred to as "Standard Drawings" are to be used, with nominal or no modifications, the Fee portion for Works-stages 1 through to 4b, both inclusive shall be 37% (thirty seven percent) of the Standard Fee No reduction to the Fee shall apply to Work-Stages 5 and 6 for which the Fee portion shall be maintained at 30% (thirty percent) of the Standard Fee (Project Cost Based Fee) at 27% and 3%: Construction and Closeout respectively.

(3) Where multiple building contracts apply to the same or separate sites, the Fee for each Building Contract shall be calculated separately using the Tariff of Fees table, based on Total Construction Cost of such Building Contract to determine the Standard Fee for each contract.

(4) Apportionment of the Fee (37% of the Standard Fee), up to and including Work-Stage 4b and where the Works comprise only buildings based on Standard Drawings, shall be as follows;

Work Stages	*Proportion of fee*	*Cumulative total*
1 Inception	*5%*	*5%*
2 Design Concept	0%	*5%*
3 Design Development	5%	*10%*
4a Technical Documentation	17%	*27%*
4b Construction Documentation	*10%*	*37%*

(5) Where the buildings based on Standard Drawings form a part of the Works, the Fee portion for such part of the Works shall be calculated separately based on Total Construction Cost of the said Works. The Fee portion, thereto, shall be consolidated into the Standard Fee which total of the Fee shall be apportioned in accordance with clause 6.2 (1).

(6) The Project Cost Based Fee for such a project, and as stated at clause 6.8 (2) above, shall be deemed to include;
   a Familiarization and review of architectural designs, Technical and Construction Documentation to assess functionality and fitness-for-purpose, health and safety of the occupants;
   b An audit, in support of the provisions of clause 6.8 (5) (a) above, of the existing condition of the erected building or structure to which the Standard Drawings relate;
   c Report to the Client on any need to modify designs, Technical and Construction Documentation to improve quality, functionality and achieve fitness-for-purpose; and
   d The scope of Standard Services for Work-Stages 1 through to 4b, both inclusive.

(7) Should modifications to existing designs and documentation be necessary, the Architectural Professional shall be remunerated, over and above the Project Cost Based Fee, for such modifications on the basis of a Time Based Fee.

(8) Where modifications to existing designs, Technical and Construction Documentation have been necessary and carried out by the Architectural Professional for reasons of deficiency or omission, of whatever nature, and on account of the necessity to achieve fitness-for-purpose, the cost of such modifications shall be deductible from the royalty or claimable from the author of the said designs or technical documentation. Where any claim of fees lies under this sub-clause, the said claim shall be due for submission as at the date of the approval of the modified designs by the relevant authorities.

(9) The number of hours, including any travelling time in accordance with clause 6.8 (5) (b), needed to carry-out modifications and an outline of such modifications shall be provided by the Architectural Professional for consideration and approval by the Client prior to delivery of the service.

(10) The Architectural Professional shall be deemed to have assumed full professional liability for the use of "Standard Drawings", whether modified or not, save in a situation where the Client has, for no valid and stated reasons, declined or failed to authorize the necessary modifications.

6.9. Fees for an Appointment to take over Incomplete Work of another Architectural Professional:

(1) Where the Architectural Professional takes over from another professional, the Work-Stages to be completed shall be agreed following assessment and recommendation by the Architectural Professional, and approval by the Client.

(2) Unless otherwise provided for in the agreement, the fee for the remaining services shall be based on the Project Cost Based Fee stated in the Agreement, provided that the Fee portion as per the Work-Stage Fee apportionment at clause 6.2 (1) and for the incomplete Work-Stage and at which the service is to be commenced, shall be subject to an increase of 15% (fifteen percent).

(3) The Fee shall be deemed to include;
   a Familiarization and review of architectural designs, and any existing Technical and Construction Documentation to assess functionality and fitness-for-purpose;
   b Report to the client on any necessity to modify designs, Technical or Construction Documentation to improve quality, functionality and fitness-for-purpose.
   c Modification of designs, Technical or Construction Documentation as may be necessary.

(4) The Architectural Professional shall be deemed to have assumed full professional liability for taking over the project.

6.10. Fees for Inspection, Contract Administration and Close Out:

(1) The fee portion for inspecting the works, administering any building contract and achieving close out shall be 30% (thirty percent) of the total of the Fee subject to adjustment as per criteria in the Framework and in terms of clause 2.1 (7) of the Framework.

(2) Site inspections and meetings on site, held once a month by the Architectural Professional to establish progress and conformity of the Works to Contract Documentation, shall be deemed to be part of the Standard Services. Inspection or meetings on site in excess of once a month, as may be deemed necessary by the parties, may be regarded as Special Management Services in accordance with clause 5.2 (1) (c) above. The frequency of such services and the form of remuneration shall be provided for in the Agreement.

(3) Notwithstanding clause 6.10 (2), remuneration additional to the Project Cost Based Fee or Time Based Fee shall not accrue where clarifications and visits to the Works are necessary to provide responses to Requests for Information (RFIs) or queries by the Building Contractor on account of deficiencies or omissions, of whatever nature, in Construction Documentation.

6.11 Fees for Review, by an Architect, of Work Performed by an Architectural Technologist or Architectural Draftsperson:

(1) Where the review and sign-off of documents, by a registered professional in the category of Architect, is required for purposes of advancing to Work –Stages 4b, 5 and 6 and submission to authorities in terms

of Section 48A of the Act, the Fee for such review shall be a Time Based Fee based on the hourly rate applicable to a Principal/Director with a Practicing Certificate. The said Fee shall be deducted from the Fee due for Standard Services (up to and including Work-Stage 4a) and shall be payable to the Architect by the Professional responsible for the origination of the design and Technical Documentation.

(2) Subject to clause 6.11 (1), the Project Cost Based Fee for Work-Stages 1 through to 4a, both inclusive, shall accrue directly to the Professional responsible for the origination of the design and documentation that is the subject of review.

(3) The Architect shall itemize and illustrate, in written and/or graphic form for own record, and for the attention and record of the Architectural Technologist or Architectural Draftsperson as the case may be, any aspects of the design or documentation that require amendment for purposes of achievement of fitness-for-purpose, health and safety of the occupants, generally in terms of the provisions of section 48A of the Act.

(4) The duration of the review in hours, the Fee and any other costs, thereto, shall be determined ahead of the exercise and for the consideration and approval of the originator of the design and technical documentation, which approval shall not be unreasonably withheld.

6.12. Fees for Review of Work Performed by another Architectural Professional:

(1) Where the review is required, at any Work-Stage, of services provided by another Professional, for quality assurance or other purpose other than taking over the service, the fees for such review shall be on the basis of a Time Based Fee. The duration of the review, tasks and costs, thereto, shall be agreed by the parties ahead of the review exercise.

6.13 Fees for Deployment of Employees:

(1) Where an employee of the Architectural Professional is deployed on site for extended inspection or on account of delays not occasioned by the Architectural Professional or other agreed purpose, the amount of reimbursement shall be the "Total Cost of Employment" plus 30% (thirty percent).

(2) For purposes of the Framework, "Total Cost of Employment" means basic salary and annual bonus, fringe benefits not reflected in the basic salary including but not limited to;

a Income benefit for the use of a motor vehicle;

b Employer's contribution to pension, provident fund, medical aid and group life insurance premiums;

c Statutory contributions and levies;

d All other costs and benefits according to the conditions of appointment but excluding any profit participation in the practice, firm, partnership or body corporate.

6.14 Fees for Extended Period of Initial Building Contract:

(1) In the event that the initial period for construction of the Works is exceeded by more than 10% (ten percent), and provided that such prolongation is due to no fault of the Architectural Professional, an amount additional to the Fee shall be payable for additional engagement resulting from the extension of time or prolongation of the period of construction of the Works. The additional amount, on a monthly basis or part thereof, shall be calculated by multiplying the Fee portion for Work-Stage 5 (27% of the Fee) by the said extension or prolongation, rounded to the nearest week, and dividing by the number of weeks for the initial period of construction of the Works. Related and additional reimbursable expenses shall also become due and payable.

6.15. Travelling Time:

(1) Payment based on hourly rates or part thereof shall apply to travelling time on a round trip outside of a thirty (30) kilometre radius from the offices of the architectural professional irrespective of whether or not the Fee is based on a Project Cost Based Fee or Time Based Fee. The provision of this clause shall not apply to lump sum fixed fees.

6.16. Fees Payable upon Termination of the Services:

(1) Where the Agreement between the Client and the Architectural Professional is terminated for reasons beyond the control of either party, the Client shall make payment in full for the portion of the Work-Stage that has been completed. Payment of part of the Fee portion, thereof, for an incomplete Work-Stage may be made following assessment and recommendation by an independent Architectural Professional or Principal Agent who is not a party to the Agreement.

(2) Compensation and costs, thereto, on account of termination of the services, save where such termination is due to reasons beyond the control of either party, shall become due and payable by the party responsible for such termination. An amount equal to 5% (five percent) of the Fee portion for the Work-Stage at which the services are terminated, and in accordance with the apportionment at 6.2 of the Framework, shall become due and payable as compensation.

6.17. Fees for Participation in a Dispute Resolution Process:

(1) Where a project is referred to dispute resolution, the Architectural Professional retained on that project shall be remunerated on the basis of a Time based Fee for the additional service required in relation and contribution to the dispute resolution process.

(2) For acting in accordance with clause 6.17 (1) above and only as expert witness to the Works, and excluding as witness for own course, the Fee shall be a Time Based Fee increased by 50% (fifty percent) to 150% (one hundred and fifty percent). For acting in any other capacity in a dispute resolution process, the applicable fee should be subject to mutual agreement of the parties.

6.18 Payment of Fee Claims:

(1) The Architectural Professional's claims are due and payable on presentation or alternatively within the period as specified in the Agreement.

(2) The Architectural Professional shall be entitled to issue interim claims for part payment of the Fee upon proper completion of a Work-Stage and submission of documents in accordance with the services as selected and outlined in the Agreement.

(3) The Client shall be entitled to withhold retention of 10% (ten percent) of the Fee portion applicable to the Work-Stage in question pending consideration and approval of work-stage submissions. Should the Client wish not to proceed to the next Work-Stage or approval not be granted within fifteen (15) calendar days from the date of submission and for reasons beyond the control of the Architectural Professional, the retention shall be released in full and immediately become due and payable. No retention to the Fee portion shall apply for Work-Stages 5 and 6.

(4) For Work-Stage 5, and unless otherwise stated in the Agreement, the Architectural Professional shall be entitled to submit interim claims on a monthly basis.

(5) (5) Notwithstanding clauses 6.18 (1), (2) and (4) above, regular invoicing and at intervals as may be required by the Value Added Tax Act is deemed to be part of the Agreement and binding to the parties.

6.19 Reimbursable Expenses:

(1) In addition to the Fee, the Client shall reimburse the Architectural Professional for all reasonable expenses necessarily and properly incurred.

(2) The expenses contemplated and reimbursable include the following:

a Printing, photocopy, maps, models, presentation materials, photography and similar documentation including all reproduction or purchase costs of documents, hotel, subsistence and travelling expenses, including kilometre allowances at current rates for vehicle usage or as agreed, toll fees and other similar reimbursable expenses;

b All payments made by the Architectural Professional, including fees and other expenses for specialized professional and other services necessarily incurred on behalf of the Client;

c Telephonic, electronic and facsimile communication, special postage and courier deliveries;

d Any additional reimbursable expenses that may be agreed to by the Client.

(3) Where a list is available and provided by the Council, after consultation with the relevant authority, reimbursable expenses for items on the said list, shall be claimed at rates appearing therein.

(4) Payment for reimbursable expenses may be claimed separately from the Fee and at any time irrespective of non-completion of the Work-Stage or due date of the regular monthly period of Fee claims.

6.20 Withholding of Payment and Claims by the Client against the Architectural Professional:

(1) Circumstances and conditions in terms of which the Client may withhold payment of a fee or disbursements, make payment with a set-off for errors, omissions or negligence, in whole or in part, shall be provided for in the Agreement.

(2) Notwithstanding the provisions of clause 6.20 (1) above, litigation or dispute resolution for recovery of loss, the Client may exercise the right and discretion in terms of the Architects Registration Act to report, to the Council, acts of negligence or improper professional conduct and may submit a claim for compensation, by the Council, for such impropriety.

7.0 Action by an Architectural Professional in the Case of a Dispute:

(1) In the case of a dispute between the parties or variance as to the interpretation of the Framework and amounts payable, the Architectural Professional shall refer the matter to the Council for assessment and recommendation or advice.

(2) The recommendations of the Council shall not be construed as a ruling in terms of the contractual obligations of parties to the Agreement and are not meant to substitute due process of dispute resolution or to wave the rights of the parties in terms of that Agreement.

(3) The Council's advice to the parties to the Agreement shall be limited to the use of the Tariff of Fees and interpretation of the Framework.

(4) An architectural professional and originator of designs and technical documentation aggrieved by the charges being levied by the Architect, at clause 6.11 (4) of the Framework, may refer the matter to the Council for assessment and ascertainment of any misconduct or unethical practice on the part of the Architect.

8.0 Definitions & Interpretation

8.1 Definitions:

(1) In this document, unless the context otherwise indicates, an expression or word hereunder shall have the meaning ascribed to it and as follows;

"Architect" means a person registered in that category and issued with a practicing certificate in terms of the relevant sections of the Act and its regulations.

"Architectural Professional" means a person or practice, appointed to render any architectural services in terms of this Framework and includes a firm, partnership, or body corporate which shall be constituted, in the Agreement, as a legal person.

"Alteration" means any physical change made to an existing building and includes any portion of an existing building altered as a result of an addition to such building.

"Budget" means the anticipated total cost of the project and/or Works and includes Total Construction Cost; provided that the cost estimates on which the budget is based, shall be deemed to be valid for a period not exceeding ninety (90) calendar days.

"Building Capacity Management" means the organizational framework, processes and manner o procurement of the services and resources necessary to ensure optimal performance of the building(s), during the operational phase, as intended by its Quality Policy.

"Building Contract" means an agreement entered into between the client and the Building Contractor for the execution of the works.

"Budget Provisions" means allowances, in the estimate of total project cost or in the Contract Sum, for expenditure, at the discretion of the client, related to supplies or installations that are not the direct responsibility of the Building Contractor or the Architectural Professional.

"Candidate Architect" means a person who has obtained a professional degree in architecture in accordance with Section 23 of the Act.

"Category of Registration" means the category in which an individual is registered in terms of Section 23 of the Act.

"Client" means the party appointing the Architectural Professional to perform the services referred to in the Framework or any part thereof,

"Client/Architectural Professional Agreement" means the Agreement plus relevant annexures prepared in accordance with the basis and context outlined in the Framework and under 1.2 above".

"Consultant" means a person or entity appointed by the Client to provide services with respect to the Works"

"Contractor" means the entity or entities contracting with the Client for the execution of the Works or part thereof.

"Contract Documentation" means documents signed by the Client and the Building Contractor for purposes of the execution of the Works.

"Construction Documentation" means graphic representations, plans, sections, elevations, site plans, specifications,

construction details, service co-ordination information, schedules and such other details and descriptions as are within the reasonable competence of an Architectural Professional which are sufficient to indicate the scope of the Works.

"Contract Sum" means the amount of the value of the Works recorded in the Building Contract.

"Inspection" means such periodic visits to and in connection with the Works by the Architectural Professional as are necessary to establish conformity of the execution of Works to Contract Documentation, and to provide on-site clarification and further information during the progress of the Works.

"Green Building or Environmental Design" means the design, technical and construction documentation of buildings incorporating, in whole or in part, internationally recognized green building standards for energy and water efficiency, indoor environmental quality, transport, emissions, land and ecology.

"Notice of the Council" means publication by the Council in the Government *Gazette*, at the end of each calendar year, the validity of which endures during the currency of the following calendar year.

"Professional" means a person registered under one of the categories in terms of the relevant section of the Act and is in possession of a valid Practicing Certificate as per Section 26 of the Act.

"Project" means the development, or part of the Works, for which the Architectural Professional is appointed to provide services.

"Principal Agent" means the person appointed by the client to administer the Building Contract.

"Practical Completion" means the stage of completion where the Works or a section thereof, as certified by the
Principal Agent, is substantially complete and can effectively be used for the purpose intended.
"Principal Consultant" means the person, in possession of a valid practicing certificate, appointed by the client to lead the Consultants and is the individual responsible and in charge of design and technical coordination of the services of Consultants.
"Quality Policy" means the qualitative and quantitative attributes of the quality of the Works or Project and includes statement of need, project objectives, standards, required operational capability statements and critical performance criteria to be applied to evaluate the quality of the designs or the Works.
"Registered Person" means a Professional as defined in the Framework and is synonymous with the term "Professional".
"Registered Quantity Surveyor" means a person registered and licensed to practice, in the Republic of Botswana, by the Quantity Surveyors Registration Council.
"Site Plans" means the layout of buildings within the boundaries of the site including their relationships to the Works and services external to the buildings such as internal access roads, parking and any boundary walls or fences.
"Standard Fee" means the total of the Project Cost Based Fee payable for the performance of Standard Services (Work-Stages 1 through to 6, both inclusive) including any integrated Additional Services in accordance with 2.1 (6) of the Framework.
"Standard Services" means the services as outlined in the Framework and in terms of Work- Stages (1 through to 6), under 3 above.
"Tariff of Fees" means the Project Cost Based fee and/or Time based Fee.
"Total Construction Cost" means the total cost of the Works or part thereof as actually or estimated to be paid out to the Building Contractor upon Close Out (Work-Stage 6). The part thereof shall include the cost of associated works external to the buildings comprising that part.
"Works" means all work executed or intended to be executed according to the Building Contract.

8.2 Interpretation:

(1) In the written Agreement, and to the extent consistent with the context in the Framework, the words; "advise", "appoint', "approve", "authorize", "certify", "consent", "decide", "delegate", "designate", "instruct", "issue", "notify", "object', "reply", "request', and "specify" shall indicate a specific act required to be carried out.
(2) The masculine gender includes the feminine and neutral genders and vice versa, the singular includes the plural and vice versa and persons shall include firms, partnerships and corporate entities.
(3) In this Framework, all monetary amounts exclude tax, which tax shall be added to any amounts which become due and payable in terms of the relevant legislation.

Republic of Botswana — Tender No. MTC/MMGE/CDU/1/12/17-18
Ministry of Mineral Resources, Green Technology and Energy Security

A SERVICES TENDER FOR THE PROVISION OF OWNER'S ENGINEER FOR THE DEVELOPMENT OF A MAXIMUM OF 100MW OF COAL BED METHANE (CBM) FUELLED PILOT POWER PLANTS IN BOTSWANA BY INDEPENDENT POWER PRODUCERS (IPP)

- TENDER OFFERS ARE INVITED for the submission of technical and financial proposals of Owner's Engineer for the development of a maximum of 100MW of Coal Bed Methane (CMB) fuelled pilot power plants in Botswana by Independent Power Producers (IPP).
- The Procuring Department is Ministry of Mineral Resources, Green Technology and Energy Security, Private Bag 0018, Gaborone, Botswana, Telephone No. (+267) 3656600, Fax No. (+267) 3909368.
- This is an Open International Bidding tender.
- In order to be considered for award, the following documents are required to be submitted:

i. Valid Tax Clearance Certificate or Exemption Certificate for international bidders. (Bidder shall provide Tax Identification Number (TIN) for the Procuring Entity to verify the Tax Clearance or Exemption online from BURS website);

ii. Tenderers who are domiciled in Botswana must be registered with the Public Procurement and Asset Disposal Board in any of the following categories (which shall be verified from IPMS):

Code: 311 – Project Management Services, Sub-Code: 01 – Project Management Services.
or
Code: 13 – Project Management Services, Sub-Codes: 01 or 02 or 03 or 04 or 05.

iii. International bidders should submit certified copies of constitutive documents defining the legal status and place of registration of the bidder in the country of origin;

iv. Submission of completed form of declaration for tendering purposes;

v. Submission of completed and signed Certificate of Authority for Signatories.

- In line with the Citizen Economic Empowerment (CEE) Policy of 2012, foreign companies are mandated to sub-contract up to (30%) percent of the contract to one hundred percent (100%) citizen owned companies. As such the sub contractor should be identified by name in the bid as well as the percentage of the work to be sub contracted.
- The physical address for collection of Tender Documents is: Ministry of Mineral Resources, Green Technology and Energy Security, Plot No. 50676, Fairground Office Park, Block C, Second Floor, Office No. S07, Gaborone. Documents may be collected between 0730 hours and 1245 hours and from 1345 hours to 1630 hours on weekdays from 11th June, 2018.
- A non-refundable deposit of P500.00 (Five Hundred Pula only) payable in cash in favour of the Government of Botswana is required upon collection of the Tender Document.
- Queries relating to the issuance of these documents may be addressed to: Mr Mogomotsi Nyepetsi, Telephone No. (+267) 3656600, E-mail: mnyepetsi@gov.bw.
- The closing time for receipt of tender offers is 1000 hours on 30th July, 2018 following which tender offers will be opened in the presence of bidders wishing to attend.
- Late tender offers will not be accepted.
- Telegraphic, telephonic, telex, facsimile or emailed tender offers will not be accepted.
- This tender is a Two-Envelope System tender. Technical proposal sealed in one envelope marked 'Technical' and 'Financial' proposal sealed in one (1) envelope marked 'Financial' then the two (2) envelopes must be sealed in one (1) envelope/package labelled: "Tender No. MTC/MMGE/CDU/1/12/17-18 — A Services Tender for the Provision of Owner's Engineer for the Development of a Maximum of 100MW of Coal Bed Methane (CBM) Fuelled Pilot Power Plants in Botswana by Independent Power Producers (IPP)", and shall be delivered to: The Secretary, Ministerial Tender Committee, Ministry of Mineral Resources, Green Technology and Energy Security, Fairground Ground Office Park, Block C, Ground Floor, Office No. 19, Plot No. 50676, Gaborone.

The Public Procurement and Asset Disposal Board's Standardised Conditions of Tender apply to this procurement, for which all the applicable Tender Data is contained in the Tender Documents.

Notwithstanding anything in the foregoing, the Government of Botswana is not bound to accept the lowest or any tender offer.

No bidder shall be allowed to represent more than one company. The tender clarification and site visit meeting are a pre-requisite and as such those not attending will not be eligible under evaluation and adjudication for award.
- Queries relating to the issuance of this document shall be addressed to: Principal Quantity Surveyor II or Chief Technical Officer, Telephone No. 6861729, Fax No. 6863214. All queries should be in writing and deadline for the same is fourteen (14) working days before the closing date of the tender.
- The Bid Submission Method is: One-Envelope Submission Method in which the bidder's financial and technical offer are submitted together in one sealed envelope.
  Completed tender offers are to be submitted in a plain sealed envelope clearly marked: "Tender No. NW/MAA/AB/004/18 — Procurement of Works for Maintenance of Makakung Primary School in Makakung" and addressed to: Senior Assistant Council Secretary, Maun Administrative Authority, Private Bag 11, Maun and shall be registered and deposited in a Tender Box at LAPAD Secretary's Office No. 39, Maun Administrative Authority, Maun.
- The closing time for receipt of tender offers is 1000 hours on 9th July, 2018 and tender opening will be done

immediately after closing at Maun Administrative Authority, Old Council Chambers in the presence of bidders who wish to attend at their own expenses.

- Late tender offers shall not be accepted.
- Telephonic, telegraphic, telex, facsimile or emailed tender offers shall not be accepted.
- Submission of more than one bid with the same Shareholdings and Directorship are strictly prohibited. Companies with more than one submission will be disqualified for further processing as such prohibits fair competition and bid fairness as per LAPAD Act section 34 (A, B) and Competition Act, Section 25 (C).

The Local Authorities Procurement and Asset Disposal Board's Standardised Conditions of Tender apply to this procurement, for which all the applicable Tender Data is contained in the Tender Documents.

Bidders shall bear all costs associated with the preparation and submission of their tender offer and the Maun Administrative Authority hereinafter will under no circumstances be responsible or liable for these costs, regardless of the conduct or outcome of the tender process.

Notwithstanding anything in the foregoing, Maun Administrative Authority is not bound to accept the lowest or any tender offer.

Republic of Botswana — Tender No. DJS/MTC/POL 032/2018-2019
Botswana Police Service

A TWO (2) YEAR FRAMEWORK CONTRACT FOR THE PROCUREMENT OF SEWAGE COLLECTION SERVICES AT BOTSWANA POLICE COLLEGE IN KANYE

- BOTSWANA POLICE COLLEGE, is undertaking a tender for the provision of sewage collection (effluent removal) services at the Botswana Police College in Kanye for a period of two (2) years, as described in the tender specifications. The proposals will be the basis for selecting a suitable service provider.
- Tender offers are invited from local service providers to submit a proposal for the provision of sewage collection (effluent removal) services for the college. Successful bidder will be expected to provide sewage collection (effluent removal) from the colleges septic tanks.
- This is an Open Domestic Tender.
- Bidders are required to be registered with the Public Procurement and Assset Disposal Board (PPADB) under: Code: 103 — Sewage, Sanitation and Refuse Disposal Services, Sub-Code: 01 — Sewage Collection, Disposal and Related Services.
- The Procuring Department is Botswana Police Service.
- The physical address for collection of Tender Documents is: Botswana Police College, near Otse, Administration Block, Reception Office, Ground Floor, along Mogobane/Ranaka Road.
- Documents may be collected during working days between 0730 hours and 1245 hours and from 1345 hours to 1630 hours on weekdays with effect from Monday, 25th June, 2018.
- Bidders are required, in order to be considered for award of the contract, be appropriately licensed to trade, manufacture and/or supply items and be in possession of requisite documentation to import, manufacture and/or sell such items in accordance with the Laws of Botswana.
- Preferential Treatment: Where applicable, the Economic Diversification Drive (EDD) for preferential treatment may be applied in the evaluation of the tender. Bidders must, in order to be considered for preferential treatment, submit an EDD Registration Certificate and should make an undertaking that the required items/supplies shall be produced locally.
- The Botswana Police Service reserves the right to visit facilities/factories during production and any violation of the EDD conditions shall lead to immediate termination of the whole contract and the next compliant and lowest priced best bidder may be considered for award of the tender.
- In line with the Citizen Economic Empowerment (CEE) youth policy of 2010 and the Presidential Directive Cab 14 (b) of 2015, youth, women and people with disability are mandated to 15% price preference. In order for the target group to benefit from this preference, they should submit a registration document from relevant Ministry or Department.
- Queries relating to the issuance of these documents may be addressed to: Botswana Police College, Private Bag 009, Otse, Telephone No. 5336200, Fax No. 5337528, Attention: Ms C. Koloi or G. Mothaelwa, E-mail: ckoloi@gov.bw, gmothaelwa@gov.bw or tmojaje@gov.bw.
- This is a Two-Envelope System (Technical and Financial) in which the technical offer from the tenderer is placed in one sealed envelope marked "Technical Offer", and the financial offer is placed into a second envelope marked "Financial Offer" and both placed into third bigger package which is sealed. All three envelopes and or packages shall clearly be marked with the name of the bidder, Tender Number and Tender Title.
- Both technical and financial proposal envelopes should have one (1) original Tender Document plus two (2) copies of the Tender Document. The original document should be marked "Original" and all copies marked "Copy 1" and "Copy 2" in separate and sealed envelopes marked: "Tender No. DJS/MTC/POL 032/2018-2019 — A Two (2) Year Framework Contract for the Procurement of Sewage Collection Services at Botswana Police College, Kanye" shall be delivered to: The Secretary, Ministerial Tender Committee, Ministry of Defence, Justice and Security, Central Business District, Plot No. 54381, Square House, Fourth Floor, Phase 2, Gaborone.
- Tender offers submitted on closing day will be submitted to: The Secretary, Ministerial Tender Committee, Ministry of Defence, Justice and Security, Central Business District, Plot No. 54381, Square House, Eighth Floor, Phase 2, Gaborone.
- Tender opening will take place immediately after closing at 0900 hours at: Ministry of Defence, Justice and Security, Central Business District, Plot No. 54381, Square House, Eighth Floor, Phase 2, Gaborone.
- The original must be marked "Original" and copies marked "1 and 2".
- A non-compulsory tender clarification meeting with representatives of the Procuring Department will take place at Botswana Police College, Kanye, Conference Room, on Thursday, 12 July, 2018 at 1000 hours.
- A non-refundable deposit fee of P150.00 (One Hundred and Fifty Pula only) payable in cash made in favour of the Government of Botswana is required on collection of the Tender Documents. Youth registered companies pay a non-refundable fee of P75.00 (Seventy-Five Pula only).
- The closing time for receipt of tender offers is 0900 hours on Tuesday, 24th July, 2018.
- Late tender offers will not be accepted.

- Tender proposals will be opened in the presence of bidders wishing to witness the tender opening session, immediately after closing at 0900 hours.
- Telephonic, faxed, telexed and emailed tender offers will not be considered.
- Names of the bidders and addresses must be reflected on the outer envelopes.

The Public Procurement and Asset Disposal Board's Standardised Conditions of Tender apply to this procurement, for which all the applicable Tender Data is contained in the Tender Document.

Notwithstanding anything in the foregoing, the Government of Botswana is not bound to accept the lowest or any tender offer.

South-East-South Sub-District Council – Tender No. SESSD/ELEC/39/2018
Civil and Mechanical Engineering Services (Electrical Engineering Division)

A WORKS CONTRACT FOR THE SUPPLY, INSTALLATION, TESTING AND COMMISSIONING OF 15M x 3NO TOWER LIGHTS IN OTSE VILLAGE

- TENDER OFFERS ARE INVITED for the supply, installation, testing and commissioning of 3No tower lights in Otse village.
- The Procuring Department is Civil and Mechanical Engineering Services (Electrical Engineering Division – South-East-South Sub-District Council).
- This tender is opened to bidders who are domiciled in Botswana and are 100% citizen owned contractors. Bidders shall, in order to be considered for award of the contract, be registered with the Public Procurement and Asset Disposal Board in the following category: Code: 02 – Electrical Engineering Works, Sub-Code: 01 – Electrical Installations, Grade: B. Preferences in accordance with the provisions of the Local Authorities Procurement and Asset Disposal Act, 2008 shall apply to the contract as per the applicable Presidential Directives.
- The pre-tender estimate for these works is P600,000.00.
- 15% price preferential treatment for companies owned by youth, women and people with disability shall be applied as per PPADB Guideline on Public Procurement Preferential Treatment.
- Bidding will be conducted in accordance with the Competitive Bidding Procedures contained in the Local Authorities Procurement and Asset Disposal Regulations (LAPAD), 2009.
- The physical address for collection of Tender Documents is: South-East-South Sub-District Council, Mechanical Workshop, Ramotswa.
  Documents shall be collected during working days between 0730 hours and 1245 hours and from 1345 hours to 1630 hours with effect from 19th June, 2018, except for weekends and public holidays.
- A non-refundable tender fee of P150.00 (One Hundred and Fifty Pula only) payable in cash is required before collection of the Tender Document. Payments should be made at Revenue Office, (New RAC) in Ramotswa, during workdays between 0730 hours and 1245 hours and from 1345 hours to 1530 hours, except on weekends and holidays.
- A non-refundable tender fee of P75.00 (Seventy-Five Pula only) will be required from companies owned by youth upon showing proof of ownership, that is, I.D and Form of Directors.
  Payments should be made at the Council Revenue Office No.118, First Floor, New RAC, Ramotswa. Note: Revenue office opens from 0730 hours to 1530 hours.
- Queries relating to the issuance of this document shall be addressed to: Principal Electrical Engineer (F. Masuku) at least five (5) working days before tender closure, Telephone Nos. 5381200 or 5381405, Fax Nos. 5390201 or 5381403.
- A compulsory pre-tender site visit/clarification meeting with representatives of the Procuring Department will take place at South-East-South-Sub District Council at Mechanical Workshop, Ramotswa on 4th July, 2018. Registration of bidders will start from 0800 hours until 0930 hours, where further instructions will be given on how to proceed to the Project site. Bidders that come later than the stated time will not be allowed to register or participate in the site visit activities. Sending one person to represent more than one company will not be allowed. Bidders must bring their own transport for site viewing. Tender offers from companies that did not attend the site visit will not be considered.
- Tender proposals should be submitted in three (3) sets; one (1) marked "Original" and two (2) copies of original marked "Copy" in a plain envelope securely sealed and clearly marked: "Tender No. SESSD/ELEC/39/2018 – A Works Contract for the Supply, Installation, Testing and Commissioning of 15m x 3No Tower Lights in Otse", and addressed to: Senior Assistant Council Secretary, South-East-South Sub-District Council, Private Bag 009, Ramotswa. These shall be delivered to Adjudication Office Nos. 5, 6 & 7 (Porta cabin/camp), behind Treasury Administration Block, New RAC, Ramotswa.
- The closing time and date for receipt of tender offers is 0900 hours on 19th July, 2018 and opening will follow immediately after closure in the presence of interested bidders. Bidders wishing to attend the tender opening may do so at their own cost, at New Architecture and Building Services Office Block, next to New Mechanical Workshop, Ramotswa.
- Late, telephonic, telegraphic, telex, facsimile or emailed tender submissions will not be accepted.

The Local Authorities Procurement and Asset Disposal Board's Standardised Conditions of Tender shall apply to this procurement, for which all the applicable Tender Data is contained in the Tender Documents.

Bidders shall bear all costs associated with the preparation and submission of their tender and the South-East-South Sub-District hereinafter will under no circumstances be responsible or liable for these costs, regardless of the conduct or outcome of the tender process.

Notwithstanding anything in the foregoing, South-East-South Sub-District Council is not bound to accept any tender offer.

F. MASUKU,
for Council Secretary,
South-East-South Sub-District Council.

- The physical address for collection of Tender Documents is: 1 Gov. Office (Service Centre) at Mafenyatlala Mall.

Documents should be collected during working days between 0730 hours and 1245 hours and from 1345 hours to 1630 hours with effect from 15th June, 2018 on presentation of receipt of payment, except for weekends and public holidays.

Queries or clarifications relating to the issuance of these documents should be addressed (in writing) to: The Senior Roads Engineer, Private Bag 005, Molepolole, Telephone No. 5921805, Fax No. 5921805 or hand-delivered to: Council Roads Office, Molepolole by Thamaga Junction from 15th June, 2018 to 11th July, 2018.

A compulsory site meeting with representatives of the Procuring Department will take place at Mogoditshane RAC on 28th June, 2018 starting at 0900 hours, where further instructions will be given. Registration starts at 0830 hours and closes at 0900 hours. Contractors who come later than the stated time will not be allowed to participate in the site visit activities. Sending one person to represent more than one company shall not be allowed. Tender offers from companies that have not attended the site visit will not be considered.

Tender proposals must be submitted in a sealed envelope clearly marked: "Tender No. KwDC/TR/CMS/RDS-HQ/049/2018 — Provision of Works for Asphalt Overlay and Road Marking of Mogoditshane Internal Roads and Mmopane Access Road in the Mogoditshane Sub-District ", must be addressed to: Council Secretary and shall be delivered, registered and deposited into the Tender Box in RAC in the LAPAD Secretary's office.

The closing time for receipt of tender offers is 0900 hours on 17th July, 2018. Opening of the tender submissions will be done immediately after closure on the same day in the Council Chambers Lounge Room, in the presence of bidders wishing to attend.

Late, telegraphic, telex, facsimile and emailed tender offers will not be accepted.

The Local Authorities Procurement Asset Disposal Act's Standardised Conditions of Tender shall apply to this procurement, for which all the applicable Tender Data is contained in the Tender Documents.

Notwithstanding anything in the foregoing, Kweneng District Council is not bound to accept the lowest or any tender offer nor incur expenses in preparation thereof.

M. RAMATLHAKWANA,
for Council Secretary,
Kweneng District Council.

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in Terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT STATEMENT (EIS) FOR THE OPERATIONS OF SENYATI SAFARI CAMP IN CH/4

The major findings of an Environmental Impact Study (EIS) undertaken for the Operations of Senyati Safari Camp in CH/4 are as summarised hereunder.

Nature and Magnitude of the Activity

Senyati Safari Camp was established in 2009 and is an eco-friendly establishment that forms part of a free flowing movement corridor, with no fences, between Chobe National Park and Zimbabwe through the Lesoma Valley. The camp offers eight self-catered chalets and 19 camp sites with a central bar area overlooking a pumped waterhole which regularly attracts elephant and buffalo to drink.

The camp provides all basic amenities but does not provide food for guests and does not offer any tourist activities directly. However, game drives, walking safaris and boat cruises can be arranged with local companies. There is a laundry and a basic maintenance workshop but there are no vehicle workshop or fuel storage facilities at the camp.Electricity at Senyati Safari Camp is provided by a connection to the Botswana Power Corporation grid network whilst water is pumped from a borehole on site and stored in an elevated water reservoir with water gravity feeding throughout the camp. Solid waste is temporarily stored on site and then taken to the Kasane landfill site for disposal or recycling. Liquid waste is stored in conservancy tanks which are emptied regularly by a licensed waste management contractor and taken to the Chobe Municipal Sewage treatment facility in Kasane.

Rationale for the Project

Located within the Lesoma valley, a natural wildlife movement corridor, Senyati Safari Camp aims to provide high quality self-catered accommodation and camping facilities to the self-drive and mobile safari sector, facilitating the continued expansion of non-consumptive photographic tourism in northern Botswana.

Location of the Activity

Senyati Safari Camp is located in the Lesoma Valley in CH/4, near the international border with Zimbabwe at S17.872293 E025.235837(WGS 84, Decimal Degrees). Senyati Safari Camp is located within the Lesoma valley, 12km to the east of Chobe National Park.

Anticipated Impacts and Proposed Mitigation Measures

The environmental impacts and mitigation measures identified by the EMP study are presented indetail in the Environmental Impact Statement (EIS) and summarised in the table below. A detailed Environmental Management Plan to help manage and monitor potential impacts is included in the EIS.

Environmental Impact	**Proposed Mitigation/Enhancement Measures**
Project Phase: Operation	
Physical and Chemical impacts	
Soil and water contamination	Ensure conservancy tanks are emptied regularly and are well maintained to prevent leakages. Remove the lowest lying conservancy tank and redirect the flow of liquid waste to an alternative tank.
Soil compaction and erosion	Limited removal of vegetation, apart from where absolutely necessary, and rehabilitate affected areas. Use designated pathways and tracks. Ensure drivers read, sign and abide by the code of conduct.
Biological and Ecological Impacts	
Vegetation destruction	Limit removal of vegetation, apart from where absolutely necessary, and rehabilitate affected areas.
Wildlife habitat alienation	Switch off all machinery and vehicles when not in use and keep noise levels down. Limit footprint of camp and extent of camp activities.

Use of local natural resources	Limit size and extent of camp activities and ensure that guests do not collect their own firewood. Firewood Harvesting Permits to be held for the collection of any firewood for use at the camp. Only fallen wood to be collected from varying collection locations.
Fire	All machinery/vehicles/appliances regularly serviced and turned off when not in use. Fire extinguishers and hoses to be positioned around camp with staff trained in fire-fighting and prevention.
Sociological and Cultural Impacts	
Disease transmission	Education of staff and visitors on dangers of disease transmission. Ensure supply of condoms is available.
Visual impact	Continued planting of indigenous vegetation to screen the camp and ensure natural look is maintained. Decor should be subtle and suitable for the bush.
Economic and operational	
Employment	Permanent staff to be employed from the local region with trickle down benefits.
Project Phase: Decommissioning	
Physical and Chemical impacts	
Soil and surface water contamination	Ensure all conservancy tanks are completely emptied prior to removal to prevent spills. Storage of solid waste in secure bunded area, with regular removal to nearby landfill or recycling centre.
Soil compaction, erosion and dust creation	Limited removal of vegetation, apart from where absolutely necessary and rehabilitate affected areas. Use designated pathways and tracks. Ensure drivers read, sign and abide by the code of conduct.
Solid waste/litter pollution	All waste to be stored securely on site prior to transportation to Kasane for disposal/recycling. Ensure all waste is covered on vehicles to prevent waste falling during transportation.
Biological and Ecological Impacts	
Wildlife habitat alienation	Switch off all machinery and vehicles when not in use and keep noise levels down. Rehabilitate the camp footprint following decommissioning.
Vegetation destruction	Limit removal of vegetation wherever possible.
Wildlife problem animals	Ensure that animals do not gain access to any unnatural food or water sources that are present as a result of the camp's decommissioning. Ensure all solid waste is stored securely to prevent wildlife access.
Fire	All machinery/vehicles/appliances regularly serviced and turned off when not in use. Fire extinguishers and hoses to be positioned around camp with staff trained in fire-fighting and prevention.
Sociological and Cultural Impacts	
Disease transmission	Education of staff and visitors on dangers of disease transmission. Ensure supply of condoms is available.
Noise disturbance	Ensure generator is sound proofed and only run generator when necessary. Minimise use of vehicles unless absolutely necessary.
Economic and operational	
Financial costs of decommissioning	Operator to ensure sufficient budget available to fully decommission and rehabilitate camp.

Employment	Decommissioning staff to be employed from the local region to create short-term benefits.

Conclusions and Recommendations of the Study
The consultants therefore recommend that the camp continue to operate on the current site.We believe that the operations of Senyati Safari Camp, whilst currently following an eco-friendly approach, can be improved to make Senyati Safari Camp more environmentally friendly, whilst ensuring the long-term success of the camp and thus safeguarding jobs and revenue.Mitigation and management measures have been identified for all aspects of the project. This includes measures to protect the environment (vegetation, soil, water, wildlife and local people) as well as specific mitigation and management approaches to ensure best practice (energy, water, waste management, hazardous materials, staff and client awareness, health and safety, fire, spillage, problem animal control, use of natural resources and rehabilitation of the site upon decommissioning. Full monitoring plans have been developed for all phases of the project. These plans identify monitoring area, monitoring method, frequency, responsible agent, thresholds and remedial actions.

Environmental Impact Statement Placement
Copies of the EIS can be reviewed at the following locations:
Department of Environmental Affairs, Maun office
Customary Court, Lesoma
Written comments or objections from those likely to be affected by the project and other interested persons should be submitted to: The Department Of Environmental Affairs on or within four (4) consecutive weeks from the first appearance of this notice.

Correspondences
All correspondences should be addressed to District Environment Coordinator, Department of Environmental Affairs, P.O. Box 35, Maun and Telephone No. 6801237, Fax Nos. 6862503/6801246 or hand-delivered to Department of Environmental Affairs, Maun Office, Plot No. 527, Light industrial near to Motovac.

Public Notice

REPUBLIC OF BOTSWANA

Notice Issued in Terms of Section 10 of the Environmental Assessment Act, No. 10 of 2011

NOTIFICATION FOR PUBLIC REVIEW OF ENVIRONMENTAL IMPACT STATEMENT (EIS) FOR THE REFURBISHMENT OF TOTAL WESTERN (ZAMBEZI) FILLING STATION AT LOT 16740, GABORONE WEST INDUSTRIAL, GABORONE

The major findings of an Environmental Impact Assessment (EIA) Study undertaken for the Proposed TOTAL WESTERN (ZAMBEZI) FILLING STATION are as summarised hereunder:

Nature and Magnitude of the Activity

Total Botswana (Pty) Ltd has been operating a service station at Gaborone West Industrial, Gaborone since 1999. The filling station business operates in a property allocated for the same use as it falls within the compatible proposed and current use of the land. Total intends to remove the existing Underground Storage Tanks (USTs) at Total Western (Zambezi) Filling Station and replace these with new UST's, with increased capacity, along with refurbishing the site. The developer proposes to add additional two 46m³ of unleaded petrol and premium/ Lead replacement petrol (LRP) and one 23m³ of diesel underground double walled tanks for the filling station, and add all other associated connections for power and pipes. These developments will happen within the same plot to become part of the existing infrastructure.

Location of the Activity

The Total Western (Zambezi) Filling Station is located along Lobatse Road on Plot 16740 Gaborone West Industrial, Gaborone.

Anticipated Impacts and Proposed Mitigation Measures

The environmental impacts and mitigation measures identified by the EIA study are presented in detail in the Environmental Impact Statement (EIS) and summarised in the table below. A detailed Environmental Management Plan to help manage and monitor potential impacts is included in the EIS.

Environmental Impact	Project Phase	Proposed Mitigation/Enhancement Measures
Negative Impacts		
Soil and water Pollution	Construction, Operation and Decommissioning	Mixing of cement should be undertaken on a temporary platform to avoid leaching of excess water into the soil. All repairs and servicing of machines and vehicles should be performed within a paved workshop. Machinery should be refuelled using drip trays so that the fuel that spills can be collected. Oil and other polluting materials should be stored in leak proof containers and a temporary concrete bund constructed for the storage of containers. The Contractor should not discharge used oil into sewers, drainage ditches, septic tanks, or streams. The Contractor should not dispose of used oil in landfills or mix used oil with waste that will be disposed of in landfills. The contractor should use Department of Waste Management and Pollution Control (DWMPC) licensed waste collectors for used oil and hydrocarbons. The Contractor should train all staff members on hazard recognition, response plan implementation, safety, clean up procedures, and reporting.

Air Pollution	Construction and Decommissioning	Site works area should be continually dampened to suppress dust. Erection of road signs to limit vehicle speeds. The fuel channels (pipes, pumps, dispensers) should be well maintained to note any leakage. Only authorised operators should dispense products to customers. Pumps should be locked when not in use.
Noise Pollution	Construction, Operation and decommissioning	Use plant and machinery with manufacturer's silencers. Turning off construction machines and vehicles while not in use. Use Botswana Bureau of Standards (BOBS) approved personal protective equipment (PPE). Contractors to work between the hours of 8:00 am -5:00pm. Any work outside these times must be approved by the lead consultant and communicated to surrounding affected parties.
Increased infections of HIV and other infections	Construction and Operation	The contractor should come up with an HIV/AIDS management plan approved by the National AIDS Coordinating Agency (NACA). The plan should state how HIV/AIDS should be addressed. Condoms should be provided to construction workers or placed in toilet facilities. A committee/body dedicated to HIV/AIDS awareness should be put in place by the Total.
Traffic Congestion due to limited access entrance and exit into the filling station	Operation	There should be proper signage showing the entrance and exit from the filling station. Operation times and fuelling at times and regulations of trucks should be adhered to.
Pollution due to improper handling of waste	Construction, Operation and Decommissioning	Installation of waste bins at all construction sites to avoid littering. Ensure all waste materials are disposed of at registered landfill. The Contractor should promote Re-using of materials, recycling and reduction of waste. Ensure that waste is collected twice a week so that there is no over spilling from bins. Fire hydrants should be inspected The developer should keep dry sand buckets in place in case of outbreaks.
Flooding	Operation	The area should have adequately water drainage systems for easy flow of the water Where there is a pavement, storm water channels need to be available to release water.
Injury and ill health due to unsafe working conditions	Construction and Decommissioning	All workers must be provided with BOBS approved personal protective equipment (PPE) PPE to be worn at all times when on-site Fire escape routes to be marked clearly. Provide first aid kits within the project site and have at least two workers trained in First Aid.

Positive Impacts		
Increased Employment	Operation	Batswana should be given priority when recruiting for positions.
Provision of fuelling and convenience services	Operation	Fuel should be provided only and sold to people with jerry cans and cars. The filling station should offer provision and selling of airtime and electricity units.

Conclusions and Recommendations of the Study
It is recommended that the development be undertaken in accordance with the EIA guidelines detailed in this report. It is vital that all persons responsible as described by the EIA guidelines are informed of their responsibilities and have the relevant mitigation guidelines issued to them by the developer's environmental consultation.
It can be concluded that the proposed project will result in the economic benefits for the country whilst the negative potential environmental and social impacts are manageable. Therefore, the report recommends that the project may proceed subject to the Department of Environmental Affairs approval of this report.

Environmental Impact Statement Placement
Copies of the EIS will be placed at the following places for review by Interested and Affected Parties,
Department of Environmental Affairs (Gaborone)
Gaborone West *Kgotla*
National Library

Written comments or objections from those likely to be affected by the project and other interested persons should be submitted to: The Director, Department of Environmental Affairs or hand-delivered to Travaglini House, Plot No. 1271, Second Floor, Old Lobatse Road by the 13th July, 2018.

Correspondences
All correspondences should be addressed to The Director, Department of Environmental Affairs, Private Bag 0068, Gaborone, Telephone No. 3902050, Fax No. 3902051.

Public Notice

REPUBLIC OF BOTSWANA

NOTIFICATION FOR PUBLIC REVIEW OF THE ENVIRONMENTAL MANAGEMENT PLAN (EMP) FOR PROPOSED CONSTRUCTION AND OPERATION OF A COMMERCIAL BUILDING ON 37177, FRANCISTOWN BY EQUALITY PROPERTIES PTY LTD

The major findings of an Environmental Management Plan (EMP) study undertaken for the proposed construction and operation of a commercial building are summarised hereunder:

Nature and Magnitude of the Project
The City of Francistown Council which holds ownership of Plot No. 37177 Central Ward has leased the land to Equality Properties (Pty) Ltd to transform the central market into a commercial building that will also have market stalls but in the main, it will be occupied by shops and office space. The total area for the plot is 4931m^2

Location of the Activity
The project is located on Plot No. 37177 Bluejacket Street as its western boundary and St Patricks Street as is east boundary.

Anticipated Environmental impacts of the Activity and Proposed Mitigation Measures
A summary of major findings of the study associated with the implementation of the proposed project together with the mitigation measures proposed to respond to the negative environmental impact assessment are presented hereunder.

Environmental Component/Impact	Project Phase	Proposed Mitigation/Enhancement Measures
Environmental Aspects		
Employment	Construction	Locals should be given priority when employing the both skilled and semi-skilled force. Advertise professional jobs on local newspapers. Job Adverts should be placed at public places like Donga *Kgotla*.
Environmental awareness	Construction	All construction staff must undergo training to raise environmental awareness and for appreciation and effective implementation of the EMP.
Increased crime (house break-ins/ robbery)	Operation	Access into the premises must be controlled. Rights of admission should be reserved.
Threat to Public Health	Operation	Proper waste management system to be put in place.
Human injury	Construction	Employees should be trained on use of equipment to avoid human injuries. Only competent personnel should be allowed to use equipment.
Noise pollution and disturbance	Construction	Excavations should be limited to day time. For the noise that cannot be controlled ear muffs/plugs should provided.
Increased waste generation and improper waste disposal	Operation and construction	Provide adequate refuse skips/bins on site for proper solid waste disposal. Do not leave cement bags, paint containers, plastics etc. lying around.

Fire risk and explosion	Operation	No big trees should be planted onsite given the nature of the business instead big trees should be confined to parking lots only. Fire Extinguisher and Fire Hydrants at the premises should be provided.

Conclusions
The project will have both positive and negative impacts. Overall the positive impacts outweigh the negative ones in view of the fact that the overall goal of the project is to construct and operate a modern commercial building. Moreover the identified potential negative impacts can be mitigated as indicated in the mitigation plan.

Recommendations
Following the undertaking of the Environmental Management Plan (EMP) for the proposed project, it is recommended that the project be allowed to proceed with due implementation of all recommended mitigation measures.

Environmental Impact Statement Placement
Copies of the EMP have been placed at the following locations for review by the general public and Interested and Affected Parties (IAPs):
Department of Environmental Affairs (Francistown).
City of Francistown Council
Donga *Kgotla*.

Correspondence
All correspondences should be addressed to: The District Environmental Coordinator, Department of Environmental Affairs, Private Bag F020, Francistown, and Tel: 2417108, Fax 2417130 or hand-delivered to DEA office Nos: 2.109, 2.110 and 2.111, Plot No. 1271, First Floor-Ntshe House Building, by 28th June, 2018.
