NOTICE.

The East Africa Registration of Lake Vessels Ordinance, 1910.

Notice is hereby given that His Excellency the Governor has been pleased to direct that the above Ordinance shall come into operation on the 1st day of December, 1913.

GOVERNMENT NOTICE No. 211]

NOTICE.

The Stage Plays and Cinematograph Exhibitions Ordinance, 1912.

Notice is hereby given that the following rules under the above Ordinance have been laid before His Excellency the Governor for his approval :—

General.

1. No building shall be used as a Theatre within the meaning of the Ordinance, unless it be provided with an adequate number of clearly indicated exits so placed and maintained as readily to afford the audience ample means of safe egress.

The seating in the building shall be so arranged as not to interfere with free access to the exits; and the gangways and the staircases and the passages leading to the exits during the presence of the public in the building shall be kept clear of obstructions.

2. All persons responsible for or employed in or in connection with the play or exhibition shall take all due precautions for the prevention of accidents and shall abstain from any act whatever which tends to cause fire and is not reasonably necessary for the purpose of the play or exhibition.

Fire Appliances.

3. Fire appliances adequate for the protection of the building shall be provided and shall include at least the following, namely a damp blanket, two buckets of water and a bucket of dry sand. In a building used habitually as a theatre they shall also include a sufficient number of hand grenades or other portable fire-extinguishers. The fire appliances shall be

so disposed that there shall be sufficient means of dealing with fire readily available for use within the enclosure. Before the commencement of a cinematograph exhibition the cinematograph operator shall satisfy himself that the fire appliances intended for use within the enclosure are in working order, and during the performance such appliances shall be in charge of some person specially nominated for that purpose who shall see they are kept constantly available for use.

Cinematograph Exhibitions.

ENCLOSURES.

Rules applying in all cases and to all classes of buildings.

4. (1) (a) The cinematograph apparatus shall be placed in an enclosure of substantial construction made of or lined internally with fire-resisting material and of sufficient dimensions to allow the operator to work freely.
- (b) The entrance to the enclosure shall be suitably placed and shall be fitted with a self-closing door constructed of fire resisting material.
- (c) The openings through which the necessary pipes and cables pass into the enclosure shall be sufficiently bushed.
- (d) The openings in the front face of the enclosure shall not be larger than is necessary for the effective projection, and shall not exceed two for each lantern. Each such opening shall be fitted with a screen of fire-resisting material, which can be released both inside and outside the enclosure so that it automatically closes with a close-fitting joint.
- (e) The door of the enclosure and all openings, bushes and joints shall be so constructed and maintained as to prevent, so far as possible, the escape of any smoke into the auditorium. If means of ventilation are provided they shall not be allowed to communicate direct with the auditorium.
- (f) If the enclosure is inside the auditorium, either a suitable barrier shall be placed round the enclosure at a distance of not less than 2 feet from it, or other effectual means shall be taken to prevent the public from coming into contact with the enclosure.
- (g) No unauthorised person shall go into the enclosure or be allowed to be within the barrier.
- (h) No smoking shall at any time be permitted within the barrier or enclosure.
- (i) No inflammable article shall unnecessarily be taken into or allowed to remain in the enclosure.

Rules apply only to specified class of buildings.

- (2) In the case of buildings used habitually for cinematograph exhibitions, the enclosure shall be placed outside the auditorium; and in the case of permanent buildings used habitually as aforesaid, the enclosure shall also be permanent.

Provided with regard to the foregoing requirements, that if the licensing authority is of opinion that compliance with either or both of them is impracticable or in the circumstances unnecessary for securing safety and shall have stated such opinion by express words in the licence, the requirement or requirements so specified shall not apply.

5. Lanterns shall be placed on firm supports constructed of fire-resisting material, and shall be provided with a metal shutter which can be readily inserted between the source of light and the film-gate.

The film-gate shall be of massive construction and shall be provided with ample heat-radiating surface. The passage for the film shall be sufficiently narrow to prevent flame travelling upwards or downwards from the light-opening.

6. Cinematograph projectors shall be fitted with two metal film-boxes of substantial constructions, and not more than 14 inches in diameter, inside measurement, and to and from these the films shall be made to travel. The film-boxes shall be made close in such a manner, and shall be fitted with a film slot so constructed, as to prevent the passage of flame to the interior of the box.

7. Spools shall be chained or gear drivers and films shall be wound upon spools so that the wound film shall not at any time reach or project beyond the edges of the flanges of the spool.

8. During the exhibition all films when not in use shall be kept in closed metal boxes.

Lighting.

9. Where the general lighting of the auditorium and exits can be controlled from within the enclosure, there shall also be separate and independent means of control outside and away from the enclosure.

10. No illuminant other than electric light or lime-light shall be used within the lantern.

Electric Light.

11. (a) Within the enclosure the insulating material of all electric cables, including "leads" to lamps shall be covered with fire-resisting material.
- (b) There shall be no unnecessary slack electric cable within the enclosure. The "leads" to the cinematograph lamps shall, unless conveyed within a metal pipe or other suitable casing, be kept well apart both within and without the enclosure and shall run so that the course of each may be readily traced.
- (c) Cables for cinematograph lamps shall be taken as separate circuits from the source of supply and from the supply side of the main fuses in the general lighting circuit, and there shall be sufficient switches and fuses inserted at the point where the supply is taken and in addition an efficient double-pole switch shall be fitted in the cinematograph lamp circuit inside the enclosure. When the cinematograph lamp is working the pressure of the current across the terminals of the double-pole switch inside the enclosure shall not exceed 110 volts.
- (d) Resistances shall be made entirely of fire-resisting materials, and shall be so constructed and maintained that no coil or other part shall at any time become unduly heated. All resistances, with the exception of a resistance for regulating purposes, shall be placed outside the enclosure, and if reasonably practicable outside the auditorium. If inside the auditorium, they shall be adequately protected by a wire-guard or other efficient means of preventing accidental contact. The operator shall satisfy himself before the commencement of each performance that all cables, leads, connection and resistances are in proper working order. The resistances if not under constant observation shall be inspected at least once during each performance. If any fault is detected, current shall be immediately switched off, and shall remain switched off until the fault has been remedied.

Limelight.

12. (a) If limelight be used in the lantern, the gas cylinders shall be tested and filled in conformity with the requirements set out in the Appendix hereto. The tubing shall be of sufficient strength to resist pressure from without and shall be properly connected up.
- (b) No gas shall be stored or used save in containers constructed in accordance with the requirements contained in the Appendix.

13. Every licence granted under the Ordinance shall contain specific conditions for the carrying out of Rules 1 and 4 (1) (a) (b) (c) (d) (e) (f) in the building for which the licence is granted and may in accordance with Rule 4 (2) contain an expression of opinion on the matters referred to in the proviso thereto.

14. Subject to the provisions of Rule 15 every licence granted under the Ordinance shall contain a clause providing for its lapse, or alternatively for its revocation by the licensing authority, if any alteration is made in the building or the enclosure without the sanction of the said authority.

15. Where a licence has been granted under the Ordinance in respect of a moveable building, a plan and description of the building, certified with the approval of the licensing officer shall be attached to the licence. Such a licence may provide that any of the conditions or restrictions contained therein may be modified by the Licensing Officer where the exhibition is about to be given. The licence and plan and description or any of them shall be produced on demand to any Police Officer or to any Licensing Officer.

Miscellaneous.

16. The following fees shall be charged:—
