GENERAL NOTICE No. 112.

DEPARTMENT OF AGRICULTURE.

WEEKLY LOCUST REPORT TO JANUARY 24TH, 1929.

HOPPERS.

In Suk.—The swarms reported in the direction of Masol are now under control, as are those in the direction of Nepau Pass. There is no news from farther north. Rains appear imminent and fresh hatchings may be expected after that event.

In Turkana.—Hoppers are being dealt with on the new Lokichar Road. They are also reported at various parts of Lake Rudolph area for sixty miles, and near the mouth of the Turkwell. There is a fresh infestation near Muressi. These areas are being dealt with by headmen. The area between Kalilokwell Soyi and Kwalang is infested; a reinforcement of men has been sent up by the District Commissioner, Northern Turkana, to assist in destruction. Hoppers seen up to the present are in the young stage, and it would appear that outbreaks are being dealt with expeditiously.

South Turkana.—In Kapeddo, which district may now be reached by road, hoppers are old, and a few have reached the winged stage. The Lokapel area has been cleared. Khalatata is reported clear, as also Lokinei. In the Lokichar area a large number of swarms have been destroyed.

In the above districts much good work has been done and is continuing.

Njemps and Northwards.—No operations report to hand.

The Acting Senior Commissioner of the above province has been constantly on the move from the early part of December, and active interest has been aroused and maintained in the prosecution of the work.

Northern Frontier Province.—Operations will shortly cease as hoppers remaining are nearing the winged stage. No detailed report to hand.

Ukamba: Kitui.—Two heavily infested areas thoroughly cleared. Reinforcements have been sent into the north-east where, in view of recent rains, hatchings are expected to recur. Work has continued with unabated energy and it is confidently expected that maturings will be on a small scale.

Konzo-Tsavo.—Operations proceeding on sisal estates and in native shambas where eggs were mainly laid. Tank truck in use in bush in the Masongoleni area. The poison train has been used on the main line, and delays to train since its use have been infrequent.

Voi.—The infestation in this area is now well under control, and very few hoppers are expected to mature in the entire district. This area has been well handled, and in good time. The District Officer has been treated for arsenical poisoning.

The Senior Commissioner has paid regular visits to the infested areas, and has taken great interest in the work, using his staff to the best advantage.

Masai Province.—Hoppers have been found near Rombo, two officers with trucks and equipment are in the area. Scouting continuing.

Coast Province: Kilifi.—Infestation cleared up.

Malindi.—Work continuing on north bank of the Sabaki River from Mambrui for fifty miles upstream.

Tanaland.—Operations continuing. No detailed report to hand.

The Locust Officer for the Laikipia District met the Rumuruti farmers on January 13th. There are no hoppers in the district. Farms which were infested with mature fliers last year were visited, but no trace of hoppers or eggs was found. No locust hoppers are reported from the Crown land north of Rumuruti for a distance of 100 miles.

Captain Nigel Graham has been appointed Locust Officer for the Nakuru District. Nominations are awaited for the Naivasha-Gilgil, Plateau, Trans Nzoia and Lumbwa Districts. Meetings with Locust Committees are to be held at Thika on January 19th, and at Machakos on January 31st. Up to the present no large hopper swarms have been found in areas above the 5,000 feet contour.

YOUNG FLYING SWARMS.

Southern Turkana.—Three swarms of pink flying locusts appeared from the west, and on January 8th, 9th and 10th were attacked by means of fire and smoke during the hours of darkness. The remnants flew south-west, and were reported on January 14th on the east side of the Elgeyo Escarpment.

Nakuru.—A swarm of young fliers was reported by Mr. Stanning, Lower Molo, on December 18th, and in the Rongai on the same date.

Northern Frontier.—A large swarm proceeded southwards from Meru to Isiolo, and then south-east on to North Kenya. After doing some damage to wheat the swarm flew north-east. Large swarm moved round the shoulder of Mount Kenya past Meru and has flown in a south-easterly direction.

Ukamba.—On January 14th, and to the evening of January 15th, a large swarm passed into the Kitui District flying from the east out of Galla country. These swarms reached the neighbourhood of Kitui boma on January 18th, and joined up near the Thua River. The latest news is that the swarm is settled round the Tiva and Mwita Syano Rivers, and the tendency of flight is south. A swarm was reported at Konzo on January 21st, at Masongoleni on January 22nd. A swarm was reported at Kapiti Plains on January 22nd. One swarm is reported to be 30 miles long by 2 miles wide. On the same day a large swarm was reported south of Kajiado moving south.

Coast.—Two flying swarms reached the Sabaki River from the north on January 20th.

Whilst the general tendency of movement of young flying swarms is east and south, up to the present no significance attaches to the direction of flight. It is expected that the fly parasites (Bomby) which were found in the mature fliers in November and December are now much more numerous on the old settling grounds of mature fliers so that parasitisation of young fliers may be confidently expected if the flight follow the route of old fliers of December, namely, southwards.

The flame throwers which were expected this month will not be landed until February 10th. Arrangements are well in hand for their utilisation next month.

Nairobi,

24th January, 1929.

Deputy Director of Agriculture.
