RABIES PROGRESS REPORT

31st JANUARY, 1933

It is again satisfactory to report that no fresh outbreaks of rabies have come under notice since the last report and consequently there has been no extension of infected or suspected areas. Baiting is generally proceeding with material success as instanced by the mortality records, and as in the case of the Sotik area, where re-baiting has resulted in a very small mortality amongst dogs and wild carnivora.

Reports from South Kavirondo state —In the Majogi location baiting has been carried out, and the following mortality has resulted: 460 dogs, 31 hyenas, 33 jackals, 37 civets and 19 mongooses. Also in the Kibuti location a mortality of 474 dogs has been reported. In the Merogi district many natives are voluntarily bringing in dogs for destruction.

Poison baits have been distributed over the whole of the Kabwochi location resulting in the destruction of 490 dogs. It will be seen therefore that the baiting in the South Kavirondo Reserve during the past week has accounted for a total of 1,544 dogs and wild carnivora.

Extensive re-baiting of farms in the south-western Sotik area has resulted in the destruction of 34 hyenas, 22 jackals, 1 leopard, 3 monkeys, 21 serval cats and 1 skunk.

In south-eastern Sotik re-baiting has been carried out over a wide area around the Sotik post, and the campaign is being continued towards the Amali-Masai border. Results of this re-baiting are not yet available.

In the Kibigori area 1,000 poison baits have been distributed in the east Kano location and have resulted in a mortality of 953 dogs.

In the Songhor district there is a reported mortality of 14 jackals by poisoning.

In the South Kisumu-Tanganyika border area 8,460 poison baits have been distributed and the following results have been reported to date: 91 hyenas, 80 dogs, 30 jackals, 28 other animals.

These distributions were made in the Burigi and Bunyabassi locations and it is expected that the final report will reveal a much heavier destruction.
