GENERAL NOTICE NO. 414

LOCUST REPORT, 22ND MARCH, 1934.

KENYA.

The Red Locust.

Coast Province.—From the Kwale district it is reported that, so far as can be ascertained, little laying has taken place in any of the more populous parts of that area. No reports of any layings have actually been received, and the females examined do not appear to be carrying eggs; moreover, many of the locusts in this and the Malindi district are dying off.

It is considered improbable that any large hatchings will take place in the more populous parts of the area, but to what extent layings have occurred in the almost uninhabited desert country behind

the coastal belt it is impossible to say. This area being very thinly populated and generally waterless, communications are naturally difficult, but the position is being watched and the necessary steps will be taken as soon as any emergencies are reported.

Masai-Machakos area.—Hatchings on a very small scale were reported to have occurred within a few miles of Kajiado on the 14th March. On investigation this emergence proved to be of almost negligible dimensions and the small and diffuse bands of hoppers were quickly and satisfactorily dealt with by the large masses of birds in the affected area. As further hatchings may shortly be expected in this district the necessary supplies of poison bait and equipment have been despatched to the spot, to be in readiness in case of need.

The flying swarms would appear to have died out on the western side of the district, but they are reported to be present, and are said to be laying, about 30 miles south-south-west of Sultan Hamud station.

The eastward drift of locusts from Masai into Ukamba, reported at the beginning of the month, has now practically ceased. Swarms are stationary and layings are reported to have taken place in Mukaa, Mbitini, Nzani and Lower Kilungu locations, and probably between Emali and Simba stations. The position in this district is being kept under close surveillance and measures have been concerted to deal with the situation as soon as necessity arises.

Sotik-Kisii area.—A satisfactory report has been received from the Kisii district to the effect that, so far as is known, no hopper emergences have taken place in the South Kavirondo Reserve and that the number of adult locusts has decreased almost to vanishing point, owing to the attacks of large quantities of birds.

A small and very diffuse swarm was observed in the neighbourhood of Muhoroni last week, and isolated cases of mating were noticed.

The Migratory Locust.

The swarm of young flyers reported last week in the neighbourhood of Kabras did a small amount of damage to wimbi and maize, but after remaining for two days flew off in a southerly direction into the Kakamega Forest Reserve. This swarm was roughly estimated to be about one mile long by half a mile wide.

The small band of hoppers previously reported to be in the vicinity of Busia has now been totally exterminated by beating.

Another small swarm of flyers, estimated at about two months old, passed over Butere on the 19th instant, flying in a westerly direction.

It is reported from Eldoret that a fairly large swarm of locusts was observed on the 17th instant some twelve miles south-east of that township flying in an easterly direction. It is presumed that this swarm is of the migratory species, but confirmation is not yet to hand.

General.—There is very little change in the general situation to be recorded, but the apparent approach of the rains may be expected to bring with it hopper emergences in most of the infested areas.

H. J. CARLISLE,
for Director of Agriculture.

TENDERS FOR THE SUPPLY OF COAL, 1935.

TENDERS are invited for the supply to the Kenya and Uganda Railways and Harbours of good quality locomotive coal, as follows:—

1. Quantities to be tendered for are—

- (a) 70,000 tons; or
(b) 140,000 tons.

Deliveries to commence during May, 1935, in shipments of approximately 5,000 to 6,000 tons with, as far as possible, regular monthly deliveries.

A variation of 10 per cent, more or less, on these quantities is to be allowed for, any such variation being at the High Commissioner's discretion at a minimum notice of three months.

2. Quotations to be C.I.F. Kilindini per ton of 2,240 lb. inclusive of stevedoring charges, plus a mooring buoy hire of 5 cents per deadweight ton (plus surcharge of 5 per cent) of coal discharged.

3. Tenderers are advised that, if the quality of any shipment of coal be found to be inferior in B.T.U.s or on practical test to a greater extent than 5 per cent of the quality of the coal on which the contract was given, the High Commissioner will be at liberty to reduce the price per ton of that shipment on a similar *pro rata* scale.

4. Samples of not less than 25 tons are required before 15th August, 1934, of any coal proposed for the contract which has not been tested or been in use in bulk on the Kenya and Uganda Railways since 1st January, 1928. (If, however, it is considered by the suppliers that any such coal has improved in quality since 1928, they are at liberty to send a sample.) No payment will be made for these samples, which must be bagged and consigned free of all charges, including freight and landing, to the Chief Mechanical Engineer, Kenya and Uganda Railways and Harbours, Kilindini: advice of shipment to be sent to Chief Mechanical Engineer, Kenya and Uganda Railways and Harbours, Nairobi.

Each bag is to have the name of the coal and colliery stencilled in plain lettering, and the same information on a linen label wired to the bag.

5. Average analyses of all coals submitted must accompany the tender.

6. It must be stated if the price quoted is net or if a rebate will be allowed in lieu of weighing, and also where payments are to be made.

7. Tenderers should quote prices C.I.F. Kilindini in:—

- (a) British bottoms;
(b) Any bottoms available.

8. Sealed tenders marked "Tenders for Locomotive Coal" must be addressed to the Chairman, Tender Board, Kenya and Uganda Railways and Harbours, P.O. Box 570, Nairobi, and must reach that office by 12 noon on 14th December, 1934. The lowest or any tender will not necessarily be accepted.
