GENERAL NOTICE No. 846

LOCUST REPORT, 21st JUNE, 1934.

KENYA.

The Red Locust.

Coast Province.—A somewhat better report regarding the weather conditions in certain of the affected areas at the coast will undoubtedly assist towards the more effective conduct of the campaign, but no material improvement in the general situation can as yet be reported. The infestation continues extremely severe from the Kwale district down to the Tanganyika border, a large proportion of the hoppers are in their fourth or fifth moult and in the ordinary course will reach the flying stage in from two to three weeks' time.

Work in all the infested areas is progressing as rapidly and effectively as weather conditions permit, and the campaign on the privately owned lands is now keeping pace with that on the Government and native lands.

Reports of damage to sisal, sugar and native crops are unfortunately becoming more frequent from day to day. It has now been reported that the hoppers are seriously attacking young coconut palms, all leaves, even to the centre leaf, being completely consumed.

Malindi reports a considerably heavier infestation than was at first anticipated, and the position in that area must now be regarded as serious.

At Mazeras the work has made good progress and the situation is slightly easier.

Machakos Area.—The campaign in the Machakos area is now practically finished.

Kisii-Narok Area.—The Trans Mara invasion is now under control, and it is hoped that the South Kavirondo position will shortly be in hand, but a few escapes are still probable.

H. J. CARLISLE,
for Director of Agriculture.
