OBJECTS AND REASONS.

This Bill gives the necessary powers to the Provincial Commissioner, Nyanza Province, to remove to a specified area the hereditary witchdoctors known as Laibons.

2. Government is satisfied that the presence of the Laibons among the Lumbwa people has been directly responsible for the recent unrest and crime in the Nyanza Province. It is imperative, therefore, in the interests of law and order, that these people should be removed, more particularly as the Lumbwa have themselves petitioned Government to take this step.

3. If this Bill becomes law, it is anticipated that Extraordinary Expenditure amounting to £850 will be involved in 1934. No Recurrent Expenditure will be necessitated.

GENERAL NOTICE NO. 882

LOCUST REPORT, 28TH JUNE, 1934.

KENYA.

The Red Locust.

Coast Province.—While the improved weather conditions at the Coast have materially assisted the work of destruction, the infestation shows little, if any, sign of abatement, and those areas previously reported as being heavily attacked are becoming increasingly difficult to deal with owing to the advanced stage of the hoppers and consequent increased size and activity of the bands. The finer weather has naturally had the effect of a considerably greater mobility on the part of the hoppers, and it is reported that a more distinct directional movement of the larger bands is now in evidence, as contrasted with their almost stationary habits during the wet weather of their earlier stages.

The foot safari undertaken through the country lying between the Ramisi River and the Tanganyika border revealed the presence of numerous scattered bands of young hoppers, which are now being dealt with under the supervision of a European officer.

The Kwale area continues heavily infested by very numerous bands of hoppers in every stage of development. The presence of hoppers in the first stage indicates that hatchings may not even yet be completed, while others having passed their last moult are beginning to mass into swarms of circling flyers.

From Ramisi it is reported that the situation has not shown much change since last week. The work of destruction has been unremittingly pursued by a large force of natives under supervision, but it is stated that further areas of cane have been attacked and it is with the greatest difficulty that these attacks are beaten off and the damage minimized. The damage to young coco-nut palms continues to extend near Gazi.

Owing to the drier conditions it has been found possible to make more extended use of poison bait, which has proved most effective, arsenite spraying is also being largely employed with good results.

While some damage to native maize and rice crops has been caused in a few districts, it can be said that the efforts towards crop protection have on the whole proved successful.

In the vicinity of Tiwi good progress is reported, and in several parts of the native reserves and of the privately owned lands the situation is stated to be well under control. The principal methods

adopted in this area are spraying and beating, though some baiting has been employed with satisfactory results. The cannibalistic habits of the hoppers are stated to have been observed to a marked degree.

From Malindi it is reported that a very heavy infestation exists in the Goshi and surrounding district. Two European locust officers are in charge of this area and are working in close touch with the District Officer at Malindi.

Kisii-Narok Area.—In the Sakwa and Kaniamkargo locations the hopper infestation is still fairly heavy, these locations having been subjected to the previously reported and almost continuous stream of hoppers from the Trans Mara region, but this invasion has now ceased. Several moderate swarms of young flyers have been observed, the largest was reported on the 23rd instant from Sakwa in South Kavirondo as proceeding from the Tanganyika border and flying in a northerly direction. This swarm is stated to have been one mile in length. Another flying swarm, one-quarter of a mile long, was observed on the 26th instant between Sianna (Narok area) and the Tanganyika border flying in an easterly direction. The further progress of these flying swarms has not yet been reported.

H. J. CARLISLE,
for Director of Agriculture.
