GENERAL NOTICE No. 1244

LOCUST REPORT, 25TH SEPTEMBER, 1935.
THE RED LOCUST.*Kenya.*

Since the last report was issued, a number of swarms of the red locust have been reported in the Colony.

Northern Frontier Province.

A small swarm was present over Bura, Garissa District, on 2nd August. It arrived from the south-west, and after doing a little damage, left in a north-east direction; presumably it was this same swarm which passed over Wajir on the following day, still heading north-east.

Central Province.

A dense swarm of locusts, perhaps half a mile long and a quarter of a mile wide, was observed at Il Melile in the Narok District on 5th September.

Small swarms were reported to be in Remongi's and Waweru's Locations, Kiambu District, on 18th September. These swarms were not moving to any great extent, and were doing considerable damage to young wattle plantations.

Nyanza Province.

A small swarm of locusts was seen between Lumbwa and Tunnel stations on 12th September. This swarm had exhibited no great movement for four days.

A swarm passed through Jamji, Kericho, on 16th September, flying towards Central Kavirondo.

During the past week five swarms have been circling round in the vicinity of Kericho, but the general tendency is for a movement to the north-east. One of these swarms, at least, is some five or six miles long.

Rift Valley Province.

A swarm was reported to have flown over Gilgil on 15th September, moving towards Lake Elmenteita; probably it was this swarm which was stated to be present at Eburru on 17th September. Little damage was said to have been done by this swarm at the time of reporting.

Forecast.—Examination of locusts from Kericho revealed slight ovarian development, and these insects may be expected to lay towards the end of October. Stragglers collected from a swarm which passed over the Lumbwa road some five miles from Kericho on 21st September showed infestation by nematodes.

Specimens derived from the swarm at Eburru showed a colour change commencing, which indicates that this swarm, also, may be expected to arrive at the laying stage soon after the commencement of the short rains.

Arrangements are being made by the Department of Agriculture for a free supply of locust bait to be available as in previous years, in case a hopper campaign is necessitated.

Tanganyika.

No locusts are reported.

COLIN MAHER,
for Director of Agriculture.
