Power to make
Rules

(a) prescribing anything which by this Ordinance is required to be prescribed, and

(b) prescribing the forms of licences "

OBJECTS AND REASONS

During the meeting of Legislative Council held during August, 1937, an assurance was given that the views of District Councils and Committees would be obtained on the question

of amending the Shops in Rural Areas Ordinance, 1933, so as to provide that no licence would be issued without the approval of the District Council or Committee, as the case may be. Action was accordingly taken and the replies show that, with the exception of one District Committee, all the Councils and Committees are in favour of the proposed amendments.

The Bill prohibits the issue of a licence except with the consent of the District Council or Committee concerned but provides for an appeal to the Provincial Commissioner against a decision adverse to the applicant. Licences will be issued for one year only and any person who desires to obtain a licence for a further period must apply in the prescribed form for a fresh licence before the 30th November of the year preceding the year in respect of which such licence is desired. Licences may be issued subject to either or both of the conditions mentioned in the proposed sub-section (2) of section 3 in clause 2 of the Bill. Provision is also made empowering the Governor in Council to prescribe forms of applications for licences and forms of licences.

No expenditure of public moneys will be involved if the provisions of this Bill become law.

LOCUST REPORT

THE SITUATION IN KENYA ON 17TH NOVEMBER 1938

The Migratory Locust (*Locusta migratorioides*)

Most of the flying swarms now in the Colony have commenced to lay eggs and large numbers of locusts from the earlier swarms are dying out. A large swarm estimated to be about 15 miles long by two miles wide is now in the Nakuru District. This swarm passed over Ol Punyata on the 10th November, flying west and is probably made up from several swarms previously reported to have proceeded east in the direction of Baringo. Further small swarms are present in the Solai, Thomson's Falls and Ravine Districts. Egg-laying has occurred thinly over a large area between Kampi-yamoto and Rongai and a sparse laying over an area of some 50 acres is reported from Solai. The swarm which has been in the Ravine District for the past few weeks has laid over an area of about 800 acres, on cultivated land on farms adjoining the Kamasia Reserve.

Hoppers continue to emerge in the neighbourhood of Hoey's Bridge and Soy, poison baiting and spraying operations are being carried out where the hopper bands have formed. The result of baiting at Hoey's Bridge is described as excellent and with ample supplies of bait available in the district it is hoped that the destruction of hoppers will be complete.

The position in other districts is as follows —

Kerio Valley — The small swarm previously reported east of Nakbori is still present in the valley but no laying by the swarm has yet taken place. The other swarms left the valley flying east towards Baringo. A small area was laid over and the District Commissioner, Tambach, is dealing with the destruction of the eggs. The locusts are reported to be dying.

Narok — The latest report from the District Commissioner states that the scattered swarm which remained in the area has dispersed and that only a few solitary locusts are now met with.

Kamasia — The swarm reported to be in this area during the past week came from the Kerio Valley. As mentioned above, this swarm has left the reserve and has proceeded towards Nakuru.

It is expected that egg laying will take place from now onwards and where this occurs, members of the public are asked to send in full details without delay. Letters and telegrams will be conveyed free by the Post Office.

Sudan — A recent report from the Sudan states that the hopper campaign concluded in October except for certain areas in Western Sudan. The campaign was successful in most areas but numerous swarms escaped from the uncontrolled desert areas. The Majority of these swarms flew south-west, during October, and a few flew south. Comparatively few flying swarms were reported from the southern provinces of the Sudan but of these, some were mature during October and any swarms remaining there have probably laid by now. Owing to swamps, tall grass and forest country control measures are not considered practicable in most parts of the southern provinces.

Tanganyika — A report dated the 7th November, 1938, issued by the Department of Agriculture states that small swarms were scattered over a large part of the Musoma District, egg-laying has not yet taken place and there has been no damage to crops. The swarms which entered Mwanza have now left in a westerly direction and were last reported to be on the Biharamulo District boundary.

Director of Agriculture
