## GAZETTE NOTICE No. 330

## THE TRADE MARKS ACT

(Cap. 506)

NOTICE is given that any person who has grounds of opposition to the registration of any of the trade marks advertised herein according to the classes may, within sixty (60) days from the date of this Gazette, lodge notice of opposition on form TM. No. 6 (in duplicate) together with a fee of KSh. 1,500 (local application) or US\$ 75 (foreign application).

Notice is also given that official objection will be taken under rule 21 (3) to all applications in which the specification claims all the goods included in any class unless the registrar is satisfied that the claim is justified by the use of the mark which the applicant has made, or intends to make if and when it is registered. Where an applicant considers that a claim in respect of all the goods included in a class can be justified it will save unnecessary delay in examining applications if a claim is filed simultaneously with the application, accompanied in appropriate cases by supporting documents.

The period for lodging notice of opposition may be extended by the registrar as he thinks fit and upon such terms as he may direct. Any request for such extension should be made to the registrar so as to reach him before the expiry of the period allowed.

Formal opposition should not be lodged until after reasonable notice has been given by letter to the applicant for registration so as to afford him any opportunity of withdrawing his application before the expense of preparing the notice of opposition is incurred. Failure to give such notice will be taken into account in considering any application by an opponent for an order for costs if the opposition is uncontested by the applicant.

- (57) *Abstract.*—The present invention relates to agriculture, to be exact to apparatus for curing, for example, tobacco and may be applied to apparatus for curing different products, materials and objects wherein solar heat radiation is used as additional source of energy. The purpose of the invention is to increase the share of solar energy consumption needed for the curing process. The offered apparatus comprises a compartment (1) for containing material to be cured, a fan system (5), non-solar heating means (4) for heating air other than by solar energy and solar heat radiation absorption means (6) constructed in the form of non-consumption solar panels (7) mounted on the outside surface (8) of side walls (2) and the roof (3) of the compartment (1). The best effect is achieved through the optimum geometric dimensions of the mounting of the solar panels (7) elements in the relationship to each other and the outside surface (8) of the side walls (2) and the roof (3) of the compartment.
