THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE PROPOSED RAISING OF MASINGA DAM

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed project.

The proposed development entails the raising of Masinga dam to increase water shortage levels by 1.5m.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Soil erosion	<ul style="list-style-type: none"> Control the earthworks and contain excavated soils on site. Soil removal process that will not deposit residuals in the drains. Efficiency of erosion control measures. Landscaping to create contours towards the drainage systems.. Maintain internal and immediate external drainage systems clear at all times.

Possible Impacts Mitigation Measures

Air pollution (dust emissions and particulate matter)	<ul style="list-style-type: none"> • Compact loose soils and apply binding materials. • Maintain construction machinery in working order at all times. • Control speed of construction vehicles around the site. • Keep the loose soils and dry materials at the construction site moist at all times. • Delivery vehicles with dry materials be covered. • Sensitize construction workers on aerial emissions.
	<ul style="list-style-type: none"> • Sensitize the workforce and truck drivers on equipment maintenance. • Supervise construction traffic. • Maintain plant and equipment • Undertake construction only during the daytime for peace of the neighbors • Workers to wear ear plugs/muffs as part of the personal protective gear.
	<ul style="list-style-type: none"> • Proper storage, handling and disposal of oil and oil wastes from machinery. • Discourage servicing of machinery and vehicles on site • Sewer pipes not to discharge into drainage systems • Shall consider periodic water quality analysis during the construction phase
	<ul style="list-style-type: none"> • Special attention on the site sanitary facilities. • Construction concrete debris shall be disposed off safely preferably re-used on road gravelling. • Earth excavated shall be dumped on pre identifies and approved land fill sites. • Other inert materials (wood, steel bars, nails, papers, glass, etc.) shall be recycled off site OR dumped sites approved by the City Council. • Provide segregated waste holding units on every floor as temporary storage bins. • Carry out an annual waste audit to determine quantities and characterization of wastes and hence mode of disposal. • Identification of hazardous wastes for specialized disposal.
Noise and vibration	
Contamination of ground and surface water: oil, spills, silt, leachate.	
Waste management, sanitation and hygiene	
Water quality degradation	<ul style="list-style-type: none"> • Remove all vegetative matter within the inundation zones prior to flooding, • Direct waste water to treatment plant before final discharge • Pass wastewater from maintenance and repair of machinery through oil interceptor.
Risks of leaks or spills	<ul style="list-style-type: none"> • Regular maintenance of site equipment, • Investigate the possibility of catalytic converters.
Possible Impacts	Mitigation Measures

re-fuelling.

Road safety

- Oil residues shall be disposed off carefully.
- Enforce speed limits for construction vehicles during construction,
- Design a separate vehicle entry different from the common entrance with the residents.
- Streamline traffic flow into and out of the premises.
- Initiate changes in traffic flow in the micro-area upon commissioning.
- Install appropriate cautionary signage for motorists entering the premises.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED DEVELOPMENT OF UMMA UNIVERSITY, ISINYA, KAJIADO

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed development

The proposed development entails the construction of a university to be known as UMMA University comprising of two blocks of classrooms, three blocks of dormitories, dining hall, mosque and four blocks of staff residence among other facilities on a 20.33 hectares plot on L.R. Kajiado/Kipeto/2419 in Kajiado district.

The project anticipates the following impacts and mitigation measures:

Mitigation Measures

Noise pollution

- Ensure proper maintenance of vehicles transporting any cleared wastes Machinery in use for excavations to

	<ul style="list-style-type: none"> • reduce noise levels to below 68 Db. • Ensure no hooting in the project site. • Provide workers with ear muffs and enforce wearing of the same. • Ensure workers have and wear personal protective equipment to guard them from dust and other hazards. • Any waste generated shall be disposed at approved dumping sites. • Delivery vehicles to undergo regular maintenance. • Work to be done at day time only (8am – 5pm).
Air contamination and fume emissions	<ul style="list-style-type: none"> • Proper maintenance of machinery & vehicles to be used. • Workers to wear personal protective equipments. • Ensure proper solid waste management plan.
Occupational health and safety hazards	<ul style="list-style-type: none"> • Ensure workers have and wear personal protective equipment to guard them from dust and other hazards. • Establish a site office. • Regular review on health, safety and environment. • Provide clean drinking water and proper sanitary facilities for workers use. • Provide First Aid basic tips to workers and set up an emergency response plan/team. • Put up warning/ informative signs at strategic points. • Sensitize all workers at start of specific tasks about looming risks.
Solid waste generation	<ul style="list-style-type: none"> • Any waste generated should be disposed at approved dumping sites. • Use materials which generate minimal wastes from their package • Order through strict budget what is just enough to avoid surplus wastage. • Use some of the wastes generated in other projects. • Ensure proper solid waste management plan-appoint a cleaning firm to collect wastes. • Donate waste to other parties to make better use of it e.g. road constructors.
Traffic congestion	<ul style="list-style-type: none"> • Ensure delivery vehicles are not parked along the roads. • All vehicles owned by facility users to be parked in the compound always and not along the roads.
Dust emission	<ul style="list-style-type: none"> • Sprinkle water on the access road before deliveries are made. • Limit delivery vehicles to a certain point only
Possible Impacts	<p><i>Mitigation Measures</i></p> <ul style="list-style-type: none"> • Budget and plan properly to make few and necessary trips.

Soil erosion	<ul style="list-style-type: none"> • Encourage transportation early in the morning before dust becomes more active. • Plant some ground cover to avert soil erosion. • Construct drainages with the site. • Harvest all storm water for gardening.
Fire risks	<ul style="list-style-type: none"> • Install two fire extinguishers and hose reel in each floor of all buildings with instructions. • All fire fighting equipments to be serviced and maintained regularly. • Ensure emergency call numbers are posted at strategic points.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE PROPOSED MAUA WATER
SUPPLY AND SEWERAGE PROJECT
INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Maua Water Supply and Sewerage Project.

The proposed project involves expansion of the Maua Water Supply and Development of a new sewerage system. The sewerage system will involve the construction of the sewerage system in town and the treatment works which is a biological system. The construction works include:

- The weir across Makena River.
- Water treatment works.
- Water storage tanks.
- Pipelines for raw and clean water which include service connections.
- Sewer lines.
- Sewage treatment works.
- Staffing housing.
- Utility building e.g. offices, laboratories, stores, pump house and workshops.

- Drainage structures especially along roads.
- Landscaping and rehabilitation works.

The project is located in Maua Town and its environs within Igembe South District. The project is based along Makena River, a tributary of Ura River, the source of water for the Town.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Soil Erosion and siltation	<ul style="list-style-type: none"> • Install silt trap to prevent sediments from entering the river. • Silt traps should be de-silted regularly. • Protection of steep cutting with appropriate reinforcement including the use of gabions. • Proper terracing and landscaping of the disturbed soil following construction work. • Planting of sediment binding grasses and other appropriate vegetation type on the disturbed soil. • Encourage the development of woodlots in the catchment areas
Loss of biodiversity	<ul style="list-style-type: none"> • Restore the lost biodiversity of the impacted area. • Disturbed area should be rehabilitated, landscaped and planted with trees, shrubs, herbs and grasses. • Promote the development of the community nurseries and educate on need of planting trees.
Ponding	<ul style="list-style-type: none"> • Improve drainage. • Landscaping, backfilling depressions, borrow pits and disused quarries • Remove excavated soil
Visual intrusion	<ul style="list-style-type: none"> • Control clearing of vegetation. • All degraded areas need be landscaped to blend with the environment using local materials and plant species • Trees, shrubs, herbs, grasses and lawn used for landscaping should consist of indigenous species • Area within the treatment works compound should be appropriately landscaped to reduce the visual impact on the vicinity
Human waste management	<ul style="list-style-type: none"> • Proper sanitation measures to be taken in living quarters to prevent outbreak of diseases. • Disposal of human waste, should be managed through the use of sewers and onsite disposal system, such as septic tanks and pit latrines • Staff housing in treatment area should be sited in such a way that it facilitates connection to the main sewerage system • Use of septic tanks would be appropriate as the permeability of the soil is good • Pit latrines should be deep, clean and without any offensive smell
Possible Impacts	Mitigation Measures
	<ul style="list-style-type: none"> • Pit latrines should be free of fly and mosquito nuisance and with a good

quality concrete slab

Solid waste management	<ul style="list-style-type: none"> • Regular inspections of the facilities • Solid waste emanating from the staff quarters to be gathered in a central location vermin proof facility and sorted into different categories. • Intergrated solid waste management be adopted. • The combustible wastes may be burned in an efficient incinerator. • All solid waste to be collected and disposed of at the municipal sanitary landfill.
	Control speed of vehicles.
Occupational health and safety	<ul style="list-style-type: none"> • Install and maintain appropriate silencer. • Regulate working hours especially at night. • Appropriate selection of machinery. • Control amount of charge in blasting. • Appropriate servicing of the vehicles and plant to ensure efficient burning of fuel • Sprinkling of water in construction yards, road and soil heaps. • Provision of health, and safety environment officer. • Provision of health safety and welfare plans and procedures to workers on site. • Establishment of a clinic for emergency. • Spill mitigation equipment including adsorbents, leakage-plugging device, foam cover. • Provide first aid facilities in the workers camp. • Undertake disease control measures e.g. draining and spraying of stagnant water.
	<ul style="list-style-type: none"> • Constant checking to ascertain any breakage or uncharacteristic flow in the system. • Constant maintenance of the sewer system to avoid any impromptu overflows
Sewer blockage and overflows

ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE FEASIBILITY STUDY OF OTHAYA AND
MUKURWE – INI WATER AND SEWERAGE PROJECT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the feasibility study of Othaya and Mukurwe-ini Water and Sewerage Project.

The proposed Othaya Water and Sewerage Project will consist of: Rehabilitation of intake works including the improvement of the access roads for Mumwe, Thuti, Gikira/Kihuri, Changachicha and Kihari; Identification for development of an additional water source (Gura Dam); Construction of treatment works for Mumwe/Thuti, Gikira and Changachicha/Kihara intakes including the construction of balancing tanks; Rehabilitation of the entire distribution network with the objective of minimising losses and ensure efficiency; Construction of a dedicated supply line for Othaya Town from the treatment works and upgrading of the distribution network in Othaya Town as the main features of the Water Supply Works. The Sewerage development shall entail: Limited trunk mains; acquisition of land for way leaves and treatment works site estimated at 6ha; Construction of treatment works consisting of waste stabilisation lagoons and Provision of exhauster truck for removal of waste from on-site treatment systems.

The proposed Mukurwe-ini Water and Sewerage Project will consist of the following as main features for the water supply works: Identification for the development of an additional water source (Chinga Dam and Mathioya Dam); Upgrading of the treatment works at Chinga Dam from 5,000 to 10,000m³/day; Construction of a dedicated line in Mukurwe-ini Town from the treatment works and Upgrading of the distribution network within Mukurwe-ini. The Sewerage development shall entail: Acquisition of land for treatment works estimated at 8ha and development of waste water stabilisation lagoons and provision of an exhauster.

The project anticipates the following impacts and mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Interference with the physical setting	<ul style="list-style-type: none"> The design shall in no way propose to implement developments that will hinder drainage, change the topography or introduce physical changes that are not in harmony with the physical setting of the project area. The structures to be developed should be aesthetically accepted to blend in with the surrounding.
Interruption of key installations	<ul style="list-style-type: none"> Formal request for permission to cross, break in and build the water pipeline should be sought from affected property owners. Formal engagement of key land and other property owners neighbouring the pipeline. Passing of relevant information to each of the affected parties. A work plan with clear responsibilities for each party should be developed to ensure smooth execution of the construction. On completion of works, each property owner should be contacted again to give views and if complaints arise the Contractor asked to address the same.
<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Land take	<ul style="list-style-type: none"> The genuine land owners shall be engaged and paid acceptable compensation for loss of the land.

Noise and vibration	<ul style="list-style-type: none"> Provision of appropriate protective equipment. Construct during the day. Install portable barriers to shield compressors and other small stationary equipment where necessary. Limit pick-up, trucks and other small equipment to a minimum idling time and observe a common-sense approach to vehicle use and encourage workers to shut off vehicle engines whenever possible. Consider labour based construction methodologies.
Dust emissions	<ul style="list-style-type: none"> Minimize the number of motorised vehicles on use. Rehabilitate disturbed areas. Provide scour checks on over-15% slopes or when working in loose soils. Manage erosion agents including water by channelling it into predetermined areas. Use predetermined tracks. Avoid machinery working in seasonally marshy areas, pans and floodplains. Wet all active construction areas as and when necessary to lay dust. Pave, apply water when necessary, or apply (non-toxic) soil stabilizers on all unpaved access roads, parking areas and staging areas at construction sites. Undertake staff training and allocate roles to trained/responsible staff members.
Disposal of excavated soil	<ul style="list-style-type: none"> The excavated soil will not be disposed off the wayleave. The soil will be re-spread in areas to be landscaped to enhance aesthetic along the wayleave area.
Interference with flora and fauna	<ul style="list-style-type: none"> Ensuring proper demarcation of the Project area to be affected by the construction works. Strict control of construction vehicles to ensure that they operate only within the area to be disturbed by access routes and other works. Permission and easement shall be sought from the various owners and institutions concerned with each section of the route where vegetation has to be disturbed.
Accidents and hazards during construction	<ul style="list-style-type: none"> Site Occupational Health and Safety Rules and Regulations shall be developed as stipulated in the Occupational Safety and Health Act, 2007. Provide appropriate personnel protective equipment (PPE) to workers and any visitors.
<i>Possible Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> Enforcing adherence to safety procedures and preparing contingency plan for accident response. Safety education and training shall be

- emphasized.
- Reduced downstream flows.
- The Proponent shall carry out a detailed hydrological survey to determine the right levels of abstraction and apply for amendment of abstraction permit from WRMA.
- Fouling and odours from the wastewater treatment works
- Ensure proper installation, testing and inspection of new rehabilitated sewers.
 - Limit fats, greases and other debris which may cause blockage in the sewage collection system.
 - Implement the general and specific prohibitions of the pre-treatment program under EMCA, 1999.
 - Provide adequate operation and maintenance of facilities and equipment.
 - Maintain an up-to-date map of the collection system showing all gravity line segments and manholes, valves and storm water conveyance facilities.
 - Routine preventive operation and maintenance activities by staff and contractors.
 - Establish a program to assess the current capacity of the collection system owned by the proponent.
- Fouling from the onsite wastewater treatment systems
- All un-sewered areas will install approved septic tanks and soak pits.

The full report of the proposed project is available for inspection during working hours at:

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE PROPOSED CONSTRUCTION OF 120
RESIDENTIAL HOUSES

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed development.

The proposed development entails construction of 120 number of 3-bedroomed bungalows with other utilities on an 8.09 hectares plot on L.R. No. KJD/Kaputiei-North/1342 Kisaju area of Kajiado District, Kitengela-Namanga Road.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Solid waste management	<ul style="list-style-type: none"> • Contract a private waste handler who is licensed by NEMA for waste disposal. • A site waste management plan shall be prepared by the contractor prior to commencement of demolition activities. This shall include designation of appropriate waste storage areas, collection and removal schedule, identification of approved disposal site, and a system for supervision and monitoring. • Any vegetation and combustible waste will not be burned on the site. • Demolition debris shall be stock piled at a safe place. • Reusable materials like doors, windows and timber shall be sold to licensed scrap dealers. • There shall be provision of solid waste receptacles and storage containers, particularly for the disposal of plastic bags, boxes, so as not to block drainage system and to prevent littering of the site. • Arrangements will be made for the daily collection of litter and demolition debris from the site by a licensed solid waste transporter for dumping at approved site.
Control of traffic flow	<ul style="list-style-type: none"> • Appropriate traffic warning signs instructing occupants and visitors to reduce speed, shall be placed at the vicinity of the entrance to the site. • Security guards shall be instructed to control traffic along the private road leading to the site and assist vehicles as they enter and exit the project site. • Security guards shall maintain a record of incidents and accidents at the site. • Emergency response procedures shall be developed and displayed at the entrance to the buildings. • Contacts of emergency service providers including St. Johns ambulance, breakdown vehicle and traffic police, shall be displayed at the main entrance area.
Management of Fire Incidents	<ul style="list-style-type: none"> • Install fire fighting equipment prior to occupation of the buildings • Ensure fire fighting equipment are inspected and serviced at least once in a period of one year • Identify and mark conspicuously an emergency assembling point • Conduct an annual fire audit for the buildings.
Possible Impacts	Mitigation Measures
Effluent disposal	<ul style="list-style-type: none"> • Effluent from the bungalows will be disposed through Riflo Septica Systems which uses biological means in synthesizing the solid faecal leaving clean water flowing to the separate tank
Dust Emission	<ul style="list-style-type: none"> • Avoid excavation works in extremely

dry weather.

- Ensure strict enforcement of on-site speed limit regulations.
- Covering of all haulage vehicles carrying sand, aggregate and cement.
- Stockpiles of fine materials (e.g. sand and ballast) should be wetted or covered with tarpaulin during windy conditions.
- Access roads and exposed ground shall be wetted in a manner and at a frequency that effectively keeps down the dust.
- Workers in dusty areas on the site shall be issued with dust masks during dry and windy conditions.
- Providing appropriate enclosure for the concrete mixer and use of dust nets at high levels of the building.
- Ensure all generators and heavy machines are insulated or placed in an enclosure to minimize ambient noise levels.
- Restrict noisy construction activities to normal working hours (8am – 5pm).
- Inform local residents beforehand, via notices and advisories, of pending noisy periods and solicit their tolerance well before the commencement of piling works.
- Workers operating equipment that generate noise should be equipped with noise protection gear including ear muffs and plugs.

Noise vibrations

Oil/hazardous materials spills

- A designated garage section of the site fitted with oil trapping equipments to be planned for changes.
- Refueling and maintenance of large vehicles will not take place at the construction site.
- All hazardous materials to be stored in appropriately bunded containers and placed on concrete floor.
- Maintaining spill response kits at the site office.
- Prepare and display on site spill response procedures and training of workers on spill response and management.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette*, *Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
