THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE PROPOSED DEVELOPMENT OF A
PERMANENT LUXURY CAMP AT EKIME SITE IN MWINGI
NATIONAL RESERVE

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed development of a permanent luxury camp at Ekime site in Mwingi National Reserve.

The Proposed project entails development of a permanent luxury camp at Ekime site in Mwingi National Reserve, Mwingi District on a specific site area that has been approved by the Kenya Wildlife Service (KWS). The luxury tented camp development activities will mainly involve the civil works associated with construction and operations of:

- A maximum of 30 bed self-contained camps providing luxury accommodation to tourists with facilities such as dining area, bar/lounge, kitchen, swimming pool, Spa and associated changing room, senior staff houses, junior staff quarters, ablution facility for junior staff.
- Storm water and sewerage treatment works.
- Protective guard rail on the Tana River side of the camp.

- Perimeter wall electric fence and Access all weather murram road network.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Soil erosion, siltation, flooding	<ul style="list-style-type: none"> • The site preparation process will be done with utmost care to ensure that excavation is done systematically and carefully without raising dust and creating unpleasant heaps of soils. • All disturbed areas are well landscaped to improve on visual intrusion • Storm water drainage lines are well constructed to reduce incidences of ponding and flooding. • The Contractor undertakes to rehabilitate any degraded environment especially the reconstructed/redeveloped part of the area • The degraded environment especially excavated areas prone to soil erosion will be rehabilitated <i>in-situ</i> (as the construction progresses) to avoid soil being washed down gradient and into River Tana • Any loose soils are compacted to avoid any wash offs.
Ponding risks, groundwater and river contamination	<ul style="list-style-type: none"> • Proper construction of sewerage treatment works (Green Water System) and drainage lines. • Carry out proper landscaping and up depressions at the time of construction and immediately after
Accidents and occupational risks	<ul style="list-style-type: none"> • The implementation of safety measures and emergency plans to contain accident risks associated with vehicle transport, operation of any sophisticated machinery and other related activities. Protection from bandits & Wildlife. • Emergency response plans/procedures including details (phone numbers and location) of the KWS Adamson's Falls Camp, nearest dispensaries, hospitals and the proponents site representative will be provided to the Site Foreman / Site Manager for action in case of any accidents during construction • All staff is trained on the use of any unfamiliar machinery and equipment that may pose danger to the user before they are allowed to use them. Particularly important is the provision of protective clothing, helmets, nose masks etc.
Increased water demand	<ul style="list-style-type: none"> • Apply for a permit from the Water Resources Management Authority Offices in Mwingi Outpost to abstract water from Tana River. • The water abstracted from the river is treated (full chemical and bacteriological analysis is done) to establish if it is fit for construction & domestic use. • There is proper management of water usage. • Installation of a reservoir water tank and water conserving taps that turn-off automatically when water is not being used. • Recycling of water used in the swimming pool.

Possible Impacts

Mitigation Measures

Solid and liquid waste generation

- A reputable solid waste handler will be contracted to regularly collect solid waste for appropriate disposal.
- Adequate provision of strategically placed waste bins all over the Camp compound to ensure that there is no idle litter that can be accessed by baboons.
- Non-usable solid waste materials generated during the construction shall be transported for appropriate disposal either in Maua.
- Due to the proximity of the Camp to Tana River, the proponent undertakes to provide well constructed sewage lines all draining into sewage treatment plant.
- KWS does not approve the use of lagoons for waste treatment in National Park area.
- All waste receptacles shall be at least 50m away from Tana River Bank
- Staff education on the importance of sound environmental management through proper handling and disposal of generated waste due to the fragile environment where the Camp is located.

Noise, air pollution during camp construction and operation

- Noise control measures will be implemented at the site area if the noise levels exceed 85 dBA for a continuous 8 hours exposure.
- Protection against the effect of the noise exposure among the workers should be effected
- Sound levels reaching the inner ear may be effectively attenuated by the use of protective devices, such as earplugs and earmuffs.
- Appropriate selection of machinery would minimise noise pollution
- Minimize the use of explosives during the excavation process
- Construction Supervisors shall be encouraged to sensitise construction workers to switch off engines of vehicles or machinery not being used
- Sensitise vehicle drivers to avoid hooting or raving of engines
- Ensure construction machinery is kept in good working condition.
- Spraying of water during construction to reduce dust emission
- KWS to regularly monitor the construction progress and assist in identifying issues that require immediate attention

Risk of fire and site security

- Install and maintain fire fighting equipment and machinery.
- Sensitise the workers on fire risks & use fireproof materials
- Provide emergency numbers at strategic points.
- Potable fire fighting equipment are located at strategic points
- Provision of security during from bandits and wildlife during the construction & operation phases.

Tana River and groundwater water pollution

- No domestic or any other hazardous waste is disposed of at the site or the nearby river water body.

Possible Impacts

Mitigation Measures

- A riparian reserve distance of 30 meters away from the river water body will be provided for to avoid pollution and protect the Camp from any potential flooding.
 - KWS is encouraged to ensure compliance by developer.
 - Ensure that machinery and used oil from vehicles is not released to the ground through the provision of mode of collection and appropriate disposal.
 - Clear instruction to machine and vehicle servicing personnel on this provision should be made available.
- Degradation of existing vegetation
- Maintain existing trees and plant more indigenous species to rehabilitate the Camp environment and improve the scenic beauty of the area.
 - Carry out regular watering and maintenance of the trees that have been planted.
- Unnecessary bright or flood lights
- Provide dim light and or Turning off all unnecessary lights at night to avoid unnecessary attraction to wild animals during the night.
- Effect of camp on wildlife
- Wetland area of the Park is avoided
 - Location of the Camp has avoided any known migratory path that would interfere with the movement of animals.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

WORKS AT THE PORT OF MOMBASA

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received and environmental impact assessment study report for the implementation of the proposed dredging works at the port of Mombasa, by Kenya Ports Authority (KPA).

The dredging project involves deepening and widening of the navigation channel to the port of Mombasa and at the turning basin in front of the proposed Kipevu West container terminal at Port Reitz. It would therefore affect the 3 harbours of Port Reitz, Kilindini Port and Entrance Harbour. Also incorporated into the project is maintenance dredging at the existing berths 1-18. The required dredging volumes at Turning Basin, Navigation Channel at Inner Port and Port Entrance are estimated at 4.7, 0.2 and 2.4 million m³, respectively.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Dredging work	<ul style="list-style-type: none"> Restrict overflow operation during dredged material loading Reduce dredging volume per day Installation of silt protection curtain surrounding grab dredger Use special dredging equipment to minimize agitation of bed material if the material is significantly contaminated
Disposal of dredged materials	<ul style="list-style-type: none"> Dredged materials will be disposed at designated open water dumping site keeping a distance more than 3km from biological sensitive areas, such as existing coral reef, sea grass bed and Mombasa Marine National Reserve. Disposal period will be mainly during SE Monsoon Season (from April to September) considering preferable local current system which could avoid significant impacts on the biological sensitive areas due to turbid water dispersion from the dumping site.
Effluent discharge from calling ships	<ul style="list-style-type: none"> KPA will inspect the ships and/or liaise with the ship administration to establish whether there is any waste on board. Any waste found will be received at the designated facilities such as East Africa Environment Company (EAM).
Accidental oil spill	<ul style="list-style-type: none"> Evaluate future traffic volume for design of sufficient port facilities Ensure operation in line with the ship handling manual. The manual has been designed specific to the Port of Mombasa by Japan Marine Science Inc on behalf of KPA. KPA pilots were part of the design and will be trained after the proposed dredging works. KPA will install new navigation buoys and leading lights to allow for safer navigation of the channel. Special short-based radar and/or reflectors will be installed for safe navigation and collision avoidance. Updated pilot qualification or additional training will be undertaken. Additional tugs, lighters and mooring and pilots requiring special skills will be made available. In order to respond to possible accidental oil spill, the Port of Mombasa already has an emergency response program.

Possible Impacts

Mitigation Measures

	<ul style="list-style-type: none"> Specialized oil spill response equipment will be available to deal with small to medium spillages. This equipment will include containment booms, recovery devices, oil recovery or dispersant application vessels. During dumping the material will be released at sea bottom to minimize plume generation. Fishers to be provided with motorized boats to enable them fish further offshore during the dredging period. Monetary compensation for fishers to assist in restoration of livelihood lost during dredging. Continuous monitoring during dredging to ensure contaminated sediments are captured and dumped at appropriate sites.
Removal of sub-marine sediment	<ul style="list-style-type: none"> Leave some undisturbed patches (reservoirs) between the dredging areas, to speed up re-colonization and recovery. This is already implied in the works structure as dredge areas are clearly marked and some areas will remain undisturbed. Use of appropriate engineering technology reductions in the amount of suspended sediment
Chemical impacts	<ul style="list-style-type: none"> The method of disposal to be used is containment of the contaminated sediments. The contaminated sediments would therefore be disposed in a containment facility to be constructed at the site of the proposed container terminal project in Port Reitz. Monitoring program be put in place to ensure that contaminated sediments are not inadvertently disposed at sea.
Oceanographic impacts	<ul style="list-style-type: none"> In case of high turbidity levels, include setting up of continuous monitoring stations during the entire dredging period. It is important to note that continuous monitoring stations should be set to monitor turbidity levels at ten (10) selected locations (especially at the Mombasa Marine Park and nearby sensitive habitats such as coral reefs) during the dredging period in order to adopt the necessary mitigation measures and further validate the model results.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.
- Provincial Director of Environment, Coast Province.
- District Environment Office, Mombasa District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE PROPOSED PROPOSED HOUSING
DEVELOPMENT ON PLOT NO. 20522 MAVOKO
MUNICIPALITY SABAKA LOCATION, MACHAKOS DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed housing project.

The project entails construction of 140No residential 3 bedroom maisonettes measuring 108 square metres complete with a shopping center and associated external works in hitherto open land with scanty vegetation.

The proposed project is located on plot L.R. No.20522, Mavoko Municipality, Sabaki location Machakos district.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Workers accidents and hazards when handling hazardous wastes.	<ul style="list-style-type: none"> Adequate collection and storage of waste should be provided on site, and safe transportation to, and disposal methods at designated areas. All receptacles for storing hazardous wastes should be adequately covered. All employees should be required to wear protective clothing when handling hazardous wastes. All workers should be adequately insured against unforeseen accidents.
Air pollution by dust generated during construction process.	<ul style="list-style-type: none"> All personnel working on the project should be trained prior to starting construction on methods for minimizing air quality impacts during construction. Construction vehicle drivers should be under strict instructions to minimize unnecessary trips, refill petrol fuel tanks in the afternoon and minimize idling of engines. All active construction areas should be watered at least twice a day to reduce dust. All trucks hauling soil, sand and other loose materials shall be covered. All paved access roads should be swept daily. This includes all paved parking areas and stage areas at construction site. Traffic speed of construction/other vehicles should be restricted to not more than 15 mph Careful screening of construction site to contain and arrest construction-related dust. Vegetation should be replanted in disturbed areas as soon as possible. Exposed stockpiles of e.g. dust and sand, should be enclosed, covered, and watered daily, or treated with non-toxic soil binders. Windbreakers should be installed at the windward side of the construction site. All workers on the site should be required to wear protective clothing while on duty.
Proliferation of uncollected solid waste.	<ul style="list-style-type: none"> Wastes to be collected regularly to control air pollution and vermin/insects etc.

Possible Impacts

Mitigation Measures

Noise pollution by construction activities.	<ul style="list-style-type: none"> Receptacles will be provided for waste storage prior to collection. Resource recovery should be encouraged once the project takes off so as to shrink waste stream and recover non-recyclables. Refuse collection vehicles should be covered to prevent scatter of wastes by wind. Wastes will be collected by a licensed operator to avoid illegal final dumping at unauthorized sites. All persons involved in refuse collection will be in full protective attire. Portable barriers should be installed to shield compressors and other small stationery equipment where applicable. Use of equipment designed with noise control elements should be adopted where necessary. Trucks used at the construction site should be routed away from noise sensitive areas in the neighbourhood, where feasible. Idling time for pick up trucks and other small equipment should be minimized to limited time. Use of very noisy equipment should be limited to daytime only. All workers operating in noisy areas or operating noisy equipment should be provided with earpieces to protect against extreme noise.
Workers accidents during construction process.	<ul style="list-style-type: none"> All workers should be sensitized before construction begins, on how to control accidents related to construction. A comprehensive contingency plan should be prepared before construction begins, on accident response. Accordingly, adherence to safety procedures should be enforced. All workers, pursuant to labour laws, shall be insured against accidents. All workers should be instructed to wear protective clothing during construction, including helmets. Construction work should be limited to daytime only
Increased surface run off leading to flooding, from paved grounds and expansive roofs.	<ul style="list-style-type: none"> Surface run off and roof water should be harvested and stored reservoir for re-use. Storm water management plan that minimizes impervious area increases infiltration by use of recharge areas, and use of retention, and/or retention with graduated outlet control structures, should be used.
Increased pressure on infrastructure and services, i.e. traffic related conflicts, water, power and sanitation.	<ul style="list-style-type: none"> A clear entry/exit must be provided along the access road, off Mombasa road Adequate roof and underground water storage tanks should be provided to complement the supply from the Mavoko Municipal Council. Expansion of the capacity of water to accommodate the increased demand in the area by the Council.
Mushrooming of food kiosks	<ul style="list-style-type: none"> Kiosks should be provided on site, with adequate sanitation, during construction

Possible Impacts	Mitigation Measures
	process.
	<ul style="list-style-type: none"> Pursuant to the Physical Planning Act (Cap.286), development control is to be enforced around the project site to control such structures.
Water supply pipes breakdown.	<ul style="list-style-type: none"> Before construction begins, it should be determined where water pipes are located to avoid reticulation break down Regular inspection and maintenance of water pipes.
Inadequate human waste disposal by workers during construction process and occupation	<ul style="list-style-type: none"> As provided for by the Building Code, a temporary latrine should be provided on site to be used by construction workers Should use Bio-box technology for effluent treatment during occupation of the houses
Fire outbreak	<ul style="list-style-type: none"> Fire fighting equipment to be strategically installed within each unit. Regular inspection of fire fighting equipment, e.g. extinguisher. Residents to be trained on how to prevent fire outbreak and how to respond in case of such emergency.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(c) Provincial Director of Environment, Eastern Province.

(d) District Environment Office, Machakos District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE PROPOSED CONSTRUCTION OF THE
MISSING LINKS ROADS NOS. 3, 6 AND 7
IN THE CITY OF NAIROBI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed construction of the Missing Links Roads Nos. 3, 6 and 7 in the city of Nairobi.

The proposed project involves construction of the Missing Links Roads in Kilimani, Lavington and Kileleshwa areas in the City of Nairobi.

The proposed project composes of three roads as described below:

(a) Missing Link Road Three (MLR 3).

- Construction of Missing Link 3: Ring Road Kileleshwa/Riverside Drive/Westlands (1.76km).

(b) Missing Link Road Six (MLR 6).

- Construction of Missing Link 6: Argwings Kodhek Road/Oloitoktok Road to Ring Road Kileleshwa (2.85 km).

(c) Missing Link Road Seven (MLR 7).

- Construction of Missing Link 7: James Gichuru Road/Olenguroune Avenue to Argwings Kodhek Road/Ngong Road (3.75 km).

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Resettlement action plan (RAP)	<ul style="list-style-type: none"> The RAP will take care of those temporary occupiers displaced by the project. Care needs to be taken to provide adequate relocations sites and well-maintained sanitary and solid waste disposals facilities. The City Council of Nairobi identified 5 markets where the TOs will be located. On inspection by the consultants, all the sites were adequately supplied with safe drinking water, sanitary facilities and access roads.
Health adverse effects	<ul style="list-style-type: none"> Provision of effective human and solid waste management system, particularly during the construction stage; Accident reduction strategies during construction and operational phases of the project; Minimization of exposure of dust to communities proximal to the project area from dust during construction; Creating awareness on HIV/AIDS and other related diseases and contractors to provide health insurers to the workers; and Reduced exposure to occupational hazards to workers.
Natural environments	<ul style="list-style-type: none"> Replacement of important trees that will be cut done with road and engineering friendly ones; where possible, important old indigenous trees e.g. the fig (Mugumo) tree; may be preserved; Implementation stage, there is a need to adhere to the recommended engineering roads designs; and Increased number of drain outlets drains so as to avoid cascade effect.
Construction of the Resident Engineer's office, labour camp and material storage sites	<ul style="list-style-type: none"> Provide adequate located and well maintained sanitary and solid waste disposals facilities such as VIP latrines. Collect, recycle and re-use oils for treating wood e.g. fencing posts. Proper training and sensitization of mechanical staff. Avoid accidental spillage through good mechanical practices and proper storage. Create awareness on HIV/AIDS and other related diseases. Avail health care services
Opening up of material borrow pit site (sand and gravel), marrum extraction/quarrying, stone quarries and	<ul style="list-style-type: none"> Reshape the quarry and where mechanical material acquisition is undertaken. Routine watering of diversion roads.

Possible Impacts	Mitigation Measures
accessing them.	<ul style="list-style-type: none"> • Use of architectural design to blend landscape. • Provide drainage works as needed to reduce risks. • Avoid use of stagnant water for drinking by provision of wells. • Routine maintenance to discourage habitation of plant and animal species. • Re-planting trees to restore the habitats as appropriate.

The full report of the proposed project is available for inspection during working hours at:

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
