INDUSTRIAL AREA

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental

impact assessment study report for the proposed development of storage and truck loading facilities.

The Proposed project will entail development of a Storage and Truck Loading Facilities with the following infrastructure; Tank farm with nine Above Storage Tanks and bund wall, An oil water separators, Pumps house, off-Loading Bay, 3-storey office block, Fire pump/ foam shed, Fire water tank, Workshop Room, Sentry House, Masonry wall, 3 product loading gantries, and access road

The proposed project site is located on Plot No. 209/14025 off Tanga Road; Between KPC Nairobi Terminal and Jogoo Road, Nairobi East District.

The project anticipates the following impacts and mitigation measures:

<i>Possible Impact</i>	<i>Mitigation Measures</i>
Air Pollution from Incidents	<ul style="list-style-type: none"> • Ensure the design, monitoring and safety systems installed for the facility must comply with established industry standards and national and international best practice. • Implement, audit and regularly improve HSE measures for emergency response to air pollution incidents during the operation phase • Develop and implement effective measures for minimization of dust during construction phase • Ensure that construction and demolition take into account the need to prevent and minimize release of fugitive emissions during the operational phase
Water Pollution	<ul style="list-style-type: none"> • Implement preventive design, monitoring and management of measures during the construction, operation and decommissioning phases to prevent and manage leaks/spills
Offensive Noise	<ul style="list-style-type: none"> • Implement measures during the construction, operation and decommissioning phases to prevent and manage noise and vibration.
Traffic	<ul style="list-style-type: none"> • Institute measures to reduce damage to the roads
Waste	<ul style="list-style-type: none"> • Develop and implement procedures for safe and appropriate disposal of waste for the all project phases
Soil contamination	<ul style="list-style-type: none"> • Measures need to be put in place to prevent soil contamination for the construction and decommissioning phases from construction machinery, vehicles and equipment.
Fire outbreaks	<ul style="list-style-type: none"> • Ensure there is effective and efficient fire fighting equipment matched with adequately skilled personnel. • Continuous retraining on fire fighting is necessary
Heavy truck movement	<ul style="list-style-type: none"> • Ensure that all trucks entering the project comply with the Transport Licensing Board Regulations

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED DEVELOPMENT OF HELLER
PETROLEUM LTD AT MODIKAR TOWNSHIP WITHIN
GARISSA MUNICIPAL COUNCIL

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the proposed Development of Heller Petroleum Limited at Modikar Township within Garissa Municipal Council.

The proponent intends to develop a petroleum fillings station which is meant to provide and supply of bulk petroleum products and other services that go with this type of activity. The proposed project is situated in Garissa Town on Plot No. BLOCK 1/183 and 184, along Kismayu Road and opposite the Kenya Armed Forces Military Camp across the road.

The project anticipates the following impacts and mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Soil and Geology.	<ul style="list-style-type: none"> • The minimum area required for construction shall be cleared of vegetation. • Measures shall be taken to ensure that topsoil and top subsoil excavated from the construction site is properly managed on decommissioning. • A minimum amount of storm water will be allowed to flow on the site, and control measures like paving and bunding to avoid storm water damage. • Top soil shall not be disturbed more than it is absolutely necessary but not below the first impermeable layer. • Stockpiled soil will be reused for rehabilitation purposes during decommissioning. • Denuded areas shall be surfaced as soon as feasible after construction and during decommissioning stage. • At closure, the site be restored to a suitable land use capacity, in the decommissioning stage.
Ecology	<ul style="list-style-type: none"> • Re-vegetation to control potential soil erosion. • Prevention of soil contamination through oil spills/ leaks from construction machinery and vehicles from the proposed project do not reach the Tana River. • Ensure that the effluent may not be discharged into the nearby Tana River. • Prevention of contamination through oil spills/ leaks from construction machinery and vehicles from the proposed project, from the fuel tanks that can be contained through bunding with wall. • Ensure that effluent is not discharged into the Tana River and the seasonal water pans. Thus can be done by use of receptors and building soak pits.

Possible Impacts *Mitigation Measures*

Air Quality

- The contractor shall ensure that the construction machinery and equipment are appropriate and fit to prevent fugitive emissions, as per national standards or international practices.
- The proponent shall ensure the regular maintenance of the equipment
- Develop and implement effective measures for minimization of dust during construction phase.
- Ensure that construction and demolition take into account the need to prevent and minimize release of fugitive emissions during the operational phase.
- Ensure the design, monitoring and safety system installed for the facility must comply with established industry standards and national and international best practice.
- Implement, audit and regularly improve HSE measures for emergency response to air pollution incidents during the operation phase.
- Provide respirator equipment to the workers.
- Water will have to be sprinkled at the project.

Solid Waste

- Develop and implement procedure for safe and appropriate disposal of waste for the all project phases.

Socio Economic.

- Implement where feasible measures to employ local community members during both construction and operational phase.

Health and Safety.

- Implement sound, cohesive EHS standards throughout all their business cycles and ensure these are observed by all managers and employees.
- Comply with all relevant EHS legislation.
- Plan and prepare for all conceivable emergencies and disasters related to their business and work environment.
- Strive to continually improve in their EHS management through well defined training and audit procedures.
- Follow best practice in EHS compliance with an aim to be industry leaders.
- Require all their business partners to manage their own EHS in line with their policy.
- Develop, and implement measures to minimize risk and injuries to the public during construction and operational phases.
- Install fuel tanks away from other facilities and residential areas to avoid pollution of hydrocarbons and their vapours to avoid ignition in case of fire. This also achieved through emergency venting distances between fuel tanks, forming of tanks, building walls, good house-keeping etc.

The full report of the proposed project is available for inspection during working hours at:

132KV TRANSMISSION LINE

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the proposed Eldoret-Kitale 132kv transmission line.

The proposed development will involve construction of a new single circuit 132kV transmission line between Eldoret – Kitale Power transmission, comprising the following:

- 132 kV line Eldoret – Kitale, 65 km

The project anticipates the following impacts and mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Terrestrial and Aquatic Habitat Alteration	<ul style="list-style-type: none"> • Re-vegetation of disturbed areas with native plant species. • Undertake selective clearance. • Minimizing clearing and disruption to riparian vegetation. • Removal of tall growing tree species and the encouragement of low growing grasses and shrubs in transmission line rights-of-way. • Removal of alien invasive plant species. • Cultivating native plant species. • Avoiding clearing in riparian areas. • Vegetation management shall not eradicate all vegetation.
Soil erosion	<ul style="list-style-type: none"> • Soils excavated for the erection of towers shall be used for re-filling and shall not be left exposed to wind or water for long periods. • The contractor shall avoid steep terrain during the transportation of construction material by using alternative routes or use light vehicles where appropriate. • Riverine vegetation shall be minimally disturbed during the construction phase to reduce soil erosion and safeguard riverbank protection. • Re-plant degraded areas with local species common in the area to complement natural vegetation regeneration to improve ground cover.

Possible Impacts *Mitigation Measures*

Air Pollution (dust, fuel emissions)	<ul style="list-style-type: none"> • Control speed of construction vehicles. • Prohibit idling of vehicles. • Water shall be sprayed during the construction phase on excavated areas. • Regular maintenance of plant and equipment. • Provision of dust masks for use when working in dusty conditions.

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the proposed housing development.

The proposed project intends to complete work on the River Park Estate by putting up some 318 four bedrooomed maissonettes in addition to the 51 three bedrooomed bungalows currently under construction in the Estate (River Park Estate), Mavoko.

The project anticipates the following impacts and mitigation

measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Air pollution, dust generation and noise pollution	<ul style="list-style-type: none"> • Spray the road and site with water during construction work • Control speed and movements of construction vehicles noting that access to project site is off a busy highway • Use of low-Sulphur diesel for diesel-operated machinery • Use of appropriate PPE by construction workers • No unnecessary hooting by project and residents vehicles • Restriction of construction activities to day time • Use of equipment designed with noise control elements • Temporarily fencing off noisy machinery such as vibrators
Clearing of vegetation	<ul style="list-style-type: none"> • Planting of ornamental trees along perimeter fences and within site • Where possible retain some of the natural vegetation as part of the built landscape • Planting of grassed lawns • Establishment of flower gardens within project site • No disturbance to areas not affected by the project so as to minimize impacts on environment

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED SETTING APART OF 50,000 HECTARES
OF TRUST LAND FOR JATROPHA CULTIVATION IN
BUNGALE AREA, COUNTY COUNCIL OF MALINDI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the proposed Jatropha cultivation.

The proponent of the proposed project intends to lease 50,000Ha of land from the County Council of Malindi to support the cultivation of Jatropha for an initial period of 33 years.

The project site is situated about 120km north of Mombasa and approximately 27km to the North West of Malindi town and in the newly created Marafa District (formerly Malindi District).

The project anticipates the following impacts and mitigation measures:

Possible Impacts

Mitigation Measures

Impact on biodiversity

- No part of the cultivated area under Jatropha shall include or be in close proximity to Dakatcha Woodlands. An appropriate buffer zone shall be created through establishment of woodlots in areas towards the woodland.
- The areas to be leased for cultivation of Jatropha shall be those that do not threaten the woodland and initial activities shall be implemented on an experimental basis to allow for research and consultations.
- The Kenya Jatropha Energy Limited shall have an obligation under the lease agreement to support initiatives (Nature Kenya and Arocha Kenya) aimed at the conservation and management of the woodland for the benefit of the local community.
- The Jatropha oil processing plant shall be set as far away from the woodland area as practical.
- No access routes shall be constructed through or near the woodland in compliance with the provisions of the Forest Act, 2005.

Possible Impacts

Mitigation Measures

- An ecological buffer zone to include community managed conservation areas shall be established between the

Jatropha farm and the forest.

Land tenure

- The design of the farm units shall include provisions for establishing woodlots of casuarinas (or other drought resistant plants as research and consultations may inform)
- Since the proposed farming is large scale and over 70% of the proposed land for Jatropha cultivation is inhabited, it is proposed that the proponent begins setting up farms in areas that are not inhabited by local communities. This strategy will beget several advantages in that it will ensure adequate time for community concerns mainstreaming into the project and assist the community in appreciating the value of the project.
- Since some of the members of the community have indicated that they would not like to be resettled elsewhere, the proponent might consider developing the villages to house the workforce and develop agreements with the local community to use their farms as outgrowers.
- For those who opt to be relocated voluntarily, the proponent will put in place measures to ensure that a competitive resettlement action plan (RAP) is developed and agreed upon between the community members affected, county council of Malindi, local administration, politicians and the proponent.
- Ensure that any resettlement does not in any way impact negatively on social networks within the community.
- That the resettlement is tailored to enhance the economic benefits likely to be generated by the project to the community.
- Adequate relocation compensation is provided to affected households
- Important cultural and ceremonial sites for the community should be preserved within the farm plan for the cultivation of Jatropha.
- The areas set aside for community farming should focus on developing the local subsistence agricultural practices i.e. the farming of maize and pineapples especially in the Bungale and Marafa areas.

Solid wastes

- Provide for composition of cleared vegetative material to make organic manure for use by local farmers and as input to the process of establishing Jatropha stands.
- Woody shrubs should be selected for use by the local community as wood fuel.
- Wrappings and plastic materials for farm tools and implementations should be disposed in designated areas in line with the Waste Management Regulations.

Possible Impacts

Mitigation Measures

- Where necessary, the proponents will liaise with the County Council of Malindi to identify spoil dumping areas during land preparation.
- In the case of transportation of waste, the proponent will procure the services

	of NEMA licensed waste handler.
Air pollution	<ul style="list-style-type: none"> • Use of the seed cake for making of fertilizer for use in the <i>Jatropha</i> farms or for sale to out growers • Obtain serviceable machinery with low emissions standards • Working in less windy conditions • Ensure that all workers are provided with Personal Protective Equipment • Working under wet conditions were practical
Noise pollution	<ul style="list-style-type: none"> • Ensure that the machines acquired for use in preparing the farms meet national and international standards
Effluent management	<ul style="list-style-type: none"> • Design and implement a waste water recycling/treatment plant especially for the processing and use in irrigation systems in line with the standards specified under Legal Notice No. 120 of 2006. • Ensure that discharge of effluent residuals to the environment conforms to the standards set out in the Third Schedule of the Water Quality Regulations. • Upon commencement of operations of the processing plant, apply and obtain an effluent discharge license from NEMA in line with Legal Notice No. 120 of 2006. • Ensure the effluent from workforce quarters (black water) shall be treated and discharged into the environment with standards equivalent to the specifications on schedule III of Legal Notice No.120 of 2006.
Energy resources use	<ul style="list-style-type: none"> • The proponent shall carry out an energy audit prior to the commencement of the operations of the <i>Jatropha</i> processing plant. • Comply with the Energy Act, 2006. • Only energy saving machinery shall be installed within the processing plant. • For lighting purposes within the plant and workforce quarters, energy saving bulbs shall be installed. • Awareness will be created among all members of staff on energy saving measures and policy as will be documented by the proponent before commencement of operations. • The power generation plant and the biogas production facilities proposed under the project shall be subject to an Environmental Impact Assessment, each on its own merit
Health and safety	<ul style="list-style-type: none"> • Health and safety regulation no.15 of 2007 shall be adhered to during land preparation activities.
Possible Impacts	<p><i>Mitigation Measures</i></p> <p>All workers shall be trained in health and safety skills especially in safe working procedures, for farm tools and machinery</p> <p>The proponent shall provide all workers with Personal Protective Equipment (PPE) for their health and safety and ensure that</p>

they comply with their use all the time during land preparation activities

There shall be an emergency response plan developed for the farm preparation activities

The proponent will always ensure that there is standby vehicle within the sites being prepared at any given time to provide ambulance service in the event of an accident or injury

A first aid kit and trained personnel in this regard shall be availed to the workers at all times during land preparation activities.

KAREN/NAIROBI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the University of Air Travel and Related Studies.

The Proposed project entails construction of the following:

- Administration and academic blocks
- Ladies hostel blocks, Men's hostel blocks
- Dining hall and auditorium, Students' centre, Graduation square
- Staff quarters (principal and senior staff residence).
- Garage
- Sports field (site for future expansion)
- Cold water storage tanks to specification.
- Strip foundation on solid ground.
- All openings to habitable rooms to have permanent vents (P.V).
- All drainage pipes laid under building and driveway to be of PVC type/concrete surround.
- Water metre to be 300mm above G.L.
- 200mm thick smooth dressed masonry wall with fair faced recessed horizontal joints.
- Dump proof course under all walls 150mm above G.L.

The project is located about 3 km. off Dagoreti road through Rhino Park road on LR. Nos. 11916/18, 11916/19 and 12252/24, Karen/Nairobi.

The project anticipates the following impacts and mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Air, dust and noise pollution	<ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limits • Avoid excavation works in dry weather and sprinkle water to reduce dust generation. • Restrict construction activities to day time only. • Ensure that noisy machineries are insulated/temporary fencing. • Use appropriate personal protective equipments (PPEs). • Noise hazard signs should be put displayed where necessary. • Machinery should be well lubricated and serviced.
Clearance of vegetations and soil erosion	<ul style="list-style-type: none"> • Establish grass lawns, flower gardens and trees around and within the site. • Minimize disturbance to flora and fauna in the neighbouring areas • Apply soil erosion control measures • Reuse the topsoil in landscaping other places.
Waste management	<ul style="list-style-type: none"> • Proper containment & disposal of solid waste in all project phases • Segregate, separate and re-use construction wastes. • Contract a licence waste collection and disposal company • Raise awareness on waste managements. • Wastewater/sewerage to be disposed through Bio-digesters sewer system

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED TRANSMISSION LINE 132KV LESSOS-
KABARNET-NYAHURURU-NANYUKI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the proposed Lessos-Kabarnet-Nyahururu-Nanyuki 132kV transmission line.

The proposed development will involve construction of a new single circuit 132kV transmission line between Lessos-Kabarnet-Nyahururu-Nanyuki covering 235km.

The project anticipates the following impacts and mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Terrestrial Habitat Alteration	<ul style="list-style-type: none"> • Re-vegetation of disturbed areas with native plant species. • Undertake selective clearance by removing tall woody species leaving saplings, for quick regeneration of vegetation along the way-leave.
Aquatic habitat alteration	<ul style="list-style-type: none"> • Minimizing clearing and disruption to riparian vegetation.
Power line related avifauna mortalities	<ul style="list-style-type: none"> • Minimize collision, undertake wire-marking to alert birds to the presence of power line, allowing them time to avoid the collision.
<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Soil erosion	<ul style="list-style-type: none"> • Build raptors platforms on top of pylons for roosting and nesting. • Soils excavated for the erection of towers should be used for re-filling and should not be left exposed to wind or water for long periods. • The contractor should avoid steep terrain during the transportation of construction

Riverine vegetation should be minimally disturbed during the construction phase to reduce soil erosion and safeguard riverbank protection. Re-plant degraded areas with local species common in the area to complement natural vegetation regeneration to improve ground cover.
Air Pollution (dust, fuel emissions)	<ul style="list-style-type: none"> Control speed of construction vehicles. Prohibit idling of vehicles. Water should be sprayed during the construction phase on excavated areas. Regular maintenance of plant and equipment. Provision of dust masks for use when working in dusty conditions.
Water Pollution	<ul style="list-style-type: none"> Maintenance of construction vehicles should be carried out in the Contractor's camp.
Management of Solid Waste	<ul style="list-style-type: none"> Contractor must dispose solid wastes away from the site to an approved disposal site.
Management of Hazardous substances	<ul style="list-style-type: none"> Use of designated areas for repair and maintenance of machinery e.g. garages to avoid fuels and lubricant spills at the camp-site.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
