The proposed site is located in Arthi River bordering Syokimau Farm to the South off Mombasa Road, to access the site; the shortest route from Nairobi City Centre is via Haille Sellaise Road, Uhuru Highway, Mombasa Road.

The project anticipates the following impacts and mitigation measures:

Possible Impact	Mitigation Measures
Soil degradation	<ul style="list-style-type: none"> • Provide soil conservation structures on the areas prone to soil erosion. • Control construction activities during rainy/wet conditions. • Resurface (pave) open areas after the completion of the project. • Introduce suitable and well-managed vegetation to generate surface covers on the open areas. • Provide, maintain and repair suitable storm water drainage channels. • Conduct standard landscaping after project completion.
Air pollution	<ul style="list-style-type: none"> • Provide Personal Protective Equipment (PPE) to workers. • Regular and prompt maintenance of construction machinery and equipment. • Sprinkling of water to reduce dust. • Enclose the site to mitigate effects of wind on the dust generated. • Regular air monitoring and tests to analyze the quality of air.
Noise and vibration	<ul style="list-style-type: none"> • Construction works should be carried out only during the specified time i.e. from 0800 hrs to 1700 hrs. • Ensure engines of vehicles or machinery are switched off when not in use. • Maintain machineries regularly. • Place generators and heavy-duty equipment (if present) in enclosures.

Possible Impact	Mitigation Measures
Solid and liquid waste management	<ul style="list-style-type: none"> • Avoid unnecessary honing of the involved machinery and vehicles. • Provide a bill boards at the construction site gates notifying the construction activities and timings. • Workers should be provided with relevant personal protective equipment (PPE). • Introduce barriers such as walls around the site.
	<ul style="list-style-type: none"> • Have private refuse handlers and the Municipal facilitate sound waste handling and disposal. • Segregate and separated waste to encourage recycling. • Provide for a central waste collection area with preferably two types of bins - one for organic matter and the other for mineral matter. • Keep the receptacles in a good condition, and sanitarily clean by frequent washing and disinfecting. • The collection of waste materials should be made at least once in 24 hours. • Train or educate the involved stakeholders/tenants on the importance and means of waste (garbage) management and handling.
Water misuse	<ul style="list-style-type: none"> • Avoid excessive use of the water supplied by the CCN mains. • Provide roof catchments with rainwater harvesting systems. • Provide notices and information signs to the involved stakeholders on water resource conservation. • Install water-conserving taps that turn-off automatically when water is not in use.
Energy misuse	<ul style="list-style-type: none"> • Encourage water reuse/recycling. • Switch electrical appliances when not in use. • Optimize operations of electrical equipment to enhance energy conservation. • Put off all lights immediately when not in use or are not needed. • Use energy conserving electric lamps for general lighting.
Fire outbreaks	<ul style="list-style-type: none"> • Make use of alternative source of energy such as solar power, which is renewable. • Install fire alarm system and fire fighting facilities following the NCC Fire Masters requirement approval. • Conduct regular fire fighting drills within the site. • Adapt an emergency response plan for the project. • Ensure that all firefighting equipment are regularly maintained and served. • Provide fire hazard signs.
Occupational health and Safety	<ul style="list-style-type: none"> • Provide for properly fitting personal protective equipment (PPE) to avoid injuries and illness. • A First Aid Kit should be provided within the site and during construction phase. • Adapt a suitable emergency response plans to manage occurrence of anticipated hazards.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED UNDERGROUND FUEL TANKS AND SUPPLY PUMP ON PLOT NO. KSM/7/195, OFF ODINGA- ODINGA ROAD, KISUMU TOWN

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the proposed liquefied petroleum gas distribution terminal.

The project entails the development of an LPG distribution facility. This will comprise a depot off-take which will primarily be via a proposed LPG distribution terminal to be built adjacent to the LPG storage facility. The distribution terminal will have both road and rail loading facilities and possibly an LPG cylinder filling and bottling plant in the Miritini area of Kilindini District, Mombasa.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Soil compaction	<ul style="list-style-type: none"> • In order to prevent irreversible construction compaction effects arising from construction plant and equipment, ensure that to the extent possible, construction is undertaken during dry periods. • On completion, all non-built up areas should be landscaped.
Soil erosion	<ul style="list-style-type: none"> • To prevent soil erosion all non-built up areas shall be landscaped and appropriate soil bind grass planted.
Run-on deposition	<ul style="list-style-type: none"> • As the mounded LPG storage tanks will be constructed on top of a hill, construct and maintain retaining walls, stone pitching, gabions, etc. to prevent upstream run-on deposition of soils.
Piping and gully formation	<ul style="list-style-type: none"> • Grout all existing pipes after excavation of the 5m high topsoil. Thereafter ensure that no water enters the LPG storage tanks' footprint area that can initiate new piping and gully formation.
Surface water (Impact on flow and Water quality)	<ul style="list-style-type: none"> • If possible undertake initial construction activities during the dry season to prevent water/soil run-off especially on side slopes. Water should also be diverted away from the project footprint areas through properly constructed drainage channels;

Possible Impacts	Mitigation Measures
	<ul style="list-style-type: none"> • Ensure that spills emanating from construction plant and equipment are cleaned immediately; • Any petroleum products stored on site must be stored in bunded areas to prevent contamination of surface water; • Contractor to adhere to Construction HSE management plan during the construction phase.
Impacts on terrestrial ecology	<ul style="list-style-type: none"> • Set up measures to ensure that during preconstruction and construction, impacts on sensitive ecological areas and individual protected biota are minimized and that good management is exercised during operation so as to prevent ecological impacts
Air quality	<ul style="list-style-type: none"> • Develop and implement effective measures for minimization of dust during the preconstruction and construction phase, followed by rehabilitation in a timely manner; • Contractor to ensure that construction plant and equipment is in a good state of repair at all times to prevent adverse exhaust air emissions.
Waste management	<ul style="list-style-type: none"> • Develop and implement safe procedures for management of non-hazardous and hazardous wastes in accordance with L.N. 121: Waste Management Regulations, 2006. Contractor is responsible for this during the construction phase and the Proponent during the operational phase of the project.
Noise and vibration	<ul style="list-style-type: none"> • Contractor's plant and equipment shall comply as a minimum with requirements of L.N. 25: Noise Prevention and Control Rules, 2005; • Implement measures to manage noise levels of trucks entering and leaving the facility during the operation phase.
Traffic	<ul style="list-style-type: none"> • Develop and implement measures to repair regularly used roads to the project site especially the Magongo Road turn-off to the project site; • Ensure that contractor vehicles comply with axle load limits; • Develop and implement a traffic management plan to take advantage of off-peak hours for delivery of construction materials and abnormal loads during the construction phase; • Contractor drivers shall possess defensive driving skills gotten from a reputable training consultancy.
Health and safety	<ul style="list-style-type: none"> • Develop and implement a contractor safety program which includes the relevant provisions of OSHA, WIBA and their respective subsidiary legislation; • Specifically ensure that the construction complies with L.N. 40: Building Operations and Work of Engineering Construction Rules, 1984.

The full report of the proposed project is available for inspection during working hours at:
