PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed standard petrol station.

The project will comprise a service station, restaurant, mini-mart, station office, lubricants/spare parts shop, store and a service pit. In addition, such facilities will go along with waste water system- septic, soak pit, and storm water drain. There shall be three pumps, two for diesel and one for petrol.

The proposed Petrol Station will be located in Industrial area along Nanyuki Road-Tanga road junctions in Nairobi on plot No. 209/12298.

The following are the anticipated impacts and proposed mitigation measures.

Possible Impacts

Soil

Noise

Excavation soil

Construction waste management

Air /dust pollution

Storm- water

Security

Water quality

Traffic management

Spillage leakage from tanks fuel adulteration

Mitigation Measures

- Site excavation works to be planned such that a section is completed and rehabilitated while another section begins.
- Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil.
- The noisy construction works will entirely be planned to be during day time when most of the neighbours will be at work.
- Excavation material will be loaded into trucks and be transported to designated disposal sites.
- Design and implement an appropriate landscaping programme to help in rehabilitating of part of the project area after construction.
- Reuse of the top soil in landscaping.
- Ensure that construction materials left over at the end of construction will be used in other projects rather than being disposed of.
- Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements
- Minimize waste through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual materials.
- Ensure strict enforcement of on-site speed limit regulations.
- Avoid excavation works in extremely dry weathers.
- Sprinkle water on graded access routes each day to reduce dust generation by construction vehicles.
- Erect dust screen round the site.
- Open drains connection will be provided on site.
- Constructions of water storage tanks/ buy some to collect storm water.
- Ensure the general safety and security at all times by providing day and night security guards and adequate lighting within and around the premises.
- Use liners where there is mixing of cement and other substances to reduce the amount of construction material in the runoff exiting the site.
- Ensure minimum excavation is done at the site to reduce soil disturbance that would increase soil erosion causing siltation of water courses.
- Delivery vehicles to be given strict instructions on safe driving in the project area.
- All delivery vehicles should follow a predetermined route.
- Use properly maintained hoses and fittings.
- Make the cement screeds in all the chambers using water proof material.
