Increased storm water, runoff and soil erosion	<ul style="list-style-type: none"> • Surface runoff and roof water shall be harvested and stored in underground reservoir for reuse. • A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure will be designed.

<i>Possible impacts</i>	<i>Mitigation measures</i>	<i>Possible impacts</i>	<i>Mitigation measures</i>
Increased solid waste generation	<ul style="list-style-type: none"> • Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. • Ensure that construction vehicles are restricted to existing graded roads to avoid soil compaction within the project site. • Use of an integrated solid waste management system i.e. through a hierarchy of options: a) source reduction b) recycling c) composting and reuse d) combustion e) sanitary land filling. • Through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size or having large quantities of residual materials. • Ensure that construction materials left over at the end of construction will be used in other project rather than being disposed of. • Ensure that damaged or wasted construction materials including plumbing and lighting fixtures, marbles and glass will be recovered for refurbishing and use in other projects. • Donate recyclable/reusable or residual materials to local community groups, institutions and individual local residents or home owners. Reduce dust emissions	<ul style="list-style-type: none"> • Ensure strict enforcement of onsite speed limit regulations. • Avoid excavation works in extremely dry weathers. • Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles. • Safety gear should be provided. 		
Exhaust emission	<ul style="list-style-type: none"> • Vehicle idling time shall be minimized. • Alternatively fuelled construction equipment shall be used where feasible equipment shall be properly tuned and maintained. • Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas and to switch off or keep vehicle engines at these points. 		
Minimization of noise and vibration	<ul style="list-style-type: none"> • Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. • Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as churches, residential areas and schools. • Ensure that construction machinery are kept in good condition to reduce noise generation. • Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels.
