THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED TENTED TOURIST CAMP ON PLOT L.R. NO. CIS MARA/OLCHORO-OIROWUA/38 IN OLERA, NAROK COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed Tented Tourist Camp.

The proposed development will include setting up of 25 luxurious tents and ancillary facilities in a camp area along the Mara River. The total area under development will be 112 acres. Upon completion, the camp will comprise of a watering hole and a salt lick with sundowner bar for game look-out, a nature walk safari by the side of the watering hole interspersed with camp sites, A natural swimming pool and bar beer area with pool bar, camp fire, dancers platform and a fitness centre (sauna, steam and Jacuzzi) and a central landscaped area for outdoor loungers

The proposed tented camp project will be on land parcel number Narok/Cismara/Olchoro-Oirowua/38 which measures approximately

112 acres in Olchoro Oirowua Ranch in Ololulunga Division, Narok District bordering Lamek and Kimintet Ranches. Narok District lies between Latitudes 00 50' and 20 05' south and Longitudes 350 58' and 360 0' East occupying a total area of 15,087.8 km².

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
High demand of raw material	<ul style="list-style-type: none"> • Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered. • Source building materials from local suppliers who use environmentally friendly processes in their operations. • Use at least 5%-10% recycled, refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills • Ensure that damage or loss of materials at the construction site is kept minimal through proper storage.
Vegetation disturbance	<ul style="list-style-type: none"> • Ensure proper demarcation and delineation of the project area to be affected by construction works. • Specify locations for trailers and equipment, and areas of the site which should be kept free of traffic, equipment, and storage. • Designate access routes and parking within the site. • Introduction of vegetation (trees, shrubs and grass) on open spaces and around the project site and their maintenance. • Design and implement an appropriate landscaping programme to help in re-vegetation of part of the project area after construction. • Avoid as far as practical contacts with wildlife and restrict construction activities and delivery of raw materials to day time only • Report any wildlife stranding to the local community conservation group and the Kenya Wildlife Service
Increased storm water, runoff and soil erosion	<ul style="list-style-type: none"> • Surface runoff and roof water shall be harvested and stored in underground reservoir for reuse. • A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure will be designed. • Apply soil erosion control measures such as levelling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. • Ensure that construction vehicles are restricted to existing graded roads to avoid soil compaction within the project site. • Ensure that any compacted areas are ripped to reduce run-off. • Site excavation works to be planned such that a section is completed and rehabilitated before another section

Increased solid waste generation	<p>begins.</p> <ul style="list-style-type: none"> • Use of an integrated solid waste management system i.e. through a hierarchy of options: 1. Source reduction 2. Recycling 3.Composting and reuse 4. Combustion 5. Sanitary land filling. • Through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual materials. • Ensure that construction materials left over at the end of construction will be used in other projects rather than being disposed of. • Ensure that damaged or wasted construction materials including cabinets, doors, plumbing and lighting fixtures, marbles and glass will be recovered for refurbishing and use in other projects
Dust emission	<ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limit regulations • Avoid excavation works in extremely dry weathers • Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles • Personal Protective equipment to be worn
Exhaust emission	<ul style="list-style-type: none"> • Vehicle idling time shall be minimized • Alternatively fuelled construction equipment shall be used where feasible equipment shall be properly tuned and maintained • Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas, and to switch off or keep vehicle engines at these points
Noise and vibration	<ul style="list-style-type: none"> • Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. • Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as churches, residential areas and schools • Ensure that construction machinery are kept in good condition to reduce noise generation • Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels • Fully adhere to the provisions of Noise Prevention and Control Rules 2005, Legal Notice no. 24 regarding noise level limits at the workplace
Generation of wastewater	<ul style="list-style-type: none"> • Provide means for handling sewage generated by construction workers (temporary pit toilets) • Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into

the land and water bodies

Incidents, accidents and dangerous occurrences

- Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated
- Ensure that provisions for reporting incidents, accidents and dangerous occurrences during construction using prescribed forms obtainable from the local Occupational Health and Safety Office (OHSO) are in place.
- Enforcing adherence to safety procedures and preparing contingency plan for accident response in addition safety education and training shall be emphasized.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839 - 00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi
- (c) Provincial Director of Environment, Rift Valley Province.
- (d) District Environmental Officer, Narok South District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project. (EIA/5/2/796)

GAZETTE NOTICE NO. 2768

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED EPC TURNKEY CONTRACT FOR
UPGRADING OF KIBWEZI – KITUI – MWINGI – KANDWIA –
USEUNI ROAD

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed EPC Turnkey contract for upgrading of Kibwezi-Kitui-Mwingi-Kandwia-Useuni Road.

The proponent proposes to improve to bitumen standards of Kibwezi-Kitui-Usueni Road approximately 330km that will form a major link for Mombasa port and Ethiopia, as part of the northern corridor transport improvement project (NCTIP). The project is subdivided into three contracts namely Contract 1: Kibwezi to Kitui (145 Km); Contract 2: Kitui - Mwingi to Kandwia (103 Km); Contract 3: Kandwia - Tseikuru to Usueni (82 Km).

The proposed project is located entirely in Eastern province and traverses several districts within the province covering a distance of 330km. The proposed alignment will generally follow Kibwezi – Kitui (B7) 145 km, Kitui – Kandwia 103km, and Kandwia-Usueni 82km

The following are the anticipated impacts and proposed mitigation measures:

Environmental issue Mitigation Measures

Vegetation loss

- Vegetation should only be cleared where it will interfere with road construction and/or present a hazard to traffic.
- Cutting of trees, other than those mentioned above, for firewood by the workers housed in camps should be controlled.
- Workers should be encouraged to use alternative sources of cooking fuel.
- As far as practicable, materials should not be stockpiled on vegetated areas.
- In areas where soils were compacted during road construction, such as along temporary access roads, the soil should be loosened through ripping to enable infiltration of water and growth of plants.
- Water sources should be handed over to the community should be carefully selected to reduce possible overgrazing in the vicinity.

Soil erosion, run-off

- The success of mitigation measures for soil erosion depends on the design of the road drainage, soil stabilization along the roadside and reserves and the cooperation and participation of the local community.
- Specific engineering solutions should be implemented to mitigate soil erosion.
- All earth cuttings need to be at a gentle angle in order to allow vegetation to grow as steep sides tend to result in seeds washing away rather than having a chance to establish.
- Soil holding structures should be constructed in very loose soils.

Pollution

- Use dust suppressants as far as possible, especially within the towns and at wildlife conservation areas.
- All the workers should wear dust masks at all times when at the sites of high dust generation.
- Warn the neighbourhood of possible generation of dust beyond normal levels.

Waste management

- Construction waste and domestic waste should be stored only in the specially designated places and removed regularly.
- Disposal and burial of waste should be agreed upon in the established order before commencement of the works.
- Discharge of any non-treated drain waters and waste to the rivers, streams, wetlands or on the surrounding land should be forbidden.
- Partly inert waste materials can be used as filling material for reconstruction of road sub-grade.
- Periodic inspection of construction works helps to ensure proper handling of waste materials.
- Contractors should encourage reuse and recycling to minimize residual waste.
- A handling protocol, e.g. waste storage away from public view, and provision of retention areas to contain accidental spills of toxic, hazardous, and harmful

- construction materials, such as caustic and acidic substances, oil, waste oil, diesel, and bitumen, should be prepared and implemented by the contractors
- Aesthetics landscape**
- Spoil materials, including solid waste produced at camping sites for road construction crews, should be properly disposed.
 - Improve quarries and borrow areas by rehabilitation to blend with the surrounding landscape.
- Noise and vibration**
- As far as possible, attempt to minimize noise, especially noise from heavy equipment when constructing the road through towns and shopping centers.
 - Special care should be taken where the construction site is near to sensitive receptors such as schools and hospitals
 - Ensure that construction equipment is operating optimally and with operational noise mufflers where possible.
- Health and safety**
- Road construction workers should be informed about diseases that are prevalent in the project area, and how they can minimize their exposure and transmission.
 - Mount regular HIV-AIDS awareness campaigns. Condoms should be made available to construction crews.
 - Contractors should provide workers with sufficient accommodation for married couples to stay together.
 - The Contractors should consider hiring a permanent nurse to attend to emergencies and to mount awareness campaigns amongst the workers.
 - Health service providers should be regularly consulted to determine any changes in disease patterns that may be associated with road construction.
 - The implementing agency will have to regularly discuss with their counterparts any health implications of on-going road construction.
