THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED TENTED TOURIST CAMP ON PLOT L.R.
NO. CIS MARA/OLCHORO-OIROWUA/38 IN OLERA, NAROK
COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact
Assessment and Audit) Regulations, the National Environmental
Management Authority (NEMA) has received an Environmental
Impact Assessment Study Report for the implementation of the
proposed Tented Tourist Camp.

The proposed development will include setting up of 25 luxurious tents and ancillary facilities in a camp area along the Mara River. The total area under development will be 112 acres. Upon completion, the camp will comprise of a watering hole and a salt lick with sundowner bar for game look-out, a nature walk safari by the side of the watering hole interspersed with camp sites, A natural swimming pool and bar beer area with pool bar, camp fire, dancers platform and a fitness centre (sauna, steam and Jacuzzi) and a central landscaped area for outdoor loungers

The proposed tented camp project will be on land parcel number Narok/Cismara/Olchoro-Oirowua/38 which measures approximately 112 acres in Olchoro Oirowua Ranch in Ololulunga Division, Narok District bordering Lamek and Kimintet Ranches. Narok District lies between Latitudes 00 50' and 20 05' south and Longitudes 350 58' and 360 0' East occupying a total area of 15,087.8 km².

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
High demand of raw material	<ul style="list-style-type: none"> • Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered. • Source building materials from local suppliers who use environmentally friendly processes in their operations. • Use at least 5%-10% recycled, refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills • Ensure that damage or loss of materials at the construction site is kept minimal through proper storage.
Vegetation disturbance	<ul style="list-style-type: none"> • Ensure proper demarcation and delineation of the project area to be affected by construction works. • Specify locations for trailers and equipment, and areas of the site which should be kept free of traffic, equipment, and storage. • Designate access routes and parking within the site. • Introduction of vegetation (trees, shrubs and grass) on open spaces and around the project site and their maintenance. • Design and implement an appropriate landscaping programme to help in re-vegetation of part of the project area after construction. • Avoid as far as practical contacts with wildlife and restrict construction activities and delivery of raw materials to day time only • Report any wildlife stranding to the local community conservation group and the Kenya Wildlife Service
Increased storm water, runoff and soil erosion	<ul style="list-style-type: none"> • Surface runoff and roof water shall be harvested and stored in underground reservoir for reuse. • A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure will be designed. • Apply soil erosion control measures such as levelling of the project site to reduce run-off velocity and increase

infiltration of storm water into the soil.

Increased solid waste generation	<ul style="list-style-type: none"> • Ensure that construction vehicles are restricted to existing graded roads to avoid soil compaction within the project site. • Ensure that any compacted areas are ripped to reduce run-off. • Site excavation works to be planned such that a section is completed and rehabilitated before another section begins. • Use of an integrated solid waste management system i.e. through a hierarchy of options: 1. Source reduction 2. Recycling 3. Composting and reuse 4. Combustion 5. Sanitary land filling. • Through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual materials. • Ensure that construction materials left over at the end of construction will be used in other projects rather than being disposed of. • Ensure that damaged or wasted construction materials including cabinets, doors, plumbing and lighting fixtures, marbles and glass will be recovered for refurbishing and use in other projects
Dust emission	<ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limit regulations • Avoid excavation works in extremely dry weathers • Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles • Personal Protective equipment to be worn
Exhaust emission	<ul style="list-style-type: none"> • Vehicle idling time shall be minimized • Alternatively fuelled construction equipment shall be used where feasible equipment shall be properly tuned and maintained • Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas, and to switch off or keep vehicle engines at these points
Noise and vibration	<ul style="list-style-type: none"> • Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. • Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as churches, residential areas and schools • Ensure that construction machinery are kept in good condition to reduce noise generation • Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise

levels

- Fully adhere to the provisions of Noise Prevention and Control Rules 2005, Legal Notice no. 24 regarding noise level limits at the workplace
- Generation of wastewater
- Provide means for handling sewage generated by construction workers (temporary pit toilets)
 - Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies
 - Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated
- Incidents, accidents and dangerous occurrences
- Ensure that provisions for reporting incidents, accidents and dangerous occurrences during construction using prescribed forms obtainable from the local Occupational Health and Safety Office (OHSO) are in place.
 - Enforcing adherence to safety procedures and preparing contingency plan for accident response in addition safety education and training shall be emphasized.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839 - 00200, Nairobi.
- Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi
- Provincial Director of Environment, Rift Valley Province.
- District Environmental Officer, Narok South District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project. (EIA/5/2/796)

GAZETTE NOTICE No. 2768

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED EPC TURNKEY CONTRACT FOR UPGRADING OF KIBWEZI – KITUI – MWINGI – KANDWIA – USEUNI ROAD

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed EPC Turnkey contract for upgrading of Kibwezi–Kitui–Mwingi–Kandwia–Useuni Road.

The proponent proposes to improve to bitumen standards of Kibwezi-Kitui-Usueni Road approximately 330km that will form a major link for Mombasa port and Ethiopia, as part of the northern corridor transport improvement project (NCTIP). The project is subdivided into three contracts namely Contract 1: Kibwezi to Kitui

(145 Km); Contract 2: Kitui - Mwingi to Kandwia (103 Km); Contract 3: Kandwia - Tseikuru to Usueni (82 Km).

The proposed project is located entirely in Eastern province and traverses several districts within the province covering a distance of 330km. The proposed alignment will generally follow Kibwezi – Kitui (B7) 145 km, Kitui – Kandwia 103km, and Kandwia-Usueni 82km

The following are the anticipated impacts and proposed mitigation measures:

Environmental issue	Mitigation Measures
Vegetation loss	<ul style="list-style-type: none"> • Vegetation should only be cleared where it will interfere with road construction and/or present a hazard to traffic. • Cutting of trees, other than those mentioned above, for firewood by the workers housed in camps should be controlled. • Workers should be encouraged to use alternative sources of cooking fuel. • As far as practicable, materials should not be stockpiled on vegetated areas. • In areas where soils were compacted during road construction, such as along temporary access roads, the soil should be loosened through ripping to enable infiltration of water and growth of plants. • Water sources should be handed over to the community should be carefully selected to reduce possible overgrazing in the vicinity.
Soil erosion, run-off	<ul style="list-style-type: none"> • The success of mitigation measures for soil erosion depends on the design of the road drainage, soil stabilization along the roadside and reserves and the cooperation and participation of the local community. • Specific engineering solutions should be implemented to mitigate soil erosion. • All earth cuttings need to be at a gentle angle in order to allow vegetation to grow as steep sides tend to result in seeds washing away rather than having a chance to establish. • Soil holding structures should be constructed in very loose soils.
Pollution	<ul style="list-style-type: none"> • Use dust suppressants as far as possible, especially within the towns and at wildlife conservation areas. • All the workers should wear dust masks at all times when at the sites of high dust generation. • Warn the neighbourhood of possible generation of dust beyond normal levels.
Waste management	<ul style="list-style-type: none"> • Construction waste and domestic waste should be stored only in the specially designated places and removed regularly. • Disposal and burial of waste should be agreed upon in the established order before commencement of the works. • Discharge of any non-treated drain waters and waste to the rivers, streams, wetlands or on the surrounding land should be forbidden. • Partly inert waste materials can be used as filling material for reconstruction of

- road sub-grade.
- Periodic inspection of construction works helps to ensure proper handling of waste materials.
 - Contractors should encourage reuse and recycling to minimize residual waste.
 - A handling protocol, e.g. waste storage away from public view, and provision of retention areas to contain accidental spills of toxic, hazardous, and harmful construction materials, such as caustic and acidic substances, oil, waste oil, diesel, and bitumen, should be prepared and implemented by the contractors
- Aesthetics landscape**
- Spoil materials, including solid waste produced at camping sites for road construction crews, should be properly disposed.
 - Improve quarries and borrow areas by rehabilitation to blend with the surrounding landscape.
- Noise and vibration**
- As far as possible, attempt to minimize noise, especially noise from heavy equipment when constructing the road through towns and shopping centers.
 - Special care should be taken where the construction site is near to sensitive receptors such as schools and hospitals
 - Ensure that construction equipment is operating optimally and with operational noise mufflers where possible.
- Health and safety**
- Road construction workers should be informed about diseases that are prevalent in the project area, and how they can minimize their exposure and transmission.
 - Mount regular HIV-AIDS awareness campaigns. Condoms should be made available to construction crews.
 - Contractors should provide workers with sufficient accommodation for married couples to stay together.
 - The Contractors should consider hiring a permanent nurse to attend to emergencies and to mount awareness campaigns amongst the workers.
 - Health service providers should be regularly consulted to determine any changes in disease patterns that may be associated with road construction.
 - The implementing agency will have to regularly discuss with their counterparts any health implications of on-going road construction.
 - Access roads for haulage trucks used during road construction should not be located near schools, hospitals and residential areas.
 - Provide warning to shop owners and other commercial businesses close to the proposed road at least two weeks before use of heavy equipment near their premises.
 - Install appropriate signs at road diversions, and these should be reflect able
- Road safety issues**
- Design and construction of rumble strips, speed bumps and erection of

appropriate warning signs

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED "TWO RIVERS DEVELOPMENT PROJECT" ON L.R. NO. 22/360, NAIROBI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed "Two Rivers Development Project".

The intended development will comprise several spatial land use patterns which will include medium and high density residential, commercial nodes, offices, institutional structures, tourism and support infrastructure such as sewerage, water, motorways and recreational centers. Other proposed constructions will include a 5 star hotel and a shopping mall.

The reference plot targeted for development for the proposed "Two Rivers Development Project" is on the property identified has L.R No. 22/360 which is part of the vast Closeburn estate neighboring the Northern bypass to the North and Limuru Road to the South. Specifically it is bordered by Ruaka River to the immediate west then Rosslyn estate, Runda estate to the South and South east, respectively. The northern bypass forms the northern boundary while Ruaka Township is found further in the North West.

The following are the anticipated impacts and proposed mitigation measures:

<i>Anticipated Environmental Impacts</i>	<i>Mitigation Measures</i>
Soil erosion and compaction	<ul style="list-style-type: none"> • Control earthworks. • Install appropriate drainage structures. • Install sediment traps. • Ensure management of soil extraction activities. • Designate a main access route for heavy machinery.
Air and dust pollution	<ul style="list-style-type: none"> • Stockpiles of earth be sprayed with water or covered during dry seasons. • Material trucks hauling soil, sand, and other loose materials should be covered

	during delivery to the site.
	<ul style="list-style-type: none"> • Provide dust masks for the personnel in dusty areas. • Sensitize construction workers. • Spray stock piles of earth with water. • Avoid pouring dust materials from elevated areas to the ground. • Provide dust screens where necessary. • Maintain vehicles, while machines must not be left idling.
Noise and excessive vibration	<ul style="list-style-type: none"> • Sensitize workforce including drivers of construction vehicles. • Place signs to indicate construction activities. • Use silenced machinery and instruments. • Workers in the vicinity of high level noise to wear safety and protective gear. • Employ temporary noise barriers.
Loss of vegetation and or habitat for wildlife	<ul style="list-style-type: none"> • Conduct planned vegetation clearance and re-vegetation and retain trees of high cultural value. • Reserve the wetland and establish a buffer zone around the wetland.
Fire outbreak	<ul style="list-style-type: none"> • The proponent to ensure that the completed facilities are fitted with safety equipments including fire fighting equipments and fire exits. • Install smoke detectors in various premises. • Put fire extinguishers at strategic sites during construction, operation and decommissioning. • Ensure adequate water stocks and operational pressures for firefighting during operation. • Post warning 'NO SMOKING' signs at fire prone areas. • Mount safety signs to indicate the emergency exits, restricted areas and assembly points.
Increased water and energy consumption	<ul style="list-style-type: none"> • Put off electric machines when not in use. • Use high energy saving bulbs and systems. • Install water storage tanks. • Promote rain water harvesting and maximizing on water recycling techniques. • Install automatic water conserving taps and toilets.
Solid waste generation	<ul style="list-style-type: none"> • Provide garbage receptacles. • Apply an integrated solid waste management approach (reduce, recycle, combustion and sanitary landfilling). • All refuse generated should be properly transported and disposed. • Provide private waste collection and disposal services.
Occupational health and safety	<ul style="list-style-type: none"> • Ensure proper solid disposal and collection facilities.

- Ensure dustbin cubicles are protected from animals, rains and are well covered.
- Provide all employees with suitable safety and protective gears.
- Ensure proper disposal of waste water.
- Ensure that all machinery used on the site is properly maintained and inspected before use.
- Place warning signs for hazardous or flammable substances.
- Ensure chemicals are stored safely and MSDS are made available.
- Ensure full compliance to the Occupational Health and Safety Act of 2007.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839 - 00200, Nairobi.

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed LPG bulk storage and filling depot.

The proposed project entails construction of modern, medium size LPG storage and filling plant in Kisumu.

The project site is located in Kisumu North District in Nyahera Division, at Kanyakwar Sub-location, East Kisumu Location. It lies within 0° 60' 0" South, 34° 45' 0" East coordinates. The proponent purchased about ten plots at Kanyakwar viz Kisumu/Kanyakwar B/17/675 – 685. The plot is located on the Kisumu Vihiga highway opposite the new Mosque and Farm Engineering.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Soil erosion and sedimentation	<ul style="list-style-type: none"> • Installation of soil traps on lower edges. • Installation of traps for stored loose construction materials such as sand.
Water pollution and quality	<ul style="list-style-type: none"> • Water sprinkler system. • Ensure effective drainage into the septic tank. • Regular maintenance checks on drainage system. • Roof catchments installed. • Installation of water saving tap models. • Install 200m³ liters water tank.
Dust	<ul style="list-style-type: none"> • Regular watering of access routes to reduce dust. • Provision of dust masks to workers.
Emissions	<ul style="list-style-type: none"> • Use of mufflers on heavy equipment and vehicles. • Reduction in use of machinery to necessary requirement only. • Regular check of gas leak detection system, pipeline seams, pneumatic cut off system and remote operating valves for automatic cut-off of the system to curb greenhouse gas emissions.
Noise	<ul style="list-style-type: none"> • Operation during daylight hours only. • Provision of ear muffs to site workers. • Construction of high perimeter wall around the site.
Biodiversity-devegetation	<ul style="list-style-type: none"> • Minimal excavation. • Devegetation of bare areas. • Planting indigenous trees.
Solid waste disposal	<ul style="list-style-type: none"> • Ensure appropriate waste baskets available in offices. • Outsource a NEMA registered waste disposal agent to collect and dispose of solid waste.
Social concerns	<ul style="list-style-type: none"> • Fencing off the project site and limiting movement and attraction of unwanted characters during construction. • Constant body search of visitors for combustible substances i.e. mobile phones, matchboxes, lighters, etc. • Outsourcing for security personnel.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839 - 00200, Nairobi.

FOR THE PROPOSED TET TEA FACTORY, KIMULOT DIVISION
OF KONON WEST DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed TET Tea Factory.

The project comprises construction of a single line CTC factory with a provision for future expansion, administration block, parking area, installation of underground fuel tanks, overhead water tanks and other associated civil works (waste and storm water, and water reticulation drainages).

The proposed TET Tea factory is located at Kimulot location, Kimulot Division of Konon West District. It neighbours George Williamson Tea Co, the defunct Koruma Estate which is under the jurisdiction and management of Unilever Tea Ltd at the North, and at the south is Kimulot trading centre. The project site is accessible through a murrum road 12 km connecting the highway (Konon -Sotik road).

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Noise	<ul style="list-style-type: none"> • Buffering materials
Effluent discharge	<ul style="list-style-type: none"> • Artificial wetlands
Dust	<ul style="list-style-type: none"> • Install dust absorbers

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MRIMA HILL NIOBIUM AND ASSOCIATED RARE EARTHS MINING PROJECT IN MSAMBWENI DISTRICT, COAST PROVINCE

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed Mrima Hill Niobium and Associated Rare Earths Mining Project.

The proposed project entails establishment of a Niobium Concentrate Plant on a suitable site within 20km of Mrima Hill. The main components of the proposed project will include on-site mining, access roads, related infrastructures, off-site concentration plant, construction workers compound, and waste tailings dam.

Mrima Hill is situated at around latitude 4°29'S, longitude 39°15'E in Msambweni Constituency of Kwale District on the coastal plain of Kenya, approximately 65km southwest of Mombasa.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation Measures

- | | |
|--|---|
| Destruction of natural forest areas | <ul style="list-style-type: none"> • During preparation of the site and associated infrastructure the actions taken will ensure the future rehabilitation and possible enhancement of the vegetation of Mrima Hill Forest Reserve • Topsoil removed during site preparation activities should be retained for future use during restoration of the forest area. |
| Noise Pollution | <ul style="list-style-type: none"> • Control movement of construction vehicles. • Provide "parking" areas for vehicles not being used at any one time; • Installation of natural barriers at facility boundaries; • Optimisation of internal traffic routing – particularly to minimize vehicle reversing needs (reversing alarm) and to maximize distances to the closest sensitive receptors but also minimizing land-clearing for transport routes. • Plant to comply with WB/IFC noise limits; • All equipment to be equipped with silencers or with lagging or specially designed acoustic enclosures; • Baseline surveys will be undertaken at the proposed site boundaries to determine and nearest sensitive receptors to benchmark the existing acoustic levels prior to construction |
| Groundwater contamination by oil, grease, and fuel in equipment areas | <ul style="list-style-type: none"> • Efficient oil and grease traps installed at refueling stations, workshops, fuel storage depots and containment areas etc; • Control collection and recycling of lubricants; • Toolbox talks (in the colloquial language) to avoid accidental spills and emergency response measures in the case of an accidents |
| Open borrow pits resulting in negative visual impact and potentially a safety hazard | <ul style="list-style-type: none"> • Install safety barriers in high-risk locations; • Rehabilitate borrow pits to original landscape; • Signage in hazardous and risky areas; • Good communication with all staff working on the site; • Ensuring that communities in vicinity of Mrima Hill do not have access to the mine (apart from those members of the community employed by the mine |
| Risk to health and safety of employees | <ul style="list-style-type: none"> • Ensure all employees provided with PPE – hard hats, gloves, and steel-toed boots. • Use of contrasting coloring on equipment/machinery including all |

- reflective markings to enhance visibility;
 - Ensure all workers are aware of emergency procedures and attend an initial site induction followed by regular site toolbox talks.
 - Ensure all employees have safety gear – hard hats, gloves, and steel-toed boots.
 - Use of contrasting colouring on equipment/machinery including all reflective markings to enhance visibility;
 - Ensure all workers know emergency procedures in place in case of accidents.
 - Implement a comprehensive safety and environmental management system.
 - Truck routing away from schools and pedestrian routes.
- Depletion of natural water sources
- Establish a water balance for the process plant and use this to inform infrastructure design;
 - Reuse, recycling and the treatment of process water, where feasible;
 - Develop a Sustainable Water Supply Management Plan by managing water use, avoiding depletion of sources and minimizing impacts to water users;
 - Build a dam to collect rainfall.
- Impact on terrestrial environment
- Storage of topsoil to be used for restoration;
 - Efficient planning of access routes and infrastructure to reduce land clearance requirements;
 - Planning in response to environmental sensitivities and habitats/species.
- Light pollution
- Minimize light pollution outside the boundaries of the facilities to prevent light spill.
 - Down-lighting preferable to minimize impact on birds and fauna in the nearby forest.
 - Security lighting to be installed for safety requirements to meet relevant regulations.
- Waste Management
- Waste areas/dumps should be planned with height specifications based on the nature of the material and local geotechnical considerations to minimize erosion and reduce safety risks;
 - Consider potential change of geotechnical properties in dumps.
 - Tailings management strategies vary according to site constraints and the nature/type of the tailing.
 - Seepage management should be a key consideration in design of tailings storage facilities.
 - Natural or synthetic liners to minimize risk of groundwater contamination.
 - Design in accordance with flood events;

- Non-hazardous wastes should be collected for recycling or disposal at an approved landfill;
- Specialized providers should handle hazardous waste.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839 - 00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi
- (c) Provincial Director of Environment, Coast Province.
- (d) District Environmental Officer, Kwale District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
