THE NATIONAL ENVIRONMENT MANAGEMENT
AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED ICT CENTRE, UNIVERSITY LIBRARY,
LABORATORY, LECTURE AND THEATRE ROOMS BY KISII
UNIVERSITY COLLEGE ON PLOT L.R. BLOCK 11/100 & 110,
KISII

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental

Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed ICT Centre, University Library, Laboratory, Lecture and Theatre rooms.

The university is putting up ICT Centre, university library, laboratory, lecture and theatre rooms, and student's hostels within her compound.

The projects are located within the Kisii University College compound blocks 11/100 & 110. Kisii University College is a constituent college of Egerton University located in Kisii County, 2Kms from Kisii Town Central Business District, Kisii Municipality, off Kisii-Kilgoris Road.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Suggested Mitigation Measure

Soil erosion and compaction	<ul style="list-style-type: none"> The contractor will provide adequate soil conservation structures to ensure that areas prone to soil erosion are protected from runoff. Areas susceptible to erosion shall be properly sloped and compacted to reduce the effect of runoff, and shall be seeded immediately. Rehabilitation of exposed sites as soon as practicable. The site preparation activity should be scheduled. Re-plant degraded areas with local species common in the area to complement natural vegetation regeneration to improve ground cover.
Occupational health and safety	<ul style="list-style-type: none"> Workers will be provided with adequate Personal Protective Equipment during the construction phase, these will include safety boots, overalls, helmets, goggles and earmuffs. Workers will also be provided with safety harnesses and proper secure equipment for scaling heights. Workers will be provided with a well stocked first aid box, which will be replenished at all times and managed by trained first aiders. Sensitize workers on occupational health and safety. Adequate sanitary facilities will be provided with proper segregation for both genders where applicable. Fencing off the entire construction site.
Air and dust pollution	<ul style="list-style-type: none"> The contractor to protect stockpiles of friable material subject to wind-throw by wetting, or with barrier or windscreen. Restrict speed on loose surface roads during dry or dusty conditions; incidence Suppress dust during dry periods by use of water sprays. Maintain equipment in good running condition-no vehicle to be used that generates excessive black smoke. Enforce vehicle load restrictions to avoid excess emissions from engine overloading. The contractor shall institute appropriate measures to minimize or avoid air quality impacts. This can be achieved through formulation of air quality management plan. The contractor to minimize/control

Noise pollution and excessive vibration

Increase in solid waste

Effluent disposal

Security traffic movement for construction vehicles

Water resources and water quality

emission of dust due to traffic movement and erosion of stockpile material and exposed soil.

- The contractor to ensure that all equipment used and all facilities erected on site are designed and operated to control the emission of smoke, dust, fumes and any other air impurity into the atmosphere.
- The contractor shall comply with the legal requirements for the managements of the noise impact specified in the recently gazetted noise quality regulations.
- The contractor shall formulate noise management plan for minimizing the generation of noise and vibration from construction activities occurring on site and its impact on surrounding residents, businesses and workers.
- All internal combustion equipment will have properly functioning silencers or mufflers.
- Neighbours to the site to be notified about the construction schedule and activities, including blasting, should it be required.
- Restriction of construction activities to daytime only.
- Proponent will use an integrated solid waste management system by source reduction, recycling, composting, reuse or sanitary land filling.
- The proponent will ensure that debris is collected by a NEMA approved waste handlers.
- There will be a central collection point for waste generated preferably with segregation of the same.
- The proponent will provide or construct proper waste receptacles to avoid littering.
- The proponent will connect to Gusii Water and Sanitation Company trunks passing through the campus
- The proponent will ensure that the materials used for construction are of the right standards as per the building code.
- The proponent will ensure that there are routine checks for the sewer lines to ensure that there are no leakages.
- The proponent will ensure that guards are available and proper intrusion surveillance equipments are installed and are working all the times.
- The proponent will ensure that there is adequate lighting in all areas and risk assessment is done regularly to identify any new threats.
- The proponent will ensure the neighbours are informed through signage about irregular movements and guards to be used to direct traffic within the campus and the access road
- Measures shall be instituted to minimize erosion and sediment transport, especially during construction activities.
- These measures should include: limiting areas cleared of vegetation, stabilizing the soils on the sloppy areas with stone

pitching and planting of grass.

- Remedial measures shall be implemented by the Contractor in the event of erosion resulting in the sedimentation of surrounding areas after due consideration of the costs and benefits of such removal activity
- Infrastructure shall be designed to ensure that contaminated run-off does not reach watercourses
- In the event of an oil spill the procedures contained in the emergency response plan will come into effect.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.
- (c) Provincial Director of Environment, Nyanza Province.
- (c) District Environment, Office, Kisii District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED EXPLORATORY DRILLING ON (BLOCKS L-5, 7, L-11A, L-11B AND L-12) IN LAMU BASIN OFFSHORE, KENYA

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed exploratory drilling on (Blocks L-5, 7, L-11A, L-11B and L-12) in Lamu basin offshore, Kenya.

The Proponent (Anadarko Kenya Company) is proposing to perform drilling to explore for commercial hydrocarbon resources in waters offshore Kenya.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Potential impact to sensitive marine fauna, fishing or tourism from accidental releases of liquid such as drilling fluid or fuel	<ul style="list-style-type: none"> • Ensure drilling fluid additives and other liquids (e.g., paint and solvent) are securely stored and managed to help prevent releases into the marine environment. • Be ready to implement oil spill and emergency response procedures for accidental bunkering/refueling incidents. • Avoid refueling/bunkering at sea during periods of rough weather or limited visibility conditions. • Adhere to standard operating

Degradation of marine water quality from accidental releases of oil (loss of well control)

procedures during refueling to minimize incidents.

- Ensure that refueling hoses and check valves are in a good working condition prior to usage.
- Ensure that all personnel involved in the drilling operation are highly trained and familiar with deepwater drilling operating standards, techniques, equipment operation and maintenance, testing, monitoring and other procedures recognized across the industry as necessary to manage and contain pressures within limits that ensure a safe and environmentally sound well.
- Tailor oil spill response preparations to consider the results of oil spill trajectory models and sensitive areas along the shoreline that may potentially be impacted by an accidental release of oil.
- Maintain contract with Oil Spill Response Limited (OSRL) for support in responding to any potential Tier 2 and 3 spills that require outside support.
- Identify extreme weather patterns or other natural hazards that could impact the area and include planning for such events in the emergency response plan.
- Review potential spill trajectories and spill response plans with the project team and appropriate crew members prior to start-up of drilling activities.
- Notify local officials before drilling commences and maintain communication throughout the project, as appropriate.
- Communicate with local port, marine navigation and fishing authorities in advance of drilling activities to make aware of location and schedule of the proposed drilling program and to establish a reliable means of communication between the drillship captain, government marine authorities and sea users during the drilling program.
- Consider trans-boundary oil spill planning in the ERP/OSCP.
- Ensure that all personnel involved in the drilling operation are highly trained and familiar with deepwater drilling operating standards, techniques, equipment operation and maintenance, testing, monitoring and other procedures recognized across the industry as necessary to manage and contain pressures within limits that ensure a safe and environmentally sound well.

- Maintain contract with Oil Spill Response Limited (OSRL) for support in responding to any potential Tier 2 and 3 spills that require outside support.
- Identify extreme weather patterns or

Potential impacts to marine water quality, marine fauna, coastal resources, fishing or tourism from an accidental release of oil

other natural hazards that could impact the area and include planning for such events in the emergency response plan.

- Review potential spill trajectories and spill response plans with the project team and appropriate crew members prior to start-up of drilling activities.
 - Notify local officials before drilling commences and maintain communication throughout the project, as appropriate.
 - Communicate with local port, marine navigation and fishing authorities in advance of drilling activities to make aware of location and schedule of the proposed drilling program and to establish a reliable means of communication between the drillship captain, government marine authorities and sea users during the drilling program.
 - Consider trans-boundary oil spill planning in the ERP/OSCP.
- Potential damage to subsea telecommunications infrastructure
- Review locations of subsea cables in relation to proposed drill sites prior to Mobilization and modify well locations if needed.
 - Perform pre-drill visual inspection of seabed at proposed well sites using submersible, remotely operated vehicle (ROV).
- Potential damage to sensitive marine fauna from contact with hull or propeller
- Reduce speeds when a whale or sea turtle is sighted and alter course to maintain a 500m separation.
 - No head on approach of marine mammals within 500m.
 - Post a look out if within 500m of a whale if sighted by vessel captain or crew.

The full report of the proposed project is available for inspection during working hours at:

FOR THE PROPOSED PETROL STATION ON PLOT L.R. NO.
KASPUL/KASIMBA/537 OYUGIS TOWN, HOMA BAY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental

Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed Petrol Station on L.R. No. Kaspul/Kasimba/537 Oyugis town, Homa Bay County.

The Proponent (National Oil Corporation of Kenya Limited) of the proposed Petrol Station is proposing to carry on construction of proposed Petrol Station at Oyugis Town in Homa Bay County. The project involves the construction of Canopy over the pumps, Sales office, a store, installation of Underground fuel tanks, Compressor/generator, Tyre centre and car wash, Drive ways, walkways, acceleration and deceleration lanes, Interceptor Tank and washrooms.

The following are the anticipated impacts and proposed mitigation measures:

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed MDS Container Petrol Service Station on plot L.R. No. Kiine/Rukanga/1493 (part – ¼ acre) at Makutano - Mwea, in Kirinyaga County.

The Proponent (National Oil Corporation of Kenya Limited) of the proposed Petrol Service Station is proposing to carry on installation of a mobile dispensing station (MDS). The MDS comprises of inbuilt dispensing units for PMS and AGO. It will comprise of; 5 dispensing pumps (2 for PMS and 3 for AGO), underground storage tanks, a canopy, tire centre, office block (lubricants shop). The proposed project is designed in line with other similar projects (petrol stations) that have been constructed by National Oil Corporation of Kenya throughout the country.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED DRILLING OF EIGHTY (80)
GEOTHERMAL STEAM PRODUCTION WELLS FOR
EXPANSION OF ELECTRICITY POWER GENERATION AT
GREATER OL KARIA GEOTHERMAL FIELD IN NAIVASHA
DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed drilling of eighty (80) geothermal steam production wells for expansion of electricity power generation at greater Olkaria geothermal field in Naivasha district.

The Proponent (Kenya Electricity Generating Company Ltd (KenGen)) is proposing to drill a total of 80 geothermal production wells in Olkaria area of Naivasha district. The objective of the proposed project is to adequately harness steam that will be used for the generation of 560MWe of geothermal energy in line with vision 2030.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Land acquisition	<ul style="list-style-type: none"> Negotiate and purchase land from the affected land owners
Soil erosion	<ul style="list-style-type: none"> 3 wells are drilled on one pad to minimize area required Compact cleared areas to avoid wind erosion Rehabilitate all degraded areas Build gabions where gully's
Increase in water abstraction from Lake Naivasha	<ul style="list-style-type: none"> Geothermal fluids will be used for drilling Containment of geothermal fluids to control surface runoff getting into water ways Reinjection geothermal fluids into the wells
Air quality	<ul style="list-style-type: none"> Monitor H₂S and dust levels and sprinkle exposed earth surfaces Maintain drilling machinery, equipment and vehicles used at optimal working conditions Monitor precipitation chemistry Speed limits of 40Km/hr to be imposed and drivers sensitized
Noise	<ul style="list-style-type: none"> Maintain drilling machinery, equipment and vehicles used at optimal working conditions Monitor noise levels Sensitize staff working in areas of high noise levels Erect warning signs in areas with high noise levels Provide staff working in excessive noise (above 45dba) and visitors with appropriate PPES
Waste effluent	<ul style="list-style-type: none"> Monitor waste brine and other discharges quality Re-inject all brine discharges

Accidental oil spills	<ul style="list-style-type: none"> Contain effluents and waste brine sumps to allow see page Prepare plans and procedures for proper storage and handling of oil products Plants and equipment should be maintained in optimal working conditions to avoid leakages Bund oil and lubricants storage area and Cover outdoor storage sites Deploy drip trays while servicing machines and equipment Line oil store floors with appropriate material and any drains should go to an oil interceptor
Drilling chemicals	<ul style="list-style-type: none"> Provide and enforce strict use of procedures and material safety data sheets for handling process chemicals Formulate emergency response plans and procedures just in case of a chemical spill Chemicals should be stored in appropriate stores and with cover
Source of Construction Materials can degrade environment in other areas	<ul style="list-style-type: none"> Specify required standard for all materials and appliances Verify source of all construction materials Quarries for raw materials for access roads should be NEMA licensed Raw materials that can be supplied by locals should be contracted to locals in the area
Solid waste generation from the construction and workers	<ul style="list-style-type: none"> All waste generated by the project should be disposed off as per EMCA 1999 (waste management regulations) Waste should be segregated, transported in permitted vehicles and disposed off in NEMA licensed sites Construction waste that can be re-used for landscaping and gabions making
Biological and physical environment	<ul style="list-style-type: none"> Ensure only the minimal required areas are cleared of vegetation Only vegetation indigenous to the area should be used for rehabilitation works Rehabilitate all the degraded areas Sensitize workers against destruction of vegetation, cutting of trees and poaching
Visual intrusion and aesthetics	<ul style="list-style-type: none"> Use colors that blend with the local environment for equipment and pipelines Re-vegetate areas that had been cleared of vegetation
Public nuisance	<ul style="list-style-type: none"> Minimize air pollution with measures earlier proposed Notify the public through local community leaders of possible disturbance during construction Erect warning signs Create a complaints register
Occupational health and safety	<ul style="list-style-type: none"> Prepare safety and emergency plans and procedures Test safety and emergency plans regularly Ensure compliance with codes of practice, ordinances, laws, regulations and union agreements Provide appropriate PPE'S and enforce use by workers

- Public Health and Safety**
- Reduce dust emission levels through regular watering of cleared areas
 - Conduct awareness on sexually transmitted diseases such as HIV/AIDS
 - Provide standard facilities for solid waste and sanitation
 - Provide workforce with wholesome drinking water
 - Monitor quality of water, air and noise levels

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED PETROLEUM SERVICES STATION ON LR NO. MN/II/ 9874 AND 9875, IN MISHOMORONI ALONG MWAKIRUNGE ROAD MOMBASA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed construction of petroleum services station on plot no MN/II/ 9874 and 9875, in Mishomoroni along Mwakirunge road in Mombasa County.

The Proponent (Ali M. Mbogo and Yumna F. Ahmed) of the proposed construction of petroleum services station on plot no MN/II/ 9874 and 9875, in Mishomoroni along Mwakirunge road in Mombasa County.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Soil disturbance and pollution	<ul style="list-style-type: none"> • Excavation only at areas of construction and pave open spaces to reduce erosion. • Ensure vehicles delivering materials and machines are in good condition- no leaks. • Part of the excavation material will be used for landscaping and beautifying the project site • The UST need to be pressure tested • Leak detection system needs to be installed with automatic cut-off with pressure drop

- Water Pollution**
- Contain packaging of building materials of new equipment installed
 - The location and standards of the septic tanks and soak pit will conform to the requirements.
 - Construct oil interceptor with carefully calculated volumes and established flow rates.
 - Refrain from realising any demolition waste into the environment
 - allocate segregated & covered garbage bins
- Biodiversity**
- Use durable materials to reduce waste.
 - Ensure that garbage bins are labeled and covered, strategically placed for ease in collection by reputable handler.
- Air pollution**
- Ensure the vehicle engines are in good condition to reduce levels of exhaust gases
 - Water sprinkling to reduce dust
 - Vapour recovery system to be installed in the breathers to prevent discharge of fuel fumes into the environment.
 - Use environmentally clean fuels.
- Noise pollution**
- Construction during daylight hours
 - Drive vehicles into the site without undue noise (hooting).

proposed Edible Oil Refinery and Fraction Packing Shortening and Soap Plant on LR No 12648/8 in Athi River, Mavoko Municipality.

The Proponent (Golden Africa Kenya Limited) is proposing to carry on construction of an Edible Oil Refining, fraction packing, shortening, and Soap manufacturing plant on LR No. 12648/8 in Athi River, Mavoko Municipality. The proponent is proposing to import edible oils from abroad and process them systematically. The processed oils will be fraction packed at the facility, part of which will be used in the manufacturing of soap products.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact Mitigation measures

Loss of vegetation cover	<ul style="list-style-type: none"> • Introduction of vegetation (trees, shrubs and grass) on open spaces and around the project site and their maintenance. • Design and implement an appropriate landscaping programme to help in re-vegetation of part of the project area after construction. • Limiting vehicular transport to defined roads as to prevent unnecessary injury, habitat destruction and complying with safe driving procedures; • Ensure proper demarcation and delineation of the project area to be affected by construction works;
Disturbance and related impacts to Wild life	<ul style="list-style-type: none"> • Design with a view to incorporating nature conservation into the development including appropriate friendly boundary fencing • Retain existing habitats where possible and aim to keep natural site features in context rather than in isolated fragments. • Preserve wildlife corridors and habitat links • Integrating ecological features, for example climbing plants and bird nest boxes within any buildings or structures. • Game hunting and killing is not permitted; • Compliance with the ecological requirements and any other legal requirements with regard to waste management, environmental pollution and discharge to waters among others; • Replacement of lost habitat where possible • Ensure that landscape design reflects local ecology and uses locally sourced plants wherever possible;
Emissions of air pollutants	<ul style="list-style-type: none"> • Using environmentally friendly equipment with higher fuel efficiency or equipped with air pollution control devices to minimize exhaust emissions • Avoiding equipment and vehicles running unnecessarily • Watering-down dusty work areas • Establishing and enforcing appropriate speed limits over all unpaved surfaces • All personnel working on the project will be trained prior to starting construction on methods for minimizing air quality impacts during construction • Ensure construction machinery and equipment are well maintained to reduce exhaust gas emissions
Pollution from Hazardous waste	<ul style="list-style-type: none"> • Handling of the materials in line with the material safety data provided by the manufacturers

Increased Noise and vibrations

Pollution of surface and ground water

Energy loss, wastage and resultant pollution

Traffic nuisance

- Appoint a safety officer to ensure that proper disposal guidelines are observed
- Ensuring that maintenance and/or piece of work carried out on any piece of equipment or construction work is undertaken by qualified personnel
- In case of spillage emergency spillage control measures to be instituted
- Containerization of any wastes and disposal through a licensed waste handler
- Use of equipment designed with noise control elements will be adopted where necessary.
- Trucks used at construction site shall be routed away from noise sensitive areas where feasible.
- Idling time for pick-up trucks and other small equipment will be minimized.
- All workers operating in noisy areas or operating noisy equipment will be provided with earpieces to protect against noise.
- Utilise sustainable waste management facilities including a packaged waste water treatment plant with the capacity to recycle all of the water utilised on site;
- Identify high risk spill areas- e.g. generators and fuel tanks – and have impervious surfaces and capture facilities in place;
- Clean up spills if any with an absorbent material. Chemicals spilled near wells can move directly and rapidly into groundwater. Chemicals spilled near ditches or streams can move rapidly into surface water;
- Develop a spill response and emergency response plan covering aspects of water management and conservation;
- Selecting properly the location of mixing areas and loading of chemicals and other construction materials;
- Ensure an appropriate storage of equipment.
- Efficient work scheduling and methods that minimise equipment idle time and double handling of material;
- Throttling down and switching off construction equipment when not in use;
- Switching off truck engines while they are waiting to access the site and while they are waiting to be loaded and unloaded;
- Switching off site office equipment and lights and using optimum lighting intensity for security and safety purposes;
- Careful design of temporary roads and traffic routing to reduce transportation distances; and
- Regular maintenance of equipment to ensure optimum operations and fuel efficiency.
- In consultation with neighbouring road users and the appropriate authorities identify an acceptable access to and from site into the highway;
- Maintain the access service road to the standard required to carry the load and volume of traffic;

- Enforce strict restrictions on the speed at which the trucks are allowed to travel and the hours of operations;
 - Where necessary implement stop/go zones which will allow a single truck to pass at a time;
 - Clear signage on the roads;
 - Education of staff and building contractors;
 - Take advantage of off-peak hours; and
 - Well trained and experienced drivers with documented evidence of training and refresher courses.
- Health and safety concerns
- Undertake Job Risk Assessment and Review of each task;
 - Put in place an Emergency Response Plan;
 - A comprehensive contingency plan will be prepared before construction begins, on accident response;
 - Develop and Traffic Management Plan prior to commencement of construction.
 - All employees will be required to wear protective gear when handling hazardous wastes;
 - All workers will be adequately insured against unforeseen accidents.
- Generation of solid waste
- Wastes to be collected regularly to control air pollution and vermin infestation;
 - Receptacles will be provided for waste storage prior to collection;
 - Resource recovery will be encouraged once the project takes off so as to shrink waste stream and recover non-recyclables;
 - Refuse collection vehicles will be covered to prevent scatter of wastes by wind;
 - Wastes will be collected by a licensed operator to avoid illegal final dumping at unauthorized sites;
 - All persons involved in refuse collection shall be in full protective attire; and
 - As provided for by the Building Code, a temporary latrine will be provided on site to be used by construction workers
- Waste water generation and effluents discharge
- Recycle the wastewater for flushing (where practical);
 - Reuse the wastewater (generally after treatment) for a beneficial purpose (either onsite or on a neighbouring property) such as dust control;
 - Treat and discharge wastewater to soakage or lined evaporation pit (where practical);
 - Treat and discharge to drains or watercourses;;
 - Implement seasonal water use limitations; and
 - Pursue options of recycling, and water harvesting.
- Extraction materials and depletion
- Source building materials from local suppliers who use environmentally friendly processes in their operations and are certified;
 - Ensure accurate budgeting and

estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered; and

- Ensure that damage or loss of materials at the construction site is kept minimal through proper storage.
- Sensitization staff working on the project on dangers of free lifestyle
- HIV/AIDS awareness training for all employees and subcontractors.
- Provide facilities including condoms and checkups for staff

Social impacts, welfare and increase in STI infections

The full report of the proposed project is available for inspection during working hours at:

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
