THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED CONSTRUCTION OF A MORTUARY ON PLOT KAMRERI/KSAGUNGA/136 MBITA DIVISION, MBITA DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed the above project.

The proponent, intends to construct an 8 roomed mortuary comprising of a body receiving area, a showering area, embalming room, body parking room, a cashier, office and staff storage area, and

outside a car park and a waiting area in Kamreri/Ksagunga/136 Mbita Division, Mbita District.

The following are the anticipated impacts and proposed mitigation measures:

Impact /Issue	Mitigation
Biomedical waste	<ul style="list-style-type: none"> The proponent shall seek approval from appropriate lead agencies and Local Authority. All biomedical waste shall be securely packaged in biohazard containers which shall be labeled with the symbol set out in part I ands II of the schedule (attached). The proponent shall ensure that the biomedical waste is not stored a above 0° c for more than seven days without the written approval of the relevant lead agencies , provide that untreated pathological waste shall be disposed of within 48 hours . Proponent shall construct an autoclave to comply with the standards set out in the Environmental Management and Co-ordination (Waste Management) Regulation, 2006. The proponent shall not transfer biomedical wastes without valid permit issued out by NEMA in consultation with relevant lead agencies. The proponent shall comply with all statutory requirement and the Environmental Management and Co-ordination (Waste Management Regulation, 2006) throughout the project cycle. All biomedical wastes produced before the installation of a class 2B incinerator will be transported using licensed mode of transport to the licensed incinerators.
Air quality	<ul style="list-style-type: none"> The proponent shall install Class 2B incinerator for the disposal of hazardous, potential hazardous and biomedical wastes. The incinerator will be sited in accordance with relevant local municipal authority planning scheme, the topography of the area and be compatible with premises in the neighborhood. The staff handling the waste will be well trained on safe handling of hazardous wastes.
Solid a waste	<ul style="list-style-type: none"> Reuse of construction debris will be encouraged. Separate waste appropriately to recover re-usable prior to disposal. A licensed private contractor will be engaged to appropriately dispose of all the solid waste that shall not have been reused on completion of the work. Train workers on risk associated to inhalation of dust and appoint at least one person to ensure proper dressing and waste handling by the workers. Provide workers with appropriate protective gears including nose and mouth mask. Appropriate bill of quantity will be prepared to minimize left over. Reduce the amount of waste generated by accurate budgeting to cutoff on

	<ul style="list-style-type: none"> excess that may expire before use. 	
Liquid waste	<ul style="list-style-type: none"> • Separate waste appropriately to recover re-usable prior to disposal. • Ensure bins are erected appropriately, labeled and regularly being emptied and cleaned. • Engage a licensed private contractor to appropriately dispose of on a regular basis the anticipated solid waste. • Connect to a standard approved septic tank. • Advise workers and patient to only use soft tissue toilets to avoid blockage of sewer. • Tine. • Prompt unblocking and repair of stalled sewer lines. • Channel storm water appropriately to avoid mixing and outburst of sewer. 	
Energy loss	<ul style="list-style-type: none"> • Install an energy efficient lighting system in the building. • Maximize on use of natural light during the day. • Switch off all light and equipment when not in use. • Use of energy efficient cooking stoves and gadgets to conserve energy. • Purchase essential items in bulk to cut on the number of trips to stockers. 	
Water loss	<ul style="list-style-type: none"> • Install water conserving automatic taps, shower heads and toilets. • Harvest rain water from roof in an elevated tank and use it in flushing toilets. • Store adequate amount of water from the municipal supply. • Promptly fix damaged /leaking pipes, faulty taps and associated facility within the building. • Sensitize worker and patient on need for efficient utilization of scarce water resources. 	
Fire hazard and insecurity	<ul style="list-style-type: none"> • Install firefighting equipments at convenient locations within the premise. • Train employees on precautionary measures to avoid fire accidents. • Fix damaged electrical systems and gadgets promptly. • Proper supervisions should be ensured in the kitchen to avoid open fire. • Fire disaster evacuation plan posters to be developed and posted appropriately. • Insure that the site is always guarded by a reputable security firm. • Constant site patrol. • Collaboration with existing security machinery. • Partnership with neighbors and police in community policing. 	<ul style="list-style-type: none"> • Compliance to the environmental management and coordination (noise and excessive vibration pollutions control) Regulations, 2009. Legal Notice No. 61, 2009. • Minimize long hours of exposure. • Excavation activities to be limited between 8 am and 6 p.m. • Use of appropriate cushioning for heavy equipment.
		Occupation accidents
		<ul style="list-style-type: none"> • Ensure warning signs on road safety are erected at appropriate location during excavation and transportation. • Speed limit of transport vehicles to be kept low. • Plan stabilization and evacuation of the injured. • Liaise with the district Occupation Health and Safety department. • Provide for appropriate signage and warning at work site. • Use personal protective equipment (PPE) to workers and any visitors. • Provide for first aid facility as per the OSHA. • Ensure availability of loaded firefighting equipment.
		Dust and air quality
		<ul style="list-style-type: none"> • Dampen work areas materials heaps and mulch bare ground to minimize dust emission. • Maintain equipment and machinery to manufacturer's specifications. • Erect a protective screen around the construction area. • Minimize period of machinery idling.

Vibration and noise	<ul style="list-style-type: none"> • Appropriate dressing of workers which include: earmuffs/plugs. • Maintaining excavation equipment in accordance to manufacturer's specification to ensure efficient operation. • Noise and vibration will be kept at acceptable levels and construction/excavation activities confined to normal working hours. 	

The Proponent (Leonard Mutuku Sesi) is proposing to establish a slaughterhouse with the capacity to handle 100 livestock a day on a 1.5 acre piece of land in Tala Market, Kangundo District, Machakos County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Proposed Mitigation Measures</i>
Dust and Air Pollution	<ul style="list-style-type: none"> Minimal land excavations to be practiced. Sprinkling of water to reduce dust. Workers should wear protective clothing such as dust masks to reduce inhalation. During operation, areas that are heavily trampled upon by livestock should be regularly watered, especially during the dry season.
Soil Erosion	<ul style="list-style-type: none"> Construction of terraces. Planting of vegetation cover. Avoid overstocking of cattle. During operation, areas that are heavily trampled upon by livestock should be regularly watered, to maintain some vegetation cover.
Solid Waste	<ul style="list-style-type: none"> Excavated soils should be placed back where possible after operations. Stones, ballast and sand remains should be used for land reclamation purposes where applicable for example erosion gullies be filled with these materials. The skin should be sold to tanneries for further processing to useful products. The bones should be sold to animal feed manufacturers for use in their industries as a raw material. Some of the bones may be sold to the community members as food for their domestic animals such as dogs. Hooves, horns and bones should be sold to manufacturing industries for use as raw materials e.g. industries that make glue products. Cow dung shall be used as manure. The contents should be moved out the soonest possible.
Liquid Waste	<ul style="list-style-type: none"> Blood will be collected in a blood pit which will be exhausted after some time before it gets filled. Waste water from the floors will be collected into a pit properly designed for the purpose. The water will be emptied from the pit regularly to avoid foul smell within the vicinity.
Insecurity	<ul style="list-style-type: none"> Security officers should be employed to reduce insecurity at the site. Cattle will be confined in an open area for at least six hours before slaughter for any claims. Slaughtering of animals be done during day time for easier identification in case of any claims. Proper fencing of the premise to keep the animals in a defined area.
Visual Impact	<ul style="list-style-type: none"> Planting of a live fence and trees should be done to reduce the visual impact.
Noise Pollution	<ul style="list-style-type: none"> Overstocking should not be done to reduce noise impacts. Construction activities should be limited to day time to prevent disturbances.
Odor	<ul style="list-style-type: none"> Proper sewage treatment facilities and

maintenance be done.

Health and Safety

- Waste from the animals such as dung to be properly disposed of, or be sold to the community as manure.
- Protective clothes for workers.
- Provision of sanitary facilities.
- Training to improve worker awareness.
- Proper animal confinement.
- Proper records of slaughtering and condemnations.
- Construct a suitable condemnation pit for disposal of condemned carcasses.

Underground Pollution

- Water Operations should not interfere with the underground water as noted that the area as a high water table (2m below).
- Construction of soak pit and condemnation pits should be impermeable to prevent seepage into underground water.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED WAA WHALE SHARK SANCTUARY, IN WAA/KWALE COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed project.

The Proponent (SeaQuarium Ltd.) intends to establish whale shark tourism in Kenya while pushing for the conservation of the giant fish by placing two juvenile whale sharks in a sanctuary where visitors will have an opportunity to swim with the whale sharks. It will be implemented along the reef to a minimum water depth of 14 meters depending on the water tide.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Proposed Mitigation Measures</i>
Environmental/marine conservation and community Involvement	<ul style="list-style-type: none"> The proponent should ensure that technical and fiscal capacity of the community is built in conjunction with conservation measures of the marine resources at Waa Location. Women must also be given opportunities to participate on the project. Decision making process being inclusive

	of the community views and wishes in order to make the project suitable.
	<ul style="list-style-type: none"> • Involvement should include but not limited to the following: the Local leaders, the BMU, the Kaya Waa elders, the local County Council Representatives as well as the Imam of the Waa Mosque/community.
Economic development	<ul style="list-style-type: none"> • The project should bring diversification of economic activities in the Waa community.
Research and innovation	<ul style="list-style-type: none"> • An MoU with universities and other research institutions should be put in place to ensure involvement in learning more about the Whale Shark Species. • The MoU should seek to avail the Sea Quarium to researchers from these institutions to undertake joint research projects.
Fatal threat of the whale	<ul style="list-style-type: none"> • The project proponent shall have in its team qualified Marine Biologists and Veterinary Doctors to take care of the welfare of the whale sharks in the enclosure. • The whale sharks should be kept in their normal habitat in the open sea, not in superficial environment. • Regular cleaning incase of any foreign materials at the sanctuary by the visiting persons (student or tourists). • Regulate the materials carried to the sanctuary by the visiting persons (students or tourism).
Safety of the tourists	<ul style="list-style-type: none"> • All PPE used by the participants should be owned and managed by the Sea Quarium. • The project proponent will routinely sanitize all PPE hence mitigate concerns that something undesirable or unsanitary would be exposed to the whale sharks and other marine flora and fauna. • During the pre-dive orientation, safety rules should be carefully explained to the visitors and swimming. • Guests will be instructed to stay together in buddy pairs and to follow the Lead Dive Masters. • The proponent shall prohibit any behavior outside of the instructions such as trying to touch or getting closer to the whale sharks. Such will result in the immediate expulsion of the guest from the seaquarium. • Safety Dive Masters and Lead Dive Masters will carry visual and physical barrier i.e. hard nets for the animals if necessary. • The safety rules will order to avoid inflicting unnecessary stress to the whale shark is completely harmless to humans.
Habitat/migration of the whale shark	<ul style="list-style-type: none"> • Whale sharks are known to be highly mandatory, but their migration patterns are not clearly understood. • The project provides a good avenue for research in migration patterns of the whale sharks as the captured whales will be tagged and released after every six months. • Upon release they should mapped using GPS as they mitigate.
Habitat/communication disturbance	<ul style="list-style-type: none"> • Sharks do not use sound to communicate to each other, however, they do sense sound as pressure through their lateral

system.

- High decibel sounds may negatively impact on the whale sharks and can potentially disrupt normal behaviors such as feeding, mating or migration.
 - Standard operating procedures will be put in place to control noise within the enclosure.
- Skills development
- The proponent shall identify and train youth within the project area on skill sets required for the marine conservation job market. This can be done with partnerships with local institutions such as Mombasa Polytechnic University College and University of Nairobi (Dept. of Marine Conservation Studies- Diani).
 - The proponent shall have guided tours (of university, polytechnic, secondary schools) within its sanctuary to initiate interest among the youth.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

TECHNOLOGY WARD IN KIAMBU MUNICIPALITY, KIAMBU
COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the construction of town houses on plot L.R. No 12825/44 and 12825/50 Kasarini-technology ward in Kiambu, municipality Kiambu County.

The Proponent (MAHA Properties Limited, P.O. Box195-00900, Kiambu) of the proposed project is proposing to construct town houses on plot L.R. No 12825/44 and 12825/50 Kasarini-technology ward in Kiambu, municipality Kiambu County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Expected Negative Impacts</i>	<i>Recommended Mitigation Measures</i>
High demand of raw materials	<ul style="list-style-type: none"> • Source building materials from local suppliers who use environmentally friendly processes in their operations. • Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is

	<p>ordered.</p> <ul style="list-style-type: none"> • Ensure that damage or loss of materials at the construction site is kept minimal through proper storage. • Use of some recycled/refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills. • Specify locations for trailers and equipment, and areas of the site which should be kept free of traffic, equipment, and storage. • Designate access routes and parking within the site. • Introduction of more vegetation (trees, shrubs and grass) on open spaces and their maintenance, especially at the front side of the development • Design and implement an appropriate landscaping program to help in re-vegetation of part of the project area after construction. 	<p>construction materials including cabinets, doors, plumbing and lighting fixtures, marbles and glass will be recovered for refurbishing and use in other projects.</p> <ul style="list-style-type: none"> • Donate recyclable/reusable or residual materials to local community groups, institutions and individual local residents or home owners. • Use of durable, long-lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time • Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure. • Purchase of perishable construction materials such as paints should be done incrementally to ensure reduced spoilage of unused materials • Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste • Use construction materials containing recycled content when possible and in accordance with accepted standards. • Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at the site
Increased storm water, runoff and soil erosion	<ul style="list-style-type: none"> • Roof water to be harvested and stored in underground reservoirs for use in cleaning and in the toilets. The tanks should have a capacity of at least 100, 000litres. To ensure the use of such water for the stated purposes, the building should be fitted with a dual water distribution system • A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure should be designed. • Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. • Ensure that construction vehicles are restricted to existing roads to avoid soil compaction within and around the project site. • Ensure that any compacted areas are ripped to reduce run-off. • Site excavation works to be planned such that a section is completed and rehabilitated before another section begins. • Construction of soil-galleys on sloppy sections. • Open drains all interconnected will be provided on site. • Roof catchments will be used to collect the storm water for some domestic uses e.g. washing of floors and cars 	<p>Dust emission</p> <ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limit regulations • Avoid excavation works in extremely dry weathers if/and when possible • Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles • Personal Protective equipment to be worn <p>Exhaust emission</p> <ul style="list-style-type: none"> • Vehicle idling time shall be minimized • Alternatively fuelled construction equipment shall be used where feasible; equipment shall be properly tuned and maintained • Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas, and to switch off engines at these points <p>Noise and vibration</p> <ul style="list-style-type: none"> • Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. • Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as churches, residential areas and hospitals • Ensure that construction machinery are kept in good condition to reduce noise generation • Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels. • Trees around the site will provide some buffer against noise propagation • The noisy construction works will entirely be planned to be during day
Increased solid waste generation	<ul style="list-style-type: none"> • Use of an integrated solid waste management system i.e. through a hierarchy of options: reduction, sorting, re-use, recycling and proper disposal • Through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual materials. • Ensure that construction materials left over at the end of construction will be used in other projects rather than being disposed of. • Ensure that damaged or wasted 	

- time when most of the neighbors will be at work.
- Ensure planning of transportation of materials to ensure that fossil fuels (diesel, petrol) are not consumed in excessive amounts
 - Monitor energy use during construction and set targets for reduction of energy use.
- Generation wastewater of
- Provision of means for handling sewage generated by construction workers (there are toilets connected to the Nairobi Water and Sewerage Company sewage system on the site)
 - Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies
 - Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated
- Incidents, accidents and dangerous occurrences.
- Ensure that provisions for reporting incidents, accidents and dangerous occurrences during construction using prescribed forms obtainable from the local Occupational Health and Safety Office (OHSO) are in place. Enforcing adherence to safety procedures and preparing contingency plan for accident response in addition to safety education and training shall be emphasized.
 - Ensure that the premises are insured as per statutory requirements (third party and workman's compensation)
 - Develop, document and display prominently an appropriate SHE policy for construction works
 - Provisions must be put in place for the formation of a Health and Safety Committee, in which the employer and the workers are represented
 - Ensure that Suitable, efficient, clean, well-lit and adequate sanitary conveniences have been provided for construction workers
 - Ensure that materials are stored or stacked in such manner as to ensure their stability and prevent any fall or collapse
 - Ensure that items are not stored/stacked against weak walls and partitions
 - All floors, steps, stairs and passages of the premises must be of sound construction and properly maintained
 - Securely fence or cover all openings in floors
 - Ensure that construction workers are not locked up such that they would not escape in case of an emergency
 - All ladders used in construction works must be of good construction and sound material of adequate strength and be properly maintained
 - Design suitable documented emergency preparedness and evacuation procedures to be used during any emergency. Such procedures must be tested at regular intervals
 - Ensure that adequate provisions are in place to immediately stop any operations where there is an imminent

and serious danger to health and safety and to evacuate workers

- Ensure that the most current emergency telephone numbers posters are prominently and strategically displayed within the construction site
- Provide measures to deal with emergencies and accidents including adequate first aid arrangements

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED RELOCATION OF TKL ELDORET AVIATION RE-FUELING SERVICES DEPOT IN ELDORET, UASIN GISHU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the proposed relocation of TKL Eldoret Aviation Re-fueling Services Depot in Eldoret, Uasin Gishu County.

The Proponent (Total Kenya Limited) of the proposed project is proposing to put up an aviation re-fueling services depot within Eldoret, Uasin Gishu County

The following are the anticipated impacts and proposed mitigation measures:

Possible impacts	Proposed mitigation measures
Jet fuel spill risk	<ul style="list-style-type: none"> • Ensure that jet fuel or any other hydrocarbon waste does not spill onto the ground during relocation. • Follow IATA and JIG relocation safety guidelines.
Work injury	<ul style="list-style-type: none"> • All workers to use appropriate PPE and work tools and equipment especially for lifting and relocation of the tanks and any other heavy equipment. • Observe safe work practice and procedures and follow KAA contractor work safety rules and procedures.
Site safety	<ul style="list-style-type: none"> • Disconnect all electrical power supply to the site at the main switch and remove all electrical wiring on site as much as possible. • Ensure no fuel or any other flammable material including waste is left on site at all. Safely dispose all flammable and polluting oily waste according to NEMA

	approved means.		etc.
Public safety and work safety	<ul style="list-style-type: none"> The new site shall be fenced off and out of bounds for unauthorized people. All workers to use proper PPE and work tools and equipment for lifting and relocation. Observe safe work practice and procedures and follow KAA contractor work safety rules and procedures 		<ul style="list-style-type: none"> Earth the aircraft and bowser during refuelling operations. Operators to wear antistatic clothing when in fuel vapour hazard areas. Use only electric equipment and wiring meeting international safety standards (explosion proof) for hazardous areas or as set by KBS.
Occupational health	<ul style="list-style-type: none"> Site to have clean running water including for drinking and proper sanitary facilities for construction workers. Workers to be provided with protective gear for dangerous or hazardous work. Have onsite first aid kit and contractor to make arrangement with the nearest medical facility (KAA) for ambulance service and emergency treatment. Contractor to take Workmen Compensation insurance cover for the works. 		<ul style="list-style-type: none"> All electrical system to be designed, supervised and certified by a professional electrical engineer.
Waste disposal	<ul style="list-style-type: none"> All site waste to be disposed at a site approved by NEMA or KAA and agreed upon with Total management. Excavated soil from the old and new site may be spread in the open airport land. 	Sanitary sewage discharge into the environment	<ul style="list-style-type: none"> All sanitary effluents from the depot to drain into on-site septic tank for proper treatment before discharge into the environment (soak away).
Release of jet fuel from the storage tanks and the loading/ offloading bay operations into the environment	<ul style="list-style-type: none"> Construct a secure masonry bund above around the tank farm and maintain the existing secondary containers for each tank. Ensure tanks and containers are free from corrosion and monitor frequently for leakage. Install high level alarm to avoid overflow. Depot site to have own 24 hour security guard, lighting and secure perimeter fence. Use hoses with dry couplings to automatically stop flow in case of accidental disconnection during operation. Loading/offloading bay to drain into a suitable 3-chamber oil interceptor. 	Spills into the environment caused by natural disasters (earthquake, floods)	<ul style="list-style-type: none"> Ensure floor for the fuel tanks containers on skid is crack -free. Depot site to be well drained by storm weather channels to avoid flooding inside the depot.

Have appropriate fire fighting equipment at the depot including hydrants. Contain all fuel spills within the installed depot's oil traps. Keep all possible sources of ignition at a safe distance away from the fire hazard areas of the depot. Elect clear safety warning and instruction signs around depot. Dispose of all oily absorbent materials safely immediately after use. Keep the grass and other vegetation around the depot trimmed and maintain a vegetation-free ring around the depot perimeter fence. Install adequate and appropriate fire fighting equipment (dry powder, foam and water fog) at the depot. All depot staff to be trained on Jet A-1 spill and fire emergency response. KAA fire brigade to always provide support in case of serious spill incidence. Earth all equipment during fuel tank sampling, dipping, filling, offloading 	Fire and pollution risks arising from spills from aircraft refuelling mishaps	<ul style="list-style-type: none"> The refuelling hoses to be always equipped with dry couplings and properly sealed nozzles that open only upon secure locking into the aircraft fuel tank's inlet or the fuel supply outlet. 		Environmental pollution from waste containing Jet fuel.	<ul style="list-style-type: none"> Securely store the waste and safely dispose of via a NEMA-licensed hazardous waste disposal contractor in accordance with NEMA and Eldoret municipal regulations. Safely dispose of all hydrocarbon waste via a NEMA-licensed waste disposal contractor in accordance with local municipal regulations
		Flight safety risk arising from water and dirt in jet fuel	<ul style="list-style-type: none"> Thoroughly filter jet fuel to remove water and dirt as much as possible during all fuel transfer operations. Always ensure that jet fuel has first settled in the storage tank after offloading before transferring to the bowser for refuelling.
		Bowser accidents (collision with aircraft, other vehicles or people) during airside operations.	<ul style="list-style-type: none"> Driver and refuelling operators to strictly adhere to the documented safety rules and procedures set by IATA, KCAA and KAA for all service providers within the airside zone of the Eldoret International Airport. All TKL aviation depot operators must first undergo safety training by KAA and KCAA before operating in the Eldoret International Airport.
		Accidents or work errors resulting from operator mental fatigue, medication drowsiness, or being under substance influence	<ul style="list-style-type: none"> Employees to observe the normal 8-hr shift including lunch-time break rest as approved by Ministry of Labour. Employee not to operate equipment or machines if under certain medication or under substance influence. All employees to be subjected to Alcoblow test before signing in at the depot.
		Jet A-1 splashing into operators' eyes and /or skin.	<ul style="list-style-type: none"> Wear appropriate protective clothing; face visor or goggles in circumstances where eye contact can accidentally occur or if skin contact is likely, wear impervious protective clothing and/or

gloves. Protective clothing should be regularly inspected and maintained.

- Install an appropriate shower at the depot.
- Follow MSDS instructions available at the depot.

Spillage of jet fuel into the environment and/ or fire breakout at the depot

- Safely empty the fuel storage tanks and pipe-work and decommission by inerting the fuel storage facility and obtain decommissioning permit from NEMA.
- Maintain all fire precaution measures until decommissioning is approved.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED THE PROPOSED TKL KISUMU AVIATION RE-FUELING SERVICES DEPOT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the proposed TKL Kisumu Aviation Re-fueling Services Depot within the airside of Kisumu International Airport, Kisumu County.

The Proponent (Total Kenya Limited) of the proposed project is proposing to put up an aviation re-fueling services depot within the airside of Kisumu International Airport, Kisumu County

The following are the anticipated impacts and proposed mitigation measures:

Possible impacts	Proposed Mitigation Measures
Public safety and work safety	<ul style="list-style-type: none"> • Site shall be fenced off and out of bounds for unauthorized people. • All workers to use proper PPE and work tools. • Observe safe work practice and procedures and follow KAA contractor work safety procedures.
Occupational health	<ul style="list-style-type: none"> • Site to have clean running water including for drinking and sanitary facilities. • Workers to be provided with protective gear for dangerous or hazardous work. • Have onsite first aid kit and contractor to make arrangement with the nearest medical facility for ambulance service and emergency treatment. Contractor to take Workmen Compensation insurance cover for the works.

Waste disposal

- All site waste to be disposed at a site approved by NEMA and Kisumu Municipal authority and agreed upon with Total management.

- Excavated soil may be used for local landscaping within the airport.

Release of jet fuel from the storage tanks into the environment

- Construct a secure bund around the above ground storage tanks. Design to allow easy inspection and maintenance for corrosion protection, leakage (interstitial pressure) monitoring.

- Install high level alarm to avoid overflow.

- Depot site to have own 24 hour security guard and secure perimeter fence.

Spillage of jet fuel from the loading/ offloading bay operations

- Use hoses with dry couplings to automatically stop flow in case of accidental disconnection during operation.

- Offloading bay to drain into an appropriately designed oil interceptor.

Fire outbreak at the depot

- Contain all fuel spills within the installed depot's oil traps.

- Keep all possible sources of ignition at a safe distance away from the fire hazard areas of the depot.

- Dispose of all oily absorbent materials safely immediately after use.

- Keep the grass and other vegetation around the depot trimmed and maintains a vegetation-free ring around the depot perimeter fence.

- Install adequate and appropriate fire warning signs and fire fighting equipment (dry powder, foam and water fog) at the depot.

- Staff to be trained on spill and fire emergency response.

- KAA fire brigade to provide support.

Lightning strike to the fuel storage tanks and fire outbreak

- Earthing of the fuel tank structure. Have appropriate fire fighting equipment at the depot.

Sanitary sewage discharge into the environment

- All sanitary effluents to drain into on-site septic tank for proper treatment before discharge into the environment (soak away)

Spills into the environment caused by natural disasters

- Have a strong and secure foundation for the fuel tanks and a crack -free bund inner lining.

- Depot site to be well drained by storm weather channels.

Fire and pollution risks arising from spills from aircraft refuelling mishaps

- The refuelling hoses to be equipped with dry couplings and nozzles that open only upon secure locking into the aircraft fuel tank's inlet or the fuel supply outlet

- All refuelling equipment and procedures to meet IATA standards as stipulated by KAA and KCAA.

- Bowser to have suitable spill containment materials at all times

- Bowser to have fire fighting foam equipment at all times

Fire caused by static electricity in fuel vapour hazard areas

- Earth all equipment during fuel tank sampling, dipping, filling, offloading etc.

- Earth the aircraft and bowser during refuelling operations

- Operators to wear antistatic clothing

Environmental pollution from waste containing Jet fuel.

- Safely dispose of via a NEMA-licensed waste disposal contractor in accordance with Kisumu municipal regulations.

Electrical shocks and or fires at the depot

- Use only electric equipment and wiring meeting international safety standards

- (explosion proof) for hazardous areas or as set by KBS.
- All electrical system to be designed, supervised and certified by a professional electrical engineer.
- Flight safety risk arising from water and dirt in jet fuel
- Thoroughly filter jet fuel to remove water and dirt as much as possible during all fuel transfer operations
 - Always give jet fuel time to settle upon transfer operation
- Bowser accidents (collision with aircraft, other vehicles or people) during airside operations.
- Driver and refuelling operators to strictly adhere to the documented safety rules and procedures set by IATA, KCAA, KAA for all service providers within the airside section of the airport.
 - All operators must first undergo safety training by KAA and KCAA before operating in Kisumu International Airport.
- Accidents or work errors resulting from operator mental fatigue, medication drowsiness or being under substance influence
- Employees to observe the normal 8-hr shift including lunch-time break rest as approved by Ministry of Labour.
 - Employee not to operate equipment or machines if under certain medication or under substance influence.
 - All employees to be subjected to Alcoblow test before being allowed entry into the depot
- Jet A-1 splashing into operators' eyes and /or skin.
- Wear protective clothing: Wear face visor or goggles in circumstances where eye contact can accidentally occur.
 - If skin contact is likely, wear impervious protective clothing and/or gloves. Protective clothing should be regularly inspected and maintained
 - Install an appropriate shower at the depot
- Spillage of jet fuel into the environment and/ or fire breakout at the depot
- Safely empty all the fuel storage vessels and pipe-work completely and render them safe by inerting and obtain decommissioning permit from NEMA.
- Environmental pollution and fire risks from waste (bottoms or interceptor) containing Jet fuel.
- Safely dispose of all hydrocarbon waste via a NEMA-licensed waste disposal contractor in accordance with local municipal regulations.
 - Maintain all fire precaution measures until inspected and decommissioning approved.

The full report of the proposed project is available for inspection during working hours at:

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED LIQUEFIED PETROLEUM GAS (LPG) PLANT, SERVICE STATION AND AUXILIARY FACILITIES ON L.R. NO. 14966, SOUTH EAST OF MARIAKANI TOWN IN KILIFI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Fossil Fuels Limited) intends to construct and operate on a 5.4 acre plot; a Liquefied Petroleum Gas (LPG) plant, to serve the purposes of receiving/storage of bulk LPG and filling of gas cylinders to service markets in Coast, Eastern, Rift Valley, Central and Nairobi provinces. The project will also include a service station and auxiliary facilities.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Proposed Mitigation Measures

- | | |
|--|---|
| Impact on the biophysical environment by clearing and excavation | <ul style="list-style-type: none"> • Pave the facility area and forecourt of the service station as paved areas can serve as fire breaks and will stabilize loose soils. • Do not landscape the facility. • Appropriate hand and foot protection (PPE) during the manual clearing of vegetation. • Adopting ergonomic work flow designs that fit physical tasks to employees and not vice-versa while maintaining a balance with productivity. |
| Air pollution | <ul style="list-style-type: none"> • The existing boundary wall will be reconstructed. • Regular dust suppression including sprinkling with water during construction. • Building materials that are likely to produce dust such as ballast should be sprinkled with water before use. • Access road and dust surfaces at the construction site should be sprinkled with water twice a day. • Employees will be provided with appropriate dust masks. • Vehicles delivering raw materials should observe speed limits. • Use of serviceable vehicles and machinery to manage dust. |
| Noise pollution | <ul style="list-style-type: none"> • Construction work and delivery of raw materials will be limited to day time. • The contractor shall inform neighbors in writing prior to commencement of the development at least two weeks in advance. • Provide earmuffs to employees using equipment that produce peak noise. • The contractor will endeavor to comply with Noise Regulations, 2006. • Only serviceable machinery and vehicles will be used. |
| Vapor emissions | <ul style="list-style-type: none"> • All venting systems and procedures shall be designed as per required standards. • Include Vapor Recovery Systems and carbon filters on vents. |
| Fire and explosion hazard | <ul style="list-style-type: none"> • Have buffer zones to minimize fire and explosion risks. • Develop and deploy a fire and explosion |

	management plan and equipment.		color coded to ensure no cross contamination.
	<ul style="list-style-type: none"> • Comply with all licensing conditions by the Energy Regulatory Commission. • Staff training in fire fighting skills to be undertaken. • Fire drills to be conducted quarterly. • Prepare an emergency response plan to be prominently displayed at the facility. • A fire safety audit should be undertaken quarterly. • Pressure valves to be included in the design for the tanks. • Diesel and kerosene fuel shall be offloaded/ loaded with pipes that have no leakage potential and stored in tanks that are well secured to prevent potential for vapor discharge. • Position tankers so as to allow for rapid evacuation in forward gear. • A warning triangle will be displayed to ensure no vehicle obstruction. • The engine, lights and all the electrical apparatus such as radio and fan of the vehicle should be put off during offloading/loading. • The windows of the truck should be closed throughout offloading. • The signage "NO SMOKING" will be displayed clearly throughout the facility. • The battery circuit should be broken by use of battery cut out switch. • Fire extinguishers will be placed strategically within reach of the delivery point. • Close and secure the caps for the dipping pipes of the storage tanks. • Check the condition of delivery horse periodically to ensure no leaks. • Sand for replenishment of the sand buckets will always be available. • Fire inspection certificate to be issued by a competent authority prior to commissioning of the service station. • Carry out a fire safety audit and implement recommendations annually. • Carry out an Occupational Health and Safety Audit in line with the OSHA, No. 15 of 2007 annually. 		<ul style="list-style-type: none"> • Conduct regular stock inventory to check on leaks/ losses. • Comply with the recommendations of engineers on protecting the integrity of the underground tanks. • Maintain records of inspections and recommendations on the facility at site. • Construct oil interceptors and channel storm water into them. • Waste oil to be disposed of through NEMA licensed contractors. • Regular inspections/tests for leakage of pipes and other oil bearing conduits. • Test effluent on a quarterly basis for the efficiency of the oil water separators. • Comply with Legal Notice 120 of 2006.
		Surface runoff	
		Effluent from the workforce	<ul style="list-style-type: none"> • Establish a sewage treatment system for effluent that is acceptable to NEMA. • Treated effluent must comply with Schedule III of Legal Notice No. 120.

		Use of water and energy resources	<ul style="list-style-type: none"> • Implement water conservation measures for the offices and sanitation facilities. • Comply with the provision of the Water Act. • Develop and implement an energy management plan for the facility. • Install energy saving systems for the security of the facility and the offices. • Educate staff on water and energy conservation. • Undertake water and energy audits annually.
		Health and safety of employees	<ul style="list-style-type: none"> • Proper training of operators. • Provide suitably equipped First-Aid kits. • Medical assistance and insurance cover to be provided to employees. • Provide access to an emergency treatment facility. • Prevention of inhalation of fumes. • Provide protective clothing, footwear, glove, safety goggles and shields etc. • Manuals and training on the correct handling of materials and packages should be in place and updated as new material safety data sheets becomes available. • Monitoring should be carried out on a regular basis, including accident reports; and medical surveillance.
		Accidental spills	<ul style="list-style-type: none"> • Sound engineering strategies will be put in place to avoid spills. • Reliable operations and effective written operating procedures. • Good preventive and predictive maintenance techniques. • Oil interceptors will be constructed. • Conduct periodic leak tests on key installations.
Hazardous waste generation	<ul style="list-style-type: none"> • Ensure use of serviceable tankers for the delivery of LPG to the facility. • Containment areas shall be provided for in the project design for tankers. • Spill cleanup materials should be managed via re-processing for product recovery or as a waste at a facility licensed by NEMA. • Install oil interceptors for effluent originating from storm water runoff, tank bottoms and washing activities. 		
Tank leakages and pollution potential of ground water resources and soil contamination	<ul style="list-style-type: none"> • Tank integrity tests to be conducted by certified engineers on a regular basis. • The design for the facility includes a fire and spill containment equipment store • Drops or wetness to ensure no leakage are checked regularly • The installations will be made of strong material steel to ensure no leaks, and are 		

- Ensure the integrity of conduits.
- Provide magadi soda for management of fuel spills.
- Cross contamination of fuel products
 - Color codes to be used for product storage tank identification.
 - One product to be offloaded at a time.
 - Density tests to be carried out at the source depots to confirm the quality of the product being loaded onto the tankers.
- Sewage disposal
 - Sewage treatment plant is recommended.
 - Comply with schedule III of Legal Notice No. 120 of 2006.
- Emergency response plan
 - Provision of security throughout the project implementation.
 - Provide emergency numbers at strategic points.
 - Ensure that all workers have access to communication facilities (phones) for quick emergency response.
 - Emergency stop buttons.
 - Installed firefighting equipment and trained staff on how to use them.
 - Installed vehicle collision protection bars at the loading/offloading bay.
 - Maintaining a First Aid kit and ensuring personnel are trained in their use.

FOR THE PROPOSED SIMWATA FILLING STATION ON PLOT
NO. ASEMBO/RAMBA/4700 IN NDORI TRADING CENTRE,
SIAYA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Maurice Onyango Okong'o) is proposing to develop Simwata Filling Station on Plot No. ASEMBO/RAMBA/4700 in Ndori trading centre, Siaya County.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Waste generation and disposal	• Solid waste should be managed according to the waste management

regulations.

- The proponent should contract a licensed waste collector.
- Waste should be disposed at the designated municipal site.
- Contract a licensed waste collector.
- Provision of rubbish bins.
- Segregation of wastes at the source.
- Waste should be disposed at the designated site.
- Solid waste should be managed according to the waste management regulations.
- The proponent should contract a licensed waste collector.
- Air and Noise pollution
 - Contractor will give prior notice of activities and time durations to neighboring building occupants.
 - Dust masks should be provided to workers to limit inhalation of the dust.
 - Switch off engines when not being used.
 - Most of the construction work to be done manually to deduce noise impact.
 - Fencing the site to avoid spread of dust.
 - Employees likely to be exposed to high noise levels to be provided with ear protectors.
 - The contractor should obtain a noise permit from NEMA.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette*, *Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
