GAZETTE NOTICE No. 6081

PROBATE AND ADMINISTRATION

TAKE NOTICE that after thirty (30) days from the date of this Gazette, and unless cause be shown to the contrary, I intend to apply to the High Court at Kisii for representation of the estates of the persons named in the second column of the schedule hereto, who died on the dates respectively set forth against their names.

And further take notice that all persons having any claims against or interests in the estates of the said deceased persons are required to prove such claims or interests before me within two (2) months from the date of this Gazette, after which date the claims and interests so proved will be paid and satisfied and the several estates distributed according to law.

Vegetation and habitat loss	<ul style="list-style-type: none"> Minimize clearing and removal of natural vegetation for construction of roads and the well site. Replant areas along the road sides with local species. Introduce local indigenous perennial

	species of woody plants by seed or cuttings.		tanks.
	<ul style="list-style-type: none"> • Ensure minimal disruption of migration routes of fauna. • Minimize width of the well site access roads to about 5 metres. • Employ selective bush clearing to ensure sapplings regrowth. 	Death of animals from road accidents:	<ul style="list-style-type: none"> • Install and enforce speed limits for all project vehicles. • Use forced speed reduction tools such as bumps, humps and barriers at appropriate points along the projects roads and the Mai Mahiu-Narok highway. • Establish warning signs regarding accident prevention and reduction.
Effluent discharge	<ul style="list-style-type: none"> • Hold brine in drainage ponds nearest to the source and prevent it from coming in contact with vegetation, wild animals or livestock. • Introduce local acacia species rather than exotic species such as eucalyptus around brine ponds. 	Air quality	<ul style="list-style-type: none"> • Reduce exhaust fumes from diesel engines of trucks by proper maintainance. • Use abatement systems to remove hydrogen sulphide. • Sprinkle water on dust roads to reduce dust. • Encourage use of nose masks by workers whenever necessary in a dusty environment. • Monitor concentrations of hydrogen sulphide using a pollution dispersion model designed specifically for this purpose. • Monitor concentration levels of hydrogen sulphide indoors using WHO recommended threshold levels of 0.15ppm for an 8-hour period for occupation health standards. • Design and implement an air quality monitoring programme to continuously monitor air conditions in the steamfield, immediate neighborhoods, and indoor air quality.
Human-wildlife conflicts	<ul style="list-style-type: none"> • Project management will work with Kenya Wildlife Service to establish a wildlife monitoring scheme that will help avoid any injury or loss as a result of wild animals. • Project management will educate staff on peaceful co-existence with wild animals. • Work with KWS to enforce wildlife regulations and anti-poaching laws. • De-obstruct dispersal zone for wild animals that move outside Suswa, Hells Gate and Mount Longonot National Parks. • Design infrastructure such as overhead pipelines to minimize their impact on wildlife habitat and movements. • Fence only individual areas such as wellheads and office blocks thus minimizing interference with wildlife and grazing areas. • Monitor animal distribution and density to aid environmental decision-making. 	Soils erosion	<ul style="list-style-type: none"> • Construction of roads, well pads and office, power station and offices will involve earth movements and disturbance of soils. • Observe weather patterns to ensure construction is carried out during the favourable climatic conditions. • Construction of gabions and retention walls to check soil erosion and gully development • Reduce movement by heavy trucks that could cause soil erosion. • Re-vegetate exposed soils and restore disturbed and eroded areas. Fence areas being revegetated to protect them from interference by wildlife and livestock. • Design and construct roads in such a way as to minimize flow of storm water.
Water Pollution	<ul style="list-style-type: none"> • Hold the brine in ponds which should be isolated by well-maintained game and livestock-proof fences to prevent accessibility by animals. • Dispose of drilling water and brine by deep re-injection. 	Increased stormwater runoff from roads and well pads	<ul style="list-style-type: none"> • Collect storm water and direct to drilling ponds and soak pits. • Construct adequate drainage systems to take care of expected flash floods.
Introduction of exotic animals and plants:	<ul style="list-style-type: none"> • Environmental personnel should design and enforce regulations on exotic animals and pets. • Enforce livestock movement regulations. • Require workers to have all their domestic pets vaccinated. • Design and implement an exotic species monitoring system to ensure compliance with set regulations. • Regulate growing of ornamental plants or crops that are exotic inside and outside workers houses. • Uproot any exotic plants germinating accidentally. • Environment department staff should monitor appearance of exotic plants at construction sites and settlement areas and take emergency action. 	Noise and vibrations	<ul style="list-style-type: none"> • Well maintained machines and vehicles. • Equip cooling towers and gas ejectors with silencers. • Monitor noise levels using Noise regulations of 2009. • Design and apply a noise measurement model to estimate noise levels during well testing and power plant operations. • Use low-noise geothermal technology in drilling and power plant construction.
Water supply augmentation	<ul style="list-style-type: none"> • Use brine or steam condensate from the first well for drilling. • Drill additional boreholes. • Water trucking from Kengen storage 		

- Risks and accidents
- Introduce and enforce speed limits.
 - Sprinkle water on dusty sections of roads.
 - Educate workers on the dangers of fire and what they should do to prevent fires.
 - Monitor the degree of dryness of fuel material and proportionate increase in the risk of fire.
 - Install a fire preparedness and response system and train workers on emergency preparedness including fires and leaks, risk assessment evaluation and mitigation.
 - Establish a fire surveillance and early warning system to raise alarm during high fire risk periods.
- Waste management
- Control waste from construction material, equipment and workers camp through development of a Waste Management Plan.
 - Put in place grade and sort waste management system to manage garbage and other forms of waste generated.
 - Enforce waste management regulations of 2006.
 - Consider possibilities of waste reduction e.g. reuse and recycling.
 - Explore possibility of using waste generated from one process to be used as an input in another industrial process.
 - Carry out periodic environmental audits that also cover waste management.
 - Cost outlay – training in environmental audits, and material costs to carry out audits
- Health and safety
- Put in place a Health and Safety system based on the requirements of ISO 18001.
 - Develop a Blowout and Pipeline Failure Plan.
 - Implement fire and emergency alarms/precautions, etc in the project design.
 - Put in place a Fire Safety and Emergency Response Plan.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MBITA CAUSEWAY REPLACEMENT BRIDGE & DECOMMISSIONING OF THE EXISTING CAUSEWAY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Kenya National Highways Authority) intends to construct of Mbita causeway replacement bridge and approach roads of 500M on either side to bitumen standards on road in Homabay County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Proposed Mitigation Measures</i>
Soil erosion and siltation	<ul style="list-style-type: none"> • Extent of vegetation removal shall be minimized to the area of works to prevent extent of soil erosion. • Avoid removal of overburden during rainy period • Installation of silt fences. • Stock piling away from drainage channels. • Placing of low bumps around the piles of fine grained materials. • Consider reuse of stock piled top material. • Temporary vegetation, seeding or other suitable stabilization methods. • Stabilize all cuts and fill slopes immediately with accepted landscaping practices.
Noise generation	<ul style="list-style-type: none"> • Selection of equipment with less noise generation (as stated by the manufacturer) to be used. • The earth moving equipment shall be periodically checked and maintained for noise levels. • The workers shall be provided with adequate PPE such as earplugs to reduce impact of high noise levels. • Operate noise-generating equipment during regular working hours to reduce the potential of creating noise nuisance during night. • Provide the workers in charge of drilling with adequate PPE such as ear plugs. • Selection of equipment with less noise generation to be used.
Dust generation	<ul style="list-style-type: none"> • The site cleared shall be periodically watered to reduce emission of dust particles. • The workers shall be provided with PPE such as nose masks and goggles to reduce impact on health. • Provide workers in charge of blasting with nose masks. • Phasing the blasting for a period. • Use a plant that has integrated dust arrestors technology • Use of water sprays to prevent the dust from being air borne.

Oils and hydrocarbons wastes from the drilling machinery	<ul style="list-style-type: none"> • Disposed off to appropriate site. • Operate machine with caution to avoid oil spills in the lake. 	construction workers.
Vibration Generation	<ul style="list-style-type: none"> • Use of explosives to break up rocks in the construction sites or quarries should comply strictly with the relevant legal requirements. • Use technology that produces less vibrations • Blast once a week or a fortnight to avoid enormous impact in short duration. • Implant explosives of recommended amount by the geology and mines department. • Evacuate any persons close to the buffer zones at least 10 minutes before blast provide relevant information to neighboring communities and other stakeholders when explosive devices are to be used. 	<ul style="list-style-type: none"> • Adequate communication with workers and signage to alert workers and users of the causeway.
Solid waste and waste water generated	<ul style="list-style-type: none"> • Skips and bins should be strategically placed within the campsite and construction site. • The skips at the construction campsite should be adequately designed and covered to prevent access by vermin and minimize odor. • Empty skips and bins regularly. • Disposal of solid waste at approved site. • Provision of portable sanitary convenience for construction workers to control sewage waste. 	<ul style="list-style-type: none"> • Fence off the quarry site and restrict entry. • Provide proper drainage to avoid pools of water. • Rehabilitation of quarry after completion of operation. • The provincial administration to provide security to strengthen community policing.
Increased traffic	<ul style="list-style-type: none"> • Provide adequate and appropriate road signs to warn Causeway users of the construction activities • Raw materials such as sand, rocks should be adequately covered within the trucks to prevent any escaping into the air or along the roadway. • The trucks should be parked on the proposed site until they are off loaded. • Heavy equipment should be transported early in the morning with proper pilot age. • Use of flagmen should be employed to regulate traffic flow. 	<ul style="list-style-type: none"> • Awareness creation on HIV/ Aids and behavior change approach to be adopted.
Vehicular emissions	<ul style="list-style-type: none"> • Periodic emission. • Check for vehicles are required. • Clean fuel shall be used for vehicles. 	<ul style="list-style-type: none"> • Ensure no minors work in the construction.
Water quality degradation	<ul style="list-style-type: none"> • Properly service machines (floating equipment) to avoid oil spills/ hydrocarbon leaks on the lake. • Avoid discharge of untreated waste from the campsite to the lake. • Washing of construction equipments should not be done at the lake shores. This is to avoid petrochemical leaks. • Controlled construction of substructure to minimize impact on water turbidity. 	<ul style="list-style-type: none"> • Ensure no alcohol or drug consumption during works. • Schedule meetings/ Barazas.
Personal injuries/ workers safety	<ul style="list-style-type: none"> • Restrict excavation where structures are to be made. • Provision of lifelines, personal safety nets or safety belts and scaffolding for 	<ul style="list-style-type: none"> • Encourage workers / Operators to take advantage of Credit facilities to educate their children and venture into income generating activities.

Creation of Pits and Trenches that may cause injuries to human Beings and Animals, form pools of water that May be breeding sites for mosquitoes

security

HIV/Aids prevalence

Underage persons working in the project

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED GREATER EASTERN BYPASS

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed Greater Eastern Bypass that traverses Nairobi, Kiambu and Machakos Counties.

The Proponent (Kenya Urban Roads Authority) of the proposed project is proposing to upgrade to bitumen standards of a 77

kilometres Road; Greater Eastern Bypass that traverses in Nairobi, Kiambu and Machakos Counties.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Loss of vegetation	<ul style="list-style-type: none"> • Control earthworks. • Install drainage structures properly. • Install erosion control measures. • grouted stone pitching and rock fill gabion works will be necessary to protect culvert inlets and outlets. • Landscape embankments and re-vegetate gravel sites with grass and indigenous shrubs. • Ensure management of excavation activities. • On sections with high filling and deep cutting, slopes should be covered by stone walls and planted with grass and shrubs. • Damaged existing drainage systems should be rebuilt or rehabilitated by suitable methods.
Solid wastes	<ul style="list-style-type: none"> • Solid wastes should be stored in properly maintained and covered sanitary bins or pits. • Solid wastes should be separated onsite before disposal offsite. • Waste Earth material, should be re-used as earth fills by the contractors or community members. • Creation of awareness to the general public on the risks. • A record of movement of wastes generated by the project should be made available for inspection. • A NEMA registered and authorized waste disposal contractor should be contracted to remove wastes from the project site to designated waste disposal sites such as Dandora Dump site.
Liquid wastes	<ul style="list-style-type: none"> • Sanitary latrines should be constructed within the staff quarters. These should be at least 100m away from any water body. • Kitchen effluent should be disposed of either in the latrines or in sanitary pits dug into the ground with adjacent soak away pits.
Dust emissions	<ul style="list-style-type: none"> • The construction workers should always have gas masks on as they work. • Watering of dusty areas should be at least five times a day. • Ensuring that un-road worthy vehicles are not used by motorists on the road.
Safety, health and environment	<ul style="list-style-type: none"> • Tightening of security within the area, both by the local police and private investors. • Setting up of a centralized police post along the proposed GEB route. • Sensitizing locals on this possibility and insisting that they take security measures such as always locking their doors, installing alarm systems, having the contacts of the nearest police station and hospitals in case of an y emergency. • Erecting road furniture such as road

signs, guard rails, and road markings. Bumps and rambles should also be put in busy residential areas or near schools, hospitals etc.

- Creating awareness to local residents on proper use of the road, when and where to cross.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MURUNY/SIYOI DAM

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Water Conservation and Pipeline Corporation) intends to construct a dam on Muruny River in Pokot South District. The project is made up of the following main components (among others); draw-off and diversion works, embankment and spillway, raw water main 11km – 34,800m³/day, treatment works (34,800m³/day), mainline to Kapenguria (34Km), storage tanks and break pressure tanks, bridge and re-routing road works, embankment, intake, gravity mainline, storage tanks (to serve communities affected by the dam).

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Proposed Mitigation Measures</i>
Loss of agricultural land	• Apply relevant regulations relating to compensation issues and compensate.
Encroachment into river catchments	• Encourage agro-forestry. • Encourage terracing to check soil erosion.
Catchment erosion and siltation	• Integrated land use management involving all stakeholders to ensure catchment protection and watershed management.
Impaired passage across the reservoir	• Construct a bridge at suitable location across the reservoir
Water use conflicts	• Ensure water to be stored is flood flow only and that regulated normal river flow is guaranteed.
Dust and noise pollution	• Ensure that emission levels of

	<ul style="list-style-type: none"> machinery are within permissible limits. • Ensure that there is no work at night. • Sprinkle access road with water during heavy traffic due to construction activities or use dust suppressants.
Possible alterations in the flow of water, changes in water quality during construction	<ul style="list-style-type: none"> • Adequately divert the river away from construction areas. • Ensure good engineering practices.
Enhanced erosion / changes in due to excavation	<ul style="list-style-type: none"> • Obtain earth fill from flooding zone whenever possible. • Re-vegetate with native species. • Fill borrow sites.
Social pressure on local community	<ul style="list-style-type: none"> • Enlighten personnel about STDs (HIV/AIDS) and use of condoms.
e.g. increase in sexually transmitted diseases)	<ul style="list-style-type: none"> • Partner with NGOs in campaign to stop the spread of HIV/AIDS. • Help strengthen healthcare system. • Strengthen basic facilities. • Avoid actions that could cause or escalate tension.
Possible pollution from construction camp	<ul style="list-style-type: none"> • Construct sanitation facilities at camp site. • Ensure appropriate disposal of used oil. • Ensure appropriate disposal of solid waste.
Workers' safety	<ul style="list-style-type: none"> • Provide protective clothing to the workers.
Downstream erosion	<ul style="list-style-type: none"> • Provide stilling basin to check velocity of released water.
Changes in water quality of the impounded reservoir	<ul style="list-style-type: none"> • Monitoring of in-stream water quality. • Partner in enlightenment for increased environmental awareness in surrounding communities. • Clear vegetation and remove it from area to be impounded.
Introduction of disease vector problems	<ul style="list-style-type: none"> • Monitor the presence of disease vectors. • Contribute to strengthening of local health facilities through public enlightenment. • Contribute to public health programs to eradicate/protect against malaria, schistosomiasis etc.
Possible pollution of water from residual chemicals used in water treatment	<ul style="list-style-type: none"> • Ensure sludge drying beds are included in the design of the water treatment works.
Possible pollution of Siyoi and Kapenguria rivers from additional wastewater	<ul style="list-style-type: none"> • Construct wastewater disposal facility.
Flooding of downstream and river bank erosion	<ul style="list-style-type: none"> • Multi-step release of water before removing dam wall.
Loss of scenery due to dumping of excavated material	<ul style="list-style-type: none"> • Liaise with local community so that excavated often fertile material can be put to good use.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED LAMU PORT AND ASSOCIATED INFRASTRUCTURE IN MANDA BAY, LAMU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Ministry of Transport) intends to construct the first of three (3) berths and associated infrastructure, including dredging reclamation and construction of an access road in Manda Bay, Lamu County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Proposed Mitigation Measures</i>
Dispersal off re-suspended dredged material.	<ul style="list-style-type: none"> • Use of silt-curtains where possible during dredging and dumping of dredged material. • Disposal of reduced amounts of material to reduce agitation. • Use of appropriate dredgers. • Reduction of dumping frequency.
Ecological/biological loss	<ul style="list-style-type: none"> • Relocation of species. • Re-planting of equal or greater areas to felled mangrove trees (compensatory restoration). • Education and conservation efforts with local communities.
Dust and other airborne/fugitive emissions	<ul style="list-style-type: none"> • Dust Screens. • Covering of stockpiles. • Spill control of bulk cargo. • Implementation of the National Oil Spill Response Contingency Plan. • Water sprinkling during construction. • Provision of Personal Protective Equipment (PPE).

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED AGRICULTURAL PLANTATION AT GALANA RANCH/BLOCK 1/1, MALINDI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Tembo Agro Oil Seeds Limited) intends to develop an agricultural plantation on 100,000 acres for the production of sugarcane, groundnuts, Jatropha, oil plants, and other related products.

The proponent also plans to get engage in the Agro-forestry industry including plantations of a variety of trees for various purposes and/or other high yielding trees and to engage in any other agricultural activities including agro-industrial production. The first phase of the plantation will cover 1, 000 acres with 700 acres having sunflower; groundnuts covering 250 acres and Jatropha covering 50 acres.

The following are the anticipated impacts and proposed mitigation measures

Environmental Impacts Recommended Mitigation Measures

High demand for raw materials (pipes, fencing materials, water storage materials) etc.	<ul style="list-style-type: none"> • Source building materials from suppliers who use environmentally friendly processes in their operations. • Ensure accurate budgeting and estimation of actual construction material requirements to prevent wastage. • Ensure that damage of materials at the construction site is kept minimal through proper storage. • Encourage use of recycled, refurbished or salvaged materials to reduce the use of raw materials and diverting material from landfills. • Demarcate and delineate the project area to be affected by construction works. • Specify locations for trailers and equipment, and areas of the site, which should be kept free of traffic, equipment, and storage.
Vegetation and animal disturbance	<ul style="list-style-type: none"> • Designate access routes and parking within the sites. • Preserve some individual trees within the site. • Introduce vegetation on open spaces and ensure their maintenance. • Harvest and store water from roofs of greenhouses for irrigation etc. • Design a storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure. • Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil.
Increased storm water, runoff and soil erosion	<ul style="list-style-type: none"> • Ensure that construction vehicles are restricted to existing roads to avoid soil compaction within the project sites. • Ensure that any compacted areas are ripped to reduce run-off. • Site excavation works to be planned such that a section is completed and rehabilitated before another section begins. • Construction and paving of soil-galleys on sloppy sections. • Open drains all interconnected will be provided on site to avoid flooding of the greenhouse sites which could lead to soil and water pollution. • Use of an integrated solid waste management system based on 3R strategy. • Through accurate estimation of the sizes and quantities of materials required. • Carry over material leftovers for utilization in another project site.
Increased solid waste generation	<ul style="list-style-type: none"> • Refurbish and reuse damaged construction materials. • Donate recyclable/reusable or residual materials to other deserving users. • Use durable materials that will not need to be replaced often. • Ensure proper storage and handling of materials to prevent damage/ waste. • Ensure controlled procurement of

- perishable materials
- Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste.
 - Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at the site.
 - Dispose waste more responsibly by dumping at designated dumping sites or landfills only.
 - Waste collection bins to be provided at designated points on site.
 - Running an educational campaign amongst operators, e.g. through use of posters, to encourage sorting, reuse or recycling of the solid waste.
 - Ensure strict enforcement of on-site speed limit regulations.
 - Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles.
 - Personal Protective equipment to be worn.
 - Vehicle idling time shall be minimized.
- Dust emission
- Sensitize truck drivers to avoid unnecessary racing of vehicle engines and to switch off vehicle engines.
 - Construction vehicle drivers shall switch off engines of vehicles not in use.
 - Construction drivers to avoid gunning of vehicle engines or hooting when passing through sensitive areas such as schools and hospitals.
 - *Trees around the sites will provide some buffer against noise propagation.*
 - Install energy saving fluorescent tubes at all lighting points.
 - Plan transportation of materials to minimize fossil fuel usage.
 - Monitor energy usage and set targets for reduction of the same.
 - Explore the possibility of using solar and wind energy within the facility.
 - Water should be used sparingly if possible.
 - Harness rainwater.
 - Install discharge meters to determine and monitor total water usage.
- Exhaust emission
- Promptly detect and repair any water pipe and tank leaks.
 - Sensitize community members and workers to conserve water.
 - Ensure taps are not running when not in use.
 - Report all accidents and incidents to the DOSHS as required.
 - Enforce adherence to safety procedures and emergency response plans.
- Noise and vibration
- Provide safety education and training, and provide first-aid facilities.
 - Develop and communicate site HSE and educate the workforce.
 - Ensure proper storage that prevents stack/ wall collapse.
 - All ladders and scaffolds used must be
- Increased energy consumption
- High water demand
- Incidents, accidents and dangerous occurrences

- of good construction and sound material and be properly maintained.
- Institute adequate emergency evacuation procedures and programs.
 - Provide well-stocked accessible first aid kits within the facility.
 - Provision must be made for persons to be trained in first aid.
 - Signs such as "NO SMOKING" etc. must be prominently displayed within the project sites, especially in parts where inflammable materials are stored.
 - Develop a suitable system for the safe collection, recycling and disposal of chemical wastes, obsolete chemicals and empty chemical containers.
 - Keep a record of all hazardous chemicals used at the sites cross-referenced to the appropriate chemical safety data sheets.
 - Prohibit eating/ drinking in chemical storage areas.
 - Provide workers with PPE as appropriate.
 - Ensure 24 hour site security manning and surveillance.
 - Suitable wet suppression techniques need to be utilized in all exposed areas.
 - Unnecessary traffic shall be limited and on-site speed controls enforced.
- Occupational health, security and safety risks
- Air pollution

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
