ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED DEVELOPMENT OF A BLACK OIL MINI
DEPOT ON PLOT L.R. NO. 82/4137 AT DONHOLM IN NAIROBI
COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Ms. Africana Energy Ltd.) intends to construct a black oil mini depot of fuel oil 180 CST tanks. The project involves the installation of loading pump and five overhead horizontal steel petroleum tanks.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts	Mitigation Measures
Soil erosion	<ul style="list-style-type: none"> • Apply soil erosion control measures. • Establish grass lawns, flower gardens and trees around and within the site after completion.
Water and energy use	<ul style="list-style-type: none"> • Provide adequate water storage facilities and reuse water. • Proponent should use energy-saving lighting bulbs. • Raise awareness on water and energy conservation.
Solid waste management	<ul style="list-style-type: none"> • Contract a NEMA licensed waste collection and disposal company. • Proper containment and disposal of solid waste in all project phases. • Segregate, separate and re-use construction wastes.
Effluent discharge	<ul style="list-style-type: none"> • Project to be connected to the standard septic tank. • Maintain internal sewer system and network during operation.
Air and noise pollution	<ul style="list-style-type: none"> • Ensure the noisy machines are insulated or temporary fenced. • Noise hazard signs should be displayed where necessary. • Machinery should be well serviced and lubricated. • Avoid excavation works in dry weather, sprinkle water to reduce dust. • Restrict construction activities to day time only.

Occupational health and safety	<ul style="list-style-type: none"> • Comply with provision of OSHA 2007 in line with Building Operation and works of Engineering Construction Rule 1984. • Engage skilled labourers and appoint a supervisor. • Use stable, safe ladders and scaffolds and display safety signs on site. • Shield construction activities to minimize accidents. • All lifting equipments should be inspected and well maintained. • Ensure all workers have insurance covers. • Provide and enforce the use of proper PPEs. • Register the construction site with DOSHS.
Fire hazards and accidents	<ul style="list-style-type: none"> • Comply with provision of Fire Risk Reduction Rules 2007. • Install fire fighting equipments during and after construction • Comply with provision of Fire Risk Reduction Rules 2007. • Sensitize workers on fire safety. • Avoid storage of flammable materials near possible fire sources.
Security	<ul style="list-style-type: none"> • Contract a reputable security firm to guard the site and the premise. • Collaborate with the authorities and institute community policing.
Fuel oil leaks and spills	<ul style="list-style-type: none"> • Regular inspection of the overhead tanks for leakages. • Protect the tanks with corrosion prevention materials. • Site the projects away from sensitive environmental receptors including sewers, tunnels, vaults, surface water and ground water reservoirs. • Monitor ground water from at least three monitoring points to also establish the direction of groundwater flow.
Soil and ground water contamination	<ul style="list-style-type: none"> • Regular hydraulic pressure testing of the above ground tanks. • Non destructive testing, for example, ultrasound testing.

The full report of the proposed project is available for inspection during working hours at:

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Sultan Palace limited) intends to develop on about 43.26 acres of beach land; a mixed use resort, which shall consist of an 80-room 5 star hotel, and a total of 367 residential units (27 villas, 90 town houses and 250 apartments).

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Recommended Mitigation Measures

Soil disturbance and pollution.	<ul style="list-style-type: none"> • Excavation only at areas of construction. • Ensure vehicles delivering materials and machines are in good condition with no oil leaks. • Part of the excavated material will be used for landscaping and beautification of the project site. • Landscaping will be done and additional trees planted to enhance the environment. • Ensure use of fertilizer only when required (after soil testing). • Document watering times and volumes. • Retain existing land use or similar to avoid major land changes.
Water pollution	<ul style="list-style-type: none"> • Refrain from releasing any construction waste into the sea. • Check the site drainage to prevent sedimentation of the marine environment through storm outfall. • The location of the sewage treatment plant should not be close to water sources. • Monitoring quality of effluent discharged. • Provide segregated and covered solid waste bins and skips. • Monitor quality of storm drain into the field.
Air pollution	<ul style="list-style-type: none"> • Ensure the vehicle engines are in good condition to reduce levels of exhaust gases. • Sprinkling of water to reduce dust levels.
Noise pollution	<ul style="list-style-type: none"> • Construction during daylight hours. • Drive vehicles into the site without undue noise (hooting).
Land use	<ul style="list-style-type: none"> • Maintain same land use as in the neighborhood – recreational. • Develop facilities for tourism and recreation only.
Socio-economic	<ul style="list-style-type: none"> • Carefully driving vehicles delivering materials. • Provide personal protective equipment (overalls, safety shoes and gloves) to employees. • Keep an accident register. • Implement safety measures, emergency plans and contacts. • Install firefighting and first aid equipment. • Train the community in new technology. • Conduct safety training and drills for occupants and staff. • The proponent shall not block community access routes/roads to the beach points.

- Resource utilization
- Proponent shall share the beneficial use of beach site with the local communities.
 - The wastewater treatment plant shall be run by a dedicated trained operator on site.
 - Clear measures on riparian protection should be prescribed.
 - Water quality and quantity monitoring shall be done to check quality and sufficiency levels.
 - Recycling of water to reduce dependency on piped supply hence reducing pressure on infrastructure.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Mr. Wambugu Ndiga) intends to construct on a 0.0464 hectare plot; a commercial building and a petrol filling station, containing 4 no. underground fuel storage tanks each with a capacity of 10,000 liters, 4 no. sets of fuel dispensing pumps for diesel, kerosene, super and regular petrol. The building will have three ground floor rooms, a hotel and rental rooms on the second floor. The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental aspect</i>	<i>Potential Impact</i>	<i>Mitigation measures</i>
Air Quality	<ul style="list-style-type: none"> • Dust during dry and windy season • Emissions from construction machinery • Noise during construction 	<ul style="list-style-type: none"> • Water the dusty grounds • Use serviced machinery • Provide workers with nose masks • Carry construction works during the day
Water resources	<ul style="list-style-type: none"> • High demand during construction • Contamination of surface water due to run off • Contamination of ground water due to fuel seepage 	<ul style="list-style-type: none"> • Ensure no water wastage • Construct an oil interceptor • Construct a tank inspection point for early leakage detection
Health and safety	<ul style="list-style-type: none"> • Hazards from machinery and equipment • Hazards from falls • Emissions during from petroleum products 	<ul style="list-style-type: none"> • Provide all workers with PPE • Use appropriate construction and climbing equipment for each task • Store equipment and material in correct positions • Enclose the working area from outsiders
Fire Hazards	<ul style="list-style-type: none"> • Possibility of fire outbreak 	<ul style="list-style-type: none"> • Ensure fire fighting equipments are provided and placed at strategic positions • Train workers on firefighting techniques
Solid & Sewerage waste	<ul style="list-style-type: none"> • Accumulation of solid waste • Overflow of sewerage waste 	<ul style="list-style-type: none"> • Encourage reuse and recycle of construction material • Provide waste bins at the forecourt and ensure timely emptying • Monitor and exhaust septic tank when necessary
Geological set up	<ul style="list-style-type: none"> • Destruction due to excavations 	<ul style="list-style-type: none"> • Avoid unnecessary excavations • Use local material for filling excavated areas
Biological resources	<ul style="list-style-type: none"> • Loss of flora and fauna 	<ul style="list-style-type: none"> • Introduce new vegetation in the front yard to mitigate the loss

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED RESIDENTIAL ESTATE DEVELOPMENT
IN MUTALIA, OFF KANGUNDO ROAD, MACHAKOS COUNTY,
ON PLOT L.R. NO. DONYO SABUK/ KOMAROCK BLOCK
1/20775

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Ghanima limited) intends to develop on about 41 acres; a total of 449 three bedroom residential housing units; generally in clusters of 23-50 houses, shops and a nursery school, ancillary facilities including driveways and common parking bays. Other components include a recreational area, borehole, waste water treatment plant, associated storm water drainage system and a perimeter wall with guardhouse.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Recommended Mitigation Measures</i>
Soil erosion and water logging	<ul style="list-style-type: none"> • Terrace, level and rip off compacted areas of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. • Proper planning of site excavation works such that a section is completed and rehabilitated before another section begins. • Landscaping and construction of retention walls to control soil erosion • Surface runoff and roof water should be harvested and stored in suitable reservoir for reuse.
Vegetation Destruction	<ul style="list-style-type: none"> • Ensure proper demarcation and delineation of the project area to be affected by construction works. • Design and implement an appropriate landscaping programme to help in re-vegetation of parts of the project area after construction. • Introduction of vegetation (trees, flowers and grass) on open spaces and around the project site.
Noise pollution and excessive vibrations	<ul style="list-style-type: none"> • Comply with maximum permissible noise and vibration levels for constructions sites as per 2nd Schedule of the Environmental Management and Coordination (Noise and Excessive Vibration Pollution Control) Regulations, 2009. • Prescribe noise reduction measures appropriately e.g. restricted working hours, material transport hours and noise buffering. • Install portable barriers to shield compressors and other small stationary equipment where necessary and locate stationary noise sources as far from existing sensitive receptors as possible. • Minimize vehicle and machinery idling time by switching off engines when not in use.

National Environment Management Authority.

Air pollution
(exhaust emissions
and dust
generation)

- Ensure use of well serviced and maintained vehicles and equipment.
- All construction works and delivery of materials shall be carried out during the day between 8:00 AM and 5:00 PM.
- Use water sprinklers control dust.
- Vehicles and machinery should be switched off when not in use.
- Cover all trucks hauling soil, sand and other loose materials or require all trucks to maintain at least two feet of freeboard.
- Pave, apply water when necessary, or apply (non-toxic) soil stabilizers on all unpaved access roads, parking areas and staging areas at construction site.
- Use of electrically operated construction machinery to avoid externalities produced by diesel engines.

Health and safety

- Unattended public access to the construction site should be restricted.
- Roster and General Register of all construction workers should be kept within the project site.
- Warning signs should be placed in appropriate places.
- Safety education and training of the construction workers should be emphasized.
- Install proper fire management equipment and strategies.
- Security personnel should be posted on site at all times

Waste management

- Solid waste management during construction and operational phases of the project must adhere to the Environmental Management and Coordination (Waste Management) Regulations, 2006
- Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements.
- Use of building materials that have minimal packaging to avoid the generation of excessive packaging waste.
- Use of construction materials containing recycled content when possible and in accordance with accepted standards.
- Adequate collection and storage of waste on site and safe transportation to the disposal sites and disposal methods at designated area shall be provided.

Traffic along access road

- Sensitize truck drivers to avoid unnecessary road obstruction.
- Cover all trucks hauling soil, sand and other loose materials to avoid spillage and dust emissions that may interfere with smooth motoring.
- Transportation hours shall be restricted to the period between 8:30 a.m. and 3:30 p.m., Monday through Friday, unless approved otherwise.

Increased water demand

- Promote awareness on water conservation and reducing water wastage.
- Quick fixing of leaking taps, pipes and toilet cisterns.
- Install push taps.
- Minimize water use in the gardens.

Increased energy demand

- Audit energy use.
- Identify and utilize

areas/equipment/systems having minimum energy consumption.

- Buy and install energy efficient equipment and use fluorescent bulbs instead of incandescent bulbs.
- Implement a programme for energy saving in the building's design.
- Other mitigation measures are outlined within this report.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Machakos County.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED THWAKE WATER SUPPLY AND SANITATION PROJECT

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Tanathi Water Services Board) is proposing a water supply to supply water to the semi-arid greater Makueni and Kitui. The project shall involve construction of an embankment dam across River Thwake to impound runoff water.

The dam wall will measure 84 metres high and its key components will include river diversion and intake works, embankment and spillway. It will cover an area of about 2,900ha spanning from the dam axis to 2-3km wide and a throwback of about 9km upstream, mainly on Thwake river basin. The catchment is estimated at about 10,276km² of about 35% arable and 65% semi-arable land. dam has been designed for full reservoir storage of 825mcm with live storage of 594mcm. The reservoir will cover an area of 2,933ha at full storage. The embankments will require about 18.4Mm³ of earth fill materials. The crest of the main dam will be 1,600m long.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Mitigation Measures Impacts

- Hydrology
- Replace vegetation cover on the buffer area and adjoining area upon project completion to reduce sediment transport.
 - Provide sediment traps and/or embankments upstream to prevent excessive silt loading into the dam.
 - To reduce sediments downstream during the construction phase, papyrus etc should be

planted downstream river banks to trap the silts.

- During the construction phase of the dam, river water will be diverted to allow the construction works, to support the river line life at least 30% of the river base flows should be allowed so as not to harm the existing ecosystem.
 - Diversion of the main stream should be within the Riverine corridor.
 - Provide collaborated watering points for the disrupted communities and animals.
 - Provide flow transmission channel of adequate capacity to carry highest flows from the proposed Thwake dam.
 - The dam will impound and store flood flow water that would otherwise create flooding downstream.
 - The reservoir if operated optimum it will increase potential maximum power output to the national grid and hence create more power reliability.
- Sediment Transport
- Encourage sustainable land use in the immediate riparian areas.
 - Ensure a minimum of 30m vegetated buffer zone around the dam.
 - Encourage application of natural manure on farms to compensate for lost silt.
 - Consider silt release valve.
- Water Quality
- Provide temporary silt barriers to protect water quality in the proposed dam.
 - The exact locations for all pit latrines, therefore, will be established to enable smooth relocation.
 - Maintain construction equipment at the highest working conditions.
 - Undertake equipment servicing only at approved locations.
 - Ensure high sanitation and hygiene at the construction camps at all times.
 - Pit latrines will be decommissioned and the earth scooped for safe disposal at pre-agreed sites.
 - Identify specific point sources of water pollution (cattle pens, market centers, agro-chemical use points, etc.) for isolation and management.
 - Institute a broad water quality monitoring system to focus on the catchment sources, incoming flows, entire dam and water downstream of the dam location.
 - All identifiable graves falling within areas to be inundated will require decommissioning and relocating to prevent contamination of water.
 - The exercise will be undertaken in full observance of traditional rites as well as the wishes of the affected families.
 - Proliferation of aquatic macro-fauna could be encouraged along the periphery of the dam to ensure natural aeration of the water.
 - Allow for buffer zone around the dam and limited proliferation of planktons for enhanced aeration.
 - All vegetation materials (live and dead) at the dam site shall be cleared and removed before the area is excavated and inundated.
 - Control soil erosion from the catchments and the immediate agricultural land (consider additional sand traps and supporting farmers on sustainable land use practices).
 - Provide silt release system for downstream productivity (This will be effective through

- activation of silt washout valve).
- Water Loss**
- Provide temporary lined channels for transmission of river flows during construction to prevent losses.
 - Ensure water abstracted for construction will be just enough.
 - Geological profiles throughout the area proposed for inundation should be continuously monitored and areas of weaknesses strengthened.
 - Sub-surface water infiltration trends on affected areas should be monitored over a period of time with respect to effects on houses and other structures.
 - Indigenous trees and shrubs that have low water dissipation capacity should be encouraged around the dam buffer zone to minimize loss of water through evapo-transpiration processes.
 - Introduce economic and financial initiatives towards water saving and responsible utilization by approved abstractions.
- Ecological Issues**
- Collaborated initiatives for compensation of vegetation removed by planting a similar volume of vegetation through community groups, i.e. local indigenous plant species.
 - Estimated volume of biomass to be established for the compensation.
 - Initiate a dedicated tree nursery of indigenous plants for replanting.
 - Reintroduction of disrupted species such as fish.
 - Dam slope stabilization to facilitate aquatic animals' free movement.
 - Sensitize the riparian communities on invasive plants to be avoided.
 - Early removal of the alien species through mechanical/physical means as soon they are noted.
 - Monitoring water quality with respect to nutrient accumulation would be necessary.
 - Develop and maintain a database of animal and plant species found in the dam area as a basis for conservation and monitoring of newly introduced species in the future.
 - Have an ecologist to oversee monitoring and management of ecological changes around the dam ecosystem, in liaison with KWS.
 - Liaise with Kenya Wildlife Service in monitoring the new habitats and characteristics of the wildlife migrating into the dam area.
 - Establish community interests and values in the evolving ecological setting and enhance economic benefits from the same.
 - Consider fish ladders or by-pass channel to facilitate fish movement.
 - Consider crossing zones at the tail waters and across the outfall into the proposed dam.
- Topography**
- The construction works should incorporate landscaping component.
 - Maintain vegetated landscape as is the existing with other dams in the cascade.
 - The dam surroundings should be made safe and attractive for tourists.
- Material Sites**
- All materials sites should be approved before use.
 - All materials sites should be rehabilitated upon completion of the works.
 - Adhere to laid down regulations at all times during materials extraction.
 - Abide by the principles of CSR on social

- utilities during construction.
- Social and Economic Aspects**
- Sensitize landowners on necessary land use changes for dam protection.
 - Undertake a comprehensive land acquisition and resettlement action plan (LAP & RAP) as a basis for compensations.
 - Compensate appropriately any land acquired for the main dam, buffer zones, water treatment plant, sand traps, the pipelines and storage tanks.
 - Include HIV/AIDS campaigns in dam construction activities.
 - Ensure the provision of condoms, voluntary status testing and use of ARVs.
 - Advise communities on ways and means to develop alternative grazing sites and compensate the farmers for the crops affected.
 - Facilitate farmers to access capital.
 - Where possible, facilitate community-owned and managed wildlife enterprise initiatives in collaboration with KWS.
 - Use of a moat around irrigated crop fields to minimize hippo incursions into crop fields.
 - Initiate collaborations with the communities and the wildlife authorities on wildlife conflict management.
 - Enhance cultural preservation through CSR initiatives.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED DEVELOPMENT OF REFUELING TERMINAL AT WILSON AIRPORT (NAIROBI)

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Gulf Energy Limited) intends establish a refueling hydrant terminal at Wilson Airport. This will involve the construction of operations offices, installation of fuel storage tanks, parking area for fuel bowsers, safety equipment and auxiliary civil works.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>	
Construction Materials Sourcing	<ul style="list-style-type: none"> Source building materials from suppliers who use environmentally friendly processes in their operations. Ensure accurate budgeting and estimation of actual construction material requirements to ensure low wastage. Apply recyclable materials to the extent possible. 	
Disruption of Ecosystem	<ul style="list-style-type: none"> Specify locations for trailers and equipment, and areas of the site which should be kept free of traffic, equipment, and storage. Design and implement an appropriate landscaping programme to help in re-vegetation of part of the site after construction. 	Noise Pollution <ul style="list-style-type: none"> Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated. Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas. Ensure that construction machinery is kept in good condition to reduce noise generation. Ensure that all power generators and heavy duty equipment are kept in noise proof housing to minimize effects of their noise levels.
Surface Drainage	<ul style="list-style-type: none"> Development storm water management plan for the site (piping systems or retention ponds or tanks) for implementation after the building is complete. Provide oil interception and grit traps to all drainage during the construction. Oil spill areas (pump locations, service bays, and stores) should be budded to prevent runoff pollution. 	Energy Resources and Use <ul style="list-style-type: none"> Ensure electrical equipment, appliances and lights are switched off when not being used. Ensure planning of transportation of materials to ensure that fossil fuels (diesel, petrol) are not consumed in excessive amounts. Monitor energy use during construction and set targets for reduction of energy use.
Solid Waste Management	<ul style="list-style-type: none"> Ensure only optimum material usage to avoid wastage and resource sustainability. Use of durable materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time. Use construction materials containing recycled content when possible and in accordance with accepted standards. Provide reusable materials such as cartons, cement bags, empty metal and plastic containers for recycling. Dispose waste more responsibly by dumping at designated dumping sites or landfills only the use of a registered waste disposal company is encouraged. Removal of existing solid wastes on the site including papers, plastics, metallic wastes, fabrics, etc. to approved public dumping area. Removal of hazardous materials (e-wastes, wastes from passenger processing) to designated areas approved by KAA. Dispose of excavated earth safely considering it could be contaminated. 	Water Resources and Use <ul style="list-style-type: none"> Ensure quantification of construction water. Ensure no wastes are discharged into open drainage systems. Provide drainage outfalls with oil interceptors and grit traps.
		Violation of Rules and Regulations <ul style="list-style-type: none"> Ensure that all building plans are approved by the Local Authority and the local Occupational Health and Safety Office. Registration of the premises under the Factories and Other Places of Work Act Cap514, Laws of Kenya is mandatory. A general register should be kept within the facility as stipulated in Sec 62 (1) of the Factories and Other Places of Work Act.
Dust and Gaseous Emissions	<ul style="list-style-type: none"> Avoid dusty excavation works to the extent possible, especially during the dry weather. Ensure construction equipment emits minimal emissions. Sensitize truck drivers to avoid unnecessary revving vehicle engines and switch off vehicle engines. Ensure proper planning of transportation of materials. Sprinkle water on dry materials to prevent dust emissions. 	Occupational Health and Safety Catastrophes <ul style="list-style-type: none"> The abstract of the Factories and Other Places of Work Act must be displayed at prominent places within the site. Ensure that provisions for reporting incidents, accidents and dangerous occurrences during construction using prescribed forms obtainable from the local Occupational Health and Safety Office are in place. Ensure that the premises are insured as per statutory requirements (third party and workman's compensation). Develop, document and display prominently an appropriate policy for construction works. Provisions must be put in place for the formation of a Health and Safety Committee (with appropriate representation) during the construction. Ensure that machinery, equipment, personal protective equipment, appliances and hand tools used in construction do comply with the prescribed safety and health standards and be appropriately installed maintained and safeguarded. All machines and other moving parts of equipment must be safe to the workers from injury.
Effluent Emissions	<ul style="list-style-type: none"> Provide means for handling sewage generated by construction workers. Conduct regular checks for sewage pipe blockages or damages since such vices 	can lead to release of the effluent into the land and water bodies during construction.

- Train and supervise workers safety of machinery use and other procedures/operations.
- Equipment e.g. fire extinguishers must be examined by authorized persons.
- Ensure that materials are stored or stacked in such manner as to ensure their stability and prevent any fall or collapse.
- Ensure that items are not stored/stacked against weak walls and partitions.
- Design suitable documented emergency preparedness and evacuation procedures to be used during any emergency.
- Ensure that adequate provisions are in place to immediately stop any operations where there is an imminent and serious danger to health and safety and to evacuate workers.
- Ensure that the most current emergency telephone numbers posters are prominently and strategically displayed within the construction site.
- Well stocked first aid box which is easily available and accessible should be provided within the premises at all times during construction.
- Provision must be made for persons to be trained in first aid, with a certificate issued by a recognized body.
- Firefighting equipment such as fire extinguishers and hydrant systems should be provided at strategic locations such as stores and construction areas.
- Regular inspection and servicing of the equipment must be undertaken by a reputable service provider and records of such inspections maintained.
- Hazard-warning signs "NO SMOKING", "SWITCH OFF ENGINE", "SWITCH OFF MOBILE PHONE" at different strategic places at the proposed station.
- Ensure that workers at the excavation sites and other dusty sites are adequately protected from inhalation of substantial quantities of dust through provision of suitable protective gear.
- Provide workers in areas with elevated noise and vibration levels, with suitable ear protection equipment such as ear muffs.
- Suitable overalls, safety footwear, dust masks, gas masks, respirators, gloves, ear protection equipment etc should be made available and construction personnel must be trained to use the equipment.
- Ensure that construction workers are provided with an adequate supply of wholesome drinking water which should be maintained at suitable and accessible points.
- Ensure that conveniently accessible, clean, orderly, adequate and suitable washing facilities are provided and maintained in within the construction site.
- All work places must be kept in a clean state, and free from effluvia arising from any drain, sanitary convenience or nuisance during construction.
- Enough space must be provided within the premises to allow for adequate natural ventilation through circulation of fresh air.
- There must be adequate provision for artificial or natural lighting in all parts the

premises in which persons are working or passing.

- Circuits must not be overloaded.
- Distribution board switches must be clearly marked to indicate respective circuits and pumps.
- There should be no live exposed connections.
- Electrical fittings near all potential sources of ignition should be flame proof.
- All electrical equipment must be earthed.

The full report of the proposed project is available for inspection during working hours at:

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED DEVELOPMENT OF CORDISONS LAMU WIND POWER PROJECT IN LAMU COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Cordisons International (K) Ltd) intends to develop a wind power project with an expected output of 300 MW in Lamu.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impacts Proposed Mitigation Measures

- | | |
|----------------------------------|---|
| Archeology and cultural heritage | <ul style="list-style-type: none"> • Consider engaging an archeologist during the construction phase to monitor excavated areas for potential archeological finds around each wind turbine location. |
| Terrestrial Ecology | <ul style="list-style-type: none"> • Where possible avoid destruction of trees. • Use dust suppression methods such as watering down excavated areas during dry periods to avoid dust generation impacts on ecology. • Livestock and wild herbivores should be allowed to graze/browse over most of the landscape to sustain dispersal and spatial recruitment of plant species. • Micro-siting of the turbines should be done away from riverine areas. • No construction activities shall occur within |

Ventilation and
Electricity

- a radius of 500m from priority plant species such as *Osyris Lanceolata* trees.
- Surface water and ground water**
- Stockpiles of excavated soil should be banded to prevent erosion and sedimentation which would lead to silt laden run-off.
 - Silt laden run-off should be directed to settlement/silt ponds to remove suspended solids prior to discharge to nearby watercourses.
 - Any on site refueling operations of construction plant and equipment will be maintained in a good state of repair with minimal leaks.
 - Storage of hydrocarbons and chemicals on site shall be in banded areas to prevent surface water and groundwater contamination.
- Noise**
- The proponent to ensure that all construction and operational phase activities comply with the requirements of the Environment Management and Coordination (Noise and excessive vibration pollution) Regulations 2009).
 - Ensure that a 500m buffer zone is maintained between a wind turbine and the nearest household.
- Ornithology**
- Critical devices such as the rotor, generator, gear box and cooling system should be equipped with protection systems to ensure safe and proper shutdown of equipment in sensitive periods and avoid bird collisions.
 - Tree clearing (bird habitats) should be minimized by siting access tracks to the wind turbines away from the natural habitats such as woodlands.
 - Tree clearing should be completed prior to or after the core bird breeding season for woodland and grassland birds.
 - Ensure that good site practices (Waste disposal of litter, dust control, stabilization of disturbed areas, etc) and procedures are used to reduce.
- Socio-economic**
- Give priority to youths from the area in jobs to be created during the construction and operational phase of the project.
 - Endeavour to use locally available construction materials and suppliers for the project construction activities.
 - Engage the local community and acquire approval from relevant lead agencies prior to upgrading existing E407 road and new access tracks to each wind turbine.
 - Provide prudent advice to the community trust fund on types of projects community should engage to uplift their livelihood.
- Transport**
- Ensure that all wind turbines components are transported in accordance with axle load limits.
 - Ensure that relevant lead agencies and Kenya police are involved for the safe transportation of abnormal loads from Mombasa to the project site.
 - All construction related plant and equipment should adhere to stipulated speed limits during the construction and operational phases respectively.
- Visual impact**
- Maintain uniform size and design of wind turbines (hub height, rotor diameters, etc)
 - Paint turbines a uniform, matt non- reflective

color while observing air navigation marking regulations.

- Shadow flicker**
- Ensure that shadow flicker does not exceed international guidelines of either 30 hours per year or 30 minutes a day at the households within the project footprint area.
- Health and Safety**
- Proponent to comply with the OSHA, 2007 and relevant subsidiary legislation throughout the construction and operational phase of the project.
 - Contractor to undertake appropriate health and safety risk assessments and produce a safety method statement for the construction of the project.
 - Provide health and safety induction and ongoing refresher training during the construction phase of the project.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Lamu County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.
