THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED MUKURUMUDZI DAM

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Kwale International Sugar Company Ltd) is proposing to construct and operate an earth dam in Mivumoni Location, Msambweni, Kwale County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
Reduced water flow	<ul style="list-style-type: none"> • Dam to impound flood waters only during peak flows. • A WARMA approved-Dam design to incorporate discharge mechanism for environmental flow during dry seasons.
Air pollution	<ul style="list-style-type: none"> • Regular dust suppression by use of water bowsers along material transport routes • All embankment material ferrying tippers to be leveled off before using any public road. • Vehicle speed control checks within 200 meters of the proposed site. • Provide requisite personnel protective equipment to workers.
On-site Population pressures	<ul style="list-style-type: none"> • Non skilled workers to be recruited locally to reduce pressure on site worker camp.
Change in water quality	<ul style="list-style-type: none"> • Periodic monitoring of water quality as per the Water quality regulations, 2006. • Restrict vehicle servicing and sanitary blocks in areas outside the proposed reservoir area. • Use sub surface drip irrigation system to conserve water and control fertilizer use. • Clear vegetation in reservoir area prior to inundation. • Create buffer zones between the proposed reservoir and the cane plantation. • Regular monitoring for invasive weeds • Cleaning, maintenance and repairs of vehicles and machinery to be strictly undertaken in designated bay.
Pollution from waste	<ul style="list-style-type: none"> • Adequate sanitation facilities to be provided for workers. • Schedule management of waste from the worker camp. • All used oils from construction machinery to be stored and collected by registered waste handling firms for disposal. • All green biodegradable waste to be composted and used in site rehabilitation.
Loss of vegetation	<ul style="list-style-type: none"> • Stripped vegetation will be composted and used for rehabilitation of burrow

areas and the embankment.

- Proponent establishing a 20,000 tree seedling nursery for conservation purposes.
 - Excavated arable soil from the reservoir zone to be used for rehabilitation purposes.
- Water borne diseases
- Convey water from reservoir through pipes rather than canals and furrows.
 - Stock the new dam with fresh water fish to control larvae.
- Dam and community safety
- Monitor structural performance and hydrological regime of catchment areas
 - Formulation of dam Operation and Maintenance schedules.
 - Restrict access to construction site by unauthorized persons.
 - All dam and spillway designs to be approved by WARMA prior to dam construction.
 - Dam constructed to withstand a one in five hundred flood return period.
- Soil erosion, sedimentation
- Plant adequate vegetation around the embankment.
 - Survey and mark all drainage channels prior to construction and repair failed drains after major storms.
 - Regular inspections.
- Water user conflict
- Installation of river gauging systems both upstream and downstream of the dam wall.
 - Actively update and engage all stakeholders through the Mukurumudzi River Water Users Association meetings.
 - Create a separate watering point for local community's livestock.
- Noise Pollution
- Proponent to create alternative routes to site through the extensive farmland for material ferrying to avoid disruption of resident community along public roads.
- Loss of riverine cultivars
- Compensate for any food crop that may be lost during construction and/or inundation.
 - Prioritize employment of local communities for sustained incomes.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Kwale County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED DEVELOPMENT OF A PETROL FILLING
ON PARCEL NO. NAROMORU BLOCK 1 RAGATI/ 1528 IN
NYERI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Daniel K. Lekupe) intends to install three underground storage tanks of the capacity of 20,000litres, 10,000litres and 6,000 for Diesel, Super and Kerosene respectively, a fully automated filling system, loading and offloading area, Office block and fire fighting system and other associated civil and electrical works.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Loss of vegetation	<ul style="list-style-type: none"> • Cut only those trees that are directly affected by the siting of the filling station.
Air pollution	<ul style="list-style-type: none"> • Periodic watering of the non-paved parts and the roads during dry seasons. • Control speed and operation of construction vehicles. • Sensitize the construction workers on the environmental issues. • Ensure engines are switched off when waiting refueling. • Introduction of unleaded oils and low sulfur diesel as demand raises that has less harm to the environment.
Waste generation	<ul style="list-style-type: none"> • Garbage should be disposed off in accordance to the councils requirements • Provide refuse waste bins at strategic points. • Contract licensed waste handlers to dispose of waste. • Encourage waste separation by the station operators in different
Waste water generation	<ul style="list-style-type: none"> • Disposal of all liquid waste into septic tanks • Proper storage ,handling and disposal of new and used oil and related wastes • Maintaining plant and equipment to avoid leaks
Noise pollution	<ul style="list-style-type: none"> • Maintain plant equipment if present/used • Construction activities to be restricted to day time • Appropriate selection of machinery
Storm water	<ul style="list-style-type: none"> • Develop a storm water drainage system and linkage to natural drains. • Ensure efficiency of drainage structures through proper design and maintenance • Construct drains to standard specifications • Regular inspection of oil interceptors and drainage channels for any leaks
Health and safety	<ul style="list-style-type: none"> • Provide cleaning drinking water • Provide protective gear for instance ear muffers, helmets and aprons

- Provide sanitary facilities for the workers
 - Ensure all health and safety requirements e.g. fire exits and firefighting equipment are installed.
 - Workers should be given the appropriate protective attire (aprons, dustcoats).
 - Provide first aid kit.
 - All wastes should be properly disposed at council designated sites.
 - Employ cleaners to ensure general cleanliness of the premises.
 - Workers should be trained on occupational health & safety and first Aid.
 - Train staff on petroleum product handling.
- Fire risk
- Underground fuel storage tanks fitted with leakage sensors.
 - Install "No smoking" alert signs to avoid accidental ignition of fire.
 - Provision of three fire extinguishers.
 - Place 'fire outbreak advisory' notices at strategic locations.
 - Regular inspection of fire extinguishers by a registered agency.
 - Windows on the buildings should not be fitted with grills .
 - Undertaking periodic fire drills for the workers.
- Increased water demand
- Recycling of wastewater where appropriate.
 - Install water taps which turn off automatically when water is not in use.
 - Provide on-site water storage tanks to harness rainwater.
 - Put up notices advising users on need to conserve water.
- Increased energy demand
- Switch off electrical appliances when not in use.
 - Provide for adequate natural lighting in facility to reduce consumption.
 - Use energy saving bulbs including those for street and security lights.
 - Explore the use of solar energy.
 - Provide standby generator for instances of power cuts.
- Accidents and incidents
- Enforce speed limits for construction vehicles especially along road links leading to the site.
 - Provide billboards the entrance to notify motorists about the development.
 - Construction of 100 m long acceleration and deceleration lanes.
 - Clear marking of 'Exit' and 'Entry' points.
 - Discourage roadside parking along Nyeri- Nanyuki highway.
- Security concerns
- Provide security guards.
 - Lighting as well as security alarms should be installed in strategic positions within the site.
 - Install surveillance cameras.
- Decommissioning
- Review the prevailing planning and development policies.

- Review the neighborhood development trends.
- Ascertain the building suitability for human habitation.
- Prepare a demolition plan.
- Issue vacation notices.
- Fencing/hoarding of the site.
- Disconnection and removal of utilities e.g. water pipes, electricity and telephone cables.
- Remove all the underground facilities like water pipes, sewer lines, electricity and telephone cables.
- Use of serviced and greased equipment to reduce noise.
- Demolition work to take place between 8.00am and 5.00pm so as not to interfere with night hours.
- Demolition workers to be provided with ear mufflers.
- Reuse or sell the salvaged materials.
- Disposal of waste at designated council sites.
- Planting of vegetation at the site.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED DEVELOPMENT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Fort View Spa and Resort Limited) is proposing to construct 288 apartments and 30 shops.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation Measures

- Equipment assembling on site
- Ensure all the necessary equipment for earth moving is brought on site when its use is almost due.
 - Ensure a central place for the earth movers and other equipment is designated to avoid littering the entire site with machinery/equipment.
 - Ensure a shed where fuel/oil for the machines will be kept is prepared in advance and made in such a manner that any spills can be handled with ease.
- Site clearance
- The earth movers should be made to work gently on the land to avoid too much dust from being produced.
 - Ensure twigs/rooting system uprooted are all kept at one point where it could be converted to fuel wood.
 - Excess rubble and soils should all be collected at one point for re-use or relocation/transportation to a designated dumping site.
- Excess soils and rubble management
- Ensure any excess soils are either dumped in a specially designated place

- within the site for eventual re-use or disposal.
- Dumping of any excess soils and rubble should be at a NEMA approved and duly licensed by the municipal council of Mombasa.
 - Sell any valuable soils to firms engaged in land scaping and gardening.
 - Reserve some of the soils for eventual land scaping and gardening of the site after or immediately to construction activities ending.
- Solid waste management during construction
- Ensure two casual workers are assigned the task of collecting any litter on site on an hourly basis during the working hours of every day.
 - Ensure solid waste receptacles are also on site for the purpose of the workers on site and any other persons who visit the site to drop their litter.
 - Ensure all solid wastes in the receptacles and all collected solids within the construction site are all weekly collected for eventual dumping at a designated dumping site duly licensed by NEMA and approved by the city council of Mombasa.
 - Ensure daily surveillance to the beach in an effort to collect any solids emanating from the construction site.
- Construction site prudent management.
- Ensure the site is managed in a manner that order is clearly evident with areas designated as for construction materials, washrooms for construction workers, changing rooms for construction workers e.t.c.
 - Ensure there is established an order of deliveries such that the site does not become shabby with all areas covered with construction materials and leaving little space for movement of workers on site.
 - Ensure sanitary facilities that heed to gender disparities i.e. sanitary facilities for women and men and ensure all workers use them and not to resort to the nearby bushes.
 - Ensure sitting (location of toilets) of sanitary facilities takes serious heed to the direction wind normally blows to avoid stench/foul smell from being nuisance to neighbours.
- Flora conservation
- Ensure the site is vegetated once construction activities are done.
 - Ensure the area is landscaped with a view to preserve certain species of trees already growing or planting others and carefully tendering them.
 - Selection of trees to be planted should be guided by their being indigenous or their being capable of greening the site and enhancing the aesthetic beauty.
- Occupational health and safety concerns
- Ensure an OHS plan is put in place at the construction site.
 - Provide all construction workers with requisite PPE devices and ensure they are used correctly.
 - Ensure a well stocked first aid kit is in place at the construction site and all workers are aware of its availability.
 - Signage to guide and direct workers and visitors should be placed at strategic

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Cortec Mining Kenya Limited of P. O. Box 28411-00200 Nairobi) intends to construct a processing plant for Niobium and associated rare earths at a site near the mining area in Mrima Hill.

The proposed plant will involve the construction of the following structures:-

- Process plant occupying an area of 700m X 300m with a roof height of about 20m including a Hydrochloric acid generation and recycling facility.
- A 600,000 liter Water Tank Farm occupying an area of 150m X 250m.
- Final Concentrator Building occupying an area of 150m x 60m.
- Workshops occupying an area of 150m x 200m.
- Stores occupying an area of 60m x 200m.
- Administration Centre occupying an area of 60m x 200m.
- Fuel tanks, Power Generator building, a 5 MW Diesel Power Station Machinery Yard and Repair Bay occupying an area of 150m x 200m.
- Slurry and Waste Dumps with Water Recovery Dams.
- The TSF (maximum height of 53 m).
- The Waste Rock Dump (maximum height of 30 m).
- Perimeter fence and other security fences.

The total plant area footprint measures approximately 460,000m². The plant will operate 24 hours per day, six days per week allowing one day per week for maintenance

The following are the anticipated environmental impacts and proposed mitigation measures:

Impacts

Mitigation Measures

- | | |
|---|---|
| Heavy water use | <ul style="list-style-type: none"> • The proponent should develop a Sustainable Water Management System Plan in collaboration with the regional WRMA office in order to ensure minimal impact to existing water systems especially the overstretching or depleting the aquifers. This could include the option of using of sea water which is available close to the site. |
| Radiation risks | <ul style="list-style-type: none"> • The proponent should ensure that radionuclides will be immobilized within the processing plant to reduce radioactivity to natural levels within the local area. • This containment should include the transportation of materials from the mining area and movement of final products for export. • A comprehensive radiation dosimetry monitoring program should be prepared in collaboration with the Kenya Radiation Protection Board. |
| Noise and vibration | <ul style="list-style-type: none"> • Good practice in the prevention and control of noise sources should be established based on the prevailing land use and the proximity of noise receptors such as communities or community use areas in accordance with the NEMA regulations. |
| Dust and gaseous emissions | <ul style="list-style-type: none"> • Appropriate dust suppression techniques should be used and dusty materials enclosed or operated with efficient dust suppressing measures include wet suppression at key sources such as haul roads and material handling points. • The proponent should use the recommended reduction and control strategies for gaseous emissions. |
| Tailings management | <ul style="list-style-type: none"> • The design, operation and maintenance of structures in the TSF should be done according to internationally recognized standards based on risk assessment strategy. |
| Solid waste | <ul style="list-style-type: none"> • Non-hazardous solid waste should be managed through an integrated solid waste management approach in accordance with the NEMA regulations. |
| Hazardous material and waste | <ul style="list-style-type: none"> • All hazardous wastes should be isolated and separated from the rest of the waste and stored within appropriate secondary containment to be disposed of separately in accordance with NEMA regulations. |
| Population influx | <ul style="list-style-type: none"> • Recruitment of employees should give priority to the local community within the project area. |
| Visual impact | <ul style="list-style-type: none"> • Visual impact can be minimized by incorporating appropriate landscaping and beautification strategies. The processing plant should try and blend into the existing environment. |
| HIV/AIDS transmission and other social ills | <ul style="list-style-type: none"> • Strengthening advocacy through awareness training in HIV/AIDS and other STDs and provide counseling and testing for HIV/AIDS to the personnel |

and local community.

Emerging environmental issues • Conducting regular environmental monitoring according to the recommended environmental monitoring plan in the ESIA report and undertake annual environmental auditing in accordance with the Environmental Impact Assessment and Audit Regulations (2003).

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Kwale County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

B. M. LANGWEN,
