The following are the anticipated environmental impacts and proposed mitigation measures:

#### Impacts

#### Mitigation Measures

Heavy water use	<ul style="list-style-type: none"> <li>• The proponent should develop a Sustainable Water Management System Plan in collaboration with the regional WRMA office in order to ensure minimal impact to existing water systems especially the overstretching or depleting the aquifers. This could include the option of using of sea water which is available close to the site.</li> </ul>
Radiation risks	<ul style="list-style-type: none"> <li>• The proponent should ensure that radionuclides will be immobilized within the processing plant to reduce radioactivity to natural levels within the local area.</li> <li>• This containment should include the transportation of materials from the mining area and movement of final products for export.</li> <li>• A comprehensive radiation dosimetry monitoring program should be prepared in collaboration with the Kenya Radiation Protection Board.</li> </ul>
Noise and vibration	<ul style="list-style-type: none"> <li>• Good practice in the prevention and control of noise sources should be established based on the prevailing land use and the proximity of noise receptors such as communities or community use areas in accordance with the NEMA regulations.</li> </ul>
Dust and gaseous emissions	<ul style="list-style-type: none"> <li>• Appropriate dust suppression techniques should be used and dusty materials enclosed or operated with efficient dust suppressing measures include wet suppression at key sources such as haul roads and material handling points.</li> <li>• The proponent should use the recommended reduction and control strategies for gaseous emissions.</li> </ul>

Population influx	<ul style="list-style-type: none"> <li>• Recruitment of employees should give priority to the local community within the project area.</li> </ul>

#### Visual impact

- Visual impact can be minimized by incorporating appropriate landscaping and beautification strategies. The processing plant should try and blend into the existing environment.

#### HIV/AIDS transmission and other social ills

- Strengthening advocacy through awareness training in HIV/AIDS and other STDs and provide counseling and testing for HIV/AIDS to the personnel and local community.

#### Emerging environmental issues

- Conducting regular environmental monitoring according to the recommended environmental monitoring plan in the ESIA report and undertake annual environmental auditing in accordance with the Environmental Impact Assessment and Audit Regulations (2003).
