THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED IMPROVEMENT AND DUALLING
OUTER-RING ROAD C59, NAIROBI COUNTY
INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Kenya Urban Roads Authority) is proposing to upgrade to bitumen standards Outer-Ring Road (C59) to dual carriageway of 2x2 lanes, in Nairobi County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>	
Land Degradation and Soil Loss	<ul style="list-style-type: none"> • Comprehensive environment impact assessment study shall be undertaken for all construction camp sites and approved by NEMA before occupation. • Construction wastes (including asphalt residuals, oils/grease, top soils, vegetation and other materials) be disposed off in approved dumping areas. • Milled asphalt from Outer Rings Road be re-utilized on same roads or elsewhere. • Prepare a management and rehabilitation plan for construction camp sites as well as the materials sites. • Construction camps and materials sites be rehabilitated back to their original conditions upon project completion. 	<p>compatibility with the adjoining land.</p> <ul style="list-style-type: none"> • Any raised structures should be attractive and easy to use by the road users, e.g. foot bridges.
Air Quality	<ul style="list-style-type: none"> • Ensure constant watering of construction surfaces and dry materials during to keep dust low throughout the project areas and the deviation routes. • Similar measures will be necessary at the material sites as well as the access road for the delivery trucks. • Maintain construction machinery and vehicles at reasonable state of service to minimize unnecessary exhaust emission into the atmosphere. 	<p>River and Stream Crossings</p> <ul style="list-style-type: none"> • Protect the main stream beds and banks from destruction and excessive earth discharge during construction. • Allow regeneration of vegetation along the flood plains. • Water for construction abstracted from any surface water source should be upon issuance of a water abstraction permit from Water Resources Management Authority (WRMA) upon application. • No discharge of pollutants from any point of the construction activities shall be discharged into the rivers or streams. • Any interference with the river/stream channels shall be suctioned by the Water Resources Management Authority (WRMA) upon application.
Noise and vibrations	<ul style="list-style-type: none"> • Inform the neighboring communities of any unusual construction activities with high noise levels on time, expected duration and any safety precautions. • Establish a constant link with the affected communities in this regard. • Utilize low noise machinery for the construction to the extent possible (Noise levels be below 35dBA to the nearest receptors by days). • Undertake assessment of building structures within the work areas with respect to their capacity to withstand compaction vibrations. • Limited blasting for hard stone quarries shall only be done after approval by the relevant authorities and also effective public information. • Provide all construction workers with relevant safety gear including ear corks at all times while at work and enforce application. • Working at night within settled and built up areas will be upon issuance of necessary permits from the National Environment Management Authority (NEMA). 	<p>Material Sites</p> <ul style="list-style-type: none"> • Environmental impact assessments (EIA) to be undertaken prior to extraction of materials from identified sites. • Material extractions and delivery should only be done during the day. • If borrow pits and quarries are operated, they be fenced off. • Rehabilitation of materials sites to take place upon exhaustion. • Material extraction should be done in dump conditions to keep dust low, especially if it is located within settled areas. • Consider establishment of boreholes to provide construction water as opposed to abstraction from the constraint public sources. • Oil storage areas should be slabbed and provided with oil interceptors and clean exit drains from the camp sites and oil storage yards. • Obtain water permit for the identified abstraction point for the construction water.
Drainage	<ul style="list-style-type: none"> • Following the obvious blockage of natural drainage along sections of the project road, it might require limited disruption of settlements for safe drainage outfalls. • Provision of adequate drainage system on sections of the project road may require that deep cuts are provided for effective drainage system. 	<p>Social Impacts</p> <ul style="list-style-type: none"> • Appropriate and adequate awareness creation and social engineering to all stakeholders, especially road users will need to be undertaken. • Information signage and speed bumps will need to be erected for use during construction. • There should be continuous watering of the road during construction. • Dust masts and first aid kits should be provided to the construction workers. • Provide motor able deviation routes that are accessible and usable during construction. • Provide alternative accesses and points to social facilities. • Provide appropriate pedestrian walkways during construction. • There should be public announcements as to when and where public amenities are to be affected. • In addition, the relocation of public amenities and services along the road corridors need to be done timely and
Topography and Physiology	<ul style="list-style-type: none"> • Material sites should be rehabilitated to near the original status as soon as they are exhausted to restore the micro-topographical outlook. • Road sections with significant cuttings should be done such as not to lose 	

Health and Safety	speedily.
	<ul style="list-style-type: none"> • Maintain all construction road sections wet to prevent dust emissions. • Ensure minimal interaction of traffic flow during construction. • Facilitate flow of surface runoff along the project roads to avoid unnecessary flooding. • Ensure driving discipline among the drivers and other construction workers with respect to the public safety. • Enhance information and appropriate signage at all time along deviations and work areas. • Ensure Occupational Health and Safety (OHS) requirements are observed at all times during the construction. • Provide acceptable alternative public bus stands during the construction. • Identify appropriate locations for installation of pedestrian crossings as part of the road project (footbridges, underpasses, crossing rumps, etc.).
Traffic Management including traffic deviations	<ul style="list-style-type: none"> • Avoid to the extent possible deviating traffic into the estate roads to minimize conflicts. • Where necessary, the affected roads should be maintained well for the period of construction. • Appropriate signage and information will be provided at all the deviations (beginning and end points). • Ensure all deviations are maintained for smooth flow of traffic. • Information on the intention any sections of the abutting roads early to prepare the residents. • Road users accessing JKIA should be encouraged to use alternative highways (the bypass, Mombasa road and others for minimum inconveniences.
Waste Management	<ul style="list-style-type: none"> • All spoil generated be disposed off on pre-identified and approved locations (appropriate impact assessment should be completed for the locations). • Involve the City Authorities on the removal and disposal of the roadside solid wastes to approved dumping areas. • Provide workers with appropriate protective gear during the waste removal process. • Camp sites shall be provided with appropriate solid waste holding receptacles to be regularly emptied for disposal. • Construction camp management to provide an inventory of waste and an acceptable waste management plan.
Economic Aspects	<ul style="list-style-type: none"> • Enhance facilitated accessibility into premises whenever need arises. • Provide liaison person with landowners on timing and approach directions for effective flow of general traffic at all times. • Make provisions for small-scale traders along the road corridor as part of the long terms physical planning of the area.
Displacement Issues	<ul style="list-style-type: none"> • Complete the RAP report and verify provisions therein in collaboration with

key stakeholders.

- Undertake comprehensive compensation process and ensure compensation before commencement of the project works.
- Ensure livelihoods restorations where disrupted,
- Institute legal provisions for acquisition of encroached road reserve.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED UPGRADING OF RABAI – BAMBURI – BOMBOLULU – MTWAPA – KILIFI 132KV TRANSMISSION LINE AND ASSOCIATED SUBSTATIONS

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed upgrade of Rabai – Bamburi – Bombolulu – Mtwapa – Kilifi 132KV Transmission line and associated Substations.

The Proponent (Kenya Electricity Transmission Co. Ltd.) of the proposed upgrade of Rabai – Bamburi – Bombolulu – Mtwapa – Kilifi 132KV Transmission line and associated Substations has proposed to carry out reconstruction of the existing approximately 60km of 132KV transmission line between Rabai and Kilifi substations on self – supporting steel lattice towers, instead of the existing wooden poles and a loop in loop out double circuit to Bamburi substation. The project works involve the addition of two step – down substations (132/33KV) at Mtwapa and Bombolulu.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Noise and vibration	<ul style="list-style-type: none"> • Sensitise construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. • Regular servicing of engines and machine parts to reduce noise generation. • Ensure that all generators and heavy duty equipment are insulated or placed in enclosures (containers) to minimize ambient noise levels. • The noisy construction works will entirely be planned to be during day

	time when most of the neighbours will be at work.	vegetation and habitat	within the site.
	<ul style="list-style-type: none"> • Provide necessary PPE to workers who may be exposed to high levels of noise and ensure proper and constant use. • All construction equipment and machinery to be used must be tested to verify if they are compliant with Kenya and the internationally acceptable standards of noise. 		<ul style="list-style-type: none"> • With Assistant from community, KWS and KFS, initiate a tree planting exercise • Design and implement an appropriate landscaping programme for the substations site. • Ensure proper demarcation and delineation of the project area to be affected by construction works. • Specify locations for trailers and equipment, and areas of the site which should be kept free of traffic, equipment, and storage.
Dust emission	<ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limit regulations. • Avoid excavation works in extremely dry weather. • Sprinkle water on graded access routes when necessary to reduce dust generation by construction and vehicles. • Stockpiles of earth should be enclosed / covered / watered during dry or windy conditions. • PPE to be provided to employees and ensure proper and constant use. • Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at site. • Dispose waste more responsibly by contracting a registered waste handler who will dispose the waste at designated sites or landfills only and in accordance with the existing laws. 	Increased Water Demand	<ul style="list-style-type: none"> • Harness rainwater and storm-water whenever possible for use in dust prevention, gardening and other site specific uses. • Install water conserving taps that turn-off automatically when water is not being used. • Promote recycling and reuse of water as much as possible • Promptly detect and repair water pipe and tank leaks.
Generation of wastewater	<ul style="list-style-type: none"> • Provide means for handling sewage generated at the construction site. • Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies. • Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated. 	Increased energy consumption	<ul style="list-style-type: none"> • Ensure electrical equipment, appliances and lights are switched off when not being used. • Install energy saving bulbs/tubes at all lighting points instead of incandescent bulbs which consume higher electric energy. • Plan well for transportation of materials to ensure that fossil fuels (diesel, transformer oil, petrol) are not consumed in excessive amounts. • Monitor energy use during construction and set targets for reduction of energy use.
Oil spills Hazards	<ul style="list-style-type: none"> • Storage and liquid impoundment areas for fuels, raw and in-process material solvents, wastes and finished products should be designed with secondary containment to prevent spills and the contamination of soil, ground and surface water. • A written substations response plan should be prepared and retained on the site and the workers should be trained to follow specific procedures in the event of a spill. • Install oil trapping equipment in areas where there is a likelihood of oil spillage. • The substations should be designed with spill prevention and detection systems to protect the environment especially where the transformers will be located. • Design appropriate protection devices against accidental discharge of transformer oil substances. • Frequent inspection and maintenance of the transformers should be done to minimize spilling. • All waste oils from maintenance of transformers and other associated equipment should be segregated and disposed properly by a reputable/registered waste handler in accordance with the waste disposal plan. 	Impacts on workers' and community health and safety	<ul style="list-style-type: none"> • Prohibit access by unauthorized personnel into the construction site • Ensure strict compliance with the Occupational Safety and Health Act (OSHA) 2007. • Train all employees and regularly sensitize them on safe working procedures. • Periodic community sensitization of the dangers posed by the project. • Place warning signs where necessary. • Erect a perimeter fence to enclose the substations.
		Soil erosion and storm-water runoff	<ul style="list-style-type: none"> • Ensure that construction vehicles are restricted to use existing graded roads. • Ensure that any compacted areas are ripped to reduce run-off. • Roof catchments will be used to collect the storm water for some substations uses. • Construction of water pans to collect storm water for substations use, tree planting and landscaping.
		Fire safety	<ul style="list-style-type: none"> • Conduct a fire risk assessment. • Ensure compliance with fire safety regulations and install all necessary fire safety equipment. • Conduct regular trainings and fire drills for employees. • Periodic maintenance to ensure that, there are;- no overloaded electrical
Destruction of existing	<ul style="list-style-type: none"> • Designate access routes and parking 		

systems; no incorrectly installed wiring; no live naked wires; and fuel store areas are continuously monitored.

- Build capacity for community on fire related issues including fighting and vigilance.
- Create fire breaks (ploughed strips) on strategic areas.

The full report of the proposed project is available for inspection during working hours at:

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED 220 kV TURKWEL-ORTUM-KITALE
ELECTRICITY TRANSMISSION LINE

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Kenya Electricity Transmission Company Ltd (KETRACO)) intends development of a single circuit 132kV Transmission Line from Nyahururu to Maralal.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation Measures

Impacts on Agricultural Land	<ul style="list-style-type: none"> KETRACO to provide monetary compensation for cessation of land use and any loss associated with compromised land productivity. Some of the access roads required during project implementation should be rehabilitated.
Impacts on Drainage, Surface Waters and Water Resources	<ul style="list-style-type: none"> Positioning of towers away from natural drainages and floodways. Position towers so as to leave a protection zone of 15 m at river and streams. Channel effluents to septic tank and run-off from work surfaces to a retaining pond.
Potential Aesthetic Impacts	<ul style="list-style-type: none"> The OHTL routes have been established so as to meet the co-inhabitancy requirements imposed by the natural landscape. Most of the transmission line route is away from main roads.
Electric and Magnetic Fields	<ul style="list-style-type: none"> The electro-magnetic field (EMF) decays very rapidly with distance from source and there should be no potential health risks for people living outside the 65 m wide way leave corridor.
Natural Vegetation	<ul style="list-style-type: none"> Clearance during construction be done manually without burning the cleared

vegetation.

Fauna

- Vegetation clearance within the Protected Areas be done under supervision of KWS and KFS personnel.
- Compensate value trees according to RAP recommendations.
- Compensatory planting of trees.
- To be mitigated at specifically identified locations by use installation of colored warning spheres on the ground conductors atop the towers if found necessary later during operation.
- Install danger sign and anti-climbing barbed wire for safety purposes on every steel tower.
- Ensure a safety officer is present at all the times during the construction phase.

Land Excavation,
Access Roads and
Campsite

- Designing transmission line route close to existing roads or line corridors.
- Rehabilitate temporary access roads after completion of works.
- Minimize the number of new roads required.
- Locate the campsite in such a way that they can have residual values like turning them into schools and other public facilities.

Soil Erosion

- Restrict use of heavy machinery and vehicles to designated work areas.
- Install soil protection works in areas sensitive to erosion prior to undertaking construction.

Substance Abuse and
Communicable Disease
Control

- Mount intensive campaign of awareness, prevention and treatment to be undertaken among the workers.
- Sensitization and education campaigns against substance abuse.
- The construction sites, contractor's accommodation areas, offices and store facility to have standard sanitation.
- Employ non-skilled labour from within the community.

Solid Waste

- Re-use some of the excavated soil for backfilling while the rest to be disposed off at designated areas.
- Dispose of waste in accordance with the NEMA guidelines.

Impact on Ambient Air,
Dust

- Set the route away from dense settlements.
- Manage dust through use of dust suppressants.
- Provide aspirators to workers at high dust generation points.

Impacts on Aviation and
Communication

- Install warning spheres in the vicinity of the aerodrome at Nasolot GR.

Potential Hazards

- A number of hazard management mechanisms could be devised to prevent and control potential hazards along the transmission line corridor and substations. These include prevention, control and management mechanisms.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette*, *Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
