PUBLIC CONSULTATION

NOTICE is given to the general public in the area of the Coast Water Services Board (CSWB) which has a license to provide water services in the counties of Kwale, Mombasa, Taita Taveta, Kilifi, Tana River and Lamu has applied to the Water services Regulatory Board for a tariff review for its agent, Kwale Water and Sewerage Company for the period 2012/2013 to 20. The Kwale Water and Sewerage Company serves the areas of Kinango, Ukunda, Kwale, Msambweni, Lungalunga, Samburu, Mazeras, Mariakani and Kombani.

Coast Water Services Board proposes an upward tariff review to enable Kwale Water and Sewerage Company to attain full cost recovery, undertake minor investments and meet conditions for improving service delivery.

The Coast Water services Board proposes to adopt rising block tariffs for all consumer categories except water kiosks.

Details of the current tariff and the proposed tariff can be obtained from info@cwsb.go.ke or at the Kwale Water and Sewerage Company offices in Kwale town.

Written comments on improvements on service delivery and/or justified objections to the upward tariff review should be addressed to the Managing Director, Kwale Water and Sewerage Company, P.O. Box 18, Kwale or info@kwalewater.co.ke

The closing date for such comments shall be on 23rd September, 2013 (30 days after the publication of this notice)

A public consultation meeting shall be held on 12th September, 2013 (at least 20 days after the publication of this notice) at Kwale County Cultural Centre Starting at 9.00 AM. All members of the public in the area of supply are invited to attend.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

**ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED UPGRADING OF RABAI – BAMBURI –
BOMBOLULU – MTWAPA – KILIFI 132KV TRANSMISSION
LINE AND ASSOCIATED SUBSTATIONS**

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed upgrade of Rabai – Bamburi – Bombolulu – Mtwapa – Kilifi 132KV Transmission line and associated Substations.

The Proponent (Kenya Electricity Transmission Co. Ltd.) of the proposed upgrade of Rabai – Bamburi – Bombolulu – Mtwapa – Kilifi 132KV Transmission line and associated Substations has proposed to carry out reconstruction of the existing approximately 60km of 132KV transmission line between Rabai and Kilifi substations on self – supporting steel lattice towers, instead of the existing wooden poles

and a loop in loop out double circuit to Bamburi substation. The project works involve the addition of two step – down substations (132/33KV) at Mtwapa and Bombolulu.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Noise and vibration	<ul style="list-style-type: none"> Sensitise construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. Regular servicing of engines and machine parts to reduce noise generation. Ensure that all generators and heavy duty equipment are insulated or placed in enclosures (containers) to minimize ambient noise levels. The noisy construction works will entirely be planned to be during day time when most of the neighbours will be at work. Provide necessary PPE to workers who may be exposed to high levels of noise and ensure proper and constant use. All construction equipment and machinery to be used must be tested to verify if they are compliant with Kenya and the internationally acceptable standards of noise.
Dust emission	<ul style="list-style-type: none"> Ensure strict enforcement of on-site speed limit regulations. Avoid excavation works in extremely dry weather. Sprinkle water on graded access routes when necessary to reduce dust generation by construction and vehicles. Stockpiles of earth should be enclosed / covered / watered during dry or windy conditions. PPE to be provided to employees and ensure proper and constant use. Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at site. Dispose waste more responsibly by contracting a registered waste handler who will dispose the waste at designated sites or landfills only and in accordance with the existing laws.
Generation of wastewater	<ul style="list-style-type: none"> Provide means for handling sewage generated at the construction site. Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies. Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated.
Oil spills Hazards	<ul style="list-style-type: none"> Storage and liquid impoundment areas for fuels, raw and in-process material solvents, wastes and finished products should be designed with secondary containment to prevent spills and the contamination of soil, ground and surface water. A written substations response plan should be prepared and retained on the site and the workers should be trained to follow specific procedures in the event of a spill. Install oil trapping equipment in areas

	<p>where there is a likelihood of oil spillage.</p> <ul style="list-style-type: none"> • The substations should be designed with spill prevention and detection systems to protect the environment especially where the transformers will be located. • Design appropriate protection devices against accidental discharge of transformer oil substances. • Frequent inspection and maintenance of the transformers should be done to minimize spilling. • All waste oils from maintenance of transformers and other associated equipment should be segregated and disposed properly by a reputable/registered waste handler in accordance with the waste disposal plan. 	<p>water runoff</p> <ul style="list-style-type: none"> • restricted to use existing graded roads. • Ensure that any compacted areas are ripped to reduce run-off. • Roof catchments will be used to collect the storm water for some substations uses. • Construction of water pans to collect storm water for substations use, tree planting and landscaping.
Destruction of existing vegetation and habitat	<ul style="list-style-type: none"> • Designate access routes and parking within the site. • With Assistant from community, KWS and KFS, initiate a tree planting exercise • Design and implement an appropriate landscaping programme for the substations site. • Ensure proper demarcation and delineation of the project area to be affected by construction works. • Specify locations for trailers and equipment, and areas of the site which should be kept free of traffic, equipment, and storage. 	<p>Fire safety</p> <ul style="list-style-type: none"> • Conduct a fire risk assessment. • Ensure compliance with fire safety regulations and install all necessary fire safety equipment. • Conduct regular trainings and fire drills for employees. • Periodic maintenance to ensure that, there are;- no overloaded electrical systems; no incorrectly installed wiring; no live naked wires; and fuel store areas are continuously monitored. • Build capacity for community on fire related issues including fighting and vigilance. • Create fire breaks (ploughed strips) on strategic areas.
Increased Water Demand	<ul style="list-style-type: none"> • Harness rainwater and storm-water whenever possible for use in dust prevention, gardening and other site specific uses. • Install water conserving taps that turn-off automatically when water is not being used. • Promote recycling and reuse of water as much as possible • Promptly detect and repair water pipe and tank leaks. 	<p>The full report of the proposed project is available for inspection during working hours at:</p> <p>(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.</p> <p>(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Increased energy consumption	<ul style="list-style-type: none"> • Ensure electrical equipment, appliances and lights are switched off when not being used. • Install energy saving bulbs/tubes at all lighting points instead of incandescent bulbs which consume higher electric energy. • Plan well for transportation of materials to ensure that fossil fuels (diesel, transformer oil, petrol) are not consumed in excessive amounts. • Monitor energy use during construction and set targets for reduction of energy use. 	<p style="text-align: right;">B. M. LANGWEN, for Director-General,</p> <p>MR/28369999 <i>National Environment Management Authority.</i></p>
Impacts on workers' and community health and safety	<ul style="list-style-type: none"> • Prohibit access by unauthorized personnel into the construction site • Ensure strict compliance with the Occupational Safety and Health Act (OSHA) 2007. • Train all employees and regularly sensitize them on safe working procedures. • Periodic community sensitization of the dangers posed by the project. • Place warning signs where necessary. • Erect a perimeter fence to enclose the substations.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED NYAHURURU-MARALAL 132 KV TRANSMISSION LINE

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Kenya Electricity Transmission Company Ltd (KETRACO)) intends development of a single circuit 132kV Transmission Line from Nyahururu to Maralal.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation Measures

- | | |
|---|---|
| Vegetation damage, Habitat Loss and Invasion by Exotic Species Along the ROW and Access | <ul style="list-style-type: none"> • Utilize appropriate clearing techniques (e.g. Hand clearing as opposed to mechanized clearing) by using human labour as opposed to heavy machinery. • Maintain native ground cover and low |
|---|---|

Roads	<p>growing vegetation along the ROW by selective removal of tall-growing tree species and allowing low-lying grasses and shrubs in transmission line rights-of-way.</p> <ul style="list-style-type: none"> Minimize clearing and disruption to riparian vegetation. Use of discontinuous maintenance roads to reduce access to wild lands and encroachment. Replant disturbed sites with native plant species. 	Physical Body Hazards	<ul style="list-style-type: none"> Maintained to avoid pollution and enhance safety. Education/Sensitization of workers on environmental Protection and Safety. Use of appropriate PPE during manual clearing of vegetation and construction. Adopting ergonomic work flow designs that fit physical tasks to employees and not vice versa while maintaining a balance with productivity.
Soil Erosion	<ul style="list-style-type: none"> Education/Sensitization of workers on environmental Protection and Safety. Soils excavated from the tower pad area shall be used for backfilling. Soils shall not be left exposed to wind/water for long. Riverine vegetation shall be minimally disturbed during construction. Reduce soil erosion and safeguard riverbank protection. 	Loss of Land Use, Population Relocation, Land Acquisition and Resettlement	<ul style="list-style-type: none"> Provide appropriate relocation options to displaced persons. Ensure displaced persons are informed about their options and rights pertaining to resettlement; offered choices and provided with alternatives. Provide prompt compensation at full replacement cost for losses of assets attributable directly to the project; offer support after displacement, for a transition period, based on a reasonable estimate of the time likely/to be needed to restore their livelihood and standards of living. Provide development assistance in addition to compensation measures.
Air Pollution (Dust, Smoke Emissions)	<ul style="list-style-type: none"> Education/Sensitization of workers on environmental Protection and Safety. Control speed of construction vehicles. Prohibit idling of vehicles. Water shall be sprayed during the construction phase on excavated areas to reduce dust emission. Regular maintenance of plant and equipment. Provision of dust masks for use while working- in dusty conditions. Use of serviceable vehicles and machinery to avoid excessive smoke emission. 	Temporary Risk to Road Safety Along the Main Road	<ul style="list-style-type: none"> Pre-notification on the intension to move large equipment by road. Observe strict code of conduct by the transported. Electrical Materials to be transported while covered to keep away moisture.
Noise Pollution	<ul style="list-style-type: none"> Noise reduction/hearing protection devices when working with noisy equipment. Use serviceable equipment with low noise emission. Instruct truck and machinery operators to avoid raving of engines. 	Working at Heights	<ul style="list-style-type: none"> Use construction site barrier tapes to isolate the site (working) area to bar intruders from accessing the area in case of a dropping object. Test structures for integrity prior to undertaking work. Implement a fall protection program that includes training in climbing techniques and use of fall protection measures, Provide Safety Belts. Inspection, maintenance, and replacement of fall protection equipment. Use of helmets and other protective devices will mitigate against scratches, bruises, lacerations and head injuries due to dropping objects. Provide first aid facilities at the site.
Generation of Solid Waste	<ul style="list-style-type: none"> Education/Sensitization of workers on environmental Protection and Safety. Provide solid waste collection facilities (waste bins) for the temporary storage of waste prior to disposal at an appropriate and designated location. The storage yards shall be provided with waste bins/chutes. Liaise with the local authorities on suitable dumping site for generated waste. Excavation activities to be done preferably during the dry season to avoid soil erosion and siltation of rivers/streams. Excavated soil to be used for backfilling. 	Loss of Land, Structures and Crops	<ul style="list-style-type: none"> Verify land tenure. Discuss with the resident/owner. Develop a resettlement plan. Create awareness on land alternatives and resettlement options.
Risk of Fire	<ul style="list-style-type: none"> Monitor the ROW vegetation that is more susceptible to fire. No burning of any materials wherever should be permitted at the site. 	Relocation of Homesteads	<ul style="list-style-type: none"> Verify land tenure. Discuss with the resident/owner the various options and alternatives. Develop a resettlement plan. Conduct resettlement. Monitor resettled persons. Alternative land for relocation to be identified. Compute the actual no of person to be resettled. Reports on resettled persons.
Site Area and Groundwater Water Pollution	<ul style="list-style-type: none"> No waste is disposed of at the project area. A riparian distance of approx. 5m meters away from the River edge to be. 	Community	<ul style="list-style-type: none"> Awareness creation amongst the

Misconceptions	community on the project facts.
	<ul style="list-style-type: none"> Community issues responded to project progress reports and monitoring reports to be prepared and recommendations implemented. Hold a minimum of two meetings per division.
Increase in Social Vices	<ul style="list-style-type: none"> Conduct Information Education and Communication (IEC) amongst the community and the project staff. Provide condoms at village and project level.
Surface Run Off and Sedimentation from Grading for Tower Pads	<ul style="list-style-type: none"> Ensure that access roads, tower pads and substation facilities are not constructed in riparian land, floodplain, waterways and wetlands. Install sediment traps or screens to control runoff and sedimentation. Use ample culverts. Design drainage ditches to avoid affecting nearby land.
Disruption of Wetland Area Ecosystem	<ul style="list-style-type: none"> Design Tower Pad location to avoid wetland area. Prevention of soil erosion, siltation and water pollution by providing containment of excavated soil. Ensure use of waste containments. Machinery and vehicles leaking fuel or oil are not to be used in wetland areas. Removal of excavated soil from site.
Water and Sanitation Facilities	<ul style="list-style-type: none"> Education/Sensitization of workers on environmental Protection. Ensure workers have appropriate sanitary facilities (toilets) at the Project area. Provide potable water drinking. Water for construction can be obtained from the existing streams, rivers or ponds within the project area (Water abstraction permit to be obtained from the local Water Authority Office.
Electrocution from Live Power Lines	<ul style="list-style-type: none"> Ensure physical integrity of structures is maintained. Deactivating and properly grounding live power distribution lines before work is performed on, or in close proximity, to the lines. Ensuring that live-wire work is conducted by trained worker only. Ensure the workers are properly isolated and insulated from any conductive object (live-line work).
Aircraft Navigation Safety	<ul style="list-style-type: none"> The transmission line design to be such that the selected route is located at a safe and acceptable distance from any airstrip or aircraft flight path. Conduct survey to ensure Transmission line does not obstruct flights into airstrips in the vicinity. Obtain KCAA approval for tower heights.
Power Line Related Avifauna Mortalities and Interference with Cultural Heritage Sites	<ul style="list-style-type: none"> To minimize collision, undertake wire marking to alert birds to the presence of power line, allowing them time to avoid collision. Build raptors platforms on top of pylons for roosting and nesting for birds. Monitor data on electrocuted avifauna

	along the proposed transmission line.
	<ul style="list-style-type: none"> Conduct a cultural heritage impact assessment survey in the project area.
Risk of Fire	<ul style="list-style-type: none"> Monitor the ROW vegetation that is more susceptible to fire. No burning of any materials wherever should be permitted at the site.
Transmission Line	<ul style="list-style-type: none"> Segregation of demolition waste.
Demolished	<ul style="list-style-type: none"> Collection of demolished waste.
Materials	<ul style="list-style-type: none"> Transportation of demolished transmission line waste. Disposal of demolition waste.
Disturbed Transmission Line Way Leave	<ul style="list-style-type: none"> Site area landscaping. Planting of indigenous plants.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED 220 kV TURKWEL-ORTUM-KITALE ELECTRICITY TRANSMISSION LINE

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Kenya Electricity Transmission Company Ltd (KETRACO)) intends development of a single circuit 132kV Transmission Line from Nyahururu to Maralal.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation Measures

Impacts on Agricultural Land	<ul style="list-style-type: none"> KETRACO to provide monetary compensation for cessation of land use and any loss associated with compromised land productivity. Some of the access roads required during project implementation should be rehabilitated.
Impacts on Drainage, Surface Waters and Water Resources	<ul style="list-style-type: none"> Positioning of towers away from natural drainages and floodways. Position towers so as to leave a protection zone of 15 m at river and streams.

Potential Aesthetic Impacts	<ul style="list-style-type: none"> Channel effluents to septic tank and run-off from work surfaces to a retaining pond. The OHTL routes have been established so as to meet the co-inhabitancy requirements imposed by the natural landscape. Most of the transmission line route is away from main roads.
Electric and Magnetic Fields	<ul style="list-style-type: none"> The electro-magnetic field (EMF) decays very rapidly with distance from source and there should be no potential health risks for people living outside the 65 m wide way leave corridor.
Natural Vegetation	<ul style="list-style-type: none"> Clearance during construction be done manually without burning the cleared vegetation. Vegetation clearance within the Protected Areas be done under supervision of KWS and KFS personnel. Compensate value trees according to RAP recommendations. Compensatory planting of trees.
Fauna	<ul style="list-style-type: none"> To be mitigated at specifically identified locations by use installation of colored warning spheres on the ground conductors atop the towers if found necessary later during operation. Install danger sign and anti-climbing barbed wire for safety purposes on every steel tower. Ensure a safety officer is present at all the times during the construction phase.
Land Excavation, Access Roads and Campsite	<ul style="list-style-type: none"> Designing transmission line route close to existing roads or line corridors. Rehabilitate temporary access roads after completion of works. Minimize the number of new roads required. Locate the campsite in such a way that they can have residual values like turning them into schools and other public facilities.
Soil Erosion	<ul style="list-style-type: none"> Restrict use of heavy machinery and vehicles to designated work areas. Install soil protection works in areas sensitive to erosion prior to undertaking construction.
Substance Abuse and Communicable Disease Control	<ul style="list-style-type: none"> Mount intensive campaign of awareness, prevention and treatment to be undertaken among the workers. Sensitization and education campaigns against substance abuse. The construction sites, contractor's accommodation areas, offices and store facility to have standard sanitation. Employ non-skilled labour from within the community.
Solid Waste	<ul style="list-style-type: none"> Re-use some of the excavated soil for backfilling while the rest to be disposed off at designated areas. Dispose of waste in accordance with the NEMA guidelines.
Impact on Ambient Air, Dust	<ul style="list-style-type: none"> Set the route away from dense settlements. Manage dust through use of dust suppressants. Provide aspirators to workers at high

dust generation points.

- Impacts on Aviation and Communication
- Install warning spheres in the vicinity of the aerodrome at Nasolot GR.
- Potential Hazards
- A number of hazard management mechanisms could be devised to prevent and control potential hazards along the transmission line corridor and substations. These include prevention, control and management mechanisms.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

- Ensure use of waste containments.
 - Machinery and vehicles leaking fuel or oil are not to be used in wetland areas.
 - Removal of excavated soil from site.
- Water and Sanitation Facilities
- Education/Sensitization of workers on environmental Protection.
 - Ensure workers have appropriate sanitary facilities (toilets) at the Project area.
 - Provide potable water drinking.
 - Water for construction can be obtained from the existing streams, rivers or ponds within the project area (Water abstraction permit to be obtained from the local Water Authority Office).
- Electrocution from Live Power Lines
- Ensure physical integrity of structures is maintained.
 - Deactivating and properly grounding live power distribution lines before work is performed on, or in close proximity, to the lines.
 - Ensuring that live-wire work is conducted by trained worker only.
 - Ensure the workers are properly isolated and insulated from any conductive object (live-line work).
- Aircraft Navigation Safety
- The transmission line design to be such that the selected route is located at a safe and acceptable distance from any airstrip or aircraft flight path.
 - Conduct survey to ensure Transmission line does not obstruct flights into airstrips in the vicinity.
 - Obtain KCAA approval for tower heights.
- Power Line Related Avifauna Mortalities and Interference with Cultural Heritage Sites
- To minimize collision, undertake wire marking to alert birds to the presence of power line, allowing them time to avoid collision.
 - Build raptors platforms on top of pylons for roosting and nesting for birds.
 - Monitor data on electrocuted avifauna along the proposed transmission line.
 - Conduct a cultural heritage impact assessment survey in the project area.
- Risk of Fire
- Monitor the ROW vegetation that is more susceptible to fire.
 - No burning of any materials wherever should be permitted at the site.
- Transmission Line Demolished Materials
- Segregation of demolition waste.
 - Collection of demolished waste.
 - Transportation of demolished transmission line waste.
 - Disposal of demolition waste.
- Disturbed Transmission Line Way Leave
- Site area landscaping.
 - Planting of indigenous plants.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED DEVELOPMENT OF EASTERN BYPASS
VIVO PETROL FILLING STATION ON L.R. RUIRU/RUIRU
EAST/BLOCK. 1/4178, IN KIAMBU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Vivo Energy Kenya) is proposing to construct a canopy cover over the fuel dispensing pumps, mini shops, changing rooms offices, a service bay, wash bay, a tyre centre and 3No USTs with a total capacity of 90,000 litres of which 50,000 shall be diesel, 30000 Super, and 10,000 V power petrol.

The following are the anticipated impacts and proposed mitigation measures:

- | <i>Environmental Impacts</i> | <i>Mitigation Impacts</i> |
|--|---|
| Changes in hydrology/impended drainage | <ul style="list-style-type: none"> • Proper Installation of drainage structures. • Install cascades to break the impact of water flowing in the drains. • Ensure efficiency of drainage structures through proper design and maintenance. • Provide gratings to the drainage channels. • Regular checks on any sludge along drainage channels. • Visual checks of oil interceptors and drainage channels for any leaks. |
| Soil erosion | <ul style="list-style-type: none"> • Control earthworks. • Rehabilitate degraded environment to avoid siltation and wash offs. • Compact loose soils landscaping. • Ensure management of excavation activities • Control activities especially during rainy conditions • Provide soil erosion control and conservation structures where necessary. • Proper disposal of excavated loose soil. |
| Air pollution through dust and gaseous emissions | <ul style="list-style-type: none"> • Control speed and operation of construction vehicles. • Prohibit idling of vehicles. • Water should be sprayed during the construction phase of excavated areas. • Regular maintenance of construction plant and equipment. • Engage sensitive construction workers. • Proper use of PPEs. |
| Noise pollution | <ul style="list-style-type: none"> • Sensitize drivers of construction machinery one effects of noise. • Maintain plant equipment (if |

	present/used).
	<ul style="list-style-type: none"> • Construction activities to be restricted to daytime • Workers in the vicinity of or involved in high-level noise to wear respective safety & protective gear i.e. earplugs & earmuffs. • Appropriate selection of machinery. • Proper storage, handling and disposal of new oil and used oil and related wastes. • Maintain station and equipment to avoid leaks • Maintenance of construction vehicles should be carried out in the contractor's yard (off the site). • Provide oil interceptors along the drains leading from car wash, service bays, and oil storage areas and dispensing pump islands.
Oil pollution	
Water resource/water quality/waste management	<ul style="list-style-type: none"> • Management of water usage. Avoid unnecessary wastage especially at the car washing bay. • Recycling of water at the construction phase where possible use of water conservation signs at the wash rooms and install water conserving taps. • Follow the NEMA regulations on water quality and waste management.
Contractors lay down area	<ul style="list-style-type: none"> • Special attention should be paid to the sanitary facilities on site especially disposal of human waste. • Garbage should be disposed off in accordance with Municipal Council requirements.
Road safety	<ul style="list-style-type: none"> • Enforce speed limits for construction vehicles especially along road links leading to the site. • Provide bill boards at the site/entrance to notify motorists about the development.
Public health and occupational safety	<ul style="list-style-type: none"> • Ensure proper solid waste disposal and collection facilities. • Ensure effective wastewater management • Design of sewerage system should be as provided in the plans. • Provide First Aid kits on the site. • Sensitize residents/workers on environmental management. • Ensure there is no poding to eliminate breeding of mosquitoes during construction. • Workers should be trained on occupational health & safety and first Aid administration • Train staff on petroleum product handling.
Vegetation	<ul style="list-style-type: none"> • Sensitize workers on HIV and AIDS. • Landscaping and planting all disturbed areas • Planting flowers / grassing just before the rains or irrigated on dry spells.
Fire safety training/ Emergency response procedures (ERPs)	<ul style="list-style-type: none"> • To enhance health and safety preparedness among stakeholders. • Ensure equipment is in good working condition. • Put up emergency response contacts. • Put up ERP notification instructions. • Put up simple instructions on how to handle fires, product spills, LPG incidents, armed robbery and product

	contaminations.
Record Keeping	<ul style="list-style-type: none"> • Collection and analysis of relevant environmental data at the site. • Data of maintenance of firefighting equipment • Monthly product reconciliation (stock loss control). • Staff Training records. • Incidents and accidents registers. • Weekly inspection records of oil water interceptor and drainage systems.
Internal Audits	<ul style="list-style-type: none"> • Monitoring will involve measurements, observations, evaluations, assessment of changes in water quality, waste management, Noise levels, contractor safety etc abstracted.
Fire outbreaks	<ul style="list-style-type: none"> • Install fire-fighting equipment as provided by municipal council fire department. • Sensitize the residents on fire risks i.e. conduct regular fire drills. • Adapt effective emergency response plan. • Provide emergency numbers at strategic points.
Security	<ul style="list-style-type: none"> • Provide security guards and facilities during construction period. • Security men should always be available to alleviate cases of robbery.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MODEL STANDARD PETROL STATION ON PLOT TITLE NO. MN/ II/12385, KISAUNI, MOMBASA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Oil Corporation of Kenya Ltd) is proposing to develop a Model Standard Petrol Station. The project highlights include: a canopy over the pumps, sales office, a restaurant, a store, underground fuel tanks, compressor/generator, tyre centre & car wash, drive ways, walkways, acceleration and deceleration lanes, interceptor tank and washrooms.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental/Social Impact</i>	<i>Proposed Mitigation Measures</i>
Air pollution	<ul style="list-style-type: none"> Control speed and operation of construction vehicles. Prohibit idling of vehicles. Spray water on excavated areas. Maintenance of construction plant and equipment. Sensitize construction workers. All bare areas should be landscaped after construction. Workers should be provided with dust masks if working sensitive areas.
Noise pollution	<ul style="list-style-type: none"> Maintain plant equipment. Construction should be carried out only during daytime i.e. 0800 – 1700 HRS. Workers to wear ear muffs if working in noisy section. Management to ensure that noise from the residents is kept within reasonable levels.
Traffic density	<ul style="list-style-type: none"> Proper signage put in place to notify neighbours of the activity and presence of heavy vehicles and to direct traffic. Presence of boards directing patrons to the site Strict adherence to traffic rules.
Flora & Fauna	<ul style="list-style-type: none"> The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.
Soil erosion & compaction	<ul style="list-style-type: none"> Provide soils conservation structures on the areas prone to soil erosion to reduce impact of erosion. There should be designated pathways and driveways for movement within the compound to avoid unnecessary compaction. All bare areas should be well landscaped after completion.
Solid waste	<ul style="list-style-type: none"> Construction debris should be collected by a licensed private contracted waste collection company Excavation waste should be re-used or backfilled. Waste generated should be collected by a privately contracted waste collection company and the contractor should ensure the construction of a central waste collection point with bulk storage facilities. The site should have waste receptacles with bulk storage facilities at convenient points to prevent littering during occupation.
Oil spills and leaks	<ul style="list-style-type: none"> Machinery should be well maintained to prevent oil leaks. Contractor should have a designated area where maintenance is carried out and that is protected from rain water. All oil products should be stored in a site store and handled carefully.
Security	<ul style="list-style-type: none"> Control of secondary businesses. Round the clock security for the facility. Adequate lighting and an alarm system installed at strategic points.

Underground fuel storage and handling

- Bushes around and within the site cleared to avoid hiding areas for thieves.
- Use properly maintained hoses and fittings
- Make the cement screeds in all the chambers using water proof material.
- Install a monitoring well next to the tanks to check on leaks
- Use water finding dipstick and/ or a hydrometer to check on density/ specific gravity
- Ensuring no spills during refilling and /or when offloading the fuel

Vegetation loss

- Designate access pedestrian routes and parking zones that are cabro-paved
- Provide signs marked do not Walk/ Park on the grass
- The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.

Occupational Health and Safety

- Provide Personal Protective Equipment
- Train workers on personal safety and how to handle equipments and machines
- A well stocked first aid kit shall be maintained by a qualified personnel
- Report any accidents / incidences and treat and compensate affected workers
- Provide sufficient and suitable sanitary conveniences which should be kept clean

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED RESIDENTIAL FLATS AT NHC CHANGAMWE ESTATE ON PLOT NO. MN/VI/2584, CHANGAMWE, MOMBASA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Housing Corporation) is proposing to construct six (6) three (3) storey residential blocks comprising of thirty (30) two-bed roomed houses and eighteen (18) three-bed roomed houses all totalling to forty eight (48) residential units; NHC

Changamwe Estate on Plot No. MN/VI/2584, Changamwe, Mombasa County.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation Impacts

Structural stability of the buildings	<ul style="list-style-type: none"> • Ensure the building and structural plans are approved by CGM. • Ensure the right construction and quantity of materials are used • Ensure the premise construction is supervised by qualified personnel • Ensure the inspection and structural design are done by a registered engineer
Management of construction waste and efficient sourcing and use of raw materials	<ul style="list-style-type: none"> • Segregate waste by separating hazardous waste from non-hazardous waste • Provide adequate and suitable solid waste collection containers • Containers for storing hazardous waste including used oil should be securely banded, labeled and disposed as required by Waste Management Regulations • Contract a NEMA licensed waste company or CGM to collect solid waste from the site for appropriate disposal at approved sites. • Contract a scrap metal dealer with a valid license for appropriate disposal • Minimize waste generated by adopting cleaner production methods such as conserving raw materials, enabling recovery and re-use of the waste • Use durable, long- lasting materials which will not need to be replaced as often, thereby reducing the amount of construction waste generated over time. • Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure • Use building materials that have minimal packaging to avoid generation of excessive packaging waste • Source building materials from companies that have undergone satisfactory environmental impact assessment/audit and received NEMA approval. • Ensure that wastage, damage or loss (through run-off, wind, etc) of materials at the construction site is kept minimal.
Dust generation and exhaust emissions	<ul style="list-style-type: none"> • Provide dust screens to minimize air pollution especially to the adjacent residential buildings • Dust emissions from piles of soil or from any other material during earthwork, excavation, and transportation should be controlled by wetting surfaces. • Piles and heaps of soil should not be left over after construction is completed. • Excavated sites should be covered with suitable solid material • Strictly enforce onsite speed controls and limit unnecessary traffic within the site. • Ensure that traffic routes on site are sprinkled with water regularly to reduce amount of dust generated by the construction trucks. • Sensitize truck drivers to avoid

Oil spills	<ul style="list-style-type: none"> • unnecessary racing of vehicle engines at loading/offloading areas, and to switch off or keep vehicle engines • Ensure that all transport and construction equipments are in good serviceable condition and no service is carried out on site. • Ensure that no fuels or oils are stored on site but procure them when needed.
Storm-water drainage	<ul style="list-style-type: none"> • Construct storm water drains • Contractor should avoid heaping excavated soil around adjacent residential houses this will minimize soil from block the drainage systems and avoid health risks.
Occupational Health and Safety	<ul style="list-style-type: none"> • Provide workers with insurance cover for such as workmen's compensation. • Provide proper scaffolds for construction at high level • Document and display on-site emergency procedures. • Use appropriate signage to direct and control flow of traffic • The construction site should be registered as per OSHA 2007 and the DOHSS should be notified of the construction works before commencement • A general accidents register should be kept on- site • Provide and enforce use of personal protective equipments • Ensure proper storage of materials and equipments to avoid accidents • Provide temporary sanitary facilities during construction • Water surfaces during excavation and construction to reduce dust generation • Restrict un-necessary movement of the public to the site in order to avoid accidents. All access to the hazardous areas should be secured with a fence • Ensure portable fire extinguishers are provided and in working condition near probable ignition sources. • Provide adequate and clean water for drinking. • Maintain environmental management records on site at all times
Energy consumption	<ul style="list-style-type: none"> • Sensitize staff to switch off equipments and lights when not being used • Consider the possibility of using alternative sources of energy especially renewable ones such as solar • Monitor energy use during construction activities and set targets for efficient energy use • Have proper planning of transportation of materials in order to save on fuel
Water use	<ul style="list-style-type: none"> • Any water leaks through damaged pipes should be fixed promptly. • Sensitize the staff to use water efficiently/sparingly. • Enhance rain water harvesting by use of tanks and other containers. • Install automatic water taps
Traffic impacts	<ul style="list-style-type: none"> • Ensure strict enforcement of on and off - site speed limits as well as limiting unnecessary traffic within the project site

- Provide parking areas for the trucks and avoiding parking on the road sides.
- Provide entry and exit points into the sites.
- Erect proper warning signs at a safe distance on the access roads to warn motorist of heavy vehicle turning.
- Ensure trucks do not damage road structures and drainage systems.
- Ensure only serviceable trucks are used during transportation
- Transport most construction materials during off peak hours
- Sewerage disposal
 - Connect the premise to MWSC sewer line.
 - Ensure proper maintenance of internal sewer network.
 - Ensure that sewage pipes are not blocked or damaged since such vices can lead to release of the effluent, resulting in land and water contamination
- Emergency/hazard response/preparedness plan
 - There must be a well designed and documented emergency preparedness plans including fire emergency procedures.
- Fire protection
 - Regular inspection and servicing of the extinguishers should be undertaken by a reputable service provider and records maintained
 - Fire safety signs should be prominently displayed within the buildings
 - Residents should be sensitized on fire safety
- Electrical Safety
 - Circuits must not be overloaded
 - The circuitry of the distribution board switches must be clearly marked
 - There should be no live exposed connections
 - Electrical fittings near all potential sources of ignition should be flame proof
 - All electrical equipments should be earthed
- General safety and security
 - Provide day-night security guards and adequate lighting within and around the estate
- Demolition waste management at decommissioning
 - All buildings, foundations, equipments, structures and partitions that will not be used for other purposes shall be removed and recycled/reused
 - Dispose reusable demolished facilities as prescribed by public procurement and disposal Act 2005, Cap 412C
 - Where recycling/reuse of the equipments, implements, structures, partitions and other demolition waste is not possible, the materials should be taken to a licensed waste disposal site

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED FUEL FILLING STATION CUM COMMERCIAL SERVICES ON PLOT L.R. NO. EMBAKASI RANCHING - P- 6966, NAIROBI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Lucy Mathenge) is proposing to construct a Filling Station Cum commercial facility comprising of: Four pump isles, two underground petroleum storage tanks (UPSTs), a heavy duty covered man-hole for each of the UPSTs, a Mini market, Car wash open to sky, Oil Interceptor, An acceleration section, Air and water point, An office section, Sanitary facilities/washrooms, soak pits, Associated piping works, compressor/ Generator Room, Staffroom, Store, Service bay and business space

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Liquid Wastes	<ul style="list-style-type: none"> • Maintenance of drainage channels and oil interceptor tanks • Discourage or avoid disposal of oil contaminated water on the ground • Covering the whole operation area with concrete hardstand
Gaseous Wastes	<ul style="list-style-type: none"> • Keep the forecourt clean; it should be regularly sprinkled with water to minimize dusts generated by traffic i.e. always suppress dust by water-spraying before sweeping. • The facility owner/ dealer to use unleaded gasoline and low sulphur diesel, which is less polluting. • To avoid bad smells, spillages should be immediately cleaned up. An appropriately designed container for waste collection should be provided on the site for temporarily storage of uncollected trash. Prompt disposal of such material should be done. • Avoid open-air incineration of trash near the station.
Air pollution	<ul style="list-style-type: none"> • Control speed and operation of construction vehicles. • Prohibit idling of vehicles. • Spray water on excavated areas. • Maintenance of construction plant and equipment. • Sensitize construction workers. • All bare areas should be landscaped after construction.

Noise pollution	<ul style="list-style-type: none"> Workers should be provided with dust masks if working in sensitive areas. Maintain plant equipment. Construction should be carried out only during daytime i.e. 0800 – 1700 HRS. Workers to wear ear muffs if working in noisy section. Management to ensure that noise from the residents is kept within reasonable levels.
Traffic density	<ul style="list-style-type: none"> Proper signage put in place to notify neighbours of the activity and presence of heavy vehicles and to direct traffic. Presence of boards directing patrons to the site Strict adherence to traffic rules.
Flora & fauna	<ul style="list-style-type: none"> The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MODEL STANDARD PETROL STATION ON PLOT TITLE NO. 753, KING'ONG'O, IN NYERI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National oil Corporation of Kenya Ltd is proposing to develop a Model Standard Petrol Station. The project highlights include: a canopy over the pumps, sales office, a restaurant, a store, underground fuel tanks, compressor/generator, tyre centre & car wash, drive ways, walkways, acceleration and deceleration lanes, interceptor tank and washrooms.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental/ Social Impact</i>	<i>Proposed Mitigation Measures</i>
Air pollution	<ul style="list-style-type: none"> Control speed and operation of construction vehicles. Prohibit idling of vehicles.

	<ul style="list-style-type: none"> • Spray water on excavated areas. • Maintenance of construction plant and equipment. • Sensitize construction workers. • All bare areas should be landscaped after construction. • Workers should be provided with dust masks if working sensitive areas. • Maintain plant equipment. • Construction should be carried out only during daytime i.e. 0800 – 1700 HRS. • Workers to wear ear muffs if working in noisy section. • Management to ensure that noise from the residents is kept within reasonable levels.
Noise pollution	
Traffic density	<ul style="list-style-type: none"> • Proper signage put in place to notify neighbours of the activity and presence of heavy vehicles and to direct traffic. • Presence of boards directing patrons to the site • Strict adherence to traffic rules.
Flora & Fauna	<ul style="list-style-type: none"> • The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.
Soil erosion & compaction	<ul style="list-style-type: none"> • Provide soils conservation structures on the areas prone to soil erosion to reduce impact of erosion. • There should be designated pathways and driveways for movement within the compound to avoid unnecessary compaction. • All bare areas should be well landscaped after completion.
Solid waste	<ul style="list-style-type: none"> • Construction debris should be collected by a licensed private contracted waste collection company • Excavation waste should be re-used or backfilled. • Waste generated should be collected by a privately contracted waste collection company and the contractor should ensure the construction of a central waste collection point with bulk storage facilities. • The site should have waste receptacles with bulk storage facilities at convenient points to prevent littering during occupation.
Oil spills and leaks	<ul style="list-style-type: none"> • Machinery should be well maintained to prevent oil leaks. • Contractor should have a designated area where maintenance is carried out and that is protected from rain water. • All oil products should be stored in a site store and handled carefully.
Security	<ul style="list-style-type: none"> • Control of secondary businesses. • Round the clock security for the facility. • Adequate lighting and an alarm system installed at strategic points. • Bushes around and within the site cleared to avoid hiding areas for thieves.
Underground fuel storage and handling	<ul style="list-style-type: none"> • Use properly maintained hoses and fittings • Make the cement screeds in all the chambers using water proof material. • Install a monitoring well next to the

	<ul style="list-style-type: none"> • tanks to check on leaks • Use water finding dipstick and/ or a hydrometer to check on density/ specific gravity • Ensuring no spills during refilling and /or when offloading the fuel • Designate access pedestrian routes and parking zones that are cabro-paved • Provide signs marked do not Walk/ Park on the grass • The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.
Vegetation loss	
Occupational Health and Safety	<ul style="list-style-type: none"> • Provide Personal Protective Equipment • Train workers on personal safety and how to handle equipments and machines • A well stocked first aid kit shall be maintained by a qualified personnel • Report any accidents / incidences and treat and compensate affected workers • Provide sufficient and suitable sanitary conveniences which should be kept clean

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED PHASE 1 OF WILLOW PARK HOMES ON L.R. NO. KIAMBAA/THIMBIGUA/2116, KIAMBU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (The Northside Developers Ltd) is proposing to develop apartments that will consist of 10 apartment blocks of 5 types with a total of 148 units.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation Impacts

Noise pollution	<ul style="list-style-type: none"> • Provision of barriers such as walls around the site boundaries to provide some buffer against noise • Installation of portable barriers to shield compressors and other small stationary
-----------------	---

	<p>equipment where necessary</p> <ul style="list-style-type: none"> Put up signs to indicate construction activities Maintain all equipments Silenced machinery and instruments should be employed Equipment such as drills, graders and cement mixers should also be used when the least number of residents can be expected to be affected Workers working with machinery, vehicles and instruments that emit high levels of noise should be provided with ear plugs and ear muffs Sensitize workforce including drivers of construction vehicles 		<p>during rainy seasons</p> <ul style="list-style-type: none"> Ensure that the drainage plan proposed is implemented as stipulated on the plan. The provision of a system of culverts should be considered. Conduct landscaping after project completion to maximally control any possible chance of soil movement. The proponent will maintain a 15m buffer zone so as to protect the riparian ecosystem of Kaaruchi River
Air pollution/particulate matter(dust)	<ul style="list-style-type: none"> Stockpiles of earth should be sprayed with water or covered during dry seasons. Buffer area of trees and other vegetation will serve as natural windbreaks Provide PPE such as nose masks to the workers in dust generation areas. All raw materials must be sourced as close as possible to the construction site thus reducing the emissions from vehicular traffic. Machines must not be left idling for unnecessary periods of time. Vehicle speeds in the construction area will be limited to minimize dust in the area The construction contractor will water the site with exposed soil surfaces twice daily during dry seasons Avoid pouring dust materials from elevated areas to ground Cover all trucks hauling soil, sand and other loose materials Provide dust screen where necessary 	Water sources	<ul style="list-style-type: none"> Management of water usage. Avoid unnecessary wastage of water Avail storage tanks. Roof catchments should be provided with water harvesting systems to enhance collection & storage of rain water Store all raw materials away from the vicinity of water bodies. General refuse generated during these phases of the development must be stockpiled in one central area of the development site, away from existing water bodies. Clearance of vegetation must be avoided in periods of heavy rainfall to reduce the impact of runoff. Install siltation traps within the drainage design to collect silt and sediments Conduct periodical water quality monitoring to ensure that standards are maintained.
Increased solid waste	<ul style="list-style-type: none"> The contractor and proponent should contract private refuse handlers and Karuri Town Council to facilitate waste handling and disposal from site. The materials should be properly segregated to encourage recycling of some wastes. Demolished stones can be used as backfills 	Sewage & effluent	<ul style="list-style-type: none"> Routine checkups of and monitoring of the WWTP to avoid leakages and blockages Construction of a WWTP to be done to meet the standards by Karuri Town Council
Loss of biodiversity	<ul style="list-style-type: none"> After project completion, proponent should rehabilitate the site by planting local trees, grass and ornamental flowers at all disturbed areas Remove as little vegetation throughout the site as possible Retain vegetation screens to reduce the visual effect of this stage of the development Maintain all mature trees (trees > 25 cm) within the development; The developer should incorporate trees that are used by bird species for foraging to attract bird species to the area. 	Public health and occupational safety	<ul style="list-style-type: none"> Adequate sanitary facilities should be provided and standard cleanliness maintained Proper handling and disposal of solid waste Provide suitable safety gear for all personnel Proper treatment of waste water Construction activities must therefore be limited between 0800hrs and 1700hrs First aid kit to be provided on site and ensure that a crew member is trained in basic first aid practices. Signs must also be placed around the construction site displaying the numbers of the person responsible for handling emergencies on the site Contractor should have workmen's compensation cover which should comply with workmen's compensation Act
Soil erosion	<ul style="list-style-type: none"> Control earthworks Provide soil conservation structures on areas prone to soil erosion to reduce impact by run-off Control construction activities especially 	Road safety	<ul style="list-style-type: none"> Road signs on main roads Enforce speed limits for construction vehicles Implement a traffic system that involves appropriate sig Perform road repair and construction at times that persons are expected to be at work and school and signs to ensure the smooth flow of

- traffic
- Socio economic concerns
- Develop a Corporate Social Responsibility programme which could provide assistance to the community.
 - Persons from the nearby communities should be employed to work on the construction site.
 - Purchase supplies to be used in the construction should be sourced from nearby suppliers
 - Implement HIV/AIDS and other communicable diseases programmes in conjunction with relevant ministries
 - Where possible offer women equal opportunities as men

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED 1250 TCD SUGAR PLANT AT OLEPITO VILLAGE, TANGA KONA AREA IN BUSIA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent, (West Kenya Sugar Company Limited) is proposing to construct a sugar factory comprising of the following: Mill House, Boiling house, Clarification House, TG hall, Boiler area, Workshop, Store, Spray pond/Cooling Tower, Sugar Go-down, Generator Room, Molasses Tank, HR Office, Sales office, Engineering Office, MFG office/Lab, Acc/cooling , Auto work shop/Auto store, Switch Board, Bagasse store, Fire Station, Medical Center, Car Parking, Time office, Time Office, Agricultural office, Administrative Office, Cane Yard, Canteen, Distillery, Water Treatment Plant, Raw Water tank for sugar plant, Raw Water Plant for co/gen, Weighbridge/Transport Office, Diesel Tank, and an Effluent Treatment Plant.

The following are the anticipated impacts and proposed mitigation measures:

Impacts

Mitigation Impacts

Noise pollution and vibrations

- Adherence to manufacturer's specifications and use of modern technology machines.
- Provide ear protection devices for the workers operating the devices.

Off-site Impacts when transporting machinery

- Transport the machinery in serviced vehicles.
- Pour water continuously to reduce the dust levels on the road heading to the factory or make a more permanent road.
- Transport where possible off-peak to avoid traffic inconveniences and possible high risk accidents.
- Use the qualified and experienced driver to transport the machinery to the factory.

Dust pollution

- Provide and enforce the use of dust masks by workers at the site.

Occupational health & safety hazards

- Observe occupational health and safety measures.
- Train workers on Occupational Health and safety and enforce use of PPEs.
- Install first aid kits at the premise.
- Maintain data base for material safety data sheets for all inputs. Make it available to key personnel.
- Install emergency showers.

Fire hazards

- Install fire extinguishers and fire hydrants at high risk zones at the factory premises.
- Formulate fire evacuation procedures.
- Come up with a fire assembly point.
- Conduct regular fire drills.

Solid waste generation

- Segregate the wastes
- Use bagasse from the cane as fuel for steam and power generation.
- Use filter and dry lime from the juice clarification processes to make a soil conditioning product for agricultural land.
- Use compost organic solids from press mud to make high quality organic manure for agricultural production.
- Come up with proper waste management strategies such as incineration of waste papers, recycling of waste water and composting of vegetative wastes.
- Convert beet pulp into cattle feed.

Accidents and Insecurity

- Employ day and night security guards; install security lights, alarms and a strong perimeter fence (preferably electric).
- Build capacity on safe working procedures.
- Have first aid kits.

Dust generation and particulate matter

- Determine inventory of cane mill dust generation to determine surplus dust available.
- Use wet scrubbers to remove dust from drying and cooling of sugar.
- Reduce fugitive dust from roads and areas by cleaning and maintaining a sufficient level of humidity.
- Install ventilation systems with filters on transport systems for dry sugar and on sugar packing equipment.
- Conduct noise mapping.

Noise pollution

- Provide workers with noise protection gear.
- Observe the frequency of the sound, time of day and the time duration especially if it affects the areas

- surrounding the factory.
- Poor house keeping
- Ensure the floor is dry at all times and proper drains are made for the waste water after cleaning or even in case of a spill during operation.
 - Areas should be well labeled and designated to give direction to the visitors and even serve as a reminder to the workers and even storage areas.
 - There needs to be proper lighting in the work area to avoid accidents due to poor visibility of the room.
- Air pollution
- Undertake fuel gas analysis for the boilers.
 - Increase number of trees on the site as carbon sequesters.
 - Conduct continuous stack gas analysis.
 - Undertake volatile organic carbons (VOC) measurement.
- Waste water discharge
- Apply for effluent discharge license from NEMA.
 - Install a waste water pre-treatment facility.
 - Treat and reuse the waste water generated
 - Construct a proper wetland.
 - Protection of aquifers and the water table from ingress of pollutants.
- Oil spills
- Provide oil interceptors along the drains from probable sources of oil contaminants.
 - Ensure all machinery is in top condition to avoid leakage.
 - Bund and roof all hazardous chemical storage areas.
 - Install central waste oil collection system for safe disposal.
 - Keep records for waste oil disposal.
 - Install oil interceptors.
 - Bund all oil containers and store them away in a safe room.
- Energy consumption
- Conduct an energy audit to yield an efficiency enhancement program.
 - Develop performance indicator for energy consumption.
 - Use waste fiber from the cane as fuel for steam and power generation.
 - Ensure that the bagasse moisture level is below 50% before is used as boiler fuel.
 - Reuse vapor from vacuum pans for heating water and juice.
 - Ensure even energy consumption by management of batch processes (e.g. centrifuges, vacuum pans) to schedule energy demand and equalize steam demand on the boilers.

The full report of the proposed project is available for inspection during working hours at:

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Kings Developers) is proposing to construct 40 town houses and apartments of three blocks with parking spaces, community hall and children playground.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Changes in hydrology	<ul style="list-style-type: none"> • Install cascades to break the impact of water flowing in the drains. • Ensure efficiency of drainage structures through proper design and maintenance. Design should be with respect to (water) peak run-off volumes (i.e. consider periods or seasons when there is high intensity of rainfall) • Provide granting to the drainage channels
Soil erosion	<ul style="list-style-type: none"> • Control earthworks • Install drainage structures properly • Compact loose soil • Landscaping • Ensure management of excavation activities • Control activities especially during rainy conditions. • Provide soil erosion control structures on the steep sides • Efficiency of erosion control measures. • Ensure standard farming methods on the provided gardens
Air pollution	<ul style="list-style-type: none"> • Control speed and operation of construction vehicles • Discourage idling of vehicles • Water should be sprayed during the construction phase of excavated areas. • Regular maintenance of construction plant and equipment • Engage sensitive construction workers
Noise pollution	<ul style="list-style-type: none"> • Sensitize drivers of construction machinery on effects of noise • Maintain plant equipment • Construction activities to be restricted to daytime

- Workers in the vicinity of high-level noise to wear safety and protective gear.
 - Provide barriers such as walls and trees around site boundaries to provide some buffer against noise prorogation
- Oil pollution
- Proper storage, handling and disposal of oil wastes
 - Maintain plant and equipment to avoid leaks
 - Maintenance of construction vehicles should be carried out in the contractors yard off the site
 - Provide oil interceptors along the drains leading from car wash and services bays
- High water demand
- Management of water usage. Avoid unnecessary wastage
 - Recycling of water at the construction phase where possible.
 - Make use of roof catchments to provide water i.e. for general purpose and provide water storage facilities to individual housing units.
 - Install water conserving taps that turn off automatically when water is not being used.
 - Source water from other sources to increase the water supply capacity of the NCC
- Contractors lay down area
- Special attention should be paid to the sanitary facilities on the site
 - Garbage should be disposed off periodically and at approved dumpsites
- Road safety
- Enforce speed limits for construction vehicles especially along roads leading to the site
 - Provide bill boards at the site/entrance to notify motorists about the development
- Public health and occupational safety
- Ensure proper solid waste disposal and collection facilities
 - Ensure effective waste water management.
 - Design of sewerage system should be as provided in the plans.
 - Sensitize residents on environmental management
 - Provision of Personal Protective Equipment (PPE)
- Vegetation
- Plant vegetation in areas where vegetation is unnecessarily removed
 - Landscaping and planting all disturbed areas.
 - Plantings and grassing should be done just before the rains or irrigated on dry spells using water conserved during the wet season
- Fire training/emergency response
- Adapt effective emergency response plans involving all both during construction and occupation phases
 - To enhance health and safety preparedness among stakeholders
 - Ensure equipment is in good working condition
 - Install firefighting equipment as provided elsewhere in the report
 - Sensitize the residents on fire risks i.e. conduct regular fire drills.
 - Adapt effective emergency response

plan

- Maintain fire fighting machinery regularly
- Provide emergency numbers at strategic points
- Provide security guards and facilities during construction period
- The gate should always be controlled by the security men, even during occupation

Security

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette*, *Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
