REGISTRATION OF INSTRUMENT

WHEREAS M'Limungi M'Iriya (deceased), is registered as proprietor of that piece of land containing 4.8 hectares or thereabouts, known as Ithima/Ntunene/761, situate in the district of Meru North, and whereas the senior principal magistrate's court at Maua in succession cause No. 30 of 2010 has issued grant of letters of administration to Thirindi M'Limungi, and whereas the said land title deed issued earlier to the said M'Limungi M'Iriya (deceased) has been reported missing or lost, notice is given that after the expiration of thirty (30) days from the date hereof, provided no valid objection has been received within that period, I intend to dispense with the production of the said land title deed and proceed with registration of the said instrument of R.L. 19 and R. L. 7, and upon such registration the land title deed issued earlier to the said M'Limungi M'Iriya (deceased), shall be deemed to be cancelled and of no effect.

Dated the 20th December, 2013.

Creation of employment	<ul style="list-style-type: none"> • Adopt labour standards which integrates employee and community benefit; • Adopt a "local first" as far as possible, policy to maximize employment opportunities for the local communities; • Give preference to locals on employment and procurement • Give preference to labour intensive practices to encourage job creation; • Ensure compliance with the law on employment of children.
Vegetation disturbance	<ul style="list-style-type: none"> • Specify locations for vehicles and equipment, and areas of the site which shall be kept free of traffic, equipment and storage; • Designate access routes and parking area within the site; • Introduction of vegetation on open spaces and around the project site; • Design and implement appropriate landscaping programme to help on re-vegetation of part of the project area after construction.
Erosion control	<ul style="list-style-type: none"> • Earthworks should be controlled so that land that is not required for the construction works is not disturbed; • Excavated materials and excess earth will be kept at appropriate sites approved by the supervising engineer and the earth dumping sites designed; • The Contractor shall protect areas susceptible to erosion by installing necessary temporary and permanent drainage works as soon as possible.
Waste water and waste oil management practices	<ul style="list-style-type: none"> • Carefully collect used oil in drums and dispose of by licensed refuse contractor; • Adhere to wastewater management regulation of the legal Notice 121 and Water quality regulations of the Legal Notice 120; • Conduct wastewater monitoring to check compliance • Document and train staff in the emergency spill response plan.
Sewer	<ul style="list-style-type: none"> • Sewer line from the station will be connected to well-constructed waste digester.
Fuel spillage while dispensing	<ul style="list-style-type: none"> • Provision to pave the pump island and remote filling area with reinforced concrete • Regular training of staff on pump island operations.
Leakage of tanks and	<ul style="list-style-type: none"> • The tank and lines will be used as per

product lines	<p>their design life of 30 years and a UST / line replacement programme put in to ensure tanks and lines are replaced prior to failure;</p> <ul style="list-style-type: none"> • Monitor daily reconciliation of wet stock and inventory records; • In case of suspect losses, institute tank and line integrity testing; and • Conduct a soil gas survey to check the extent of contamination from the leaks. • Ensure the tanks are vaulted as per the standard.
Increased solid waste generation	<ul style="list-style-type: none"> • Comply with the requirements of the Environmental Management (Waste Management) Regulations Legal Notice 120; • Use of the 3R integrated solid waste management strategy. • Use durable, long-lasting materials that shall not need to be replaced as often, thereby reducing the amount of construction waste generated over time; • Waste should not be burned on site or dumped in undesignated waste disposal areas; • Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements; • Clearly designate and construct an appropriate waste collection facility.
Dust emission	<ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limit regulations; • Sprinkle water during excavation works by heavy machines; • Sprinkle water on graded access roads when necessary to reduce dust generation by construction vehicles; • Provide masks to be provided to employees and worn.
Fire and accident	<ul style="list-style-type: none"> • Provision and placement of appropriate fire extinguishers and training of personnel; • Provision of fully equipped First Aid box on site at all times; • Display warning signs at suitable locations; • Prohibit unauthorized persons at the station; • Weatherproof fittings for all lighting and power points located outside the fuel station.
Air pollution	<ul style="list-style-type: none"> • Ensure that the generator are maintained to manufactures specifications, records maintained and availed whenever there is need; • Ensure that tank vents are located away from sensitive receptors.
Noise and vibration	<ul style="list-style-type: none"> • Keep noise level within acceptable limits and construction activities shall, where possible, be confined to normal working hours; • All construction machinery are maintained and serviced in accordance

	with the contractor's specifications;
Water and soil contamination	<ul style="list-style-type: none"> • Sensitize construction vehicle drivers and machinery operations to switch off engines of vehicles or machinery not being used; • Sensitize construction drivers to avoid revving vehicle engines or hooting; • Sound barriers to be erected around the construction areas.
	<ul style="list-style-type: none"> • No grey water runoff or uncontrolled discharges from the site/working areas (including wash-down areas) shall be permitted; • Potential pollutants of any kind and in any form shall be kept, stored and used in such a manner that any escape can be contained and the water table not endangered; • Take reasonable measures to control storm water and the erosive effects; • No construction materials shall be stockpiled within areas that are at risk of flooding; • Plastic sheeting, sandbags or geofabric approved by the Supervising Engineer shall be used to prevent the migration of fine grained soil particles.
	<ul style="list-style-type: none"> • Develop a site safety action plan detailing safety equipment to be used, emergency procedures, restrictions on site, frequency of safety inspections and controls; • Daily site inspections should be done to ensure safe work practices are adhered to; • All workmen should be provided with personal protective equipment; • The Conditions of Contract in the tender documents should stipulate health, safety and environment regulations and work procedures;
	<ul style="list-style-type: none"> • Plan and implement traffic management programme on daily basis; • Comply with all applicable legislation and by-laws with regard to transport; • Lane and junction design and signage to meet appropriate standards; • Movement of construction vehicles timed to avoid peak periods • Ensure adequate entry and exit lane design and appropriate signage.
	<ul style="list-style-type: none"> • The Contractor should monitor water consumption and utilization; • Sensitize construction workers on the importance of proper water management.
Energy utilization	<ul style="list-style-type: none"> • Develop an energy management plan; • Construction machinery and vehicles should be maintained and used in accordance with manufacturer's specifications, to maximize efficiency and lower use of energy; • Construction workers should be sensitized on the importance of energy management.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED RESIDENTIAL APARTMENTS ON PLOT
L.R. NO. 2916/1/MN IN NYALI AREA, MOMBASA COUNTY.

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Gold Truck Services Limited) is proposing to construct three blocks of apartments rising to the 8th floor along beach road, Nyali area in Mombasa County. The total number of apartments will be 48 and 3 penthouses. The elevated nature of the apartments will necessitate the existence of a lift and staircase lobby. There will also be ample space for parking saloon cars for the residents.

Below is a summary of the anticipated impacts and the proposed mitigation measures:

<i>Impact</i>	<i>Proposed Mitigation Measures</i>
Site clearance	<ul style="list-style-type: none"> • Ensure site clearance is done and all debris collected in one area for ease of disposal to a recognized and designated dumping site • Ensure all forms of debris out of clearance which can be converted into fuel wood are well kept for use and public allowed to collect it as fire wood. • Ensure earth movers work gently to avoid much dust emissions
Dust emissions during site clearance	<ul style="list-style-type: none"> • Ensure loose soil layers are identified and water sprinkled on them to avoid too much dust from being produced. • Ensure blowing winds are factored in during site clearance to avoid blowing winds especially from the sea from scooping loose soil particles. • Erect barriers especially in the areas bound to be affected by dust emissions. • Provide PPE for dust control suitable for the construction site. • Extreme dust conditions should be notified to the neighbours and reparations for damages effected to the persons affected.
Excess soils and rubble management	<ul style="list-style-type: none"> • Ensure any excess soils are kept in a designated place for re-use or disposal.

- Dump excess soils and rubble at a NEMA approved sites
 - Sell any valuable soils to firms engaged in landscaping and gardening.
 - Reserve some of the soils for eventual landscaping and gardening of the site after or immediately to construction activities ending.
- Solid waste management during construction
- Ensure two casual workers are assigned the task of collecting any litter on site on an hourly basis during the working hours of every day.
 - Ensure solid waste receptacles are also on site for the purpose of the workers on site and any other persons who visit the site to drop their litter.
 - Try to re-use some of the materials generated as waste to reduce the amounts which is due for dumping.
- Construction site prudent management.
- Create orderly designated areas within the site for various activities
 - Create a schedule for delivery of site materials to maintain site orderliness
 - Ensure siting (location of toilets) of sanitary heed the wind direction.
- Occupational health and safety concerns
- Ensure an OHS plan is put in place at the construction site.
 - Provide construction workers with requisite PPE and ensure they are used correctly.
 - Ensure a well stocked first aid kit is in place at the construction site and all workers are aware of its availability
 - Signage to guide and direct workers and visitors should be placed at strategic points within the construction site to warn of imminent dangerous incidents
- Flora conservation
- Ensure the site is vegetated once construction activities are done.
 - Ensure the area is landscaped with a view to preserve certain species of trees already growing or planting others and carefully tendering them.
 - Selection of trees to be planted should be guided by their being indigenous or their being capable of greening the site and enhancing the aesthetic beauty.
- Increased water demand during construction and occupations/operations phase
- Ensure adequate water reservoirs are on site for use by site personnel.
 - Rain water harvesting should be made a prudent option and that gutters and additional storage reservoirs put in place.
 - Water consumption plan that minimises wastage and maximises on the little available should be put in place both during construction and during occupations/operations phase.
 - Post notices to all construction working points/stations and to all places where taps are fixed warning people to avoid leaving taps running when not in use.
- Increased sewage generation during occupations/operations
- Install the bio-digester as proposed in the project plan.

phase

Increased solid waste generation during occupations/operations phase.

- Ensure regular surveillance of the bio digester functionality and ensure it's as per the set standards by the manufacturer.
- Subject samples from the treated sewage to laboratory testing and ensure it is within NEMA standards for discharge into the environment.
- Hire NEMA licensed solid waste handling firms and ensure the tracking document is ever completed once waste is collected from the apartments.
- Maintain a solid waste transfer point within the apartments' premises and ensure regular collection of such wastes for eventual disposal to a designated dumping site, one that has been approved by the City Council of Mombasa and NEMA.
- Promote the 3R waste management strategy
- There should be no dumping site on the apartments' premises

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED BIOLOGICAL CONTROL FIELD TRIAL OF *OPUNTIA STRICTA* (CACTACEAE) BY *DACTYLOPIUS OPUNTIAE* BIOTYPE 'STRICTA' IN OL JOGI RANCH, LAIKIPIA COUNTY.

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Ol Jogi Ltd) is proposing to conduct a field trial involving the coordinated release of a biological control agent known as *Dactylopius opuntiae* 'stricta' biotype (*Dactylopiidae*) for an experimental field control trial in Ol Jogi ranch, (a domestic and wild animals ranch covering 58,000-acre land, located 40 kilometers north of Nanyuki). The project design entails collection of the biological control agent *Dactylopius opuntiae* 'stricta' biotype (*Dactylopiidae*) from a quarantine facility at Muguga, transfer to Ol Jogi ranch where they'll be housed, fed and multiplied in readiness to raise a population enough for release at predetermined trial sites. The main activity will be the co-ordinated release and field monitoring that involve data collection on the bug tendency to spread and attack target host plant in comparison to non-target close relatives or close growing plants or animals. The aim is to determine the bug host specificity in the field

before permission is granted for its use in anticipated future project(s).

Below is a summary of the anticipated impacts and the proposed mitigation measures:

<i>Impact</i>	<i>Proposed Mitigation Measures</i>	
Delayed permission to carry out the project	<ul style="list-style-type: none"> Prior to decision to conduct the anticipated eradication project the proponent should follow strictly the procedure of conducting biological control in Kenya using an alien biological control agent. 	<ul style="list-style-type: none"> Support projects that can create employment and income to local people
Handling cochineal bug in the Ol Jogi ranch	<ul style="list-style-type: none"> Meet the project license conditions issued by NEMA Observe all bio-safety rules and regulation Meet the housing, feeding, and security conditions set for the bug Train workers on field rules, procedures and regulations Train workers on field monitoring procedure, effective data collection and safety measures Train workers on how to respond in case of emergencies 	<ul style="list-style-type: none"> Mobilize local people to rehabilitate land Promotion of natural regeneration of native grass and plants Optimizing movements to and from project site to reduce disturbances to soil, Careful driving and use of light vehicle machinery in Raise awareness among the local community on keeping fewer livestock to minimize overstocking
Health and safety of workers	<ul style="list-style-type: none"> Provide and enforce use of personal protective equipments First aid facilities should be availed at the site office Document and display on-site emergency procedures A general accidents register should be kept on-site. Create EHS awareness among the personnel Observing safety measures while monitoring in the field Restrict un-necessary movements of public to the project site Development of a clear site organization and working schedule Employ skilled and trained workers Maintain environmental management records on site Medical investigation on the side effect of the cactus fruit juice causing stomachache and diarrhea to children. 	<ul style="list-style-type: none"> Exhaust emissions Vehicle idling time should be minimized in the field. Equipment and vehicles should be properly serviced and maintained. The proponent is advised to use formulated gasoline, low sulphur diesel fuel, advanced engine design and fuel metering and highly efficient exhaust control devices Emergency Response Plans (ERP) Training should be conducted on how to prevent and manage incidences. Workers must fully be aware and mentally prepared for potential emergency. Initiate and develop effective ERPs to cater for various eventualities Noise pollution Drivers should keep rules and regulations of moving around in game reserves by keeping minimum noise and avoid unnecessary hooting to avoid disturbances to animals Deprived ecological food /fodder resource Manage areas not to be completely eradicated the cactus plant Monitor migration and emigration trend of baboons, elephants and bird in response to eradication of the cactus aiming to enhance ecological balance Pursue and plan for alternative fodder crops for wild animals and livestock impacted by eradication of cactus Waste disposal Use a bin for waste collection (of approved type and size). Educate the workers on the importance and means of waste management and handling during field activities. Train the workers on the 3Rs (Re-use, Recycle and Reduce) principle.
Stakeholders support to the project	<ul style="list-style-type: none"> Consultation with stakeholders and local communities shall continue Ensure the project interest does not conflict or adversely affect stakeholders Consultation mechanisms and strategies used to engage local communities should be participatory in nature, and Ensure that local people and other stakeholders are effectively involved 	<ul style="list-style-type: none"> Clearing the population of cochineal bug in the field at decommissioning Managing and ensuring that minimum or no bug population is left in the field after the project life. Limiting the release of bugs to retain recommended field population towards the termination phase. Employ environmental friendly methods that include chemical spray or introducing natural enemy to eliminate the bug.
Cultural and biological resources	<ul style="list-style-type: none"> Putting into consideration cultural and biological value of the cactus plant Proponent plan should consider areas to limit the level of eradication of cactus plants identified food resources. . Follow-up on information on attempt to produce fruit juice from cactus fruit and research on feasibility of such commercial initiative 	<ul style="list-style-type: none"> Loss of employment at end of project Workers to be informed prior to winding-up of the project activities Post project life monitoring Self audit and putting detectors for early warning of repercussions for plants eradication

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED PETROL STATION AND COMMERCIAL BUILDING ON PLOT L.R. NO. 209/11827 ALONG MOMBASA ROAD, NAIROBI COUNTY.

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Mahadi Oil Kenya Limited) is proposing to construct a Petrol Station and a Commercial building. The site will be surrounded by a boundary wall. There will be a deceleration lane to the station and an exit lane. The surface of the station will be cabro block finished and fitted with storm water drainage channels. The petrol station will constitute of the following; 5 fuel pumps under a canopy, Parking area, Gas cylinders point, a refueling zone with intake valves, fueling pumps and pressure point, underground fuel storage tanks, three 350,000 Lt diesel tanks, two 350,000 Lt petrol tanks, one 350,000 Lt kerosene tank, compressor shade, service bay, generator shade, control room, car wash area, a lubricants shop, shop office and shop store, sanitary facilities.

The commercial building will constitute basement, ground to 8th floors comprising of the following; ground floor, gate in and a ramp to the basement, 3 sets of stairway each with a lobby area, a lift system area with a lobby, a business center, three offices fronted by a passage, 5 shops, a cafeteria, ATM outlets, a ramp out of the basement and gate out, upper floors that will constitute office and other types of business ventures space.

Other installations on site will be the borehole and the underground water storage tank.

Below is a summary of the anticipated impacts and the proposed mitigation measures:

Impact	Proposed Mitigation Measures
Sources of raw materials	<ul style="list-style-type: none"> Obtain raw materials from sources that are compliant with NEMA regulations. Procure quantities that are sufficient for the intended works only Commit to extensive use of recycled raw materials as will be appropriate
Impact on the biophysical environment	<ul style="list-style-type: none"> Pave the facility area and forecourt of the petrol station Use appropriate PPE during the manual clearing of vegetation; Adopting ergonomic work flow designs that fit physical tasks to employees and not vice versa while maintaining a balance with productivity

Air pollution from dust, machines and vehicle emissions

- Regular dust suppression including sprinkling with water should be included in the construction phase, as and when dust becomes an issue.

- Building materials that are likely to produce dust such as ballast should be sprinkled with water before use

- Employees will be provided with appropriate dust masks and their use enforced by the site supervisor

- Vehicles delivering raw materials should observe speed limits

- Use of serviceable vehicles and machinery to manage dust

Noise pollution

- Construction work and delivery of raw materials will be limited to day time hours

- Inform neighbors in writing prior to commencement of the development so that they are prepared psychologically at least two weeks in advance.

- Employees using equipment that produce noise shall be provided with earmuffs

- The contractor will endeavor to comply with Noise Regulations, 2006

- Only serviceable machinery and vehicles will be used

Health, safety and security at site

- Provision of adequate and appropriate Personal Protective Equipment

- Employees to be given the correct tools and equipments for the jobs assigned

- Employees to be trained on safe use of equipment

- Rest times and breaks will be observed

- First aid services and an emergency vehicle to be readily available at site

- Moving parts of machines and sharp surfaces to be securely protected with guards to avoid unnecessary contacts and injuries during construction phase

- The contractor will comply with the provisions of Occupational Safety and Health Act No. 15 of 2007

Traffic concerns

- Provide de-acceleration and acceleration lanes

- Drivers to avoid stopping along the highway

- The construction and installation process are temporary compared to the permanency of the traffic of the Mombasa-Nairobi highway

- Dedicated access and exit points for tankers

- Provision of acceleration and de-acceleration lanes into and out of the station

- Ensuring sufficient parking space always for loading and offloading tankers

- Avoiding unnecessary delays at the loading/offloading bay

- One staff is assigned the role of traffic management

Leaks from Installations i.e. potential for pollution of ground water resources and soil contamination	<ul style="list-style-type: none"> • Regularly tests to ensure integrity of the installations (USTs, compressor etc.). • Drops or wetness to ensure no leakage are checked regularly • The installations will be made of strong material steel to ensure no leaks, and are color coded to ensure no cross contamination • Inventory management / stock reconciliation will be done daily to ensure no leakages and to monitor available stocks • Ensure compliance with the recommendations from engineers on protecting the integrity of the underground tanks. • Maintain records of inspections and recommendations on the facility at site 	<ul style="list-style-type: none"> • Company commitment to safety • Oil interceptors will be provided • Prepared timelines for regular checks on the installations especially the fuel loading and offloading zones • Ensure the integrity of conduits
Risk of fire and explosions	<ul style="list-style-type: none"> • Diesel and kerosene fuel will be offloaded/loaded with pipes that have no leakage potential and stored in tanks that are well secured to prevent potential for vapour discharge • Tankers will be positioned such as to allow for rapid evacuation in forward gear. • The engine, lights and all the electrical apparatus such as radio and fan of the vehicle should be put off during offloading/loading • The signage "NO SMOKING" will be displayed clearly throughout the facility • The battery circuit should be broken by use of battery cut out switch. • Fire extinguishers will be placed strategically within reach of the delivery point. • Secure and monitor the caps for the dipping pipes of the storage tanks • Fire inspection certificate to be issued by a competent authority prior to commissioning of the petrol station • Staff training in fire fighting skills and fire drills to be conducted quarterly • Carry out a fire safety audit and implement recommendations annually • Carry out an Occupational Health and Safety Audit in line with the OSHA, No. 15 of 2007 annually • Prepare an emergency response plan to be prominently displayed at the facility through a reputable Occupational Health and Safety firm. 	<ul style="list-style-type: none"> • Color codes to be used for product storage tank identification • One product to be offloaded at a time • Density tests to be carried out at the source depots to confirm the quality of the product being loaded onto the tankers
	Sewage, waste water disposal	<ul style="list-style-type: none"> • The effluent will be discharged to the public sewer line/ bio-digester • Comply with schedule III of Legal Notice No. 120 of 2006 • Reduction at source – technological options like using low volume cisterns in toilets to reduce the amount of water per flush. • Installation of automatic water taps at wash basins to ensure that water runs only when necessary. • Treatment to conform to standards spelt out in the regulations depending on where the final effluent will be discharged. • Conduct regular inspections for sewage pipe blockages or damages and fix appropriately.
	Runoff and wash water potential for land and water pollution	<ul style="list-style-type: none"> • Oil water separators to be installed to manage the potential oil and water pollution • Inspections/tests for leakage of pipes and other oil bearing conduits will be done on a regular basis through qualified engineering firms • Effluent tests on a quarterly basis to test the efficiency of the oil water separators • Compliance with Legal Notice 120 of 2006 • Waste oil to be collected by recycling companies
	Solid wastes	<ul style="list-style-type: none"> • Waste separation i.e. of office waste and petrol stations wastes to be undertaken and be handled by NEMA registered and licensed contractors • Provide solid waste handling facilities such as waste bins for every office and other facilities within the premise. • Collect and transport to the nearest WEE recycling facility in Nairobi. • Comply with the Waste Management Regulations
Health hazards		
		Emergency response plan
		<ul style="list-style-type: none"> • Provision of security throughout the project implementation • Provide emergency numbers at strategic points • Ensure that all workers have access to communication facilities (phones) • Install emergency stop buttons • Installed firefighting equipment and trained staff on how to use them • Installed vehicle collision protection
Accidental spills	<ul style="list-style-type: none"> • Sound engineering strategies will be put in place to avoid spills • Reliable operations and effective written operating procedures • Good preventive and predictive maintenance techniques 	

- bars at the loading/offloading bay
- Maintaining a First Aid kit and ensuring personnel are trained in their use
- Structural safety and security
- The buildings will be constructed strictly to engineers' details and prescriptions in terms of materials quality and time frame to ensure no risk of buildings collapsing.
 - Security will be enhanced by contracted security firms.
 - A perimeter wall will boost security for the customers and the facility
 - Parking space for customers and trucks unloading goods will be provided.
 - Annual structural engineering audits will be undertaken on all completed structures
- Water resources use
- Ensure sources of water for use meets the standards specified under Schedule I of Legal Notice No. 120 of 2006 (standards for domestic supply).
 - Install self-regulating water taps for sinks and basins within the facility.
 - Create awareness among the staff on the importance of conservation of water
 - All water for use shall be metered to determine consumption levels and yields of the underground water sources.
 - Rain and storm water harvesting shall be practiced

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette*, *Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
