- Workers wear ears' anti-noise devices
- Installation of noise proof/abatement devices in the factory and stand-by generators
- Solid waste separation and implying recycling when possible
- Introducing suitable and sufficient containers and keep them always closed
- Emptying daily
- Cleaning around and spraying anti-insects
- Awareness training for all personnel
- Contracting NEMA licensed waste handlers to dispose wastes
- Collection of all wastewater from all utilities in the underground sealed cesspool.
- The cesspool will be professionally emptied by special sewage treatment tanks by use of ventagro treatment systems once filled and disposed according to the water quality/municipality regulations.
- Use of Ventagro Sewage treatment system
- Rational use of water.
- Application of water saving devices
- Awareness programs for the workers

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED LOWER NZOIA IRRIGATION DEVELOPMENT PROJECT (PHASE II) IN SIAYA AND BUSIA COUNTIES

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent (National Irrigation Board) has proposed to develop an irrigation project in the Lower Nzoia Basin which has been identified as having the potential to provide food security for the communities in the basin and beyond through irrigation water tapped from Nzoia River.

In Siaya County, the Lower Nzoia Irrigation Development Project (LNIDP) – Phase II covers the northern side of River Nzoia basin from Nzoia Bridge on Ugunja-Ukwala Road to Ruambwa and in Busia County it covers the area from Rumbwa to Nahasiongo River/Stream. The Lower Nzoia Irrigation Project Phase II is set to cover approximately 3,796 Ha of land in Siaya and Busia counties. The main beneficiaries of the project will be farmers in Bunyala East and Bundalangi North subwards of Bunyala Sub-County; and West Ugenya, Ukwala and North-West Ugenya subwards of Ugenya Sub-County.

Below is a summary of the anticipated impacts and proposed mitigation measures.

Impact	Mitigation Measures
	Construction phase
Vegetation damage, habitat loss and invasion by exotic species	<ul style="list-style-type: none"> Utilize appropriate clearing techniques (e.g. hand clearing as opposed to mechanized clearing) by using human labour as opposed to heavy machinery. Maintain native ground cover by selective removal of trees which cannot be incorporated in the project design. Minimizing clearing and disruption to riparian vegetation.
Soil erosion	<ul style="list-style-type: none"> Soils excavated for the construction of irrigation infrastructure and housing shall be used for backfilling and the excess disposed away from site. Soils shall not be left exposed to wind/water. Minimal disturbance to riverine vegetation during construction to reduce soil erosion and enhance riverbank

	protection.
Air pollution (dust, fuel emissions)	<ul style="list-style-type: none"> Control speed of construction vehicles; Prohibit idling of vehicles. Water shall be sprayed during the construction phase on excavated areas to reduce dust emission. Regular maintenance of vehicle and equipment. Provision of dust masks while working in dusty conditions. Use of serviceable vehicles and machinery to avoid excessive smoke emission.
Noise pollution	<ul style="list-style-type: none"> Noise reduction/ hearing protection devices when working with noisy equipment. Use serviceable equipment with low noise emission. Instruct truck/machinery operators to avoid raving of engines.
Generation of solid waste	<ul style="list-style-type: none"> Provide solid waste collection facility (disposal container) for the temporary storage of waste prior to disposal at an appropriate and designated location. The storage yards should be provided with solid waste disposal facilities such as waste bins/chutes. Liaise with local authority on suitable dumping site for spoils. Excavation activities to be done preferably during the dry season to avoid soil erosion and siltation of streams. Use of the soil to backfill.
Risk of fire	<ul style="list-style-type: none"> Monitor the vegetation that is more susceptible to fire. No burning of materials should be permitted at the site.
Project area and surface and groundwater water pollution	<ul style="list-style-type: none"> Appropriate collection, handling and storage of chemical including used oils from machines and vehicles used by contractor. A riparian distance of approx 6m–30m meters away from the river edge to be maintained to avoid pollution and enhance safety.
Injury to workers	<ul style="list-style-type: none"> Use appropriate PPE during the manual clearing of vegetation. Adopting ergonomic work flow designs that fit physical tasks to employees and not vice versa while maintaining a balance with productivity.
Relocation, land acquisition and resettlement	<ul style="list-style-type: none"> Inform and provide a plan to project area farmers on project implementation plan. Sensitize project area population on planned project activities.
Road use risk to local population	<ul style="list-style-type: none"> Pre-notification on the intension to move large equipment by road. Observe strict code of conduct by the transporters.
Working at heights	<ul style="list-style-type: none"> Use construction site barrier tapes to isolate the site(working) area to bar intruders from accessing the area in case of a dropping object. Test structures for integrity prior to undertaking work. Implement a fall protection program that includes training in climbing techniques

	<ul style="list-style-type: none"> and use of fall protection measures. • Provide harnesses for use when working at heights. • Inspection, maintenance, and replacement of fall protection equipment. • Use of helmets and other protective devices will mitigate against scratches, bruises, lacerations and head injuries due to dropping objects. • Provide first aid facilities at the site. 	
Loss of farm crops	<ul style="list-style-type: none"> • Discuss with the crop owners. • Develop and provide a resettlement plan. • Create awareness on land alternatives and resettlement options. 	
Community misconceptions	<ul style="list-style-type: none"> • Awareness creation amongst the community on the project facts. • Community issues responded to promptly. • Prepare project progress and monitoring reports to be prepared and recommendations implemented. • Hold a minimum of two meetings per year to sensitize local community and PAPs. 	<ul style="list-style-type: none"> • Carry out disease surveillance monitoring. • Provide irrigation water use tips to farmers. • Awareness creation among community on the project facts. • Ensure community issues/questions are responded to promptly. • Prepare project progress and monitoring reports and recommendations implemented. • Hold regular meetings with project area farmers (every 3 months at the beginning but later once every year).
		Wastage of irrigation water
		Community misconceptions
		Pollution of surface and shallow groundwater
		Irrigation water tariffs
		Lack of markets for produce
Increase in social vices	<ul style="list-style-type: none"> • Conduct Information Education and Communication (IEC) amongst the community and the project staff. • Ensure workers are known to project area persons. 	<ul style="list-style-type: none"> • Discuss proposed charges for Irrigation Water with farmers and agree on appropriate tariff looking at project capital and sustainability. • Ensure markets for agricultural produce is identified to avoid produce losses and discouragement to farmers. • All roads in project area need to be upgraded to all weather roads.
Surface run off and sedimentation from construction activities	<ul style="list-style-type: none"> • Ensure that access roads, Office and Staff Houses are not constructed in riparian land, floodplain, waterways or wetlands. • Install sediment basin as proposed in the design to avoid sediment deposit in the irrigation facility. • Use ample culverts. • Design drainage ditches to avoid affecting canals, river or nearby land. 	
Health issues for project workers	<ul style="list-style-type: none"> • Sensitize PAPs on use of protection facilities like mosquito nets appropriate gear when working in waterlogged areas to avoid Bilharzia. • Provide sensitization to Host Community and PAPs on sexually transmitted diseases and emphasize on use of condoms. 	
Potential displacement of persons and loss of property	<ul style="list-style-type: none"> • Proponent has instituted a RAP Study to identify affected population, land and property, in order to determine loss of livelihood, loss of property and the land taken up by the project. • The RAP Study is currently underway. • A RAP report is going to be prepared and used for compensation. 	
	Operational phase	
Water borne diseases	<ul style="list-style-type: none"> • Sensitize project area community on use of preventive measures like mosquito nets to avoid catching malaria. • Caution households on use of canal water for drinking/domestic consumption before proper treatment. • Local Authority concerned with domestic water matters to be involved in coordinating provision of clean drinking water to affected farmers. 	<ul style="list-style-type: none"> • Identify types of chemicals used in farming (fertilizers, herbicides and pesticides). • Sensitize farmers on impacts of project area pollution.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED CONSTRUCTION OF GREATMOUNT LPG
LIMITED DEPOT AT NARO MORU, NYERI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Greatmount Lpg Limited) is proposing to construct a fuel depot and gas to be located in a 1.518 hectare piece of Land, L. R. Nos. Naromoru/Naromoru Block 2/Aguthi/1394, Naromoru/Naromoru Block 2/Aguthi/1395, Naromoru/Naromoru Block 2/Aguthi/1396 and Naromoru/Naromoru Block 2/Aguthi/1741 in Nyeri County.

The proposed project will entail construction of two horizontal LPG storage tanks each having a storage capacity of 60tons, commercial building, parking areas for visitors, officers, oil trucks and LPG trucks, cylinder storage area, cylinder filling area, a 100m³ water storage tank and fire fighting installations

The following are the anticipated impacts and proposed mitigation measures:

<i>Anticipated Impacts</i>	<i>Mitigation Measures</i>
Noise Pollution	<ul style="list-style-type: none"> • Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels. • Drivers to be sensitized to avoid unnecessary gunning of vehicle engines or hooting • Proper and regular servicing of engines and other machines shall be adhered to
Aesthetic values	<ul style="list-style-type: none"> • Take all solid waste materials to designated disposal sites. • The landscaping programme should be maintained.
Air /Dust pollution	<ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limit regulations
Storm- water	<ul style="list-style-type: none"> • Open drains connected to MCC storm water drains should be well functioning at all times; such drains should also be fitted with oil filters; Construction/provision of water storage tanks to collect storm water for cleaning uses; Implementation of roof water harvesting
Security	<ul style="list-style-type: none"> • Ensure the general safety and security at all times by providing day and night security guards and adequate lighting within and around the facility.
Health and safety	<ul style="list-style-type: none"> • All workers must be provided with the necessary protective gears; Ensure all workers are in protective gears all the time when on site; Place fire extinguishers in strategic areas within the depot; Designate and mark smoking

Spills

areas;

- Workers to be trained as fire marshals
- Fire escape routes to be shown clearly
- Provide enough first aid kits within the facility and have at least workers trained in first aid administering
- Emergency telephone numbers should be well displayed
- Take steps to prevent leaks and spills. Keep machinery, equipment containers, and tanks in good working condition and be careful when transferring used oil. Have sorbent materials available on site.
- If a spill or leak occurs, stop the spill from flowing at the source. If a leak from a container or tank can't be stopped, put the product in another holding container or tank.
- Contain spilled products. For example, containment can be accomplished by erecting sorbent berms or by spreading a sorbent over the spill; Develop a spill response action plan; Remove, repair, or replace the defective tank or container immediately; All grounds should be cemented to prevent spills from leaking into underground water
- Do not discharge petroleum products to sewers, drainage ditches, septic tanks, or streams.
- Do not dispose of petroleum products in landfills or mix them with wastes that will be disposed of in landfills.
- Do not mix petroleum products with cleaning solvents. The resulting mixture may be a hazardous waste.
- Do not use petroleum products for road oiling, dust control, weed control or for similar purposes.
- Keep storage containers closed when not actively adding or removing material- When storing drums keep an aisle space between drums to allow for inspection for leaks and damage.
- Install secondary containment to prevent the release of petroleum products to the environment-Inspect containers and secondary containment structures on a weekly basis to be certain that they are in good condition. Keep written records of these inspections
- Cement all ground in the depot to avoid leakage of petroleum products into underground water or contamination of soil; Have good plans of emergency cases of spill; Train all staff on hazard recognition, response plan implementation, safety, and clean up procedures, and reporting
- Firefighting equipment such as fire extinguishers should be provided strategic locations such as stores and construction areas.
- Regular inspection and servicing of fire equipment must be undertaken by reputable service provider and records such inspections maintained
- Signs such as "NO SMOKING" must be prominently displayed within the premises especially in parts where inflammable materials are stored

Fire safety

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.
- (c) County Director of Environment, Nyeri County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proposed project involves the construction of a luxury eco-lodge and sustainable tourist facilities which will provide top-notch hospitality to tourists. Details of the project are contained in the EIA Study Report.

Below is a summary of the anticipated impacts and the proposed measures.

Possible impacts	Proposed Mitigation Measures
Wildlife disturbance (human-wildlife conflicts)	<ul style="list-style-type: none"> • Allow animals as much free movement as possible around the site. The fence will be kept to a bare minimum to allow animals freedom of movement. • Identify and avoid encroaching into wildlife hideouts, breeding areas and feeding points. • Identify points at the river showing Hippo access points and ensure they are unrestricted to allow free movement. • Erect necessary barriers to avoid direct human-wildlife interaction including electric fences and safety rails. • No hunting of game meat at the luxury eco-lodge unless permitted
Solid and liquid waste management	<ul style="list-style-type: none"> • Use of an integrated solid waste management system • Thorough accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed. • Ensure that construction materials left over at the end of construction will be used in other projects rather than being disposed off. • Refurbish damaged items • Donate recyclable/reusable or residual

materials to local community groups, institutions and individual local residents or home owners.

- Use of durable, long-lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated.
 - Provide solid waste handling facilities such as waste bins
 - Ensure proper disposal of solid waste generated from the facility.
 - Provide adequate and safe means of handling sewage generated at the premise i.e. through sewer systems and other treatment methods.
 - Provide means for handling sewage generated by construction workers
 - Conduct regular inspections for sewage pipe leaks, blockages or damages and fix
- Vegetation disturbance
- Ensure sustainable building practices to make sure that as little of the natural flora and fauna is affected.
 - Designate access routes and parking within the proposed site.
 - Preserve of indigenous trees within the site.
 - Implement an appropriate landscaping program to help in re-vegetation
 - Ensure wood used for bonfires is sourced from woodlots and not from local area
 - Monitor evasive species within the project area and the conservancy
 - Prohibit introduction of plant and ornamental species without prior permission from plant specialists
- Increased storm water, runoff and soil erosion
- Harvest surface and roof-rainwater
 - A storm water management plan shall be designed.
 - Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil.
 - Ensure that construction vehicles are restricted to existing roads.
 - Ensure that any compacted areas are ripped to reduce run-off.
 - Open drains all interconnected will be provided on site and linked to peripheral storm water drains leading to the water bodies created or Mara River.
 - Plant suitable trees in degraded areas and control excessive soil erosion
- High demand for construction raw materials
- Source building materials from local suppliers who use environmentally friendly processes in their operations.
 - Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered.
 - Use at least 5%-10% recycled, refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills
- Dust emission
- Ensure strict enforcement of on-site speed limit regulations
 - Personal Protective equipment to be

- worn by construction workers
- Noise and vibration
- Planting grass and trees on the helicopter landing pad to control dust.
 - Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used.
 - Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through the Mara ecosystem which is sensitive
 - The structural system is intended to be light gauge steel which is a very light structure that allows construction in a short period of time and is less noisy.
 - Ensure that all generators are insulated or placed in enclosures to minimize ambient noise levels.
- Increased energy consumption
- Ensure electrical machinery, equipment, appliances and lights are switched off when not being used
 - Install energy saving fluorescent tubes at all lighting points instead of bulbs which consume higher electric energy
 - Maximizing day lighting. Exterior lighting will be minimized to control light pollution and designed so as not to be visible from outside.
 - Use efficient water heating systems that primarily rely on solar energy etc.
 - Monitor energy use during the operation of the project and set targets for efficient energy use
- Occupational health and safety (ohs) risks
- Develop a clear site organization plan and construction schedule
 - Ensure that machinery, equipment, personal protective equipment, appliances and hand tools used in construction do comply with the prescribed safety and health standards and be appropriately installed, maintained and safeguarded
 - Implement all necessary measures to ensure health and safety of the general public during operation of the project as stipulated in Occupational Safety and Health Act, 2007.
- High water demand
- Promptly detect and repair of water pipes and tank leaks
 - Encourage and sensitize construction staff on water conservation techniques
 - Installation of a reservoir water tank and water conserving.
 - Install water meters to record usage
 - Put in place controlled abstraction regime
 - Recycle water used as much as possible
 - Promote rain water harvesting
- Increased masai mara ecosystem carrying capacity
- Carry out an environmental audit report after the first year of operation and annually thereafter to ascertain impacts on the general ecosystem and mitigate accordingly
 - Put off unnecessary lights at night or use dim lights to avoid attraction of wildlife unnecessarily
- Protection of mara river
- Drainage channels draining into the river should be provided with effective and adequate screens to filter off any solid

waste

- A buffer distance of over 30m away from the River Bank shall be observed for any permanent construction
- Ensure that no waste is discharged into the river
- Ensure that the river is not depleted through over-abstraction.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.
- (c) County Director of Environment, Narok County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

Z. O. OUMA,
for Director-General,

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
