THE COUNTY GOVERNMENTS ACT

(No. 17 of 2012)

HULUGHO SUB-COUNTY

REALIZING the need to give effect to the objects and principles of devolution as set out in Articles 174 and 176 (2) of the Constitution and further aware that there is need to decentralize the functions of the County Government so as to provide services more efficiently to the people, the County Assembly of Garissa has in exercise of its legislative authority under Article 176 (2) of the Constitution and Section 48 (1) (e) and (5) of the County Government Act, 2012, unanimously approved the creation of Hulugho Sub-County as a new administrative unit.

Dated the 6th June, 2014.

MR/5048293

M. A. DUBAT,
Clerk to the Assembly.

THE COMPETITION ACT

(No. 12 of 2010)

FRANCHISE AGREEMENT BETWEEN KUMON EDUCATION
SA (PTY) LIMITED AND

APPLICATION FOR EXEMPTION

1. PURSUANT to provisions of section 25 (3), the Competition Authority wishes to notify the public that Kumon Education SA (PTY) Limited, a company incorporated in South Africa, has made an application under section 28 of the Act for exemption of their proposed three (3) year Franchise Agreement with the Franchisees set out in the Schedule.
2. In the agreement, Kumon Education (PTY) Limited intends to grant franchisees right to use the Kumon method of learning Mathematics and English subject to the following terms and conditions:
 - (a) The agreement will be non-exclusive but the franchisees will be limited to providing and utilizing the method at the Centre only and not any other premises.
 - (b) Similar right for operation of other franchised Centres shall not be granted within one kilometer radius from the Centre.
 - (c) The franchisee shall have an option to renew the agreement upon expiry of the initial term for a further period of five years, or such additional period as may be agreed upon.
 - (d) The franchisee shall charge monthly tuition fees and enrolment fees as guided by Kumon SA (PTY) Limited.
 - (e) Upon termination of the agreement, the franchisee or instructor shall not, within six months, thereafter acquire an interest in any other similar business activity without prior written consent of Kumon SA (PTY) Limited.
3. Any interested parties may, within thirty (30) days of the publication of this notice, submit any written representations on this application—
 - (a) through hand delivery to: The Competition Authority of Kenya, Railways Headquarters, Block "D" Ground Floor, Haile Selassie Avenue;
 - (b) through the Postal address : P.O. Box 36265-00200, Nairobi; or
 - (c) through email: info@cak.go.ke.

THE MINING ACT

(Cap. 306)

APPLICATION FOR A SPECIAL LICENCE

NOTICE is given that an application under section 17 of the Mining Act has been made by Bamba Mining Company Limited, of P.O. Box 723-00517, Nairobi, Kenya for a special license to prospect for iron ore and manganese ore over an area described in the schedule hereto and the said application has been accepted for consideration.

By virtue of section 7 (1) (d) of the Mining Act the said area of land is therefore excluded from prospecting and or mining except as regards any prospecting and mining rights granted in respect of the

area in question or any part thereof before the date of this notice which are subsisting or any right of renewal thereof.

Any objection to the grant of the special license may be made in writing and addressed to the Commissioner of Mines and Geology, P.O. Box 30009-00100, Nairobi, Kenya so as to reach him within thirty (30) days from the date of publication of this notice.

SCHEDULE

An area of approximately 40.6 km² situated in Kilifi County, delineated on Kilifi topo sheet Ref. No. SA-37-15 of scale 1:250,000 and the boundary points more particularly indicated in the table below.

Order	East (X)	North (Y)

GAZETTE NOTICE No. 4345

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED RELOCATION OF WILSON AIRPORT RE-
FUELLING SERVICE DEPOT IN NAIROBI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Total Kenya Limited) is proposing to relocate their Wilson Airport Aviation Re-fuelling Services Depot from its current site to a different permanent site within the airport as per the current Kenya Airports Authority layout planning for the airport.

The proposed airport re-fuelling services depot facility shall include the following main features:

- Four x 60 m³ capacity above ground horizontal storage tanks mounted on reinforced concrete saddles for Jet A-1 storage.
- Two x 10 m³ capacity above ground horizontal storage tanks mounted on reinforced concrete saddles for Diesel storage.
- Three x 30 m³ capacity above ground horizontal storage tanks mounted on reinforced concrete saddles for storage of fire fighting water.
- A pump house and drum shed.
- Two x 40 foot containers for spare parts.
- A road truck loading/offloading service bay and bowser parking yard.
- A site office for the depot staff.

The following are the anticipated impacts and proposed mitigation measures:

Impacts	Mitigation Measures
Risks associated with transfer of installations	<ul style="list-style-type: none"> • The tank shall be removed using a crane to reduce risk of damage. • Unnecessary movement and disturbance of soil surface shall be avoided. Watering shall be done where appropriate to control dust. • Degassing of the tank to reduce occupational hazards shall be done. • Resurface / pave open areas after the completion of the project. • Transfer of these installations shall be escorted and shall be done through 'wide road' carriage to warn other motorists to slow down to avoid bad incidents.
Interruption of existing logistics	<ul style="list-style-type: none"> • The relocation shall be done in phases to ensure no interruption of the ongoing operations. • The current facility shall be running as usual while awaiting completion and commissioning of the new site. • The current site shall be shut down upon confirmation that indeed the new site is fully functional.
Generated wastes and dust	<ul style="list-style-type: none"> • Ensure proper handling of the generated wastes and have an authorized and guided transportation and disposal away from the site area. • Provide personal protective equipments, materials and clothing such as nose masks and goggles to workers to ensure their safety. • Regular and prompt maintenance of construction machinery and equipment. • Control over areas generating dust particles by sprinkling water to reduce

	<ul style="list-style-type: none"> dust. Enclosure of such areas so as to mitigate effects of wind and hence controlling propagation of dust. A reputable solid waste handler will be contracted to regularly collect solid waste. The materials shall be properly segregated and separated to encourage recycling of some of them. 	<ul style="list-style-type: none"> Reliable operations and effective written operating procedures shall be adhered to. Good preventive and predictive maintenance techniques. Commitment to safety. Oil interceptors shall be provided. Enough lighting and in working condition shall be ensured. Floors and walls shall be kept clean.
Soil erosion	<ul style="list-style-type: none"> Unnecessary movement of soil materials from the site shall be avoided. Open areas shall be resurfaced / paved after the completion of the project. Suitable and well-managed vegetation to generate surface covers on the open areas and to control soil movement by erosion agents including water and wind shall be introduced. Suitable storm water drainage channels shall be provided and maintained regularly to avoid blockages. 	<ul style="list-style-type: none"> The following installations / facilities shall be made at strategic locations as a fire risk measure: Smoke detectors. Gas detection system. Fire alarms. Firefighting equipment. water pump and hosepipe. water tank with large volume of water. Workers shall be sensitized on fire risks and use firefighting equipment. "No Smoking" rule shall be observed. Precautionary signs shall be well displayed, clean and easily legible to the customer. There will be no use of mobile phones at fuel storage yard. All electrical components at the site shall be of appropriate quality to minimize risks associated with faulty electrical fittings. All cables serving the pumps shall be well insulated and in sealed conduits.
Surface drainage system	<ul style="list-style-type: none"> Drainage channels shall be installed in all areas that generate or receive surface water such as car parking and driveways Drainage channels shall be covered with gratings to prevent occurrence of accidents and dirt that would compromise flow of runoff. The channels shall be designed with regards to the peak volumes such as periods or seasons when there is high intensity of rainfall for avoid overflow. The drainage channels shall be self-cleaning which means they shall have suitable gradient to avoid blockages. Suitable storm water drainage channels shall be provided so as to effectively discharge water to safe areas. 	<ul style="list-style-type: none"> Provision of security throughout the project implementation shall be done Provision of emergency numbers at strategic points shall be done. All workers shall have access to communication facilities (phones etc.) for quick emergency response. Emergency Stop Buttons shall be installed. Staff shall be trained on how to use them. A well equipped First Aid kit shall be maintained. Safety precautions shall be observed during offloading of trucks.
Noise and vibration	<ul style="list-style-type: none"> Machineries and equipment in use shall be maintained to reduce noise resulting from friction. There shall be no unnecessary honking of vehicles. Provision of bill boards at the construction site gates notifying of the construction activity and timings shall be displayed. Shielding of the areas under works to reduce noise propagation shall be done. 	<ul style="list-style-type: none"> Traffic flow management There shall be sufficient parking space Unnecessary delays shall be avoided at the fueling bay. One staff shall be assigned the role of traffic management. Fueling point shall be kept clean, with no litter, oil or spillage.
Leaks from installations	<ul style="list-style-type: none"> Regular tests to ensure integrity of the installations such as air separators, valves, couplings, dispensing hoses and storage tanks shall be done Drops or wetness at the above ground tanks to ensure no leakage shall be checked regularly. Inventory management / stock reconciliation shall be done daily to ensure no leakages and to monitor available stocks. Installations shall be made of strong material such as steel to ensure no leaks Sound engineering shall be put in place. 	<ul style="list-style-type: none"> Security Tight security measures shall be observed by contracting a security firm to provide security guards at the facility. These security guards shall regulate motor vehicle and people entry and exit in to the facility. Any suspicious characters shall be reported to the management and police for appropriate action.
Cross contamination	<ul style="list-style-type: none"> Color codes for product storage tank identification shall be used. Density tests to confirm the quality of the product being offloaded shall be done always. 	

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Nairobi County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

Z. O. OUMA,
for Director-General,

MR/5048086 National Environment Management Authority.

GAZETTE NOTICE NO. 4346

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED GARSEN – HOLA – GARISSA 220KV AND GARISSA – WAJIR 132 KV HIGH VOLTAGE TRANSMISSION LINES

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Kenya Electricity Transmission Company Limited) is proposing to construct high voltage 132kV and 220 kV transmission lines to link Garsen-Hola-Garisa-Wajir.

The length of the line is estimated at 526km and is expected to serve Garissa, Tana River and Wajir Counties which are currently off-grid and served only by isolated diesel generators.

The following are the anticipated impacts and proposed mitigation measures:

Impacts	Mitigation Measures
Displacement of persons, Loss of Land and Land use rights	<ul style="list-style-type: none"> Community sensitization and awareness creation regarding the project. Conduct a Resettlement Action Plan (RAP) along the transmission line. RAP Implementation (compensation of PAPs, contingency). Re-alignment costs.
Occupational Health and Safety concerns	<ul style="list-style-type: none"> Supervision of compliance with occupational, health and safety standards. Training of all workers on public occupational health and safety practices.
Loss of Flora and Fauna	<ul style="list-style-type: none"> Mark out areas for clearance and use manual method of clearing. Undertake a selective clearance by removing tall woody species leaving saplings for quick regeneration of vegetation along the way leave. Re-vegetation with indigenous species.
Soil Erosion	<ul style="list-style-type: none"> Soils excavated for the erection of towers should be used for re- filling and should not be left exposed to wind or water for long periods. The contractor should avoid steep terrain during the transportation of construction material by using alternative routes or use light vehicles where appropriate. Re-plant degraded areas with local species common in the area to complement natural vegetation

Water pollution	<ul style="list-style-type: none"> regeneration to improve ground cover. Adherence to EMCA Regulations on water quality. Proper storage of all vessels containing oil, fuel and other hazardous chemicals. Training of site workers on clearing up spillages. Availing spillage kits including suitable PPE in storage areas. Proper disposal of waste containers, litter and other waste generated during construction in compliance with waste management regulations. Discharge of effluents to adhere to NEMA regulations. Routine inspection.
Visual Impact	<ul style="list-style-type: none"> Extensive public consultation during the planning of power line and power line right-of-way locations. After construction, natural vegetation should be restored in non operational areas of the site and/or additional landscape planting with local indigenous species used to improve views into the site.
Vehicular and Human Traffic Impacts	<ul style="list-style-type: none"> Extensive public consultation during the planning of power line and power line right-of-way locations After construction, natural vegetation should be restored in non operational areas of the site and/or additional landscape planting with local indigenous species used to improve views into the site.
Liquid and solid wastes	<ul style="list-style-type: none"> Sensitization of workers on environmental protection and safety Provision of solid waste collection facilities for the temporary storage of waste prior to disposal. Liaison with the local county authorities on suitable dumping site for generated waste. Excavated soil to be used for backfilling.
Noise and vibration	<ul style="list-style-type: none"> Use of noise protection devices when working with noisy equipment The contractor will also be expected to use serviceable equipment with low noise emission and instruct truck and machine operators to avoid raving of engines.
Air pollution (dust and exhaust emissions)	<ul style="list-style-type: none"> Sensitization of workers on environmental protection and safety. Control speed of construction vehicles. Water should be sprayed during the construction phase on dusty excavated areas. Regular maintenance of plant and equipment. Provision of dust masks for use when working in dusty conditions. Use of serviceable vehicles and machinery to avoid excessive smoke emission.
Bird mortalities	<ul style="list-style-type: none"> Undertake wire marking to alert birds to the presence of power line Build raptors platforms on top of pylons for roosting and nesting.

- | | |
|---------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Aircraft Navigation Safety | <ul style="list-style-type: none"> • Install visual markers as an indication for light aircraft. • Obtain KCAA approval for tower heights. |
| Electrocution from Live power lines | <ul style="list-style-type: none"> • Ensuring physical integrity of structures is maintained. • Deactivating and proper grounding of live power distribution lines before work is performed on, or in close proximity to the lines. • Ensuring that live wire work is conducted by trained workers only. • Ensuring the workers are properly isolated and insulated from any conductive object (live line work). |
| Working at heights during maintenance | <ul style="list-style-type: none"> • Testing of structures for integrity prior to undertaking work. • Implement a fall protection program that includes training in climbing techniques and use of fall protection measures. • Inspection, maintenance and replacement of fall protection equipment • Use of helmets and other protective devices. • Provision of first aid facilities at site. |
| Fire Risk | <ul style="list-style-type: none"> • Carry out routine thinning, slashing, and other maintenance activities, within and adjacent to Rights-of-Way in order to minimize the risk of fire. • No burning of any materials should be permitted at the site. |

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Garissa County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

Z. O. OUMA,
for Director-General,

MR/5048021

National Environment Management Authority.

GAZETTE NOTICE NO. 4347

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED RELOCATION OF DHL REFUELLING SERVICES FACILITY FROM EABL RUARAKA SITE TO DHL KASARANI SITE IN NAIROBI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Total Kenya) is proposing to relocate DHL Refueling Services Facility from EABL Ruaraka Site to DHL Kasarani Site in Nairobi County.

The re-location project shall involve the following activities; Removal and transfer of a 54cm³ above ground fuel storage tank, canopy, dispensing pumps, offloading pumps, tank saddles, and other equipment from Ruaraka to Kasarani, fabrication of an additional 50cm³ above ground storage tank, installation of the two tanks, high speed twin fuel dispensing pumps, fuel offloading facilities, canopy, safety signs and other equipment, Piping works, installation of an oil-water separator (interceptor), calibration of the two tanks, branding of the tanks, pumps and canopy with total logos and safety signs and remedial works at the Ruaraka site.

The following are the anticipated impacts and proposed mitigation measures:

Impacts	Mitigation Measures
Risks associated with transfer of installations	<ul style="list-style-type: none"> • The tank shall be removed using a crane to reduce risk of damage. • Avoid unnecessary movement and disturbance of soil surface. Watering should be done where appropriate to control dust. • Degassing of the tank to reduce occupational hazards. • Resurface/pave open areas after the completion of the project. • Transfer of these installations shall be escorted and shall be done through 'wide road' carriage to warn other motorists to slow down to avoid bad incidents.
Interruption of existing logistics	<ul style="list-style-type: none"> • A new tank 54m³ shall be installed at the new facility (Kasarani) tested and commissioned to ensure that the facility is operating efficiently. • Ruaraka facility shall be running as usual while awaiting completion of the relocation of the second tank. • Ruaraka site shall be shut down upon confirmation that indeed the Kasarani site is fully functional.
wastes and dust management	<ul style="list-style-type: none"> • Ensure proper handling of the demolished materials and have an authorized and guided transportation and disposal away from the site area. • Provide personal protective equipment, materials and clothing such as nose masks and goggles to workers to ensure their safety. • Regular and prompt maintenance of construction machinery and equipment. • Control over areas generating dust particles by sprinkling water to reduce dust. • Enclose such areas to mitigate effects of wind and hence controlling propagation of dust. • A reputable solid waste handler will be contracted to regularly collect solid waste. • The materials shall be properly segregated and separated to encourage recycling of some of them. • Some demolished stone materials shall be used as backfills.
Soil erosion	<ul style="list-style-type: none"> • Avoid unnecessary movement of soil materials from the site. • Resurface/pave open areas after the completion of the project. • Introduce suitable and well-managed vegetation to generate surface covers on

- theopen areas and to control soil movement byerosion agents including water and wind.
- Provide suitable storm water drainage channels and maintain them regularly to avoid blockages.
- Noise andvibration
- Machineries and equipment in use shall be maintained to reduce noise resulting from friction.
 - There shall be no unnecessary honring of Vehicles.
 - Provision of bill boards at the construction site gates notifying of the construction activity and timings.
 - Shielding of the areas under works to reduce noise propagation shall be done.
- Leaks from installations
- Regular tests to ensure integrity of the installations such as air separators, valves, couplings, dispensing hoses and storage tanks shall be done.
 - Drops or wetness to ensure no leakageshall be checked regularly.
 - Inventory management / stock reconciliation shall be done daily to
 - ensure no leakages and to monitor available stocks.
 - Installations shall be made of strongmaterial such as steel to ensure no leaks.
 - Sound engineering shall be put in place.
- Risk of fire
- Workers shall be sensitized on fire risks and use firefighting equipment.
 - "No Smoking" rule shall be observed.
 - Precautionary signs shall be well displayed, clean and easily legible to the customer.
 - There will be no use of mobile phones atthe forecourt.
 - All electrical components at the site shall be of appropriate quality to minimize risks associated with faulty electrical fittings.
 - All cables serving the pumps shall be well insulated and in sealed conduits.
- Security
- Tight security measures shall be observed by contracting a security firm to provide security guards at the facility.
 - These security guards shall regulatemotor vehicle and people entry and exit into the facility.
 - Any suspicious characters shall be reported to the management and police for appropriate action.
- Traffic flow management
- There shall be sufficient parking space
 - Unnecessary delays shall be avoided at the fueling bay.
 - One staff shall be assigned the role of traffic management.
 - Management shall ensure that there will be minimal blockages if any at the entrance and the exit.
 - Forecourt shall be kept clean, with no litter, oil or spillage.
 - Engines shall not be running while the vehicles are at the fueling bay.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Nairobi County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

Z. O. OUMA,
for Director-General,
National Environment Management Authority.

GAZETTE NOTICE NO. 4348

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED CONSTRUCTION AND OPERATION OF ALPHA FUEL SERVICES LIQUID PETROLEUM GAS FILLING AND FUEL DEPOT IN KIRINYAGA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Alpha Fuel Services) is proposing to start a fuel depot and LPG filling and distribution station in Sagana Township, Kariti Location, Sagana Division of Kirinyaga West District in Kirinyaga County

The proposed LPG filling and fuel depot will comprise a perimeter fence , entry & exit gates, grass lawn , flower beds ,driveway and parking ,three steel LPG storage tanks capable of holding 200 metric tonnes, an LPG cylinder filling pump facility, piping ,empty and filled LPG cylinder storage facility,3 mild steel fuel storage tanks each with a capacity for 50 M3, fuel pumps, temporary office, emergency assembly point and fire fighting equipment ,wash rooms sewer lines and septic tank

The following are the anticipated impacts and proposed mitigation measures:

<i>Impact</i>	<i>Mitigation Measure</i>
Solid waste and unused building materials	<ul style="list-style-type: none"> • Ensure all the waste, damaged and unused building materials are removed safely from the site and sold out, reused or disposed properly. • Landscaping the site and road reserve.
Fire ,safety	<ul style="list-style-type: none"> • Liaise with the local county government on awareness and training of locals on fire management. • Liaise with St John's Ambulance on training on first aid from fire accidents and incidences. • Regularly inspect the storage tanks using approved leakage detection techniques and take appropriate remedial measures recommended. • Install signage and warning signs of areas likely to be prone to fire – , no carrying of matches no smoking, switch off engine , parking, toilets and such other warning signs. • Provide appropriate firefighting equipment and procedures and insure property.

- Train staff in emergency preparedness.
 - Provide PPE for those working under hazardous condition.
 - Store LPG appropriately. Proponent should provide suitable fire extinguishers including ABC or CO2 and place them near probable source of ignition.
 - All the workers should be instructed on how to put off fires.
 - Warning signs of probable sources of fires should be placed within the premises.
 - Provide insurance cover for workers and the facility in case of fire
- Noise levels
- Handle cylinders carefully.
 - No handling of cylinders at night.
- Security and conflicts
- Vet recruits before engagement.
 - Employ locals as much as possible.
- Environmental Aspects
- Drainage channels could be maintained if premise is converted to another use.
 - If condemned, demolition and clearance should be done to rehabilitate the site for other use and dispose waste properly.
 - Dispose of gas properly.
- Socio economic aspects
- Building could be converted to another use.
 - Encourage workers to engage on other IGAs.
 - Workers should enlist with NHIF and NSSF SACCO society schemes.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Kirinyaga County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

Z. O. OUMA,
for Director-General,

MR/5021892 National Environment Management Authority.

GAZETTE NOTICE NO. 4349

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED BONDO CLUSTER IRRIGATION DEVELOPMENT PROJECT (PHASE I) IN SIAYA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent (National Irrigation Board) has proposed to develop the Bondo Cluster Irrigation Project. The Phase I of the project is

aimed at developing four irrigation schemes within Rarieda District and Bondo District with a combined irrigable area of 3,000 ha.

East Asembo scheme targets to develop a net irrigable area of 395 Ha, and will draw water from Lake Victoria at an intake located at 659519E, 9980822N. Great Nam scheme targets to develop a net irrigable area of 477 Ha, and will draw water from Lake Victoria at an intake located at 649370.6E, 9978176.217N. Wagusu scheme targets to develop a net irrigable area of 420 Ha, and will draw water from Lake Victoria at an intake located at 632908.997E, 9979429.988N; and Yala scheme targets to develop a net irrigable area of 2193 Ha, and will draw water from Yala River at an intake located at 646765E, 9996273N.

The proposed irrigation project is based on gravity and pumped systems. Gravity system will draw water from Yala river where there is substantial elevation to ensure water is conveyed to the irrigation areas using gravity head. The main components of the gravity system will comprise; Headwork/Intake chamber; Sedimentation basin; Conveyance Pipeline; Main Pipelines, Distribution Pipelines, General pipeline fittings and appurtenance.

Below is a summary of the anticipated impacts and proposed mitigation measures:

Impact	Mitigation Measures
Construction phase	
Interference with the physical setting	<ul style="list-style-type: none"> • The design shall in no way propose to implement developments that will hinder drainage, change the topography or introduce physical changes that are not in harmony with the physical setting of the Project area. • The structures to be developed should be aesthetically acceptable to blend in with the surrounding. These structures should not form or end up being used by the resident population as access or bridges. No residential facilities shall be erected on site and the proponent shall as much as possible complete the works in such a way that natural aesthetics shall be retained at the locations. Restoration shall be undertaken to ensure that the original setting is as much as possible retained.
Interruption of existing infrastructure	<ul style="list-style-type: none"> • Formal request for permission to cross, break in and build the water pipeline should be sought from affected property owners. • Formal engagement of key land and other property owners neighbouring the pipeline. • Passing of relevant information to each of the affected parties. • A work plan with clear responsibilities for each party should be developed to ensure smooth execution of the construction; and • On completion of works, each property owner should be contacted again to give views and if complains arise the contractor asked to address the same.
Flooding during construction	<ul style="list-style-type: none"> • Ensure pipeline routing are properly excavated. • Regularize checks and inspection of the pipeline routing to avert blockages; • The Resident Engineer should inspect all pipeline connections and joints.
Soil erosion	<ul style="list-style-type: none"> • The contractor must implement erosion control measures to avoid erosion in areas that are prone to erosion, e.g. steep slopes and drainage lines. • Construct soil conservation measures at stockpiled sites. • Topsoil must be reinstated and rehabilitated and rehabilitated on top of

	sub soil.		
Soil compaction	<ul style="list-style-type: none"> • All excavation works must be properly backfilled and compacted. • Vehicles must be kept on existing roads or tracks where possible. • Minimize compaction during stockpiling by working the soil in the dry state. • Avoid unnecessary vehicle movement; • Rip compacted areas to reduce runoff and re-vegetate where required. • All topsoil and other soil profiles must be managed strictly. 	Oil spills	<p>constructed in such a manner so as to ensure that the surrounding areas (including groundwater) are not polluted.</p> <ul style="list-style-type: none"> • Vehicle maintenance should be done on purpose- built impervious concrete platforms with oil and grease traps. • Standard operating practices for refueling mobile equipment such as a minimum 15m from any water channel should be practiced. • Operator training is an important aspect of preventive approach and should be put into used before assignment or in the course of duty. • All above surface tanks should be bounded and mounted on paved surfaces. • Ensure that all equipment are in good condition, clean and free from leaks • Oil spill containment and clean up equipment should be kept at the contractor's camps.
Vegetation loss	<ul style="list-style-type: none"> • The contractor should ensure that vegetation is cleared only where necessary. • Where mature trees are cut, new trees should be planted in adjacent areas. 	Air quality and dust	<ul style="list-style-type: none"> • Workers shall be trained on management of air pollution from vehicles and machinery. • Vehicles delivering soil materials should be covered to reduce dust emissions. • Activities generating dust (excavation, handling and transport of soils) to be carried out in calm weather. The Resident Engineer shall suspend earthworks operations wherever visible dust is affecting properties adjoining the work site. • The contractor should provide dust masks to all personnel on dust-prone work sites. • Records of related complaints should be kept by the contractor and communicated to the Resident Engineer; • All construction machinery should be maintained and serviced in accordance with the equipment specifications and manufacturer's standards.
Extraction of natural resources	<ul style="list-style-type: none"> • A current and valid authorization from the Department of Mines prior to any blasting activity shall be obtained. • A qualified and registered blaster by the Department of Mines and Geology shall supervise all blasting and rock-splitting operations at all times. • The Contractor shall ensure that emergency services are notified, in writing, a minimum of 24 hours prior to any blasting activities commencing on site. • The Contractor shall take necessary precautions to prevent damage to special features and the general environment, which includes the removal of fly-rock. Environmental damage caused by blasting/drilling shall be repaired at the Contractor's expense. • The Contractor shall ensure that adequate warning is provided to the local communities immediately prior to all blasting. All signals shall also be clearly given. • The Contractor shall use blast mats for cover material during blasting. Topsoil shall not be used as blast cover. 	Noise and vibrations	<ul style="list-style-type: none"> • Noise levels shall be kept within acceptable limits and construction activities shall, where possible be confined to normal working hours. • Equipment should be maintained regularly to reduce noise resulting from friction. • Workers in the vicinity of high-level noise to wear Personal Protective Equipment; • Limit pickup trucks and other small equipment to an idling time, observe a common sense approach to vehicle use and encourage workers to shut off vehicle engines whenever possible. • No unnecessary hooting by project and resident vehicles.
Solid wastes	<ul style="list-style-type: none"> • Provide litter collection facilities such as bins. • Dispose waste at a location that shall be approved by Resident Engineer in accordance with the waste management plan after consultation with the relevant stakeholders, including the local community. • The disposal site need to be more than 100 meters from watercourses and in a position that will facilitate the prevention of storm-water runoff from the site from entering the watercours. 	Operational phase	
Wastewater	<ul style="list-style-type: none"> • All grey water runoff or uncontrolled discharges from the site/working areas (including wash down areas) to water courses should be contained and properly channelled. • Water containing such pollutants as cements, concrete, lime, chemicals and fuels shall be discharged into a conservancy tank for removal from site; • Potential pollutants of any kind and in any form shall be kept, stored and used in such a manner that any escape can be contained and the water table not endangered. • Wash areas shall be placed and 	Pollution by pesticides and insecticides	<ul style="list-style-type: none"> • Adopt an integrated pest management system, eco- farming and Adopt biological control and improved agricultural practices.
		Hydrology	<ul style="list-style-type: none"> • Adhere to the safest maximum permitted abstracted water quantities at the intakes. • Alternating release volumes of water from the intakes during low river flow

seasons to optimize usage without interference with aquatic life and downstream users.

- The Proponent shall monitor the hydrology to determine whether there is reduced downstream flow and to determine the right levels of abstraction.
- Water logging
- Assess project soils and their management needs, building dykes, apply water efficiently, consider drip or dawn/evening sprinkler irrigation, use lined canals or pipes to prevent seepage. Mulch exposed soil surfaces, Flush irrigated land regularly, Cultivate crops having high tolerance to salinity.
- Land use conflicts
- Control land use conflicts through Land use planning that should be participatory to designate areas for ecological, grazing and farming.
- Water use conflicts
- Encourage community participation in the project operation and develop an established community conflict resolution system.
- Emergence of water related diseases
- Clearing sediment and weeds regularly, Provide/ensure alternate facilities for domestic water supply, bathing and human waste disposal, Provide education and training for farmers and other community members on: Irrigation health risks, efficient use of irrigation water, Proper storage, handling, use and disposal of agro-chemicals, Monitor disease/infection occurrence and public health indicators, and take corrective measures.
- Decommissioning phase
- Demolition waste
- All structures that will not be used for other purposes must be removed and recycled/reused as far as possible.
- Vegetation disturbance
- Implement an appropriate re-vegetation program to restore the site to its original status.
 - Consider use of indigenous plant species in re-vegetation.
- Noise and vibration
- Ensure that all equipment used are insulated or placed in enclosures
 - The noisy demolition works will be planned to be during the day.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Siaya County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

National Environment Management Authority.

GAZETTE NOTICE No. 4350

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED BADASA CLUSTER IRRIGATION DEVELOPMENT IN MARSABIT CENTRAL DISTRICT, MARSABIT COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Irrigation Board) is proposing to implement the Cluster Irrigation Development Project aimed at developing two irrigation schemes within Marsabit Central District with a combined irrigable area of 300 ha. Songa scheme targets to develop a net irrigable area of 150 Ha, and will draw water from Songa dam. Badasa scheme targets to develop a net irrigable area of 150 Ha, and will draw water from Badasa dam. The proposed irrigation project is based on drip irrigation system which shall be adopted since; it is already under practice in the project area; Water is not available in plenty hence a system that is efficient in water use is preferred; Since pumping to great heads for sprinkler will lead to high operation and maintenance cost which may not be sustainable

Below is a summary of the anticipated impacts and the proposed mitigation measures:

Impact	Proposed Mitigation Measures
Interference with the physical setting	<ul style="list-style-type: none"> • The design shall not hinder drainage, change the topography or introduce physical changes that are not in harmony with the physical setting of the Project area. • The structures to be developed shall blend in with the surrounding. • Restoration shall be undertaken to retain the original setting.
Interruption of existing infrastructure	<ul style="list-style-type: none"> • Formal request for permission to cross, break in and build the irrigation infrastructure should be sought from affected property owners. • Formal engagement of land and other property owners neighbouring the pipeline. • Passing of relevant information to each of the affected parties. • Develop a work-plan to ensure smooth execution of the construction; and • On completion of works, each property owner should be contacted again to give views and if complains arise the contractor asked to address the same.
Soil erosion	<ul style="list-style-type: none"> • Implement erosion control measures in erosion prone areas. • Construct soil conservation measures at stockpiled sites. • Topsoil must be reinstated and rehabilitated and rehabilitated on top of sub soil. • All excavation works must be properly backfilled and compacted.
Soil compaction	<ul style="list-style-type: none"> • Vehicles must be kept on existing roads or tracks where possible. • Minimize compaction during stockpiling by working the soil in the dry state. • Avoid unnecessary vehicle movement. • Rip compacted areas to reduce runoff and re-vegetate where required.
Contractor's camps	<ul style="list-style-type: none"> • Have comprehensive waste management and sanitation plan and facilities. • All storage tanks and equipment should have correct labels and Material Safety Data Sheets. • Adequate emergency response plan

	<p>should be in place in the camps.</p> <ul style="list-style-type: none"> • Employ best practice management "housekeeping" in all the camps. • Remove camps after use and the land restored to its previous condition or better. 	Air quality and dust	<ul style="list-style-type: none"> • Train workers on management of air pollution from vehicles and machinery. • Cover vehicles delivering soil materials to reduce dust emissions. • Activities generating dust to be carried out in calm weather. • Provide dust masks to all personnel on dust-prone work sites. • Avoid removal of vegetation until such time as clearance is required and exposed surfaces shall be re-vegetated or stabilized as soon as practically possible.
Vegetation loss	<ul style="list-style-type: none"> • The contractor should ensure that vegetation is cleared only where necessary and new trees should be planted in areas adjacent to the cleared ones. 	Noise and vibrations	<ul style="list-style-type: none"> • Keep noise levels to within acceptable limits. • Equipment should be maintained regularly to reduce noise resulting from friction. • Workers in the vicinity of high-level noise to wear Personal Protective Equipment. • Limit pickup trucks and other small equipment to an idling time. • No unnecessary hooting by project and resident vehicles. • Any complaints received by the Contractor regarding noise will be recorded and communicated to the Resident Engineer.
Extraction of natural resources	<ul style="list-style-type: none"> • Obtain authorization from the Department of Mines prior to any blasting activity shall be obtained. • A registered blaster Geology shall supervise all blasting and rock-splitting operations at all times. • The Contractor shall ensure that emergency services are notified, in writing prior to any blasting activities commencing on site. • The Contractor shall ensure that adequate warning is provided to the local communities prior to all blasting. • The Contractor shall use blast mats for cover material during blasting. 	Occupational health and safety	<ul style="list-style-type: none"> • Contractor to establish a comprehensive Health and Safety Plan. • Ensure compliance with all standards and health and safety regulations. • Establish and enforce a strict code of conduct for all project drivers including outside suppliers delivering materials.
Solid wastes	<ul style="list-style-type: none"> • Employ an integrated waste management strategy. • Provide litter collection facilities such as bins. • Chemical or hazardous wastes shall not be burnt on site or dump in open pits. • Maximize the re-use of all excavated materials in the works. 	HIV/AIDS	<ul style="list-style-type: none"> • Education and sensitization of workers and the local communities on STIs, provide condoms to the project team and the public in conjunction with local NGO's dealing with HIV/AIDS. • Where possible conduct regular sensitization campaigns and monitoring and evaluation of the modes used during the two year course of the project; • Formation of peer groups from among the project staff to ensure continuity in training and awareness raising. • The contractor has to institute HIV/AIDS awareness and prevention campaign amongst workers for the duration of the contract e.g. erect and maintain HIV/AIDS information posters at prominent locations as specified by the Resident Engineer.
Wastewater	<ul style="list-style-type: none"> • All grey water runoff or uncontrolled discharges from the site/working areas to water courses should be contained and properly channelled. • Water containing such pollutants as cements, concrete, lime, chemicals and fuels shall be discharged into a conservancy tank for removal from site. • Potential pollutants of any kind and in any form shall be kept, stored and used in such a manner that any escape can be contained and the water table not endangered. • Wash areas shall be placed and constructed in such a manner so as to ensure that the surrounding areas (including groundwater) are not polluted. 	Pollution by pesticides	<ul style="list-style-type: none"> • Adopt an integrated pest management system, eco-farming and Adopt biological control and improved agricultural practices.
Oil spills	<ul style="list-style-type: none"> • Vehicle maintenance should be done on purpose-built impervious concrete platforms with oil and grease traps. • Standard operating practices for refueling mobile equipment such as a minimum 15m from any water channel should be practiced. • Operator training is an important aspect of preventive approach and should be put into used before assignment or in the course of duty. • All above surface tanks should be bounded and mounted on paved surfaces. • Ensure that all equipment are in good condition, clean and free from leaks • Have in place oil spill containment and clean up equipment at the camp sites. 	Land use conflicts	<ul style="list-style-type: none"> • Control land use conflicts through Land use planning that should be participatory to designate areas for ecological, grazing and farming.
		Water use conflicts	<ul style="list-style-type: none"> • Encourage community participation in the project operation and develop an established community conflict resolution system .
		Human wildlife conflict	<ul style="list-style-type: none"> • Collaborate with KWS, KFS and other relevant government agencies in managing wildlife; create buffer zones, providing separate watering points for fauna.

- Demolition waste (decommissioning)
- Use of an integrated solid waste management system.
 - All structures that will not be used for other purposes must be removed and recycled/reused as far as possible.
 - All foundations must be removed and recycled, reused or disposed of at a licensed disposal site.
 - Where recycling/reuse is not possible, the materials should be taken to a licensed waste disposal site.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Marsabit County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

Z. O. OUMA,
for Director-General,

MR/5048151 National Environment Management Authority.

GAZETTE NOTICE NO. 4351

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED WIKITHUKI IRRIGATION PROJECT SITUATED IN WIKITHUKI SUB LOCATION, KYENINI LOCATION, MUSAVANI DIVISION, TSEIKURU DISTRICT IN KITUI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Irrigation Board) proposes to put up an Project in Wikithuki sub location, Kyenini location, Musavani Division, Tseikuru District in Kitui County.

The project will be constructed in two phases and will entail among other things the abstraction of water from Tana River through a pumping station to stilling basins before being conveyed through a system of main and tertiary canals for application to the field through open furrow system. A booster station will be constructed to raise water to other basins for application to the fields through drip and sprinkler irrigation system. The two phases of the project are expected to bring the irrigated land to a total of 900 acres, 500 acres of which is designed to use canal and furrow irrigation system, 400 acres will be based on a combination of drip and sprinkler systems of irrigation. The main components to be constructed in each of the phases considered in this design are: intake sump, pump house, pump, receptor basins, rising mains; road and their crossing canals, division boxes, scheme office and store, booster station, design of sprinkler irrigation system, scheme electric fencing, bush clearing and land levelling, roads and culvert crossings

The following are the anticipated impacts and proposed mitigation measures:

Impacts	Mitigation Measures
Water pollution	<ul style="list-style-type: none"> • Limit number of vehicles and area of construction. • Compaction of loose material & Diversion

	<ul style="list-style-type: none"> of storm water flows from construction sites. • Hazardous wastes to be properly disposed by a licensed waste handler. • Apply appropriate irrigation management. • Ensure appropriate agricultural practices and control of inputs. • Adhere to waste discharge standards.
Loss of trees and greenery beauty	<ul style="list-style-type: none"> • Minimize number of trees cut. • Revegetation.
Water borne diseases	<ul style="list-style-type: none"> • Construction of public convenience for both genders.
Siltation	<ul style="list-style-type: none"> • Ensure proper design and layout of field to allow for self cleaning of canal. • Ensure appropriate terracing if possible. • Ensure water application rate does not exceed soil intake rate. • Upgrade the other technologies in future. • Manual desilting of canals.
Vector diseases	<ul style="list-style-type: none"> • Manage irrigation water to avoid runoff or excessive application. • Avoid leakage leading to water logging.
Accidents and ill health	<ul style="list-style-type: none"> • Consult with local community and health workers. • Provide HIV/AIDS awareness education to all farmers and workers on site. • Develop and implement an appropriate OS&H policy.
Chemical poisoning	<ul style="list-style-type: none"> • Manage and use chemicals as recommended by manufacturers. • Develop and implement an appropriate OS&H policy.
Loss or disruption of important Communal pathways to watering points	<ul style="list-style-type: none"> • Upgrade local facilities as part of irrigation's social responsibility. • Provide safe crossing points and new pathways to ensure that communities are not cut off from each other or from community facilities and resources due to pipe networks.
Aquatic fauna	<ul style="list-style-type: none"> • Manage handling, application and disposal of agrochemicals and wastewater as per design and specifications.
Nuisance of Smoke, dust and noise	<ul style="list-style-type: none"> • Control and limit burning activities. • Control transport movement and hours of operation.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Kitui County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

Z. O. OUMA,
for Director-General,

MR/5048151 National Environment Management Authority.

GAZETTE NOTICE NO. 4352

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED REHABILITATION OF KISUMU SEWAGE
TREATMENT SYSTEM IN KISUMU CITY, KISUMU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent (Lake Victoria Environment Management Project II) to support the expansion of the sewerage system and the construction of Artificial Wetland for Kisumu City to improve the final effluent quality that is discharged into River Kisat that finally discharges into Lake Victoria.

The sewerage system for Kisumu City is earmarked for expansion to be able to serve the Western Sewage District of Kisumu City, which is currently un-served but is developing at a high rate. As part of this improvement, Kisat Conventional Sewage treatment plant is set to undergo rehabilitation while Nyalenda Sewage treatment lagoons are already on a progressive rehabilitation.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impacts</i>	<i>Proposed Mitigation Measures</i>
Stakeholder preparation Seeking approvals	<ul style="list-style-type: none"> • Involvement of stakeholders and public. • Preparation of management plan. • Acquisition of the project land if necessary.
Establishment of construction camp sites	<ul style="list-style-type: none"> • Undertake ESIA studies for the target camp sites and obtain approval from the relevant authorities (including NEMA). • Isolate through fencing the camp sites from access by the public for their safety.
Access to campsites	<ul style="list-style-type: none"> • Utilize to the extent possible the existing public roads to avoid social and economic disruption. • Ensure road safety measures for the construction vehicles to the extent possible by observing all traffic regulations.
Safety risks	<ul style="list-style-type: none"> • Provide notices, signage and information to the public for their safety at all locations.
Air pollution	
Social nuisance	<ul style="list-style-type: none"> • Install barriers along walkways, crossings and public places affected by the works for public safety. • Where there are potential for nuisance from dust generation, ensure earth moving is under damp conditions (consider watering where necessary). • Inform immediate communities or stakeholders of the activities for harmony. • Earth moving to take the shortest period possible. • Sewers channels to be cut in phase and small sections.
Public safety	<ul style="list-style-type: none"> • Notify public the intent to cut sections for safety precautions.
Occupational safety	<ul style="list-style-type: none"> • Provide signage and safety information in all work areas. • Ensure compliance by workers with safety safeguards including the OHS, provision of safety gear and enforcement of application.
Disruption of amenities (access roads, services	<ul style="list-style-type: none"> • Notify other services providers and laying of sewer pipes and testing be

lines and driveways)	<p>undertaken within the shortest period to avoid public disruption.</p> <ul style="list-style-type: none"> • Mark the lines to avoid conflicts with other activities.
Materials sourcing, delivery and storage	<ul style="list-style-type: none"> • Construction material sources should be environmentally sustainable (approved accordingly). • Delivery routes and modes of transport should be approved. • Material storage on site not to be internal or external nuisance. • Material residuals to be disposed off in accordance with established regulations.
Waste removal and disposal	<ul style="list-style-type: none"> • Construction wastes (residual earth, debris and scrap materials) to be removed for safe disposal. • Encourage recycling where possible (concrete debris for access road surfacing). • Contaminated organic matter in the work areas including sludge and grit matter (sewerage plants) to be isolated for safe disposal.
Health and Safety	<ul style="list-style-type: none"> • Provide construction workers with personal protective gear (gloves, gum boots, overalls and helmets), especially at the wastewater treatment plants. • Provide temporary toilets and bathrooms for the construction workers at the work sites. • Provide onsite first aid kit accessible by the workers on need. • Isolate the site for access by the local communities during the construction for their safety and health.
Air Quality Control	<ul style="list-style-type: none"> • Control dust emissions in all work areas (watering where necessary). • Sludge to be covered on removal and transit. • Avoid open burning of solid materials during construction works. • Any materials preparation (e.g. crashing) be undertaken in controlled.
Environmental Pollution Control	<ul style="list-style-type: none"> • Ensure effluent discharge during construction remains controlled. • Neutralize all solids waste matter (including sludge and grit matter before off-site disposal).
Social interactions	<ul style="list-style-type: none"> • Fence up the site to keep off local communities for their safety (especially children). • Provide safe shed for the workers who may be served food by the local communities. • Ensure any materials released to the local communities for re-use is disinfected.
Sewer connections	<ul style="list-style-type: none"> • Provide easy connection points to the treatment plant for the immediate residents for enhanced sense of ownership.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Kisumu County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

Z. O. OUMA,
for Director-General,
National Environment Management Authority.

GAZETTE NOTICE NO. 4353

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
APPLICATION FOR ACCESS PERMIT

INVITATION FOR PUBLIC COMMENTS

PURSUANT to legal notice No.160 of the Environmental Management and Coordination (Conservation of Biological Diversity and Resources, Access to Genetic Resources and Benefit Sharing) Regulations, 2006 the National Environmental Management Authority (NEMA) has received application for access permit for the following:

1. Dustin Rubenstein, Columbia University, P.O. Box 1200, Amsterdam, Avenue, New York, NY.

Activities:

Collection of feathers, whole blood, plasma, blood products and egg shell fragments from superb starlings, *Lamprotornis superbus* from Mpala Ranch and Mpala Research Centre in Laikipia. The samples will be exported for analysis in the applicant's laboratory at Columbia University in New York City, USA.

2. Gerald M. Mkoji, Kenya Medical Research Institute, P. O. Box 54840-00200, Nairobi.

Activities:

Collection of snails in the genus *Biomphalaria* and *Bulinus* from Mwea, Kisumu and on the Lake shores, Lake Victoria. Specimen analysis will be done at Kenya Medical Research Institute and from time to time be exported to the collaborators' laboratories in the USA for further analysis and experimentation.

3. Hu George Wang, Mpala Research Center, P.O. Box 555, Nanyuki.

Activities:

Collection of insect limbs from at Mpala Research Centre and DNA bar coding analysis will be done at Smithsonian Institution, Washington, DC, USA.

NOTE:

The full documentation of the proposed activities is available during working hours at the National Environment Management Authority (NEMA) headquarters, Popo road, off Mombasa road, Nairobi.

The Authority is therefore inviting the public to submit oral and written comments within 21 days from the date of publication of the notice of the Director General to assist the authority in the determination of the application.

GEOFFREY WAHUNGU,
Director-General.

- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
