received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Oil Corporation of Kenya Limited) is proposing to construct a service station near Naivas supermarket within Nakuru Town centre along the Nakuru-Nairobi highway on Plot L.R. No. Nakuru Municipality Block 16/263 Nakuru Town, Nakuru County.

The proposed project will comprise a canopy over the pumps, sales office, a store, underground fuel tanks, compressor/generator, tyre centre and car wash, drive ways, walkways, acceleration and deceleration lanes, interceptor tank and washrooms.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impact</i>	<i>Proposed mitigation measures</i>
Air pollution	<ul style="list-style-type: none"> Control speed and operation of construction vehicles. Prohibit prolonged engine idling. Spray water and/or wet surfaces during excavation works. Maintenance of construction plant and equipment. Sensitize construction workers on measures to reduce air pollution. All bare areas should be landscaped after construction to reduce dust. Provide respiratory protective devices.
Noise pollution	<ul style="list-style-type: none"> Maintain plant equipment. Construction should be carried out only during daytime i.e. 0800 – 1700 HRS. Workers to wear hearing protection when working in noisy section.
Traffic density	<ul style="list-style-type: none"> Proper signage put in place to notify neighbours of the activity and presence of heavy vehicles and to direct traffic. Presence of boards directing patrons to the site. Strict adherence to traffic rules.
Ecological considerations (flora and fauna)	<ul style="list-style-type: none"> The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.
Soil erosion and compaction	<ul style="list-style-type: none"> Provide soils conservation structures on the areas prone to soil erosion to reduce impact of erosion such as stone pitching on the drains which are near the road. There should be designated pathways and driveways for movement within the compound to avoid unnecessary compaction. All bare areas should be well landscaped after completion.
Solid waste management	<ul style="list-style-type: none"> Construction debris should be collected by a licensed waste handling company. Excavation waste should be re-used or backfilled. Waste generated should be collected by a licensed waste handling company and the contractor should ensure the construction of a central waste collection point with bulk storage facilities.
Oil leaks and spills	<ul style="list-style-type: none"> Machinery should be well maintained to prevent oil leaks. Contractor should have a designated area where maintenance is carried out and that is protected from rain water. All oil products should be stored in a site store and handled carefully.
Security	<ul style="list-style-type: none"> The site will be fenced off using iron

	<ul style="list-style-type: none"> • sheets during renovation. • Round the clock security for the facility. • Adequate lighting and an alarm system installed.
Loss of vegetation	<ul style="list-style-type: none"> • Designate access pedestrian routes and parking zones that are cabro paved. • Provide signs marked do not Walk/ Park on the grass. • The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.
Occupational health and safety	<ul style="list-style-type: none"> • Provide Personal Protective Equipment. • Train workers on personal safety and how to handle equipment and machines. • Report any accidents / incident and treat and compensate affected workers. • The site will be fenced off using iron sheets during renovation to protect the public from unexpected accidents.
First aid	<ul style="list-style-type: none"> • A well-stocked first aid kit shall be maintained by a qualified personnel.

The full report of the proposed project is available for inspection during working hours at:

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED 15MW COAL FIRED PLANT IN MERRUESHI, KAJIADO COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Devki Energy Company Limited) is proposing to construct a 15MW Coal Fired plant in Merrueshi, Kajiado County. The proposed coal power plant would be located at a site near south of Merrueshi village in Kajiado County. Proposed site is located at 22° 0' 49" 48" N latitude and 69° 0' 30" 58" E longitude. The site is well connected with State Highway Emali/Oloitok Road (A104). This project also is in line with the Government of Kenya's goal and plan of having an additional 5,000MW injected into the national grid by 2015 and therefore remains a critical contributor to this objective.

The following are the anticipated impacts and proposed mitigation measures:

Impact	Mitigation Measures
Air Quality	<ul style="list-style-type: none"> • Undertake air sampling (quality) every 6 months for sensitive receptors. • Applicable standard of 150 mg/Nm3

	<ul style="list-style-type: none"> • for particulate emission will be followed. • Installation of electrostatic precipitators (ESP) and Single-flue; Advance low NOx burners for steam generators. • Sulphur content of the heavy fuel oil will not exceed 2%. • Provision of dust suppression facilities. • Develop Air Quality Management Plan
Degradation of water sources/water pollution	<ul style="list-style-type: none"> • Ensure valid permits on construction of water abstraction (sources established in the project site/boreholes/ construction). • Groundwater abstraction is on permits conditions (locations to be identified). • Construction of underground neutralization pit, guard ponds and ash ponds. • Construction of a sewerage system. • Construction of soak-away pits and or reticulated drainage network.
Noise emission/pollution	<ul style="list-style-type: none"> • Provision of adequate PPE for workers. • Steam turbine generator to be housed in closed buildings. • Provision of 5m wide greenbelt at plant boundary to attenuate noise. • Develop Noise Mitigation Plan.
Ecological impacts	<ul style="list-style-type: none"> • Develop a Wildlife Management and Protection Plan. • Observation of speed limits. • Warning signs in areas where wildlife movement/crossing is common. • Education, training and awareness prohibiting workers from killing wildlife.
Solid waste impacts	<ul style="list-style-type: none"> • Develop Standard Operating procedures (SOPs) and schedules for the project works. • The contractors to develop waste management plans and provide appropriate facilities for their operations. • Spoil disposal sites should be approved by NEMA before dumping commences. • Ash generated will be stored in silos within the plant site and used for production of cement. • Disposal facilities (receptacles) provided at strategic points in the plant. • Consider Recycling or Re-Use and waste segregation during construction and operation.
Traffic and transport	<ul style="list-style-type: none"> • Develop Traffic Management Plan • Observing speed limits. • Awareness and training for drivers. • Erection of warning/caution signs. • Erection of speed humps.
Unplanned events/fire and hazards	<ul style="list-style-type: none"> • Fire prevention systems and secondary containment will be provided for storage facilities, where necessary, to prevent fires or the releases of hazardous materials to the

environment.

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 42 and 43 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received Draft of Strategic Environmental Assessment (SEA) reports for the Olkaria Geothermal Field Development Programme and the Eburru Geothermal Field Development Programme.

The proposed Geothermal Development Programme at Olkaria and Eburru is part of KENGEN's Geothermal Expansion Programme, which is a nine-year programme (2012 to 2020). This Expansion Programme is part of KENGEN's Good to Great Transformation Strategy whose objective is to increase the Company's installed capacity to over 3000MWe by 2020. In this Strategy, the installed capacity for geothermal energy is expected to increase by over 1110MWe by 2020, and most of this expansion will take place in the Olkaria Geothermal Field.

Olkaria is a sensitive area in which the development of the geothermal resource needs to conform to the policies and strategic plans for ensuring environmental sustainability in Kenya, and a balance needs to be achieved between biodiversity conservation, the needs of the local communities, geothermal development and interests of all stakeholders.

The Eburru Geothermal License Area is a sensitive area that includes part of the valuable Eburru Forest (part of the Mau Forest Complex) and the Eburru community. Geothermal development in Eburru needs to conform to the policies and strategic plans for ensuring environmental sustainability in Kenya, and a balance needs to be achieved between biodiversity conservation, the needs of the local communities, geothermal development and interests of all stakeholders.

The methodology developed for the draft Strategic Environmental Assessment follows the 2012 Kenyan SEA Guidelines, International Best Practice and the requirements of the International Financial Institutions that are likely to fund the Programme, namely the World Bank, Agence Francaise de Development, KfW Entwicklungsbank, European Investment Bank and Japan International Cooperation Agency. The SEA assesses in detail the potential impacts of the proposed project, the obligations derived from other Policies, Plans and Programmes, and the stakeholder concerns in relation to all the significant environmental and social aspects identified, including biodiversity conservation, economy, employment, air quality, water, noise, soil, solid waste, tourism, agriculture, education, health infrastructure, housing, roads and transport.

The Strategic Environmental Assessment for Olkaria and Eburru proposes the following:

1. To assess the level of compliance of the Programme with the other relevant policies, plans and strategies;
2. To assess whether the proposed developments are compliant with EMCA (1999) and its Regulations;
3. To assess compliance to international conventions that Kenya is a signatory and with the requirements of the International Financial Institutions that participate in the financing of geothermal process in the area;

4. To identify, predict, assess and where necessary mitigate the environmental and social impacts that are likely to be caused by the proposed programme;
5. To engage with the affected stakeholders throughout the process to ensure that it is transparent, to incorporate stakeholders' concerns into the assessment, incorporating their views on the long term impacts of geothermal developments and to promote stakeholders participation in the decision making process and;
6. To identify development alternatives in terms of location, technologies, scheduling, construction and operation.

The key points for Olkaria and Eburu SEA are:

- Analysis of KENGEN's Geothermal Development Programme.
- Review of legislation and regulatory framework for the SEA.
- Analysis of related Policies, Plans and Programmes.
- Description of the environmental and social baseline.
- Situation analysis.
- List the potential environmental and social impacts and related indicators, targets, threshold and limits of acceptable change.
- Development and analysis of alternatives.
- Prediction and assessment of impacts.
- Identification of enhancement opportunities and mitigation methods.

Over 80 mitigation measures, monitoring measures and recommendations are outlined in the SEA Reports to avoid, minimise or compensate for potential negative impacts and maximise positive impacts resulting from the programme. Key mitigation measures include the following:

Implementing a Strategic Environmental and Social Management System to apply and monitor the mitigation measures outlined in this SEA in a systematic, efficient, transparent and participatory manner;

Not developing geothermal resources (geothermal well drilling or power plant construction) in certain areas within the geothermal license area identified as critical for biodiversity conservation and tourism;

Training the local communities to increase the number of local people employed by KENGEN and to encourage the local groups to bid for contracts with KENGEN;

Developing a Corporate Social Responsibility Priority Setting System: KENGEN will design a system to prioritise CSR actions and handle CSR requests by the different stakeholders. This will be prepared in consultation with all identified stakeholders and ensure a systematic and transparent approach for the selection and implementation of CSR actions.

The key potential negative impacts and the recommended mitigation measures for Olkaria Geothermal Field Programme are highlighted below:
