THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED RWABURA IRRIGATION DEVELOPMENT PROJECT IN GATUNDU SOUTH CONSTITUENCY IN KIAMBU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, National Irrigation Board is proposing the implementation of Rwabura Irrigation Development Project in Gatundu South Constituency in Kiambu County. The proposed project will consist of two (2) conveyance lines and three (3) main lines proposed to supply water across the project area. The Thiririka conveyance line (conveyance 1) of about 8.27 km offtakes from Thiririka intake in the Kikuyu escarpment forest and follows Thiririka River South Eastwards up to the head of the scheme. Conveyance line 2 of about 8.82 km off takes from the Rwabura intake and follows Rwabura River South Eastwards up to the head of the scheme.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Reduced water flow	<ul style="list-style-type: none"> • Adopt a watershed management approach for River Rwabura and Thiririka River during construction. This will enable works to be undertaken when demand for water is minimal for downstream users. • Develop compensation measures for affected downstream water users.
Change in soil properties	<ul style="list-style-type: none"> • During construction, earthworks should be controlled so that land that is not required for the works is not disturbed. • Where possible, excavation should be carried out during the dry spell to prevent soil from being washed away by the rain. • Excavated materials and excess earth should be kept at appropriate sites approved by the construction supervisor. • Areas that are cleared for excavation should be planted with grass once the pipeline is laid.

Air pollution

Construction waste

Biodiversity loss

Occupational health and safety

- Compaction of soil by heavy vehicles will be mitigated through the use of wide tyres to spread the weight of vehicles. In addition, only few tracks should be used to bring materials to the work area.
- The Contractor should maintain construction machinery and vehicles in accordance with the manufacturers' specifications to keep noise and gas emissions to a minimum.
- The Contractor should control dust emissions and odours by sprinkling water and by good housekeeping practice.
- Construction works should be undertaken only during day time.
- Waste management should comply with EMCA (Waste Management) Regulations.
- Designated garbage storage areas should be provided during construction and the contractor should be responsible for handling and disposal of all construction and related waste.
- Waste disposal by burning should not be permitted and signage should be erected to ensure that workers are sensitised to waste disposal and handling issues on site.
- Recycling is the most desirable option for 'disposal' of any waste materials resulting from construction. The contractor should, as much as possible put to good and acceptable use any materials damaged or rejected for use on site.
- The construction supervisor and contractor will have the primary responsibility for the environmental due diligence. The construction supervisor will be required to include environmental considerations in monthly progress reports and indicate progress in the implementation of mitigation measures as outlined in the EMP.
- Except to the extent necessary for establishing the construction site and carrying out the construction works, vegetation should not be removed, damaged or disturbed.
- Existing cleared or disturbed areas should be used for construction of temporary structures and stockpiling of materials.
- Construction staff should be encouraged to trim trees rather than remove them.
- Planting of vegetation should be undertaken after the pipes are covered with soil.
- Re-vegetate using indigenous tree and grass species whenever possible.
- Avoid cutting down indigenous trees.
- In order to prevent work-related accidents, there should be strict compliance with labour laws and health and safety committee rules.
- Hazardous areas should be secured and all workers should be provided with personal protective equipment.
- All workers should be trained in fire response and basic first aid procedures.

- Public health issues**
- The irrigation water management committee should put in place information, education and communication programmes about safe uses of and treatment of irrigation water at household level.
 - The irrigation water management committee should support implementation of HIV/AIDS prevention programmes within the project area in collaboration with other stakeholders.
 - Include HIV/AIDS awareness and control campaigns in the project targeting construction workers.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.
- (c) County Director of Environment, Kiambu County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT
AUTHORITYENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED DEVELOPMENT OF 36 MEGAWATTS
WIND FARM AT TAKAUNGU/ MAVUENI LOCATION,
VIPINGO ON LAND PARCELS MN/III/291/2 AND MN/III/4391,
KILIFI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Mombasa Cement Company is proposing to construct and operate 36 Megawatts Wind Farm at Takaungu/ Mavueni Location, Vipingo on Land Parcels MN/III/291/2 and MN/III/4391, Kilifi County. The proposed wind farm will be onshore and will be built by installing twelve wind turbines to generate electricity to the national grid. The design components of the wind farm will include wind turbines complete with all necessary auxiliary facilities, overhead power lines and access road. Electricity generated will be fed to an existing nearby sub-station and power transmission grid within the premises of Mombasa Cement Limited.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed mitigation measures</i>
Noise and vibration	<ul style="list-style-type: none"> Limit the construction and turbine installation to day time. Ensure equipment like heavy duty cranes being used to install the turbines are appropriately serviced and maintained. Put in place a comprehensive noise and vibration conservation programme which will include noise and vibration level monitoring, use of noise attenuators, training and use of appropriate personal protective equipment. Ensure the provisions of Environmental Management and Co-ordination (Noise and excessive vibration control) Regulation, 2009 are adhered to.
Flora and Fauna	<ul style="list-style-type: none"> Careful site selection for the wind farm and associated transmission lines to avoid or minimize the clearing vegetation and destruction of associated fauna habitats. Configuring wind turbines and access roads to minimize the clearing of vegetation and destruction of associated fauna habitats. Limit vegetation clearance and removal to actual location/installation of the turbine and allied infrastructure. Avoid off-road driving by wind farm personnel that can result in destruction of flora and fauna on site
Particulate matter (dust) emission	<ul style="list-style-type: none"> Regular sprinkle water on opened up dusty access roads. Secure construction site with dust screens. Provide construction workers with appropriate personal protective devices Monitor dust levels.

Occupational injuries

- Ensure the provisions of the Environmental Management and Co-ordination (Air Quality) Regulations, 2014 are adhered to.
- Ensure only skilled and experienced workers are involved in the construction of the wind farm and allied infrastructure.
- Ensure suitable, appropriate, well serviced and maintained equipment are availed to the workers.
- Workers working at height and in confined areas must be provided with appropriate safety equipment.
- An all equipped first aid station to be on site with trained and experienced first aiders, stand by ambulance and referral hospital.
- Ensure that the provisions of the Occupational Safety and Health Act, 2007 are adhered to.

Traffic inconvenience
along Mombasa-Kilifi
Road

- Permission to be sought from Kenya National Highway Authority for transportation of abnormal loads (wind turbines) prior to transportation.
- An escort vehicle one in front and one behind the truck transporting the turbines to be provided.
- Turbines to be transported during daylight only.
- Notice to be issued on local press of transportation of abnormal loads on the said road to inform other potential road users on order for them to exercise extra caution.

Visual impacts

- Appropriate site selection to avoid areas used for tourism and recreation.
- Adjusting the location of turbine rows or individual turbines to reduce perceived visual impacts.
- Choose wind power equipment with aesthetics in mind (where consistent with other objectives), such as a smaller number of (larger) turbines and reduced or different night lighting.
- Careful site selection to locate turbines where they would not produce shadow flicker around human dwellings.

Impacts on avifauna and
bats

- Careful site selection to avoid building wind farm within important bird habitats and bird migration routes.
- Bird flight activities in a zone of 200-500 m surrounding the planned wind farm should be recorded and analysed.
- Flight heights, directions, species, and behaviours of birds should be studied systematically.
- The direction of tower layout should be properly designed to reduce the effects on bird migration.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
