Areas dedicated for hazardous material storage shall provide spill containment and facilitate clean up through measures such as dedicated spill response equipment. Storage sites for petroleum products to be secured and signs to be posted which include hazard warnings, who to contact in case of a release (spill), access restrictions and under whose authority the access is restricted will be posted. In case of soil pollution, subsurface investigations should be conducted which should involve the collection of subsurface soil and groundwater samples for laboratory analysis.

Generation of solid waste	<ul style="list-style-type: none"> Construction waste should be recycled or reused to ensure that materials that would otherwise be disposed of as waste are diverted for productive uses; excavated soil and debris should be properly disposed of by backfilling and landscaping. Contracted waste handlers should be licensed by NEMA to transport and dispose waste at approved dumpsites only. During transportation of waste, it should be covered to avert dispersion along the way. Hazardous waste should not be mixed with other solid waste generated and should be managed by way of incineration or land-filling through a licensed hazardous waste handler. Improve on the existing natural drainage systems to avoid flooding. 	<ul style="list-style-type: none"> Equal employment opportunities for both men and women. Expose and involve women in construction activities where possible in an effort to transfer required skills to them. Involve women groups in activities that they are good at such as landscaping Enhance gender sensitivity and reduce gender discrimination in construction activities.
Air pollution	<ul style="list-style-type: none"> Conduct an air quality audit to collect baseline data that can be measured against. Construction site and transportation routes to be water-sprayed on dry and windy days, especially if near sensitive receptors. Haulage trucks must be covered. Particulate emissions will be controlled by the off-site disposal of construction debris. Vehicles and construction machinery should be properly maintained. All diesel fuel in use should be ultra-low Sulphur diesel. Staff working in dust generating activities e.g. site preparation, excavation, concrete mixing should be provided with dust masks. Strict Adherence to Air Quality Regulations, 2006. 	<ul style="list-style-type: none"> Conduct Regular drills shall be undertaken to test the response of the involved stakeholders.
