GAZETTE NOTICE NO. 10420

THE WATER ACT

(No. 43 of 2016)

ELDORET WATER AND SANITATION COMPANY

APPROVED TARIFF STRUCTURE FOR THE PERIOD 2019/20 TO 2023/24

Eldoret Water and Sanitation Company (ELDOWAS) applied to the Water Services Regulatory Board (WASREB) for a correction of tariffs for sewerage services, for the period 2019/20 to 2023/24 as per section 72 (1) (b) of the Water Act, 2016. The corrigendum for the correction was gazetted on 10th July, 2020 *vide* Gazette Notice No. 4650.

After considering the application, the written and oral submissions by stakeholders during the consultation period, WASREB has determined a tariff correction for the sewerage services offered by ELDOWAS to improve service delivery, operate sustainably and protect consumer interests.

WASREB gives a one (1) month's notice to all existing and potential customers of ELDOWAS that the approved tariffs for the four financial years 2020/21, 2021/22, 2022/23 and 2023/24 shall be as follows:

1. Approved Change in Water Tariff Structure for 2020/21 to 2023/24

(a) Consumers with a Water Connection

Customer Category	Approved Tariff	
Domestic	Consumption Block (75% of the water billed)	Approved Tariff Per M ³
	>0-6.	30
	7-20.	40
	21-50	63
	51-100	70
	101-300	89
Multi-Dwelling Units/ Gated Communities	>300	100
	Unit Rate	63
Commercial/Industrial/ Government	Consumption Block	Approved Tariff Per M ³
	1-50	63
	51-100	70
	101-300	89
	>300	100
Public Schools, Universities and Colleges	Consumption Block	Approved Tariff Per M ³
	0-600	30
	601 - 1200	35
	>1200	45

(b) Consumers without a Water Connection

- Disconnected water accounts shall be charged based on the average of the last three months' sewer charges before the disconnection.
- Sewerage consumers without a water connection shall be charged as follows:
 - Domestic (Per Single dwelling unit): KSh. 350 per month
 - All other categories: 75% of the volume of water consumed as per the metered source of water

2. Cost Structure

Below is the summary of the projected annual cost structure that makes up the total costs to be incurred by ELDOWAS during the tariff period.

	KSh.	KSh.
Cost Subject to Annual Indexation		
Operations and Maintenance Costs		793,279,274
Fixed Costs		
Average Annual Investment Cost	142,665,271	
Debt	66,990,011	
Average Annual Asset Renewal	109,960,189	
Sub Total- Fixed Costs		319,615,471
Total Average Annual Cost		1,112,894,745
Projected Average Annual revenue		1,216,741,121
Average Annual Cost Coverage		109%

Dated the 2nd December, 2020.

MR/1421197 ROBERT GAKUBIA,
Chief Executive Officer.

HIRAM GACHUGI,
Registrar of Companies.

Pursuant to section 254 (1) of the Insolvency Act, the bankrupts will be given an automatic discharge on the 18th July, 2022 unless the

Official Receiver, the trustee of the estates of the bankrupts, or a creditor of the bankrupts gives notice of intended opposition to the discharge of the bankrupts before that date.

Any creditor who intends to oppose the discharge of the bankrupts shall state in writing the grounds for his/her opposition and send a notice to this effect to the Official Receiver, the trustee of the estate of the bankrupts and the bankrupts at any time before the 18th July, 2022. If the discharge of the bankrupts is opposed, the trustee will apply to the court without delay for an appointment for the hearing of the opposition in the manner prescribed by the Act and the Insolvency Regulations.

Dated the 20th November, 2020.
MARK GAKURU,

GAZETTE NOTICE NO. 10425

IN THE HIGH COURT OF KENYA AT NAIROBI
 COMMERCIAL AND ADMIRALTY DIVISION – MILIMANI
 LAW COURTS

INSOLVENCY CAUSE NO. E030 OF 2020
 IN THE MATTER OF ALJAZEERA CHANNEL LIMITED
 KINYUA JOHN Petitioner

AND

ALJAZEERA CHANNEL LIMITED Respondent

PETITION

NOTICE is given that a petition for the liquidation of the above-named Company by Kinyua John in the High Court was on the 14th September, 2020 presented to the said Court by the firm of Coulson Harney LLP.

And the said petition is directed to be heard before the Court sitting at the High Court of Nairobi, Milimani Law Courts, the Commercial and Admiralty Division on the 17th December, 2020 at 9.00 a.m. in the forenoon or soon thereafter, and any persons desirous to support or oppose the making of an order of liquidation may appear at the time of hearing in person or by his advocate for that purpose and a copy of the petition will be furnished by the undersigned to any person requiring such a copy on payment of the regulated charge for the same.

Dated the 12th November, 2020.

COULSON HARNEY, LLP,
Advocates for the Petitioner.

GAZETTE NOTICE No. 10430

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED AFFORDABLE HOUSING UNITS
DEVELOPMENT ON L.R. NO. 22/365 (WITHIN THE TWO
RIVERS DEVELOPMENT) ALONG THE NORTHERN BYPASS,
NAIROBI CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Two Rivers Development Limited, proposes to construct affordable home units within the Two Rivers Development in Ruaka. The project will include fourteen (14) blocks of seventeen (Ground plus 16 floors each) entailing one, two and three bedroom apartments comprising of a total of 1650 units, associated facilities and amenities on Plot L.R. No. 22/365 Along the Northern Bypass, Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Soil erosion	- Control earthworks. - Install drainage structures to control flow of storm water. - Ensure management of excavation activities.
Loss of vegetation	- Only areas earmarked for development should be cleared. - Project developmental footprint is less than 75% of the total land cover. - Plant trees, shrubs and flowers on remaining open spaces.
Air pollution	- Stockpiles of earth should be sprayed with water or covered during dry seasons. - Provide dust masks for the personnel in dusty areas. - Sensitize construction workers on pollution control measures. - Cover all trucks hauling soil, sand and other loose materials. - Provide dust screen where necessary.
Noise pollution	- Install portable barriers to shield compressors and other small stationary equipment where necessary. - Display signs to indicate construction activities. - Maintain all equipment; Adhere to provisions of Noise Prevention and Control Rules 2005, Legal notice No. 24 regarding noise limits at the workplace as well as NEMA Noise and Excessive Vibration Pollution Control Regulations, 2000.
Road traffic disruption	No overloading of trucks and good driving practices to be practiced. Suitable junction/access point to be provided. Use of appropriate and legible signage. Employment of formal flagmen/women in order to ensure the public safety.

Possible Impacts	Mitigation Measures
Water sources	Observe, protect and conserve the riparian reserve in compliance with the water Act, 2016 and water reserve management rules 118 (1).
Increased generation of waste	- Adopt waste minimization at source. - Monitoring the fate of disposed wastes to ensure they are legally land filled at a recognized controlled site. Adhering to waste management regulations of 2006.
Public health and occupational safety	- Ensure proper solid waste disposal and collection facilities; Ensure dustbin cubicles are protected from animals, rains and are well covered. - Provide suitable safety gear for all personnel. - Proper treatment of waste water. - Adherence to the ministry of health guidelines on preventing spread of the SARS-CoV-19 virus.

The full report of the proposed project is available for inspection during working hours at:

- Principal Secretary, Ministry of Environment and Forestry, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.
- Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- County Director of Environment, Nairobi City County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process regarding this plan.

MAMO B. MAMO,
Director-General,

MR/1421004 National Environment Management Authority.

GAZETTE NOTICE No. 10431

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT
AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED CONSTRUCTION OF A DECENTRALIZED
TREATMENT FACILITY (DTF50 SEWAGE) AT PELELEZA
AREA, MWATATE TOWN, TAITA TAVETA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, TAVEVO Water and Sewerage Company Limited, is proposing to develop a decentralized treatment facility comprising the operator store, receiving bay/balancing tank, anaerobic reactor, vertical flow constructed wetland, sludge drying bed and waste disposal unit with a capacity of 50M3/day (DTF-50) for the treatment of sludge from Mwatate town (Peleleza, Kariobangi, Kitivo and Soko ya Zamani areas) Taita Taveta County.

The following are the anticipated impacts and proposed mitigation measures:

Aspect	Potential -VE impact	Mitigation
1. Air / Ambient environment	Emission of dust during transport of building materials and construction activities.	- Water rough road to construction site periodically during construction period. - Re-vegetate the site as appropriate after construction.

Aspect	Potential -VE impact	Mitigation
		- Hoard site to curb dust from spreading to the neighbourhood. - Provide workers with PPE (dust masks). - Trucks hauling dirt and debris to and from site, should be covered to reduce spillage. - Stockpiles of sand and soil should be covered or surrounded with wind breaks. - Expedite construction so that it can take the shortest time possible. - Construction should be carried out only during daytime. 0800-1700hrs. - Provide workers with PPE if working in noisy section. - Hoard site to reduce noise from noisy equipment. - Machinery should be well maintained to reduce noise resulting from friction. - Limit unnecessary hooting. - Provide relevant signage at the construction site on construction activity and timings. - The number of construction equipment operating simultaneously shall be minimized through efficient management practices. - Vehicle idling time shall be minimized. - Proper servicing of machinery as per the manufacture's specifications to reduce emissions. - Incinerator chimney stack will be at minimum 4 metres height - The incinerator must always be maintained to ensure complete combustion, less pollution - Ensure efficiency and optimal operation of all units - Provide relevant PPE to DTF staff
2. Soil	- Increased noise during transport of building materials and construction activities. - Emission of smoke from vehicles and equipment. - Emission of Smoke from incinerator - Soil erosion during construction - Soil compaction from vehicles and machinery.	- Soil erosion during construction - Use designated route to site.

Aspect	Potential -VE impact	Mitigation	Aspect	Potential -VE impact	Mitigation
		• Designate vehicle/machinery parking area. • Control construction activities especially during rainy conditions. • Re-surface open areas after completion of the project and introduce appropriate vegetation. • Provide suitable storm water drainage channels to effectively discharge water to safe areas.		• Habitat alteration.	• Appropriate landscaping after end of construction to maintain a green environment.
	• Soil contamination from vehicles and machinery oil. • Soil contamination from bottom ash from incinerator.	• Designate areas for parking vehicles and machinery. • Ensure incinerator waste (ash) is disposed of in designated areas. • Line disposal pit with right plastic gauge.	5. Health and Safety	• Solid waste generated from transportation and storage of building materials • Human waste disposal (to prevent poor hygiene issues). • Accidents and injuries.	• Provide waste bins strategically within the construction site. • Cover bins to prevent access by vermin, and minimise odour and dust. • Provide temporary sanitary facilities for construction workers. • Provide clean water for workers. • Conduct EHS education for site workers. • Provide workers with relevant PPE depending on task (ear muffs, gloves, mask, boots, helmets, overalls). • First-aid kit should be provided within the site plus at least 2 first aiders. • Food handlers preparing food the workers at the site should be controlled and monitored to ensure that food is hygienically prepared. • Appropriate PPE will be provided to DTF workers. • Bad odour and danger of infection from faecal sludge during operation phase. • Bottom ash from incinerator disposal at operation phase. • Dispose of in properly designated and properly lined pit.
3. Water	• Increased use of water to reduce dust and in construction. • Reduced water quality in nearby river • Increased use of water in AR and VFCW. • Release of treated water to the environment. • Contamination of water sources. • Breeding ground for disease vectors (mosquitoes).	• Educate workers on water conservation and waste management. • Temporary dykes to prevent surface runoff, especially if construction coincides with rainy season. • Educate workers on water conservation and waste management. • Only effluent with mandatory BOD/COD levels will be released to the environment. • Community education on proper use of water released from DTF. • Only effluent with mandatory BOD/COD levels will be released to the environment. • Mosquito bio-control (e.g. fish like minnow, tadpoles-frogs, etc.)			
4. Biodiversity	• Loss of flora and fauna.	• Ensure proper demarcation and delineation of the project area to be affected by construction works. • Designate access routes and parking within the site. • Preserve individual trees within the site that do not fall on the actual construction area. • The area will be restored to its original state after construction.			

The full report of the proposed project is available for inspection during working hours at:

(a) Principal Secretary, Ministry of Environment and Forestry, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(b) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(c) County Director of Environment, Taita Taveta County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process regarding this plan.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED AFFORDABLE HOUSING PROJECT ON
PLOT L.R. NO. 12430/34, 35, 38 AND 39 IN MWIKI, KASARANI
NAIROBI CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Centum Development Limited C/O Haco Industries Limited, is proposing to construct three adjoining blocks of apartments which will sit on 4No. plots numbered as 12430/34, 35, 38 and 39 in Mwiki-Kasarani Nairobi County. The three blocks will comprise of ground plus 7 floors (G+7) with a total of 268 Units. The composition of the individual apartment's blocks will include Studio units, One bedroom, Two bedroom with window bay, Two bedroom with Balcony and Studio lofts.

The following are the anticipated impacts and proposed mitigation measures:

<i>Anticipated Environmental Impacts</i>	<i>Mitigation Measures</i>
High demand of raw materials	- Source building materials from local suppliers who use environmentally friendly processes in their operations. - Ensure accurate budgeting and estimation of actual construction material requirements. - Ensure that damage or loss of materials at the construction site is kept minimal through proper storage. - Use at least 5%-10% recycled, refurbished or salvaged materials to reduce the use of raw materials.
Topography and vegetation disturbance	- Ensure proper demarcation and delineation of the project area to be affected by construction works. - Specify locations for Vehicles and equipment's, and areas of the site which should be kept free of traffic, equipment, and storage of materials. - Design and implement an appropriate landscaping programme to help in re-vegetation.
Storm water runoff and soil erosion	- A storm water management plan that minimizes impervious area infiltration by use of recharge areas. - Apply soil erosion control measures such as levelling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. - Ensure that construction vehicles are restricted to existing graded roads. - Proper vegetation of grass and other types of vegetation to hold and retain soil.
Increased solid waste generation	- Use of an integrated solid waste management system i.e. through a hierarchy of options: 1. Source reduction 2. Recycling and reuse 3. Composting 4. Combustion 5. Sanitary land filling. - Through accurate estimation of the sizes and quantities of materials required. - Use of durable, long-lasting materials that will not need to be replaced as often. - Provide facilities for proper handling and storage of construction materials to reduce the amount of waste. - Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste.

Anticipated Environmental Impacts

Dust emission	- Ensure strict enforcement of on-site speed limit regulations. - Avoid excavation works in extremely dry weather. - Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles. - Personal Protective Equipment to be worn
Exhaust emission	- Vehicle idling time shall be minimized. - All construction equipment shall be properly tuned and maintained. - Sensitise truck drivers to avoid unnecessary gunning of vehicle engines at loading/offloading points and parking areas.
Noise and vibration	- Ensure that construction machinery are kept in good condition to reduce noise generation. - Ensure that all generators and heavy-duty equipment are insulated or placed in enclosures to minimize ambient noise levels. - The noisy construction works will entirely be planned to be during daytime when most of the neighbours will be at work. - Use of protective equipment's by the construction workers. - Switching off construction vehicles and machines when not in use.
Increased energy consumption	- Install energy saving LED bulbs at all lighting points which consume less energy. - Ensure planning of transportation of materials to ensure that fossil fuels (diesel, petrol) are not consumed in excess. - Switch off electrical equipment, appliances and lights when not in use. - Install sensory lighting at various locations which are not in use all the time such as the parking areas. - Monitor energy use during the operation of the project and set targets for efficient energy use.
High water demand	- Install water conserving taps that turn-off automatically when water is not being used. - Promote recycling and reuse of water as much as possible. - Promptly detect and repair water pipes and tank leakages. - Sensitise staff to conserve water by avoiding unnecessary water use. - Prompt detection and repair of water pipes and tank leakages.
Generation of wastewater	- Provide adequate and safe means of handling liquid waste at the premises. - Conduct regular inspections for pipe blockages or damages and fix them appropriately. - Ensure regular monitoring of the sewage discharged from the project to ensure that the stipulated sewage/effluent discharge rules and standards are not violated.

*Anticipated
Environmental
Impacts**Mitigation Measures*

Electrical safety	• Use qualified electricians for all electrical works. • Use of high quality power cables and equipment. • Use of fire extinguishers onsite in case of fire. • Earth all the electric cables in the appropriate manholes.
Incidents, accidents and dangerous occurrences.	• Ensure that provisions for reporting incidents, accidents and dangerous occurrences during construction using prescribed forms obtainable from the local Occupational Health and Safety Office (OHSO) are in place. • Enforcing adherence to safety procedures and preparing contingency plan for accident response in addition to safety education and training shall be emphasized.
Fire safety	• Keep functioning and well serviced fire hydrants onsite • Designate assembly points within the site in case of fire accidents. • Install a chart of emergency numbers on site, this include police, ambulance, County fire services, etc.
Occupation health and safety (OHS)	• Provide protective gears to the worker. Helmets, gloves and boots. • Install clean and functional sanitary facilities onsite. • Food for the workers to be served in a clean designated area to avoid contamination.
Emergency preparedness and evacuation procedures	• Design suitable documented emergency preparedness and evacuation procedures to be used during any emergency. • Ensure that adequate provisions are in place to immediately stop any operations where there is an imminent and serious danger to health and safety. • Ensure that the most current emergency telephone numbers are prominently and strategically displayed within the construction site.
Insecurity	• Ensure the general safety and security at all times by providing day and night security guards and adequate lighting. • Body-search the workers on entry, to avoid getting weapons on site, and when leaving the site to ensure nothing is stolen. • Ensure only authorised personnel get enter the site. • Security alarms will be installed.

The full report of the proposed project is available for inspection during working hours at:

- (a) Principal Secretary, Ministry of Environment and Forestry, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.
- (b) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (c) County Director of Environment, Nairobi City County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process regarding this plan.

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT
AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED COMMERCIAL INCINERATION PLANT
ON PLOT L.R. NO. 23961, EXPORT PROCESSING ZONE
AUTHORITY IN KINANIE, MAVOKO SUB-COUNTY,
MACHAKOS COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Boredo Supplies Limited, proposes to develop a waste handling facility by installing an incineration plant with 2 incinerators designed to handled 20 – 500Kg/Batch of hazardous waste which include a boundary wall, entry points, generator room, weighbridge, associated facilities and amenities in Plot L.R. No. 23961, in Kinanie Area, Machakos County.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impacts Mitigation Measures

CONSTRUCTION PHASE

- | | |
|--|---|
| Increased storm water, runoff and soil erosion | <ul style="list-style-type: none"> • Roof water to be harvested and stored in underground reservoirs for use in general cleaning and in the toilets. The tanks should have a capacity of at least 100, 000litres. • A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control. • Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil structure should be designed. • Ensure that construction vehicles are restricted to existing roads to avoid soil compaction within and around the project site. • Site excavation works to be planned such that a section is completed and rehabilitated before another section begins. • Construction of soil-galleys on sloppy sections. • Roof catchments will be used to collect the storm water for some uses e.g. washing of floors and cars. |
| Increased solid waste generation | <ul style="list-style-type: none"> • Use of an integrated solid waste management system i.e through a hierarchy of options: reduction, sorting, re-use, recycling and proper disposal. • Through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual. • Ensure that construction materials left over at the end of construction will be used in other projects rather than being disposed of. • Use of durable, long-lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over. |

Possible Impacts	Mitigation Measures	Possible Impacts	Mitigation Measures
	• Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure. • Purchase of perishable construction materials such as paints should be done incrementally to ensure reduced spoilage of unused materials. • Use building materials that have minimal or no packaging to avoid the generation of excessive packaging. • Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at the site. • Dispose waste more responsibly by dumping at designated dumping sites or landfills only. • Waste collection bins to be provided at designated points. • Running educational campaigns amongst workers, e.g. through use of posters, to encourage reuse or recycling of the solid waste.		• Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as churches, residential areas and hospitals. • Ensure that construction machinery are kept in good condition to reduce noise generation. • Ensure that construction machinery are kept in good condition to reduce noise generation. • Ensure that all generators and heavy-duty equipment are insulated/placed in enclosures to minimize ambient noise levels. • Initiate full operationalization of the incinerator immediately by providing adequate diesel. • Avoid open burning of to reduce on noise pollution from explosions.
Increased storm water, runoff and soil erosion	• Roof water to be harvested and stored in underground reservoirs for use in general cleaning and in the toilets. The tanks should have a capacity of at least 100,000litres. • A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control • Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil structure should be designed. • Ensure that construction vehicles are restricted to existing roads to avoid soil compaction within and around the project site. • Site excavation works to be planned such that a section is completed and rehabilitated before another section begins. • Construction of soil-galleys on sloppy sections. • Roof catchments will be used to collect the storm water for some uses e.g. washing of floors and cars.	OPERATION PHASE	
		Increased energy consumption	• Ensure electrical equipment, appliances and lights are switched off when not being used. • Install energy saving fluorescent tubes at all lighting points instead of bulbs which consume higher electric energy. • Ensure planning of transportation of materials to ensure that fossil fuels (diesel, petrol) are not consumed in excessive amounts. • Monitor energy use during construction and set targets for reduction of energy use. • Have provision for the installation of solar panels as per the provisions of the 2012 and the Energy (Solar Photovoltaic Systems) Regulations.
		High water demand	• Harness rainwater for some domestic uses such as general cleaning, in the toilets and gardening (roof catchment), hence the need for a dual water distribution system within the building. • Install water conserving taps that turn-off automatically when water is not in use as well as low flush toilets and waterless urinals. • Promote recycling and reuse of water as much as possible (need for a dual water distribution system within the building). • Install a discharge meter at water outlets to determine and monitor total water usage. • Promptly detect and repair water pipe and tank leaks. • Sensitize workers to conserve water by avoiding unnecessary toilet flushing etc. • Ensuring taps are not running when not in use.
Dust emission	• Ensure strict enforcement of on-site speed limit regulations. • Avoid excavation works in extremely dry weathers if/and when possible. • Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles. • Personal Protective equipment to be worn.		
Exhaust emission	• Vehicle idling time shall be minimized. • Alternatively, fueled construction equipment shall be used where feasible; equipment shall be properly. • Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas, and to switch off engines at these points.	Generation of wastewater	• Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies. • Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated. • Waste water will be channeled conservancy tank then directed to EPZA sewer line.
Noise and vibration	• Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles machinery not being used.		

Possible Impacts	Mitigation Measures	Possible Impacts	Mitigation Measures
Occupational hazards or injuries to works, visitors and general public	• Ensure that provisions for reporting incidents, accidents and dangerous occurrences during construction using prescribed forms obtainable from the Occupational Health and Safety Office (DOSHS) are in place. • Plant operators and worker training in hazardous-material management and annual refresher courses. • All workers should be provided with protective gear. These include working safety boots, overalls, helmets, goggles, earmuffs, respirators/masks and gloves. • A first aid kit should be provided within the site. This should be fully equipped at all times and should be managed by qualified person. • The proponent should have workmen's compensation cover (WIBA). It should comply with workmen's compensation • Adequate sanitary facilities should be provided and standard cleanliness maintained. • Safe operation procedures/ clear instruction provided to the workers and general public to ensure that safety is maintained • Workers operating within the high temperature zones should not exceed 2hrs continuous presence or/as may be directed by the Occupational Health and Safety Experts. • Mounting of safety signage's within and outside the incinerator plant • Enforcing adherence to safety procedures and preparing contingency plan for accident response in addition to safety education and training shall be emphasized.	Hazardous materials/chemical safety and storage	• Keep a record of all hazardous chemicals used at the premises, cross-referenced to the appropriate chemical safety data sheets. • There should be no eating or drinking in areas where chemicals are stored or used.
		Oil spills	• A designated workshop section of the site fitted with oil trapping equipment's to be planned for changes. • Such an area will be well protected from contaminating the soil.
		Hydrology and water quality degradation	• Hazardous substance control and emergency response plan that will include preparations for quick and safe clean-up of accidental spills. • Hazardous-materials handling procedures to reduce the potential for a spill during construction and operation. • Identify areas where vehicle maintenance activities and storage of hazardous materials, if any, will be permitted.
Machinery/equipment safety	• Arrangements must be in place for the medical examination of all construction. • Ensure that equipment and work tasks are adapted to fit workers and their ability including protection against mental strain. • All machines and other moving parts of equipment must be enclosed or guarded to protect all workers from injury. • Arrangements must be in place to train and supervise inexperienced workers regarding construction machinery use and other procedures/operations. • Equipment such as fire extinguishers must be examined by a government authorized person. The equipment may only be used if a certificate of examination has been issued. • Reports of such examinations must be presented in prescribed forms, signed by the examiner and attached to the general register.	Airquality monitoring and control	• ensure that the incinerator is functioning properly, and the chimney is clear of excessive soot. • Rigorously segregate waste so that no unnecessary PVC (IVs, etc.) waste is incinerated. • Ensure that the incinerator is preheated adequately and that supplementary fuel is added whenever necessary to Maintain the burning temperature above 600C. • Load the incinerator according to the recommended "Best Practices". • Adopt rigid quality control measures. • Installation of well-designed and well-operated fine-particle of Air pollution Control device (APCD) such as filtration collectors, including primary fabric filters (baghouses); electrostatic collectors, including dry and wet electrostatic precipitators (ESPs) and ionizing wet scrubbers; and wet inertial-impaction collectors, including venturi scrubbers and advanced designs that use flux-force condensation enhancement techniques. • Odor removal by using activated carbon and good housekeeping .
Electrical safety	• Circuits must not be overloaded. • Distribution board switches must be clearly marked to indicate respective circuits and pumps. • There should be no live exposed connections. • Electrical fittings near all potential sources of ignition should be flame proof. • All electrical equipment must be earthed.	DECOMMISSIONING PHASE	
		Solid waste	• Ensure safety precautions have been observed to decommissioning especially in regards to metals. • Unrecyclable material to be transported by licensed waste transporters to NEMA licensed dump sites. Careful removal of lined ash it on site.
		EHS concerns	• Appropriate personal protective equipment to be provided and properly used. • Appropriate training of workers on occupational health and safety issues.
		Site restoration and rehabilitation	• Notify NEMA and other relevant authorities on the intentions to stop operations at least 6 months in advance and carry out decommissioning report then submit it to NEMA for review and approval. • Revegetate the project site. • Monitor the site for a year.

The full report of the proposed project is available for inspection during working hours at:

- (a) Principal Secretary, Ministry of Environment and Forestry, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.
- (b) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (c) County Director of Environment, Machakos County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process regarding this plan.

MAMO B. MAMO,

Director-General,

MR/14211144

National Environment Management Authority,

GAZETTE NOTICE NO. 10434

**THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT**

(No. 8 of 1999)

**THE NATIONAL ENVIRONMENT MANAGEMENT
AUTHORITY**

**ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED CONSTRUCTION OF A DECENTRALIZED
LIQUID WASTE (FECAL SLUDGE) TREATMENT FACILITY IN
MTONDIA, TEZO WARD, KILIFI TOWN ON PLOT NO.
KILIFI/MTONDIA/1667, KILIFI COUNTY**

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kilifi Mariakani Water and Sewerage Company Limited, is proposing to install a 50 cubic meter/per day decentralized waste water treatment facility in Mtondia area, in Kilifi County meant to treat domestic wastewater from Kilifi Town and its environs county.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Air emissions	- Decreasing the number of trips carried out by the vehicles will minimize air pollution. - Vehicles to be used during the construction phase are to be kept in good working condition and should not be the source of excessive fumes.
Noise pollution	- Road traffic movements shall be scheduled to normal working hours (0800 Hrs -1700 Hrs). - All equipment and vehicles on the site should be equipped with noise suppressing measures and kept in proper working order. - Delivery of materials in bulk to avoid repetitive movements of delivery vehicles will be encouraged. - Silencers on equipment such as generators will be properly designed. - Temporary noise pollution due to construction works will be controlled by proper maintenance of equipment and vehicles, and tuning of engines and mufflers. - Noise problems during operation phase shall be reduced to normally acceptable levels by incorporating low-noise equipment in the design and/or locating such mechanical equipment in properly acoustically lined buildings or enclosures.

Possible Impacts

Mitigation Measures

Dust pollution

- Dust and air pollution due to dust when excavated material is stock piled, should be limited by means of wetting (particularly dry season), covering with foil or working in small sections so that the trenches are backfilled with excavated soil within shortest possible period (maximum 2-3 days).
- Settled areas within project access routes will be identified and maximum speeds of project vehicles will be established within these areas.
- Speed limit of 15km per hour will be posted and enforced to reduce airborne fugitive dust caused by vehicular traffic.
- Construction materials will be delivered in bulk to avoid repetitive movements of delivery vehicles.
- Construction materials and stockpiled soils will be covered if they are a source of fugitive dust.
- Transportation of materials will be done in such a manner that they do not fly or fall off the vehicle by covering or wetting friable materials.

Surface and ground water contamination from wastewater and sludge

- Effluent /wastewater quality will be tested on a regular basis to ensure that its characteristics are within the set standards. Set out in the third schedule of Water Quality Regulations, 2006.
- Proper measures will be taken to avoid accidental surface runoff intrusion from the manholes of the sewerage network, which can overburden the plant and cause discharge of partially treated wastewater from the wetland.
- Trucks ferrying the sludge to disposal sites should be well maintained to avoid discharging of the waste materials along the way to the site.
- Proper handling and drying of sludge will be done in drying beds, during dry season.
- With continuous sampling and laboratory tests, the performance of the DTF will be optimized.
- The greasy material from the grease trap will be regularly removed and stored in proper barrels and then collected and appropriately disposed with the municipal solid waste.

Odors as a result of mismanagement of solid wastes

- The greasy material from the grease and sand trap will be regularly removed and stored in proper barrels and then collected and disposed of with the municipal solid waste.
- The staff of the plant will be properly trained, to enable them to handle grease and sand removal and taking samples for lab testing.
- Produced residuals will be stored in closed containers and transported in enclosed container trucks to landfill site.
- Aeration tanks will always be kept at an optimum aeration rate.
- Proper landscape around the facility will be done to serve as a natural windbreaker and minimize potential odour dispersions, if present.
- Odours will be reduced or prevented through normal housekeeping and improved operation and maintenance design procedures.

Possible Impacts	Mitigation Measures	Possible Impacts	Mitigation Measures
	- Sludge transfer systems such as conveyors, screw pumps, and conduits will be kept clean in order not to generate odours. - Regular cleaning of aeration tank walls and floors, washing weirs, and removing scum regularly, will be done to help in odour reduction. - Where odour emissions could lead to complaints, the provision of covers to the odour sources will be considered, especially for sludge holding tanks and sludge dewatering systems. - Flow regulating chambers, drainage valves, standby pumps, as well as electric standby generators shall be provided to reduce the possibility of wastewater flooding within the wastewater treatment plant site, which results in possible generation of obnoxious smell. - The presence of multiple aeration basins in the plant also reduces overflowing problems. - The current solid waste facility shall be relocated to an ideal location. - When odour becomes an evident public nuisance, synthetic windbreakers (e.g. walls) shall be employed to maintain odour nuisance within each site.		- Limits of construction zones will be identified and marked, and all activity will be kept within marked boundaries. - When detected, sensitive species or habitats shall be conserved.
		Impacts on the fauna	- Tree planting will be done to maintain habitats for avifauna. - No snaring or hunting will be allowed on or around the site. - Contact details for someone who can be called if catching and relocation of snakes, spiders or other unwanted species is needed will be kept at the site. - Labourers will be educated as to the importance of not simply killing all snakes and other fauna that is perceived as dangerous.
		Health and safety impacts.	- The contractor shall conform to all the stipulations of the Occupational Health and Safety Act, 2007. The Act requires the designation of a health and safety representative when more than 20 employees are deployed. - The contractor shall provide ample warning signs, guard rails, warning tape, etc., around open excavations, stacks of material, debris, etc. and shall be held liable for all claims as a result of neglect of such precautions and provisions. - Proper access control shall be enforced to ensure that no unauthorized persons enter the site. - Material delivery vehicles shall be under the control of competent personnel. It will be ensured that persons handling equipment and materials are suitably trained, supervised and adequately instructed. - Railing will be installed around all process tanks and pits. The use of a life line will be required and personal flotation device (PFD) when workers are inside the railing, and it will be ensured that rescue buoys and throw bags are readily available. - A confined spaces entry program that is consistent with applicable national requirements and internationally accepted standards will be implemented.
Impacts on water	- In general, the DTF systems produce a highly treated and well-nitrified effluent that typically meets the required effluent quality standards. Disinfection with chlorine will further suppress bacterial population in the discharged effluent. Thus, the proposed facilities' discharge effluent quality is expected to meet the Minimum Standards contained in Water Quality Regulations, 2006. - The implementation of training recommendations, maintenance plans, and process and effluent monitoring programs will be mandatory. - Sufficient instrumentation and standby equipment (blowers, pumps, and electric generators) shall be provided to ensure an uninterrupted and controlled operation, thus avoid inefficient process performance. - To attain the expected safe effluent discharge, skilled and trained operator will be available for proper process loading, optimization, control, and thus performance. - Continuous sampling and laboratory tests will ensure that the performance of the DTF will be optimized. - The greasy material from the grease trap will be regularly removed and stored in proper barrels and then collected and disposed with the municipal solid waste		
Impacts on soil	- Periodic tests will be done to assure the quality of effluent wastewater, to avoid partially treated wastewater to reach the soils. - Effluent will be appropriately disposed of by ensuring that they meet the required standard prior to discharge taking place. - Effluent quality will be monitored on a continuous basis to avoid partially treated wastewater reaching the soils. - Excavated soil will be utilized for landscaping and then tree planting purposes.		
Impact on flora	To avoid loss of biodiversity, proper management of DTF outputs will be done.		

The full report of the proposed project is available for inspection during working hours at:

- Principal Secretary, Ministry of Environment and Forestry, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.
- Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- County Director of Environment, Kilifi County.

A copy of the EIA report can be downloaded at www.nema.go.ke

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process regarding this plan.

GAZETTE NOTICE NO. 10435

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT
AUTHORITYENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED TWO AND THREE BEDROOM
APARTMENTS ON L.R. NO. 2/31/3 IN KIRICHWA ROAD,
KILIMANI, NAIROBI CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kenya Power Pension Fund, is proposing to develop a high-rise residential property of 16 floors comprising of 288 units, two and three-bedroom apartments on plot L.R. No. 2/31/3, Kirichwa Rd. Kilimani, Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impacts Mitigation Measures

General site environmental and social management	• Develop permit matrix (name, phase, requirements and lead. • Plan and give regulators advanced warning of potential problems and start of works. • Always display on site the emergency number for regulators and local community at key worksites. • Work sites will be subjected to daily —walk-round site inspections by the Contractors' EHS management staff. • Establish a safe working environment with an occupational health and safety (OHS) plan that addresses potential hazards, identifies preventive and protective measures, including training and use of personal protective equipment (PPE), and describes documentation and reporting of accidents, diseases and incidents.
Air quality management	• Develop a dust management plan. • Maintain a logbook: record any exceptional incidents that cause dust, either on- or off-site, and the action taken to resolve the situation in the log book. • Plan site layout – machinery and dust causing activities (e.g. access roads, stockpiles) should be located away from the site boundary and sensitive receptors where practicable. • Consider the prevailing wind direction when siting stockpiles to reduce the likelihood of affecting sensitive receptors. • Sealing or re-vegetate completed earthworks as soon as reasonably practicable after completion. • Spray water during construction.
Surface water management including water quality	• Undertake equipment and/or vehicle maintenance off site where feasible to prevent potential for releases and spills of oils/solvents/hydrocarbons. • No groundwater abstractions without prior approval/permits from authorized body. • Use of waste bins/proper waste management.

Possible Impacts Mitigation Measures

Noise management	• Identify and implement appropriate PPE requirements. • Design noise barriers or other noise attenuation into the design if necessary. • Inform nearby dwellings on the timing and duration of works and when the noisiest stages are likely to occur (ongoing through process). • Switch off equipment when not in use. • Limit vehicle speeds on site and access roads, particularly along the northern boundary of the site (10km per hour).
Landscape and visual impact management	• Implement good housekeeping practices including stockpile areas and dust suppression measures. • Be careful when locating construction compounds, construct installations with sustainable materials, materials to reduce the visual impact and material that enhances the aesthetics of the Project area. • Minimise external lighting. • Be careful when locating construction compounds. • Restrict the extent of all disturbed areas as far as practicable.
Traffic and transport management	• Employ safe traffic control measures, including road signs and flag persons to warn of dangerous conditions. • Ensure that normal load heavy goods vehicles use a defined route, which will need to be agreed on prior to Project works. • All vehicles should turn directly into the site or to a pre-agreed /defined layby area of the main road. • Adopt best transport safety practices across all aspects of Project activities with the goal of preventing traffic accidents and minimizing injuries suffered by Project personnel. • Emphasize safety aspects among drivers (specific induction training for all drivers).
Land contamination, materials and waste management	• Identify waste handling facilities for the Project to accept/ treat waste. • Identify and implement appropriate PPE requirements. • Develop an emergency response plan including spill control plan. • Liquid wastes/oil/chemicals to be stored in tanks or drums located in bunded areas which can hold 110% of the total storage volume and in accordance with national safety requirements. • Implement good housekeeping and operating practices, including inventory control to reduce the amount of waste resulting from materials that are out-of-date, off-specification, contaminated, damaged, or excess to plant needs.
Ecological management including habitat removal and restoration and soil mitigation	• Use indigenous plants as much as possible for replanting programs. • Develop a reforestation plan with 10:1 reforestation ratio. • Store topsoil in dedicated sites within site boundary. • Develop a habitat removal and restoration plan (HRRP) to include revegetation replanting.

Possible Impacts Mitigation Measures

- Occupational health and safety management
- Ensure all employees carry out induction health and safety training prior to commencement of work.
 - Provide appropriate and legally required signage and PPEs to all staff.
 - Develop accident and emergency preparedness and response plan and carry out procedure training and drills with workers and local health authorities on a regular basis related to site hazards and risks.
 - Set up a telecommunications procedure specifying the hierarchy of who to contact in the case of an emergency.

The full report of the proposed project is available for inspection during working hours at:

- (a) Principal Secretary, Ministry of Environment and Forestry, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.
- (b) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (c) County Director of Environment, Nairobi City County.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or County Governments. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or County Assemblies.
- (4) *Act Supplement* contains Acts passed by the National Assembly, Senate or County Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE HUMAN RESOURCE POLICIES AND PROCEDURES MANUAL FOR THE PUBLIC SERVICE —

Kenya Gazette

A.30 (1) All communication for publication in the *Kenya Gazette* should reach the Government Printer not later than Friday of the week before publication is desired.

(2) A State Department will be required to meet the cost of advertising in the *Kenya Gazette*.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
