TERMS OF REFERENCE FOR THE TASKFORCE/TECHNICAL WORKING
COMMITTEE ON THE DESIGN, DEVELOPMENT AND IMPLEMENTATION
OF THE TEA INDUSTRY PRICE STABILIZATION FRAMEWORK

1. Introduction

1.1 The tea industry in Kenya is a significant economic activity in Kenya's macro-economy comprising of approximately 650,000 small-holder farmers and providing direct and indirect employment to about 6.5 million workers both at the farm level and at various stages of the tea value chain from tea processing at the factory, transportation, warehousing, packing and sale. The tea industry contributes about 4% of the country's Growth Development Product.

1.2 In addition, tea is a major export commodity accounting for 26% of the country's total value of exports equivalent to about KSh. 130 Billion in export earnings annually. Moreover, Kenya is the world leader in the export of black CTC teas and accounts for 22% of total global tea exports

1.3 However, the domestic tea sector has over the recent years been facing a myriad of operational challenges, key among them inefficiencies in the value chain management that poor price discovery at the tea auction in Mombasa, cartelization and capture by vested commercial interests of the various segments of the tea value chain; and low and declining prices from tea exports

1.4 The net result of these challenges has been declaration of extremely low, declining and often volatile farm-gate prices for tea farmers. These low prices have significantly undermined ability of the tea sector to sustainably support quality livelihoods among tea farming communities leading to persistent agitations from farmers and their leaders for proactive Government intervention in the management of the tea value chain with a view to improving earnings.

In extreme circumstances, there are instances where farmers have uprooted the tea bushes in preference for other horticultural crops that are less strangled by brokers and farmers have more leverage in selling their produce

1.5 From a macro-economic standpoint, the tea sector is a strategic pillar to the Government's policy agenda for employment and wealth creation. By virtue of the size and the demographic characteristics of the populations served and supported by the sector, the tea industry is too important a sector to be allowed to collapse under the weight of narrow and predatory commercial interests like happened to coffee, tea, cotton, cashew nuts, pyrethrum and other hitherto profitable agricultural value chains

1.6 It is in the context of this background that the National Government has commenced significant tea reforms aimed at improving the operational efficiency of the tea value chain in order to guarantee better earnings for Kenyan tea at the export market and better prices for tea farmers.

These reforms that inter alia include optimization of tea handling costs by various value chain actors; value addition and democratization of the tea handling, storage and trading processes are more particularly elaborated in the tea bill 2020 and the Tea Industry Regulations, 2020 that are at advanced stages of the legislative process

2. Establishment of a Tea Price Stabilization Framework.

2.1 One of the critical reforms envisaged in these two policy instruments is the need for development and establishment of a sustainable tea price stabilization framework.

2.2 Considering the technical and green-field nature of this task, it is considered necessary to establish a technical working and advisory committee to develop and oversee operationalization of a sustainable tea farm-gate price stabilization framework for the benefit of farmers

2.3 In general terms, the technical working and advisory committee/task force shall undertake the following tasks –

- (a) develop a robust tea industry price stabilization framework for the tea industry in Kenya;
- (b) evaluate the resource requirements and possible sources to support the tea industry price stabilization framework;
- (c) consider and evaluate plausible sustainability options for the tea industry price stabilization framework; and
- (d) undertake any other task in furtherance of this broad objective

3. Specific Terms of Reference.

3.1 The specific terms of reference for the Technical Working and Advisory Committee/Taskforce on the tea industry price stabilization framework shall be to –

- (a) evaluate available literature on establishment of successful commodity price stabilization frameworks in progressive and comparable jurisdictions;
- (b) based on available and objectively verifiable data and information, identify the threats and success factors for sustainable commodity price stabilization frameworks in comparable markets and jurisdictions;
- (c) based on plausible data and assumptions, identify the threats and success factors for establishment of a sustainable tea industry farm-gate price stabilization framework in Kenya;
- (d) identify the critical institutional and technical design parameters for a successful and financially sustainable tea industry farm-gate price stabilization framework in Kenya;
- (e) identify the financial, technological and human resource requirements for the rollout of a tea industry farm-gate price stabilization framework for Kenya;
- (f) using plausible assumptions, evaluate and prioritize on the basis of probability of success, the possible sources and adequacy of financial resources for a price stabilization framework including but not limited to the tea levy proposed in the bill, direct exchequer contributions, Donors, Grants, bank balances held by KTDA on behalf of farmers in various commercial banks accounts, liquidation of non-core farmers' assets; and other relevant sources;

- (g) define a robust financial sustainability framework that include but not limited to sound investment plans and short frequency, data supported rebalancing framework for resource inflows and outflows in order to guarantee sustainability of the tea industry farm-gate price stabilization framework to perpetuity;
- (h) define a robust risk assessment matrix including appropriate risk triggers and mitigation mechanisms for a sustainable tea industry farm-gate price stabilization framework;
- (i) develop and oversee an end-to-end tea industry farm-gate price stabilization framework implementation plan;
- (j) undertake on-going and end term (post-implementation) monitoring and evaluation of the implementation of tea industry farm-gate price stabilization framework and brief the Cabinet Secretary accordingly; and
- (k) undertake any other task in this respect as shall be assigned by the Cabinet Secretary.

4. Tenure of the Tea Reforms Implementation Steering Committee

The Taskforce shall be for a term of two (2) months from the date of establishment.

5. Budget

The Agricultural and Food Authority (AFA) shall cater for the requisite budget and facilitate the work of the Taskforce.

6. Location of the Secretariat

Conduct basic first aid training and provide first aid kits. • Provide and maintain adequate water and sanitation facilities (Toilets, solid waste bins) for use by personnel at the site. • Enforce a strict code of conduct to limit movement of personnel outside the construction site or designated camp to prevent attack by wildlife. • Provide wildlife barriers around the site throughout the construction phase.
Waste generation	• Segregate organic and inorganic wastes and for non-biodegradable waste, reuse, recycle or appropriately dispose at a designated waste dumpsite • Use of BoQ by contractor/proponent to purchase only what is needed to minimize possibility of waste.	Disruption of wildlife serenity and access to the stream	• Plan activities in response to movement of wildlife within the conservancy. • Limit machinery working hours where possible and applicable.

Reduced flood flow downstream during initial dam filling and possible conflicts with downstream users	• Ensure the dam design provides for regulated filling process. • Ensure compensation/ environmental flows are continuously and consistently released. • Ensure the downstream water users are aware of the dam design and functionality.
Increased traffic	• Sensitize drivers to observe traffic rules and speed limits, particularly near the shopping centre and primary school. • Notify the school administration of anticipated increase in traffic and identify best strategies to protect pupils. • Erect speed bumps near schools and shopping centres.	Increased wildlife population around the area leading to degradation	• Careful monitoring of condition and diversity of flora and fauna with particular emphasis on nuisance species. • Initiate soil conservation measures such as trees and vegetation around the dam.
Health and safety issues	• Contractor vetting to ensure compliance with legal requirements governing suitability for the specific job. • Proponent will develop and commit the contractor to site occupational health and safety rules,	Contamination and spread of water-borne and vector-borne diseases	• Regular monitoring of water quality. • Ensure no direct watering of livestock and wildlife from the dam (construct troughs outside the dam area). • Encourage conservancy personnel to avoid drinking untreated water. • Monitoring and utilization of biological vector-control methods.
