NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSSMENT STUDY REPORT FOR THE PROPOSED ASBESTOS CORRUGATED SHEETS DISPOSAL SITE ON PLOT L.R. NO. 12177/68 IN SAGALLA, TAITA TAVETA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent Tai Lifestyle Limited, proposes to establish and manage an asbestos corrugated sheets disposal site. The strategy for disposal will be pit burial at a depth of 3 meters which will be excavated and lined with concrete and high density polythene to prevent soil and underground water contamination. The dimension of each pit are as follows; length 36m, breadth 14m and height 3m. The expected volume of the asbestos corrugated sheets is approximately 30,000 tonnes. The disposal of the sheets will be sectional, using and closing up filled up sections accordingly. The propose project will be on Plot L.R. No. 12177/68 in Sagalla, Taita Taveta County.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Potential Mitigation Measures

Loss of grazing areas and wildlife habitat	•	Preserve as possible indigenous trees and other vegetation cover that need not be removed.	
Destruction of physical environment	•	Restore degraded areas through landscaping by sediment binding grasses and trees.	
	•	Retain the excavated soil to be used in backfilling the disposal pits.	
Occupational safety and health risks	•	Register the site as a workplace with the DOSHS.	

- Obtain insurance cover for the workers at the site.
- Provide adequate and appropriate PPE to workers and visitors to the site and enforce on their use.
- Provide employees with correct tools and equipment for the jobs assigned and train on their use.
- Ensure moving parts of machines and sharp surfaces are securely protected with guards.
- Provide first aid services and emergency vehicle at the site.
- Comply with the Occupational Safety and Health Act, 2007.
- Sprinkle water at the excavation areas to suppress dust.
 - Use of serviceable machinery/equipment and trucks.
- Procure and enforce the use of dust masks to workers and visitors to the project site.
- Monitor fugitive emissions.
- Comply with the Air Quality Regulations, 2014.
- Procure and provide adequate ear muffs to workers and visitors to the site and enforce their use.
- Sensitize truck drivers to avoid unnecessary hooting and running of vehicle engines.
- Comply the Noise and Excessive Vibration Pollution (Control) Regulations, 2009.
- Solid waste generation Use the generated overburden in backfilling and landscaping.
 - Procure and strategically place adequate solid waste collection bins with a capacity for segregation.
 - Procure a sizeable central solid waste collection bin with chambers to accommodate separated waste.
 - Sensitize construction workers on proper waste management
 - Procure the services of a NEMA licensed waste handler to dispose of the solid waste.
 - Comply with the Waste Management Regulations, 2006.
 - Sensitize the workforce on the need to conserve the available water resources.
 - Monitor the amount of water being abstracted from the borehole.
 - Procure and deliver to the site mobile toilets from a NEMA licensed waste contractor.
 - Comply with Water Quality Regulations, 2006.

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent Central Rift Valley Water Works Development Agency proposes to develop Mumias-Kimilili sewerage project which has three main sewers namely M-1, M-2 and M-3. The proposed sewer originates from Ekero market and traverses to the East of Kakamega-Mumias Rd (C40) and will cross Mumias-Bungoma Rd (C33) near Finito sports pub as it discharges to the proposed M-3 trunk. The line serve the areas of Ekero market and Ekama and towards areas to the East of Ekero market and Ekama.

The following are the anticipated impacts and proposed mitigation measures:

- Possible impacts **Mitigation Measures**
- Noise and vibration The Contractor shall keep noise level control from plant within acceptable limits and construction and equipment activities shall, where possible, be confined to normal working hours. Planned operations in the residential, hospitals, schools and other noise sensitive areas shall be notified by the Contractor at least 5 days before construction is due to commence in the said vicinity.
 - Any complaints received the by Contractor regarding noise will be recorded and communicated to the Resident Engineer.
 - The Contractor must adhere to Noise Prevention and Control Rules of April 2005
 - Acquire Noise and excessive vibrations Pollution Control Permit and comply with conditions provided by the Environment Management and Co-ordination, Noise and excessive vibrations Pollution Control regulations of 2009.

- Construction wastes will be collected and Waste generation and • disposed of by registered waste handlers at NEMA approved disposals sites in accordance with EMC (wastes) regulations Act, 2006.
 - The contractor is encouraged to recycle and reuse materials and resources which are still in good working condition to reduce pressure on natural resources and the quantity of waste to be disposed.
 - Contaminated organic matter in the work areas to be isolated for safe disposal material residuals to be disposed of in accordance with established NEMA regulations.
 - KACWASCO to work closely with the locals for project acceptance and ownership.
- Sludge handling and The proponent will ensure that the roofs of the sludge drying beds are always in good condition to ensure quick drying of sludge and appropriate disposal to reduce

and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent Central Rift Valley Water Works Development Agency proposes to develop Mumias-Kimilili Sewerage project in Kimilili town, which has one main trunk sewer namely k-1, the proposed k-1 trunk main sewer originates from Kamusinga area, north of Kimilili town centre. It reverses the banks of river kibisi, with two major paved road crossing on Kimilili-Kipsokwony road and Kimilili-Kamukuywa road. It then discharges waste water effluents to the proposed Kimilili waste water treatment plant located in south east of Kimilili municipality. The sewer will serve areas of Kamusinga, Kimilili town centre, Kimilili market, Jonaf Farm, Khamulati, Kimilili-Kamukuywa road, Kimilili Kipsokwony road, areas along the bank of river Kimilili/Kibisi, Matili TTI and Maeni areas. The specific area to be serve within this catchment include Moi Girls, Kamusinga, Friends school Kamusinga CBSM Kimilili m school, Kory Family hospital Kimilili, Kimilili bus top Banks, shops, Offices and institutions within the CBD, western province police training institute, Kimilli market, Kamtiong market and Maeni market. The trunk will therefore serve a huge portion of the town.

The following are the anticipated impacts and proposed mitigation measures:

Possible impacts		igation Measures
Accidents, injuries or death of workers or community member		The Contractor Will Provide construction workers with PPEs (gloves, safety shoes, overalls, reflectors, nose mask, ear muffs and helmets).
	•	The Contractor Will Provide temporary toilets and bathrooms for the construction workers at the work sites.
	•	The Contractor Will Provide first aid kits accessible by the workers on need.
	•	The Contractor Will Isolate and barricade the site for access by the local communities during the construction for their safety and health
	•	Contractor to provide a Healthy and Safety Plan prior to the commencement of works to be approved by the Resident Engineer.
Solid waste mismanagement leading to pollution	•	Preferably to be located on land already cleared wherever possible.
	•	People within the area shall be involved in the site location to avoid conflict
	•	The need to be more than 20 meters from water courses and in a position that will facilitate the prevention of storm-water runoff from the site from entering the watercourse.
	•	Contouring of spoil site to approximate natural topography and drainage and/or reduce erosion impacts on the site. The Contractor shall ensure that the placement of spoil is done in such a manner to minimize the spread of materials and the impact on surrounding vegetation and that no materials' creep' into' no- go 'areas.
Gender Based Violence (GBV)	•	Contractor will prepare a GBV Prevention and Response Plan and

implementation arrangements.

Mitigation Measures

- Contractor to prepare and enforce a No Sexual Harassment and discrimination Policy in accordance with national laws.
- Contractor to engage services of local CSO to educate all workers and nearby communities and stakeholders on preventing and responding to sexual harassment and GBV ahead of any project related works.
- Popularize and put in place confidential mechanisms and hotlines for reporting GBV and sexual offences cases.
- Strategies such as male involvement will be employed in preventing and responding to GBV and sexual harassment
- Establish partnerships with relevant government agencies and NGOs to ensure survivors of GBV and sexual offences access survivor centered services such as medical care, psychosocial support, legal redress, safety, etc. as and when necessary.
- Provision of gender disaggregated facilities - separate bathing, changing, sanitation facilities for men and women.
- Grievance redress mechanisms including non-retaliation should be set up for the workers.
- Liaise with the administration units (County and sub-County governments, Police, DO, chiefs, etc.) to provide regular surveillance and patrols to protect workers and unacceptable behavioural interaction of local communities and workers.

ENVIRONMENTA IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED PROPERTY DEVELOPMENT ON PLOT L.R. NAKURU MUNICIPALITY BLOCK 7/554 LOCATED ALONG NAKURU-KISUMU ROAD IN NAKURU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent Local Authorities Provident Fund (LAPFUND) intends to construct a Commercial mall, a 5 Star Hotel, a Modern warehouse block, an Office block, Petrol Station, Kindergarten, Residential apartments and Parking lots within its premises on plot L.R. Nakuru Municipality Block 7/554 located along Nakuru-Kisumu Road in Nakuru County.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation measures

Vegetation disturbance	•	Ensure	proper	demarcati	on and
		delineatior	of the	project ar	ea to be
		affected by	y the con	struction w	ork.

- Specify location for vehicles and equipment and areas of the site which shall be kept free of traffic equipment and storage.
- Designate access routes and parking within the site.
- Introduction of vegetation(trees, shrubs and grass) on open spaces and around the project site and their maintenance.
- Design and implement an appropriate landscaping progamme to help in revegetation of open parts of project area after construction.
- Ensure strict enforcement of on-site speed limit regulations.
 - Sprinkle water during excavation works by heavy machines.
 - Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles.
 - Dust masks to be provided to employees and should be worn.
 - Use environmentally friendly fuels
 - Minimize the period for machinery idling.
 - Pursue good practices in energy use during operations and sensitize staff.
 - Provide appropriate personnel protective equipment to site workers.

Increased solid waste generation

Dust emission

- Use of an integrated solid waste management system i.e. through a hierarchy of options: 1. Reduction at source, 2. Recycling, 3. Reusing, 4. Incineration, 5. Sanitary land filling.
- Through accurate estimation of the dimensions and quantities required.
- Use of durable, long lasting materials that shall not need to be replaced as often as, thereby reducing the amount of waste generated over time.
- Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements.
- Use building materials that have minimal or no packaging to avoid generation of excessive packaging waste.
- Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at site.
- Dispose waste more responsibly by contracting a waste registered handler who will dispose the wastes at designated sites only.

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTA IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED DEVELOPMENT OF 60 MEGAWATTS WIND FARM AT SOUTH SAMBURU GROUP RANCH/88

KWALE COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent Devki Steel Mills Limited, proposes to develop a wind farm that will consist of 12 wind vestas V90 3MW turbines which are pitch regulated upwind wind turbines with active yaw and three blade rotor, with all necessary auxiliary facilities, overhead power line and access roads. This turbine has a rotor diameter of 90m with a generator rated of 3.0MW. The electricity generated will be fed to an existing nearby sub-station and power transmission grid within the premises of Devki Steel Mills Limited. The project will be located on Plot No. South Samburu Group Ranch/88 Kwale County.

The following are the anticipated impacts and mitigations measures:

Impact	Mi	tigation Measures
Impacts on terrestrial flora and fauna- vegetation clearing	•	Careful site selection for the wind farm and associated transmission lines to avoid or minimize the clearing vegetation and destruction of associated fauna habitats.
c cum	•	Configuring wind turbines and access roads to minimize the clearing of vegetation and destruction of associated fauna habitats.
	•	Limit vegetation clearance and removal to actual location/installation of the turbine and allied infrastructure.
	:	Avoid off-road driving by wind farm personnel that can result in destruction of flora and fauna on site.
Noise and vibration	•	Limit the construction and turbine installation to daytime.
	•	Ensure equipment like heavy duty cranes being used to install the turbines are appropriately serviced and maintained.
	•	Put in place a comprehensive noise and vibration conservation programme which will include noise and vibration level monitoring, use of noise attenuators, training and use of appropriate personal protective equipment.
	•	Ensure the provisions of Environmental Management and
	•	Co-ordination (Noise and excessive vibration control) Regulation, 2009 are adhered to.
Particulate matter (dust) emission	•	Regular sprinkle water on opened dusty access roads.
	•	Secure construction site with dust screens.
	•	Provide construction workers with appropriate personal protective devices
	•	Monitor dust levels.
	•	Ensure the provisions of the

Ensure the provisions of the Environmental Management and Coordination (Air Quality) Regulations, 2014

Mitigation Measures

are adhered to.

Ensure only skilled and experienced workers are involved in the construction of the wind farm and allied infrastructure.

- Ensure suitable, appropriate, well serviced and maintained equipment are availed to the workers.
- Workers working at height and in confined areas must be provided with appropriate safety equipment.
- An all equipped first aid station to be on site with trained and experienced first aiders, stand by ambulance and referral hospital.
- Ensure that the provisions of the Occupational Safety and Health Act, 2007 are adhered to.

Permission to be sought from Kenya National Highway Authority for transportation of abnormal loads (wind turbines) prior to transportation.

- An escort vehicle one in front and one behind the truck transporting the turbines to be provided.
- Turbines to be transported during daylight only.
- Notice to be issued on local press of transportation of abnormal loads on the said road to inform other potential road users on order for them to exercise extra caution

Thorough stakeholder engagement, including prior consultation, participatory decision-making, and information disclosure and dissemination. Adjusting the location of turbine rows or individual turbines to reduce perceived visual impacts.

- Choose wind power equipment with aesthetics in mind (where consistent with other objectives), such as a smaller number of (larger) turbines and reduced or different night lighting.
- Careful site selection to locate turbines where they would not produce shadow flicker around human dwellings.
- Use planning tools-standard industry software that predicts the location and timing of shadow flicker.
- Stakeholder engagement with potentially affected households and businesses.
- Create a visually balanced, simple and consistent image by adopting a regular wind turbine tower layout format such as a double line, a triangle, or a grid for regular landscapes such as an open or levelled space as is the case of the proposed project site.
- Turbine colors to be white, off-white or grey which gives people a feeling of cleanliness and efficiency and engage the turbines to the backdrops at different views and in different weather conditions.
- Design of wind farm according to the peculiarities of the site and with sensitivity
