THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED EXPLORATORY DRILLING AND
OPENCAST MINING ON PLOT TRANSMARA/MOYOI 1236,
KILIMAPESA HILL, LOLGORIAN TOWN, NAROK COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kilimapesa Gold (Pty) Limited, proposes to expand its mining operations by undertaking exploratory drilling and open cast mining of gold on the surface of Kilimapesa Hill using a combination of Reverse Circulation (RC) Drilling, Diamond Drilling (DD), as well as Open Pit (OP) mining to compliment the underground mining currently in place on plot title No. Transmara/Moyoi/1236, Kilimapesa Hill, Lolgorian Town within Narok

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impact</i>	<i>Proposed Mitigation Measure</i>
Removal of vegetation	- Re-vegetation of disturbed areas with native plant species. - Use of human labor as opposed to heavy machinery to avoid herbaceous layer destruction and exposure of the soil to wind and water erosion. - Undertake selective clearance by clearing demarcated areas for exploration. - Give the community priority on use of the removed vegetation for construction or other purpose. - Create buffer zones with vegetation.
Land scars	- Infill after sampling, mapping. - Undertake re-vegetation with native plant species disturbed during the exploration phase to reduce soil erosion.
Solid waste management	- Ensure that the workers dispose any remaining solid waste such as metals, paper, plastics, etc. at an approved disposal site. - Provide bins for separate collection of wastes into appropriate sorts such as recyclable and non-recyclable. These bins should be labeled. - Use designated areas for repair and maintenance of vehicles and powered machinery to avoid fuel and lubricant spillage on site - Put in place an efficient, regular and appropriate waste collection and disposal scheme that will prevent the accumulation of wastes at collection areas. - Where possible material considered as waste may be re-used or recycled or be given to who may consider them useful for others uses. - Maintain and repair equipment rather than replacing it to reduce waste.
Air pollution	- Wet/mist all active construction areas as and when necessary to lay dust. - Speed limit within of proponent vehicles should be limited to 10kph to avoid generation of dust. - Ensure regular inspection and maintenance of installed generators according to manufacturer's specifications.

Noise and Vibration impacts	• Ensure proper handling of hazardous wastes associated with maintenance. • Noise generating activity will be strictly limited to daytime i.e. between 8.00 am to 5.00 p.m. • Posting notices at the sites to inform people of noisy activities. • The proponent to regularly conduct noise assessment studies and keep records. • Use of hearing protection devices e.g. ear muffs by the employees. • Inform neighborhood of any abnormal noise generating activities to minimize disruption to local residents. • The proponent shall comply with the Environmental Management and Co-ordination (Noise and Excessive vibration pollution Control) Regulations of 2009. • No noise generation activity at night without noise license.		• site at all times and ensure that trained first aid personnel are available. • Adopt proper working procedures and when working with chemicals, machines and equipment. • Put in place an appropriate emergency response plan. • Control waterborne diseases by ensuring sanitation at the site and by regularly conducting chemical and bacteriological quality of the water to ascertain its suitability for consumption. • Ensure presence of clean sanitary facilities by adding pit latrines or outdoor toilets that can be emptied. • Frequently undertake workers through refresher trainings. • Ensure all staff and workers are fully aware of the limits to the site for each activity, standard operating procedures, and emergency procedures.
Fire	• Carry out routine bush thinning in vulnerable areas, slashing, and other maintenance activities, within and adjacent to rights of way to minimize the risk of fire. • Declare places with flammable materials as “NO SMOKING ZONES”. • Install fire extinguishers at strategic locations. • Regularly inspect the fire-fighting equipment. • Establish and mark a “FIRE ASSEMBLY POINT” at a strategic outdoor point at the site. • Regular train personnel concerning emergencies including those involving fire out-breaks.	Soil disturbance	• Soil excavated from the project area to be used for back filling in other mining areas within the precincts of Kilimapesa Gold areas of operations. • The project shall pursue the zero-waste policy on the management of excavated soils and debris. • The valuable top soil containing organic material, nutrients as well as seeds and the soil fauna should be excavated separately and piled in an appropriate manner for re-use.
Traffic impacts	• Place clear signage at the gate to alert drivers to look out for entering and/or exiting vehicles. • Provide space for use by emergency management vehicles. • Provide for adequate space at the turning point at the gate to give drivers enough room to maneuver into and out of the project site.	Soil and water contamination by oil spills, drilling and acid mines wastes	• Ensure work areas involving storage, handling and manipulation of chemicals are at a pre-designed work area which has an impermeable base and which does not drain as surface runoff or into underground water sources, streams or rivers. • Provide accidental spill containment kits for the provided chemicals and instruct workers on safe use of the kits. • Any contaminated soil should be handled properly as hazardous waste and removed from site for safe disposal. • Plan emergency response measures in case of accidental oil spills. • Proper maintenance of construction equipment.
Occupational Safety and Health	• Contract an environmental, safety and health officer at the site. • Sensitize workers on sexually transmitted diseases especially STIs and HIV/AIDS. • Secure the site with appropriate fencing for protection. • Post notices at the site informing the public of activities at the site and danger spots at the site. • Remove all soil, boulders and other heavy materials from the edges of the pit. • Keep all passages clear at all times. • Provide appropriate PPE as spelt out under section 101 (1) of OSHA, 2007. • Have fully equipped first aid kits at the	The full report of the proposed project is available for inspection during working hours at: (a) Principal Secretary, Ministry of Environment and Forestry, NHIF Building, 12th Floor, Ragati Road, Upper Hill, P.O. (No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

**ENVIRONMENTAL AND SOCIAL ASSESSMENT (SESA)
REPORT FOR THE KENGEN ENERGY (INDUSTRIAL) PARK
MASTER PLAN, OLKARIA, NAIVASHA SUB-COUNTY,
NAKURU COUNTY**

INVITATION OF PUBLIC COMMENTS

IN LIGHT of the provisions of section 57 A of the Environment Management and Co-ordination Act (EMCA), 1999, Regulation 42 and 43 of Environmental (Impact Assessment and Audit) Regulations Legal Notice No. 101 of 2003, the National Environmental Management Authority (NEMA) has received a draft Strategic Environmental and Social Assessment (SESA) report for the KENGEN Energy (Industrial) Park Master Plan, Olkaria, Naivasha Sub-County, Nakuru County. The SEA findings are expected to integrate the existing sectoral plans and programs to establish sustainable development mechanisms.

Kenya Electricity Generating Company (KENGEN) Plc the Plan owner, intends to leverage on KenGen geothermal power production at Olkaria to develop an industrial zone i.e an Energy (Industrial) Park in Olkaria Geothermal Hub in Naivasha Sub-County, Nakuru County, Kenya. The proposed site covers 1,824 ha and is entirely located within KenGen land. The proposed masterplan is scheduled to be implemented in four (4) phases of 5 years each with the initial phase anticipated to kick on in the year 2025. The Energy Park is anticipated to have industries including Fertilizers; Iron and Steel; Plastics and Packaging; Fabricated Metal products; Pulp and Paper; Wood and Wood Products; Textiles and Apparel (Steam Intensive Industry); Food and Beverages (Steam Intensive Industry); Textiles and Apparel (Light Industry); Food and Beverages (Steam Intensive Industry); Warehousing and Logistics; and Supporting Light Industry.

A summary of the proposed environmental management and monitoring plan for the KENGEN Energy (Industrial) Park Master Plan is highlighted below.

<i>Impact</i>	<i>Mitigation Measures</i>
Biodiversity and natural conservation	- Engagement of an ecologist in ensuring efficient management of wildlife in the masterplan area. - Wildlife crossings to be provided in wildlife migration corridors and dispersal areas. - Provision of a perimeter wall within the Energy Park to restrict entry by wildlife. - Liaison with KWS to facilitate fencing of national Parks neighbouring KEP-Longonot and KEP-Suswa Roads that are proposed. - Provision of wildlife crossings in wildlife migration corridors and dispersal areas. - Designation of areas in the Energy Park to serve as grazing lands for the local community members in a coordinated manner. - Liaison with KWS and WRTI to facilitate fencing of the Hell's Gate National providing wildlife crossing to facilitate wildlife dispersal. - Compliance to Hell's Gate-Mt. Longonot National Parks Ecosystem Management Plan, 2017-2027. - Collaboration with KWS in installation of security measures to monitor poaching. - Engagement of KWS rangers in managing and monitoring traffic in the area which will ensure efficient management of poaching. - Preparation and implementation of biodiversity management plan.

Impact

Mitigation Measures

- Control of flora species to be introduced in the Energy Park.
- Documentation of species loss in the implementation of the industrial park.
- Respective industries and infrastructure developments to ensure a full census on flora coverage in their respective sites.
- Approval application from KFS/KWS for all the vegetation/trees to be planted in recovery of lost flora.
- Employment of a competent biodiversity expert in ensuring full implementation and monitoring of the biodiversity plan.
- Equipment to be used in all construction activities be decontaminated e.g. washing equipment to remove soil potentially carrying Alien Invasive Species (AIPS) propagules before brought on site.
- Usage of top surface of the soil from borrow pit when excavating gravels for road construction as well as industrial development to be avoided in order to avoid transporting AIPS propagules to new areas.
- Aftermath proliferation of AIPS should be controlled by regularly reducing their population and recruitment since AIPS appears later after soil disturbance.
- Fisheries department at the county and County Government level as well as KMFRI should collaborate in management of fish resources in Lake Naivasha.
- Preparation of a water quantity monitoring and management plan to regulate water usage in the Energy Park.
- Drilling of boreholes to serve as alternative sources of water for use in the Energy Park.
- Preparation of policy on rain water harvesting system in the Energy Park.
- Employment of competent persons in ensuring full implementation of water quantity management and monitoring plan.

Environmental and landform changes

- Preparation of land utilization and management plan.
- Ensure that landscaping is done immediately the affected areas are completed.
- Ensure that infrastructure provided in the masterplan area are compatible with the existing landscapes.
- Ensure that the soils disturbed are immediately stabilized based on the high erosion potential of the area soils.
- Ensure revegetation in areas affected as this will encourage runoff infiltration and reduce the speed of runoff.
- Ensure development is maintained in areas with a slope of less than 150.
- Ensure that water detention ponds are integrated in the Energy Park.
- Employment of a competent team of experts in land and landscape management and monitoring.

Pollution

- Preparation and implementation of air quality monitoring plan.
- All industrial and infrastructure development ensures that baseline air quality assessment is undertaken.

<i>Impact</i>	<i>Mitigation Measures</i>	<i>Impact</i>	<i>Mitigation Measures</i>
	• All industries in the Energy Park to undertake air dispersion modelling. • Development of all industrial development should be done upon compliance with all air quality requirements in the country especially Air Quality Regulations, 2014. • Employment of competent persons in ensuring full implementation of air quality management and monitoring plan. • Formulation of a noise and vibration monitoring and management plan that will be implemented by a competent expert. • Works within settlement areas as well as in wildlife habitats should be carried out during the day. • The respective industries should undertake noise dispersion model for their facility. • Development of all industrial development should be done upon compliance with all noise and vibration requirements in the country especially EMCA Noise and Excessive Vibration Pollution) (Control) Regulations, 2009. • Preparation of a water quality monitoring and management plan. • All industrial and infrastructure development proponents ensure that chemicals with a potential to lead to surface and ground water pollution are efficiently managed. • Preparation of an emergency response plan in managing accidental chemical spillage.		• Ensure that as many women are given employment opportunities in the Energy Park. • Employment of a team of competent socio development experts enables effective management and monitoring of social development issues. • Formulations of a dispute redress committee. • Formulation of a schedule for having public forums in ensuring continuous communication between the Energy Park implementation team and the neighbouring community. • Quarterly meetings with the host community.
Waste management	• Formulation of a waste monitoring and management plan. • Respective industries and infrastructure development proponents should compel that contractor to ensure proper planning in ensuring minimal solid waste generation from construction activities. • All contractors should have a system in place to track waste. • All waste generated in the construction works should be reused or recycled where possible. • Designation of a place where all construction waste is held for a day ready for disposal at designated sites. Contractors to be subjected to monthly audits in ensuring compliance with waste management and spill management plans. • All developments in the energy park to be subjected to Environmental Impact Assessment (EIA) with baseline soil analysis to be undertaken and annual Environmental Auditing (EA) as prescribed in the law.	Occupational safety and health	• Formulation of an occupational, safety and health management and monitoring plan. • Preparation of a traffic management plan to ensure effective traffic movement. • Implementation of OSHA, 2007 and its rules. • Employment of a team of competent persons responsible for implementation of the occupational, safety and health management and monitoring plan. • Formulations of a dispute redress committee.
Social issues	• Preparation of a social development plan in management of social issues in the area. • Establishment of sensitization programmes covering gender mainstreaming, HIV/AIDS and other communicable diseases campaigns, among other moral subjects. • Initiate CSR programmes amongst the Maasai community in focusing on investment in cultural centres in place and establishment of more cultural centres in promoting and enhancing Maasai community cultural practices.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED APARTMENTS DEVELOPMENT ON
PLOT L.R. NO. 76/955 ALONG THINDIGUA HIGHWAY STREET,
KIAMBU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above-proposed project.

The proponent, John Muikiria Waweru, proposes to develop 14No. Floors apartments block with a total of 377No. residential units (5No. of one bedroom and 372No. of studio apartments), gym, cafeteria, laundry/drying yard, associated facilities and amenities and will be located on Plot L.R. No. 76/955 along Thindigua Highway Street, Thindigua, Kiambu County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
General site management	• Provide Environmental, Health and Safety training to workers to ensure that they understand the requirements of the environmental, health and safety management plans as applicable to their responsibilities. • Ensure that workers sign a code of conduct to observe established procedures and are well behaved towards the surrounding community.
Visual and landscape management	• Maintain as much as possible the natural drainage systems and patterns. • Preserve the existing natural vegetation as much as possible. • Ensure the protection of vegetation using any of the following methods: mark, flag or fence areas of vegetation to be preserved; designate limits of root systems (tree drip line); and locate construction traffic routes, spoil piles etc. away from existing vegetation. • Where possible, commence landscaping activities as soon superstructures are erected. • Set out a plan for re-vegetation of disturbed areas. • Prioritize indigenous trees and shrubs in the choice of plants.
Air pollution, particle and dust emissions	• Sprinkle water on work areas, and materials heaps to minimize dust emissions. • Minimize exposed areas through the schedule of construction activities to enable dust control. • Utilize vegetation, mulching, sprinkling and stone/gravel layering to quickly stabilize exposed soil. • Identify and stabilize primary entrances/exits prior to commencement of construction. • Direct construction vehicular traffic to stabilized roadways. • Maintain equipment and machinery to manufacturers' specifications by regular servicing to maintain efficiency in combustion and reduce carbon emissions. • Use environmentally friendly fuels such as low Sulphur diesel. • Minimize the period for machinery idling. • Ensure that no burning of waste is done on site; and • Provide appropriate Personnel Protective Equipment such as dust masks to site workers.
Energy demand and usage	• Ensure the use of rated equipment in welding and related works. • Maintain equipment and machinery to manufacturers' specifications by regular servicing to maintain efficiency in combustion and reduce carbon emissions. • Use environmentally friendly fuels such as

	low Sulphur diesel. • Minimize the period for machinery idling to save on fuel. • Specify and procure the most energy efficient plant options fit for purpose and avoid use of plant with unnecessary and excess capacity.
Noise and vibrations management	• Install portable hoods to shield compressors and other small stationary equipment where necessary. • Endeavour to use equipment installed with noise abatement devices as much as practicable. • Reduce idling time on trucks and other noisy equipment. • Encourage drivers to turn off vehicle engines when not in use and avoid unnecessary hooting/revving of engines. • Provide personal protective equipment such as ear muffs to workers at the site as necessary; and • Carry out construction work during the day only. No works shall be carried out on Sundays.
Increased water demand	• Close water taps when not in use. Repair broken pipes. • Ensure that water is used efficiently by avoiding extravagant water use and wastage. • Monitor water consumption and maintain records. • Harvest rain water wherever possible to supplement other sources of water. • Channel construction wastewater into temporary holding ponds to allow sedimentation before release in to the environment; and • Recycle and reuse construction wastewater wherever possible.
Soil erosion	• Salvage, stockpile and ensure re-use of native topsoil during re-vegetation activities in disturbed areas. • Identify fertile soil borrow-pits as close as possible to the project site. • Ensure re-vegetation of disturbed areas as soon as possible to prevent soil erosion. • Ensure that construction vehicles use predetermined tracks at the site to reduce ground compaction. • Utilize vegetation, mulching, sprinkling and stone/gravel layering to quickly stabilize exposed soil Utilize vegetation, mulching, sprinkling and stone/gravel layering to quickly stabilize exposed soil. • Identify and stabilize primary entrances/exits prior to commencement of construction. • Construction wastewater shall be channeled to a predetermined area such as a temporary holding pond where sedimentation can take place and reduce the amount of soil carried away in wastewater. • Oils, fuels, paints and any hazardous

	materials to be stored in accordance with their respective MSDS's, and in such a manner to avoid spillages or leakages. Bund walls should be constructed around these substances' storage area so as to enable containment in the event of spillage or leakage. • Implement erosion and sedimentation controls and ensure proper disposal of liquid waste.		service telephone numbers including: Fire brigade, Ambulance. • Accordingly, adherence to safety procedures will be enforced. • Provide first aid kits at strategic places in the site. • All workers to wear protective gear during construction e.g. helmets. • Provide clean water and food to the workers. • Construction work will be limited to daytime only. • Workers to be adequately insured against accidents. Ensure that the workers are registered with NHIF and NSSF and remits appropriate fee. • Develop and implement a detailed and site-specific Emergency Response Plan. • Provide adequate sanitary facilities on site; and • Provide for first aid facilities as per the OSHA, 2007, and ensure that workers are trained on emergency response such as first aid skills. • Provide and clearly display emergency contacts on site.
Traffic management	• Contractor shall ensure that construction traffic movement does not coincide with the known rush hours in the project area, and that speed and loading limits are observed. • Develop a traffic management plan to ensure that site vehicles do not interfere with the regular traffic on the access roads, or pose safety hazards to site workers or the general public. • Set up traffic control/warning signs along the access road near the site entrance informing other motorists of potential hazards of construction vehicles turning.		
Oil leakages and spills on the environment	• Proper storage, handling and disposal of new oil and used oil and related wastes. • Maintain construction machinery and equipment to avoid leaks. • Maintenance of construction vehicles to be carried out in the contractor's yard (off the site). • Provide oil interceptors along the drains leading from service bays.		
Solid waste management	• Identify a temporary holding area for demolition and construction wastes. • Recycle and re-use demolition and construction waste as much as possible. • Ensure that all non-recyclable/reusable wastes are cleared from site at the earliest opportunity to avoid pile-up. • Avoid mixing excess concrete if possible. Discard excess concrete in a designated area. • Washing of concrete-coated vehicles/equipment off-site or in a designated area. The concrete wash area will be at least 50m away from storm drain inlets or open drainage facilities. Runoff from onsite concrete wash area shall be contained in a temporary pit where concrete can set. • Surface runoff within the site to be diverted in order to avoid flushing away soil and other material. Sediment traps to also be installed to remove sediments before discharge of the runoff from the site. • Establish measures to ensure that construction material requirements are carefully budgeted to avoid leftovers.	Raw materials extraction and use in construction	• Source construction materials such as sand, ballast, quarry stones, and hard core from registered and approved quarries and sand mining firms. • Implement stringent inventory management mechanisms and only order for materials after a fairly accurate estimation of actual construction requirements; and • Manufacture building elements off-site where possible, and deliver to site.
		Increase generation of waste water	• Connecting and channeling all liquid/effluent wastes to the existing sewerage system. • Provision of adequate sanitary facilities for the workers during construction and tenants during the operation phase of the facility. • Proper decommissioning of the sanitary facilities shall be carried out once construction is complete. • Sanitary facilities shall be kept clean always. • Ensure regular maintenance of foul water drainage works at the premises to prevent clogging and fore-stall breakdowns.
		Surface run-off and storm water drainage	• Semi permeable materials will be used for construction of pavements. • After completion of construction, the proponent shall embark on comprehensive landscaping. • Drainage channels shall be covered; say with gratings, to avoid occurrence of accidents and entry of dirt. • Construct gently sloping drains to convey water at non-erosive speed directing the storm water to the main drainage system in
Health and safety of workers	• All workers will be sensitized before construction begins, on how to control accidents related to construction. • A comprehensive contingency plan will be prepared before construction begins, on accident response. • Keep record of the public emergency

the area.

Fire outbreak risks occurrence, response and safety

- “No smoking signs” where flammable materials are stored.
- Hire competent and properly authorized electrical contractor to do the electrical works.
- Train staff on the use of the available firefighting equipment. At least one person trained on handling firefighting equipment should be available through-out the construction phase of the project.
- Conduct regular firefighting drills within the site.
- Develop and post at the site fire emergency and evacuation procedures.
- Provide adequate number of appropriate firefighting equipment at accessible strategic places within the property.
- Organize for inspection and maintenance of fire equipment at least once in a period of six months.
- Maintain on site telephone contacts for fire brigade, G4S fire brigade and St. Johns ambulance service provider.

Emergency and spread of social vice

- To minimize project effects on local social set up;
- The contractor shall ensure that there is adequate street lighting and a security guard within the site to help curb with issues that may arise from theft. Also installing 24hr operating CCTV surveillance, which will be monitored regularly.
- It is recommended that the contractor employs workers from the immediate area where possible to avoid social conflict.
- Conduct periodic sensitization forums for employees on ethics, morals, general good behavior and the need for the project to co-exist with the neighbors.
- Offer awareness, guidance and counselling on HIV/AIDS and other STDs to employees.
- Provide safety tools such as condoms to employees.
- Ensure enforcement of relevant legal policy on sexual harassment and abuse of office.
