On 4th May, 2023, the DPP returned the file with recommendation for further investigations.

Inquiry into Allegations of Corrupt Conduct against a Chief Magistrate during Her Tenure at Milimani Law Courts, Nairobi

The Commission commenced investigations upon receipt of a complaint that a Chief Magistrate formerly attached to Milimani Law Courts engaged in unethical conduct during the trial of Case No. 1 of 2019. It is alleged that the said Chief magistrate received Kshs 500,000/= on behalf of the accused person in order to grant him favorable bail terms.

Investigations established that the said Chief Magistrate did not request nor receive a bribe of KSh. 500,000/- in order to grant favorable bail terms to the accused in case no. S.O. 1 of 2019.

On 13th March, 2023, a report was compiled and forwarded to the DPP with the recommendation that the file be closed for lack of sufficient evidence.

On 12th April, 2023, the DPP returned the file with recommendation for further investigations.

21. EACC/NYR/OPS/INQ/5/2021

Inquiry into Allegations of Offering a Bribe Contrary to Section 5 (1) as Read Together with Section 18 (1) of the Bribery Act, 2016

The Commission commenced investigations upon receipt of a complaint from the Officer Commanding Maragua Police Station (OCS) that three relatives of a suspect had offered to give him a bribe of KSh. 40,000/= to drop defilement charges against the suspect.

Investigations established that three relatives of the suspect arrested for defilement and the victim's mother went to the office of the Maragua OCS seeking the release of the suspect on cash bail of KSh. 40,000/= which was placed on his table. The said OCS called the Officer in-Charge DCI Maragua who went to the OCS's office, recovered the money and prepared an inventory of the recovered money. It was alleged that the three relatives of the suspect had offered the OCS a bribe of KSh. 40,000/=-.

Investigations revealed that it was not clear whether the KSh. 40,000/= was a bribe or a settlement between the victim's mother and the suspect's relative for the criminal case or whether there was prior negotiation for a bribe between the suspect's relative and the OCS. Therefore, it was not conclusive whether the KSh. 40,000/- was a bribe.

On 13th March, 2023, a report was compiled and forwarded to the DPP with recommendations to the file be closed for lack of sufficient evidence to sustain the offence of offering bribe against the suspects under section 5 (1) (a) as read with section 18(1) (a) of the Bribery Act 2016.

On 4th May, 2023, the DPP returned the file with recommendation for closure.

22. EACC/OPS/INQ/88/2021

Inquiry into Allegations of Bribery and Impersonation against a Former Nairobi City County Officer

The Commission commenced investigations following a complaint from a boda boda rider within Nairobi that while in the course of his business, he was arrested by the suspect, former Nairobi City County Officer, and his motorcycle was confiscated. It was alleged that the suspect requested for a bribe of KSh. 10,000/= to release his motorcycle.

Investigations established that the suspect, requested for a financial advantage of KSh. 10,000/- and on different dates and received KSh. 3,000/=-, KSh. 1,000/= and KSh. 5,000/= from the complainant. Investigations revealed that the suspect was not an employee of Nairobi City County and was personating a Nairobi City County Enforcement Officer.

On 13th March, 2023, a report was compiled and forwarded to the DPP with recommendations to charge the suspect with four counts of receiving a bribe contrary to section 6(1)(a) as read with section 18 of the Bribery Act and one count of personation contrary to section 382 of the Penal Code.

On 20th April, 2023, the DPP returned the file with recommendation for further investigations.

Inquiry into Bribery Allegations against an Employee of the Tourism Fund

The Commission commenced investigations after receiving a bribery report that a Levy Officer at the Tourism Fund had requested for KSh. 500,000/= to waive tourism levy arrears of KSh. 1,000,000/= owed by a Hotel.

Investigations established that the Hotel owed KSh. 26,092/= in arrears of the Tourism Levy. Investigations revealed that the suspect requested for a bribe of Kshs. 500,000/= later negotiated the amount to KSh. 300,000/= and received KSh. 100,000/= from the complainant.

On 13th March, 2023, a report was compiled and forwarded to the DPP with recommendations to charge the Levy Officer at Tourism Fund with 3 counts of receiving a bribe contrary to section 6 (1) (a) as read with section 18 of the Bribery Act.

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED AVOCADO PLANTATION FARM WITH A DAM LOCATED ON PLOT L.R. NO. 17510, LAIKIPIA WEST SUB-COUNTY, LAIKIPIA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Mutara Orchards Limited proposes to establish an avocado plantation farm on a 2000 acres piece of land. The farm will also be used for cultivation of other vegetables such as kale, cabbage and spinach among others. The proposed project will also entail construction of a dam that will be used for water storage that will be collected from the surface run off, staff housing, parking area, medical clinic camp offices, storage area and associated facilities. The proposed project will be located on Plot L.R. No. 17510, Laikipia West Sub-County, Laikipia County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigations Measures During Construction/Set up Phase of the Farm Plantation and Dams</i>
Loss of vegetation/deforestation	- Avoid cutting mature tree and select areas of less vegetation for plantation activities. - Re-vegetation of exposed areas around the site to mitigate against the erosion of soil through surface water runoff and wind erosion.
Soil compaction	- Machinery needs to be operated on the existing roads or tracks. - Unnecessary vehicle movement should be avoided.
Dust emission	- Excavation, handling and transport of erodible materials shall be avoided under high wind conditions or when a visible dust plume is present and or covered by tarpaulin while on transit. - Vehicle speeds are limited to a maximum of 30km/h.
Pollution of rivers	- Apply sediment control procedures to prevent sediment returning into the rivers including but not limited to the retention ponds, among others appropriate to the site. - Plant vegetation cover, the grass around the reservoir and all affected areas not under cultivation.
Occupational health and safety risk	- Provide workers with appropriate personal protective equipment (PPE). - Keep agrochemical (pesticide and herbicide among others) in their original package away from reach by children and mature people as well. - Store chemicals as recommended in the MSDS.
Labour Influx	- Develop and implement the Labour Management Plan. - Hire labour from the local community unless otherwise.
Soil erosion	- Soil erosion control measures (retention ponds) should be undertaken to avoid erosion in sensitive areas and those prone to erosion. - The levelling and disturbance of the soil should be limited to the

designated cultivation site.

- The contractor should ensure there is regular watering of dusty roads and maintenance during this stage.
- Damaged roads as a result of heavy vehicles should be repaired adequately and without delay.
- Re-vegetate affected areas with the vegetation from the site.
- No introduction of invasive/alien vegetation to the site.
- Continuous monitoring of the vegetation within the proposed project site to ensure no incidences of alien species spreading.
- Hire a biodiversity expert to periodically monitor the vegetation growth at the site.
- Workers should be trained on pest and disease control and management, especially integrated pest management.
- There should be increased pest and disease surveillance to monitor the prevalence of existing pests and diseases.
- The sensitization should involve all community members in the area and should be holistic.
- To minimize the conflicts between man- livestock and wildlife, the farms should be adequately fenced off with the use of the appropriate materials.
- The right amounts of fertilizer application should be used to prevent potential for excess quantities getting washed into the surface waters and from infiltrating into the groundwater resources.
- Waste management should be adequately streamlined to prevent the release of effluents into the environment.
- Monitor the crest to ensure that the edges do not erode and the crest width does not deteriorate. If required, additional material should be placed on the crest and a good grass cover maintained.
- Monitor the crest and slopes for cracks. The location, alignment and depth of crack should be reported and cracks should be in-filled by compacting similar soil into the cracks.
- Adequate drainage should be designed and engineered to prevent excessive runoff of sediments into the environment.
- No cultivation of slopes of more than 35%; construct water velocity checks; safe water disposal to discharge points.
- Plant grass strips and construct

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED CONSTRUCTION OF MAU MAU LOT 4:
IHITHE-NDUNYU NJERU ROAD PROJECT

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kenya National Highways Authority proposes to construct a class C primary road that is approximately 94km long. The main section is approximately 49km and will have a desirable width of 40m and 25m in sections traversing Aberdares Forest and starts at Ihithe, through Nyayo Tea Zone, Aberdare National Park, Kahuruko and ends at Ndunyu Njeru. Other road sections include in the project are the Njengu-Treetops Gate- Ambone, the Ihithe-Kiamutiga-Mukarara, the Ark Gate Access, the Munyaka-Koinange-Heni-Mwendandu and the Njoma-Weru Road sections, all totaling approximately 44km in length. The proposed project traverses through Nyeri and Nyandarua counties

The following are the anticipated impacts and proposed mitigation measures:

Anticipated Impacts *Mitigation Measures*

Clearing of vegetation	- Cleared trees should be kept within the forest and should be used in order to prolong period of carbon emission. - Sites should be identified for offsetting the loss of forest cover and biomass. This will require an adoption of compensation plan.
Human-wildlife conflict	- Construction of the road should be conducted faster to minimize potential diversion of animal movements. - Excavation of deep long channels should be avoided.
Wildlife poaching	- KWS should screen contractor personnel working in the project. - Contractor should work within the construction space of the road and designated construction camp. - KWS should screen contractor's construction plant, equipment, containers, etc. - Security in the region should enhance surveillance on vehicles.
Barrier to movement of elephants and rhinos to the river and dispersal foraging grounds	- Construction of road should be conducted faster during dry season to allow for natural dispersal tendency of wildlife during wet seasons. - Crossing ramps should be put in place where temporary trenches are constructed. - Avoid deep trenches as much as possible.

Anticipated Impacts *Mitigation Measures*

Impact on aesthetic value	- Provide drinking water troughs and mud puddles away from the roads. - Plant grasses, lianas and climbers on cut slopes. - Level of road fillings on valleys should be synchronized with the gradient of the topography in the valleys. - Trees should be planted near the road reserve to moderate on visual intrusions. - Structures should be painted green colour. - Control the spread of solid wastes in the protected areas. - Control introductions and spread of AIPS.
Solid waste pollution	- Dumping used foods, food covers and water bottles. - On Construction waste, Contractor to provide solid waste storage bins and skips. - Contractor to ensure that the solid waste collected is disposed of in an approved dumpsite.
Accidental oil spill	- Contractor should have well maintained engines and equipment to avoid accidental oil leakages. - Construction camp should not be established within the Protected Areas (National Park and Forest Reserve). - Construction should be confined during dry seasons only to avoid rains washing oily equipment and machines. - All Earthmovers, vehicles and equipment should be removed from the water tower before the onsets of rainy seasons. - Clear spills immediately they occur.
Pollution of streams, rivers and reservoirs	- Avoid generating piles of soils along the road. - Cover piles of soils with waterproof materials to prevent erosion. - Excess generated loose soils should be disposed safely.
Draining of wetland and poor resilience to climate change	The contractor Construct barrier before the road crossing to prevent water from wetland drained when channel is excavated for bridge construction.
Impact on fauna	- Construction on site should begin from 8 a.m. and ends at 4 p.m. to allow the birds including other wetland birds to forage - Introduction of speed bumps specifically towards the mooreland valleys. - Avoid clearing of tall vegetation on valleys to allow these birds to scale flight height higher than the height of cars. - Plant the indigenous shrubs and trees near the valleys to control the flight speed of the bird and allow this bird to scale its flight height once the trees grow taller. - Provide drinking water troughs and mud puddles away from the roads.
Introduction of alien invasive plant species	- Equipment to be used should be decontaminated. - Always avoid the top surface of the soil from borrow pit when excavating gravels for road reinforcements in order to avoid

<i>Anticipated Impacts</i>	<i>Mitigation Measures</i>
	transporting AIPS propagules to new areas.
	Since AIPS appears later after soil disturbance, aftermath proliferation of AIPS should be controlled by regularly reducing their population and recruitment.
Pitfalls resulting from excavation of trenches	- Provide a temporary crossing over the trench to enable the small mammals, reptiles and amphibians cross easily before backfilling of soil is done. - Construction personnel should provide a ramp to enable trapped animals to get out and monitor trenches for animal rescue.
Potential collection of live specimens of chameleon	- Personnel should be educated on cites in order to understand how to protect species from collection of live specimens. - Environmental expert should be incorporated in the personnel team to monitor on incidences of collection of live specimens.
Climate change impact	- To mitigate this the workers should be trained on management of air pollution from vehicles and machinery. - All construction machinery shall be maintained and serviced in accordance with the legal requirements and the contractor's specifications.
Occupational safety and health	- Regular checks by KWTa should be undertaken to ensure the relevant labour laws and occupational health and safety plans are adhered to at all times. - All project workers should, as part of their induction, receive training on health and safety. - All workers will have contracts which clearly state the terms and conditions of their employment and their legal rights. - The proponent and the contractor will put in place a worker grievance redress mechanism accessible to all workers, whether permanent or casual, directly or indirectly employed. - All project workers should have access to training on communicable diseases and STDs and community interactions in general. Contractor should ensure that all the laborer's are over 18 years of age.
Increased transmission of HIV/AIDs and other STIs	- The contractor should develop and implement pre-employment screening measures for workers, which should include applicable diseases. - The contractor should develop and implement a HIV/AIDs and other STIs policy and an information document for all workers directly related to the project. - The contractor will make condoms available to employees and communities neighbouring the site office during construction.
Impacts on employment, procurement and the economy	- The project should prioritize the employment of labour from the local area. - The proponent should adopt a fair and transparent employment and procurement strategy to avert any potential favoritism. - The project should prioritize the

<i>Anticipated Impacts</i>	<i>Mitigation Measures</i>
	procurement of raw materials from Nyeri and Nyandarua counties.
Loss of property and livelihood sources	- Further the process should identify persons who have been affected in this regard and identify which alternative intervention can be suitable to help them cope with their loss. - The local leaders including special interest groups should be involved and consulted in identification of interventions and restoration of community livelihoods. - Establish a community grievance redress mechanism to address concerns arising from the community and to avoid conflict.

The full report of the proposed project is available for inspection during working hours at:

- Principal Secretary, Ministry of Environment and Forestry, NHIF Building, 12th Floor, Ragati Road, Upper Hill, P.O. Box 30126-00100, Nairobi.
