(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED RESIDENTIAL APARTMENTS
DEVELOPMENT PLOT L.R. NO. 209/7480, LOCATED ALONG
MUTHANGARI DRIVE WITHIN WESTLANDS AREA, NAIROBI
CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above-proposed project.

The proponent, Thermax (East Africa) Limited proposes to develop a residential apartment consisting of 3 blocks, (Block A, B and C) with a total of 225No. units. Block A will consists of 9No. units in each floor (4No.units 1-bedroom, 3No.units 2-bedroom, and 2No. units studios) totaling to 135 units. Block B will consists of 3No. units in each floor (3No. units 1-bedroom, 1No. unit 2-bedroom, 1No. unit 3-bedroom) totaling to 45 units Block C will have 3No. Units in each floor (1No. unit 1-bedroom, 1No. unit 2-bedroom, 1No. unit 3-bedroom) totaling to 45 units. Each block will have 15 floors two basements, ground floor, podium, associated facilities and amenities. The proposed project will be located on plot L.R. No. 209/7480, located along Muthangari Drive, within Westlands area, Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

Impacts

Destruction of water pipes along the access road

Destruction of soil structure and ground profile

Increased surface water run-offs

Piling of loose soil and other debris on site

Fire risk

Air pollution through exhaust fumes and dust emissions

Proposed Mitigation Measures

- Proper surveying to identify location of the pipes in consultation with the water provider.
- Marking of the pipe locations.
- Reinforcement to protect the water pipes.
- One point of entry and exit to and from the site for ease of managing the same.
- Use of well-maintained and appropriate machinery and tools for site clearing and excavation works.
- Compacting of loose soil in excavated areas.
- Ensure management of excavation activities especially during rainy conditions.
- Provide soil erosion control structures to help in management of surface run-offs during construction phase.
- Proper Landscaping of the site to be done after completion of construction works.
- Provision of storm water trenches and drains on site.
- All roof water and surface runoff water to be collected and stored in underground water reservoirs to use.
- Proper and regular maintenance of drainage system.
- Enclose the site to prevent these waste soils and other debris from spilling over to neighboring properties.
- All dug up soil to be removed promptly and disposed of to appropriate areas approved by the Nairobi City County.
- Re-use the soil in backfilling and landscaping.
- All buildings on site to be made of non-combustible material.
- One 9kg CO₂ fire extinguisher shall be stationed at strategic points all-round the premises.
- Water hydrants should be installed.
- All trucks and any other mode hauling soil sand and other loose materials to and from the site should be covered.
- The site should be enclosed with dust-proof net.
- Control speed of construction vehicles to reduce dust generation.
- Sprinkling of water on dry soils in excavated areas, pavements.
- Use of clean fuels for machines and equipment.
- Provide barriers such as walls and netting around site boundaries to provide some buffer against dust emissions (where applicable).
- Encourage other people to either avoid and or minimize the coming to this site during construction works
- All pipes leading to the Septic Tank to have P-traps to prevent fowl air from the

Occupational health and safety	<p>decomposing wastes coming back to the house</p> <ul style="list-style-type: none"> Power supply requirements shall be calculated and shared with KPLC as is the requirement. A dedicated transformer for the entire project shall be a consideration. Alternative power sources (solar) shall also be considered. All workers and visitors on site to use mandatory protective gear. Unattended entry to the project site to be restricted. Use of efficient and well maintained machines to lift and transfer materials. Removal of all dangerous materials that may pose a threat such as metal bars, wires, glass and broken equipment. Availing of fully equipped first Aid kitties to help address emergencies. Warning signs to all users and visitors be placed at appropriate places. Educate construction workers and tenants on health and safety risks and their prevention
Increased traffic generation	<ul style="list-style-type: none"> Provide walkways for use by pedestrians to avoid competition between hard and soft traffic. Transportation of construction materials and excavated soil to be carried out during off-peak hours only. Sensitization of truck drivers to avoid unnecessary road obstruction Provision of ample parking on-site and plot frontage. Sign posts to guide motorists to and from the construction site.
Increased liquid waste generation	<ul style="list-style-type: none"> Ensure that all liquid waste generated on site is channeled to the sewer line. All channels leading from the parking bay to have grease and oil filters and interceptors. Construction works to be done to standard to avoid incidences of spillages and linkages.
Increased solid waste generation	<ul style="list-style-type: none"> Ensure that all the solid waste management during construction and operational phases of the project do comply with the (Waste Management) Regulations of 2006.
Loss of habitat and biodiversity	<ul style="list-style-type: none"> Removal of only necessary vegetation where construction works will be carried out. Landscaping of the site after construction by planting grass, encourage terrace gardening (where applicable)
Noise pollution and excessive vibrations	<ul style="list-style-type: none"> Comply with the maximum permissible noise levels for construction sites as provided for in the second schedule of the Environmental and Co-ordination (Noise and Excessive Vibration Pollution) Control Regulations of 2009.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Increased water demand	<ul style="list-style-type: none"> Use of well-maintained and serviced machines and equipment for this very purpose. Ensuring that all construction activities to be restricted to day time (008-1700hrs). Workers in the vicinity of high-level Noise to wear safety and protective gear. Install portable barriers to shield compressors and other small stationary equipment. Construct water reservoirs and rainwater harvesting systems for conservation. Use of tanker water for construction works. Management of water usage for construction and re-use in lawns/gardens. Recycling of water where possible. Install water conserving taps and turn off automatically when water is not being used. Quick fixing of leaking taps and pipes to avoid wastage of water. Never leave running taps on after use.

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED INSTALLATION OF ELECTRIC FENCE
AT TSAVO EAST NATIONAL PARK, (KAMUNYU, KILALINDA,
KAMBU RIVER, LUKENYA UNIVERSITY MAKUENI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, County Government of Makueni Department of Roads, Energy and Public Works proposes to install two-strand electric fence (110km) long at Tsavo East National Park, along Kamuyu Primary School, Sasum Home, Kamuyu Stream, Miisani Village, Kambu River, Makutano, Dan Marcos, Kalawa Village, Sabati and Lukenya University in Kibwezi East Sub-County, Makueni County. The proposed project will help to reduce the human wildlife conflict (HWC) within the community and to reduce negative perception towards wildlife as a whole. The electric fence will be electrified using solar energy from two power energizers. The fence will be put in a manner so as to allow the public access water in the Kambu River as well as their livestock with ease. The proposed fence site is approximately 245 kilometers from Nairobi Town. Access to the site shall be through Mutito Andei Town.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impacts Mitigation Measures

Planning, surveying, ESIA study, alignment	<ul style="list-style-type: none"> Avoid vegetation destruction, use available tracks, maintain modicum of silence, intensified consultations.
Traffic management	<ul style="list-style-type: none"> The contractor should plan and implement traffic management programme on daily basis. Comply with all applicable legislation and by-laws with regard to road safety and transport. Lane and junction design and signage to meet appropriate standards. Movement of construction vehicles timed to avoid peak periods. Ensure adequate entry and exit lane design and appropriate signage.
Liquid wastes	<ul style="list-style-type: none"> Carefully collect used oil in drums and dispose of by licensed refuse contractor. Adhere to wastewater management regulation of the legal Notice 121 and Water quality regulations of the Legal Notice 120. Construct Interceptor and conduct wastewater monitoring to check compliance and submit the results to NEMA. Document and train staff in the emergency spill response plan. Revegetation of open ground should be done to reduce run off hence reducing storm water drain.
Constraining animals within the park	<ul style="list-style-type: none"> Provision of wildlife migration corridor and ecological sites, translocation.
Transportation of materials	<ul style="list-style-type: none"> Maintain modicum of silence, use designated tracks, avoid using noise prone vehicles such as old tractors.
Digging holes	<ul style="list-style-type: none"> Backfilling of excavated areas, solid waste put in bins are transported outside the park.
Fencing	<ul style="list-style-type: none"> Due diligence ensuring animals are not locked out. Strategic wildlife management.
Air pollution and dust generation	<ul style="list-style-type: none"> Sprinkling all active construction sites with water. Control of speed and movements of all automobiles within the construction site. Use of low-sulphur diesel for diesel-operated construction machinery. Provide dust mask to workers. Install an eco-efficient back-up generator fitted with scrubs and silencer.
Over-extraction of construction materials	<ul style="list-style-type: none"> Construction materials shall be from approved sources: for example: hardstone for building should be obtained from bonafide commercial quarries.

Possible Impacts Mitigation Measures

Live fence	<ul style="list-style-type: none"> Procure environmentally friendly and sustainable materials. Do not use the following materials for construction of the building: <ul style="list-style-type: none"> Asbestos in any form. Asbestos substitutes or any naturally occurring man-made mineral fibres. Lead, Lead paint or other materials containing Lead which may be inhaled, ingested or absorbed. Vermiculite, unless it is established as being fibre-free. Any product containing Cadmium that are regarded as being deleterious building material which are not in accordance with statutory requirements or with current accepted good building practice at the time of specification or construction.
Limited access to the reserve	<ul style="list-style-type: none"> Install warning signs on the live wire, allow for migration corridors and safe gates in designated areas, monitoring of voltage. Allow for access routes in designated areas, provide for utilization of reserve products.
Access to the reserve	<ul style="list-style-type: none"> Community members should indemnify KWS, Access at owner's risk, creating awareness on possible exposure to danger.
Spillage of oil to soil and underground water sources	<ul style="list-style-type: none"> Have sorbent materials available on site. If a spill or leak occurs, stop it from flowing at the source. Develop a spill response action plan and display it in a strategic place. Most of the open grounds should be cemented to prevent spills from leaking into underground water and soils. Do not discharge petroleum products to sewers, drainage ditches, septic tanks, or streams. Do not dispose of petroleum products in landfills or mix them with wastes that will be disposed of in landfills. Ensure that all drainages are fitted with oil interceptors to retain any oils that will find their ways into the drainages. Monitor quality of water draining from the site. Monitor quality of underground water and soils for potential contamination, if necessary remediate the sites.
Accidents	<ul style="list-style-type: none"> Adherence to safety requirements and standards, awareness creation on possible accidents, training of technicians on maintenance of the fence, installing warning signs.
Fire	<ul style="list-style-type: none"> Install warning and preventive signs along access routes, engage stakeholders in fire management.
Public health and occupational health and safety	<ul style="list-style-type: none"> Develop a site safety action plan detailing safety equipment to be used, emergency procedures, restrictions on site, frequency and personnel responsible for safety inspections and controls. Daily site inspections should be done to ensure safe work practises are adhered to. All workmen should be provided with personal protective equipment (PPE). The Conditions of Contract in the tender

Possible Impacts Mitigation Measures

- documents should stipulate health, safety and environment regulations and work procedures.
- The contractor must appoint a foreman with knowledge on health, safety and environment regulations.
 - All injuries that occur on site must be recorded in the accident registers and corrective actions for their prevention be instigated as appropriate.
 - Site personnel should be encouraged to report “near-miss incidents” in order to avoid potential problems and increase safety awareness.
- Conflicts with local communities on labour issues
- Contractor will be required to have a transparent external communication plan covering among others, how available opportunities will be advertised.
 - The contractor should prioritize employing locals as casuals to reduce the need for labour influx.
 - Consultations with the local council of elders to ensure that available opportunities are fairly distributed across different clan members.
- Child protection, sexual exploitation and abuse (SEA) of underage girls
- Workers will be educated by relevant agencies such as police and probation officers on the relevant laws and polices protecting children.
 - Reach out to children in and out of school in the vicinity of the construction sites with a life skills program focusing on HIV/AIDS and sexual abuse prevention among others areas.
 - Partnerships will be established with relevant government agencies and NGOs to ensure children access survivor centered services such as medical care, psychosocial support, legal redress, safety, etc as and when necessary.
 - Liaise with the administration units (county and sub-county governments, police, DO, chiefs, etc.) to provide regular surveillance and patrols to protect workers and unacceptable behavioral interaction of children and workers.
- Gender equity and mainstreaming
- Contractor and implementing agency to prepare and implement a Gender Action plan to include at minimum, in conformance with local laws and customs, equal opportunity for employment (min 30% of labour should be women).
 - Provision of gender disaggregated accommodation, bathing, changing, sanitation facilities.

The full report of the proposed project is available for inspection during working hours at:

- Principal Secretary, Ministry of Environment and Forestry, NHIF Building, 12th Floor, Ragati Road, Upper Hill, P.O. Box 30126-00100, Nairobi.

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED DEVELOPMENT OF TIRYO SUGAR
MILLS LOCATED ON PLOT NO. 21959/4 (PART), ALONG
NANDI HILLS-KIMWANI ROAD IN KIMWANI, NANDI
COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Tiryo Sugar mills proposes to establish a sugar milling factory with a total capacity of 1000 TCD (starting capacity of 800 TCD). The project will comprise of sugar milling plant administrative offices, store, sanitary facilities, parking areas, effluent treatment plant, finished products, warehouse, boiler, bagasse yard associated facilities and amenities on Plot No. 21959/4 (part), along Nandi Hills, Kimwani Road in Kimwani, Nandi County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Clearing of vegetation	<ul style="list-style-type: none"> • Proper demarcation and delineation of the project site to be affected by construction work. • Design and implement an appropriate landscaping program to help in re vegetation of part of the project site after construction. • Set a replanting and landscaping programme that focuses on increasing “green area”
Over extraction of raw materials	<ul style="list-style-type: none"> • Source material from suppliers that use environmentally friendly processes in their operation. • Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered. • Steel should be used in preference to timber and the contractor should ensure that sufficient quantities of scaffolding are available for hire at the time of construction. • All construction materials should be from approved sources.
Dust emissions	<ul style="list-style-type: none"> • Sprinkle water on graded access routes each day to reduce dust generation by construction vehicles. • Controlling the speed of vehicles on the site. • Provide workers with dust masks.
Excessive noise and vibrations	<ul style="list-style-type: none"> • Ensure that all heavy-duty equipment is insulated or placed in enclosures to minimize ambient noise levels. • Ensure that noise levels do not exceed 75dB(A). • Attenuation of any sound that may affect the inner ear by use of earplugs and earmuffs.
Increased traffic flow	<ul style="list-style-type: none"> • The contractor should plan itineraries for site traffic. • Issue notices/advisories of pending traffic inconveniences and solicit tolerance by commuters before the commencement of construction works.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> Assign traffic marshals during periods of chronic or potential traffic congestions.
Energy utilization	<ul style="list-style-type: none"> Develop an energy management plan. Construction machinery and vehicles should be maintained and used in accordance with manufacturer's specifications, to maximize efficiency and lower use of energy.
Solid waste management	<ul style="list-style-type: none"> Use of an integrated solid waste management system. Dispose waste more responsibly by dumping at designated dumping sites or landfills only. Waste collection bins to be provided at designated points on site. Use bagasse as a source of fuel in the boilers. Provide facilities for proper handling and storage of construction materials.
Wastewater management	<ul style="list-style-type: none"> Conduct regular inspections for sewerage pipe blockages or damages and fix appropriately. Ensure regular monitoring of the sewage discharged. Storm water management channels should be maintained and kept clean. Apply for effluent discharge license from NEMA. All wastewaters should be directed to the Effluent Treatment Plant.
Air pollution	<ul style="list-style-type: none"> Regularly monitor stack emission. Installation of wet scrubbers and thermal oxidizers. Use the correct fuel to air ratio by proper adjustment of air and fuel ratios. Avoid carbon build-up in the boiler and furnace tubes and maintain the boilers.
Occupational health and safety	<ul style="list-style-type: none"> Ensure provision of suitable protective clothing and appliances. Ensure training and supervision of inexperienced workers. Provision of well-equipped First Aid kits and /or ready transport in case of emergencies. Adequate supply of both quantity and quality of wholesome drinking water must be provided. Secure adequate ventilation of workrooms. Provide adequate sanitary facilities for separate genders.
Accidents and injuries	<ul style="list-style-type: none"> All plant, machinery and equipment should only be used for designed work. Insist on regular servicing of electrical fittings and appliances by qualified personnel.
Fire hazards	<ul style="list-style-type: none"> Provide adequate number of appropriate firefighting equipment as well as fire exit options. Ensure inspection and maintenance of fire equipment. A fire escape route and an emergency assembly point should be clearly indicated
Over utilization of water resources	<ul style="list-style-type: none"> Monitor water consumption. Apply for water abstraction permits from WRA. Install internal water meters.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> Incorporate rainwater harvesting measures. Recycling of wastewater to reduce water consumption.
Molasses and distillery management	<ul style="list-style-type: none"> Ensure that all wastewater from the distillery is channelled to the Effluent Treatment plant. Regular inspection and maintenance should be carried out on pipes to ensure no leakages. Conduct effluent discharge and quantity monitoring at NEMA accredited labs and submit quarterly records of such monitoring to NEMA.

The full report of the proposed project is available for inspection during working hours at:

- (a) Principal Secretary, Ministry of Environment and Forestry, NHIF Building, 12th Floor, Ragati Road, Upper Hill, P.O. Box 30126-00100, Nairobi.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

The following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or County Governments. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or County Assemblies.
- (4) *Act Supplement* contains Acts passed by the National Assembly, Senate or County Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

Kenya Gazette

A.30 (1) All communication for publication in the *Kenya Gazette* should reach the Government Printer not later than Friday of the week before publication is desired.

(2) A State Department will be required to meet the cost of advertising in the *Kenya Gazette*.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
