THE COMMISSION -

Mrs. M. B. Rajabally - Commissioner,

Mrs. V. Bikhoo - Commissioner,

Having regard to the Competition Act 2007,

Having regard to the Competition Commission Rules of Procedure 2009,

Having regard to earlier decisions of the Commission codenamed 'DS0016' and 'DS0017' dated 27<sup>th</sup> May and 8<sup>th</sup> December 2015 respectively,

Having regard to the request made by Gamma-Civic Ltd on 21<sup>st</sup> March and restated on 7<sup>th</sup> May 2018,

Having regard to a report of the Executive Director dated 29<sup>th</sup> May 2018,

**I. Request for release from undertaking**

- 1.1 This Decision relates to a request made by Gamma-Civic Ltd on 21<sup>st</sup> March 2018. In a letter addressed to the Commission dated 21<sup>st</sup> March 2018, Gamma-Civic Ltd referred to the undertakings it had previously offered to the Commission and which had been accepted in the form of a decision codenamed CCM/DS/0017 dated 8<sup>th</sup> December 2015.
- 1.2 In particular, Gamma-Civic Ltd requested that it be released from a commitment to source its supply of cement through Kolos Cement Ltd through a competitive process.
- 1.3 Gamma-Civic Ltd explained that the release was necessary to facilitate a strategic partnership, the terms of which would require that it procures cement exclusively from the strategic partner in question.

CCM/DS/0027

- 1.4 After finalizing the said partnership, Gamma-Civic Ltd restated its request to be released from the referred undertaking.
- 1.5 The Executive Director reviewed the request of Gamma-Civic Ltd in light of any anti-competitive effects which could stem from it. Following assessment, the Executive Director reported his findings to the Commissioners on 29<sup>th</sup> May 2018, recommending that the request be accepted.

## II. Determination

- 1.6 Having regard to the request of Gamma-Civic Ltd and the assessment of the Executive Director in his report, the Commission is satisfied, as per section 64(2)(b) of the Act, that there has been a material change in circumstances which warrants that it accepts to release Gamma-Civic Ltd from the referred undertaking.

## III. Decision

### NOW THEREFORE,

For the reasons set out in this Decision, the Commission decides as follows:

- 1) We accept to release Gamma-Civic Ltd, as per section 64(2)(b) of the Act, from the undertaking it offered regarding the sourcing of cement and which was accepted and published in the Commission decision codenamed 'DS0017' on 8<sup>th</sup> December 2015.
- 2) The release will apply only within the scope and duration of the strategic partnership between Gamma-Civic Ltd/Kolos Cement Ltd and WH Investment Pte Ltd, and as long as the former remains independent from LafargeHolcim Ltd.

##### REVIEW OF FINANCIAL PERFORMANCE

###### 1. Introduction

1.1 The interim financial statements of the Bank include Statement of Comprehensive Income, Statement of Financial Position, Statement of Cash Flows and the accompanying notes. This review discusses the Bank's financial statements for the six months ended 30 June 2018, paying particular attention to the strategic and environmental context within which they were achieved.

###### 2. Statement of Comprehensive Income

2.1 Having successfully delivered on the objectives of its first year of implementing IMPACT 2021 and the emergency Countercyclical Trade Liquidity Facility (COTRALF) by 31 December 2017, the Bank began 2018 by prioritising initiatives aimed at promoting and financing Intra Africa trade. During the first six months of the year, significant progress was made in pursuit of this strategic goal especially regarding the organization of the first ever Intra African Trade Fair to be hosted in Cairo in December 2018. Progress has also been made in implementing the Industrialisation and Export Development pillar of the strategy especially around the establishment of Industrial parks and export Export Processing Zones (EPZ) within its member countries. Whilst the general recovery in international prices for most commodities

has been positive for many countries, the rising interest rates have had negative impact on some of the countries with significant foreign debt. The growing protectionism and potential trade wars have also created some market uncertainties.

2.2 It was within this context that the Bank operated for the six months ended June 2018. The financial performance during the period was satisfactory and ahead of budget. Gross revenue increased by US\$ 21 million to levels of US\$ 343 million compared to prior year. This was primarily driven by a significant increase in fee income by 119% while interest and similar income recorded a 2% growth compared to prior year performance notwithstanding the decline in average loan balances. Interest and similar income increased despite the winding down of the Bank's 2-year Countercyclical Trade Liquidity Facility (COTRALF) programme, which led to a reduction in loans and advances which closed the period at US\$8.8 billion (2017: US\$10.5 billion). Interest and similar expenses increased by 12% compared to prior year in line with expectation given the rising interest rate environment. Consequently, operating income grew by 3% compared to prior period to reach US\$ 199.9 million (2017: US\$194.2 million). The Bank maintained operating expense growth within budget during the period under review despite the implementation of planned increase in human resources in order to support the execution of the current five year strategic plan.

2.3 Attributable earnings achieved by the Bank over the six months amounted to US\$ 110 million. While 6% lower than prior year performance of US\$117 million, the performance was well ahead of budget by 34%.

The decline against prior year was mainly due to fair value losses amounting to US\$ 15 million arising from derivative instruments held for interest rate risk management purposes. The losses arose due to the impact of the rising interest rate environment. The interest rate swaps transforms the interest rate profile of the Bank's borrowings from fixed to floating in order to match the interest rate risk profile of the loan assets which is floating. As a result, the incurred fair value loss is adequately being compensated given that the majority of the loan book is priced at floating rate, thus any rise in market interest rates positively impacts the interest income. In addition, Management has put in place measures to cap these fair value losses going forward.

2.4 Despite the slight decline in net income on year-on-year basis, on the back of fair value loss from risk management derivatives, the key profitability ratios were well above budget with the return on the Bank's average shareholders' equity (ROAE) at 10% (Budget: 8.08% and 2017: 13.9%) and return on the Bank's average assets (ROAA) at 1.88% (Budget : 1.57% and 2017: 1.82%) as at 30 June 2018. In line with the additional equity raised during the first six months and last quarter of 2017, Basic Earnings per share (EPS) decreased from US\$ 3,091 in 2017 to US\$ 2,283 in 2018.

2.5 In line with the Bank's Capital management policy targets, the Bank's Capital Adequacy Ratio stood at a strong position of 25% (Budget : 23% and 2017: 24%), an improvement from prior year due to additional capital injection from both existing and new shareholders. A significant amount of slightly under US\$300 million was raised during the last quarter of 2017 from the issuance of Depository receipts backed by the Bank's class D shares. In addition an amount of about US\$ 78 million was also raised from other equity source between the last quarter of 2017 and end June 2018. As a result, the Bank's equity levels improved providing additional capacity for future business growth in line with the Bank's developmental agenda. A further detailed analysis of the Statement of Comprehensive Income is presented below.

#### **Net Interest Income and Margin**

2.6 The Bank achieved a 2% growth in interest and similar income at US\$314.81 million (2017: US\$308.85 million) on the back of increase in interest income from better priced loans and advances following the repayment of a large proportion of its related low priced cash-backed COTRALF. Interest income from money market investments reaching US\$15.2 million mainly due to significant growth in the average outstanding cash balance by 96% as well as increase in average yield on these placements. Interest and similar expense increased by around 12% to close the period at US\$139.27 million (2017: US\$124.82 million) despite interest bearing liabilities declining to US\$8.42 billion (2017: US\$12.12 billion). There are two factors explaining the increase in interest expense, firstly in 2017 the Central Bank Deposit Programme (CENDEP) constituted over 40% while 2018 it constituted 17% of interest bearing liabilities thus significantly reducing interest expense and secondly 3 month Libor increased from 0.99% in January 2017 to 2.31% by June 2018 amid the general rising interest rate environment.

2.7 The Bank's net interest margin was up at 3.17% per annum in 2018, an increase from prior year performance of 3.01% per annum mainly due to improvement in average pricing of the loan portfolio arising from the repayment of COTRALF facilities which constituted a significant portion of the loan portfolio in 2017 and attracted lower margins given the high cash collaterals which were held under these facilities.

#### **Non-Interest Income**

2.8 (2017 :US\$ 8.57million) given higher volumes of advisory mandates which were completed in 2018 compared to 2017. The achieved results reflected the benefits of the re-organisation carried out by the Bank which saw the resourcing of the Advisory and Capital Markets department and Trade services unit in line with the current 5 year strategic plan to boost non-funded income.

#### **Operating Expenses**

2.9 Operating expenses increased by US\$ 12.23 million in 2018 compared to 2017 mainly due to increase in general and administrative expenses by US\$ 7.73million to support the various strategic initiatives being pursued by the Bank in line with the Bank's mandate. In addition, the significant planned growth in professional staff recruitment which raised staff costs by US\$ 3.99 million also contributed to the reported growth in operating expenses. The Bank's results reflected better effective cost controls and operating efficiency evidenced by the cost to income ratio of 20% which is well below the strategic plan target.

#### **Allowance for Impairment on Loans and Advances**

2.10 The allowance for impairment on Loans and Advances decreased by US\$ 15.79 million to close the period at US\$ 31.95 million (2017 :US\$ 47.74 million) on the back of lower facilities experiencing repayment difficulties by US\$31 million. On the other hand Collective impairment increased, however by US\$15.4 million mainly due to increase in the basis of deriving the Collective impairment value by 30% in anticipation of potential impact of adoption of International Financial Reporting Standard (IFRS) 9 -"Financial Instruments". To this effect, the Bank is currently working on the implementation of IFRS 9 adoption and has not been able to reflect the full transitional adjustments for IFRS 9 in the reported results as the project was still ongoing. However Management expects that the impact would be limited to the off balance sheet exposures due to the short term nature of the trade finance loan portfolio and high collateral levels. The Bank's asset quality was within acceptable levels as reflected in the non-performing loans (NPL) ratio of 2.36% (2017 : 2.26%), a result of robust and effective credit risk management policies. The NPL ratio increased slightly from prior year despite the reduction in gross non performing loans by 12% (US\$30 million) due to a 16% (US\$1.7bn) decline in gross outstanding loans. The provisions coverage ratio was satisfactory and well above the 100% minimum threshold at 149% (2017 : 130%).

#### **3. Statement of Financial Position**

3.1 The statement of financial position shows the position of the Bank's assets and liabilities as well as its Net worth or Shareholders funds at the reporting date. A detailed discussion of assets and liabilities with respect to the period ended 30 June 2018 is presented hereunder.

**Assets**

3.2 In line with expectation, the Bank's total assets declined by 18% from US\$14.06 billion as at 30 June 2017 to US\$11.52 billion as at 30 June 2018 mainly due to the winding down of the Bank's 2-year Countercyclical Trade Liquidity Facility (COTRALF) programme which saw net loans and advances balance reduce by 17% from levels of US\$ 10.5 billion to US\$ 8.8 billion as at 30 June 2018. The Bank expects to continue to grow the loan book to over \$10 billion in the second half of the year in line with its strategic and business plans. Loans and advances balance accounted for 76% (2017: 75 %) of total assets while cash and due from banks assets constituted 20% (2017: 23%) of total assets. The Bank has the liquidity necessary to fund the planned disbursements in the 3rd and 4th quarters of the year when loan demands are usually at their peak.

**Liabilities**

3.3 Total liabilities of the Bank stood at US\$ 9.21 billion (2017: US\$ 12.31 billion) as at 30 June 2018, a decrease of 25% mainly due to 68% decline in customers deposit accounts as cash collaterals backing certain loans reduced as the loans were repaid. The borrowing balance rose by 3% from US\$ 7.21 billion in 2017 to US\$ 7.42 billion in 2018 which was necessary to inject liquidity to support expected business growth. Total borrowings accounted for about 81% (2017: 59%) of total liabilities while customer deposits and balances accounted for about 17% (2017: 40%) of total liabilities.

**Shareholders' Funds**

3.4 The Bank's shareholders' funds grew by 32% to close the period at US\$2.31 billion (2017: US\$1.75 billion) primarily driven by capital injections in line with the strategic plan to raise capital to sustain planned business growth. In addition, the Bank also generated internal capital arising from higher profitability which contributed to the increase in the Bank's net worth. The Bank's callable capital which has been significantly credit enhanced as part of the Bank's capital management strategy amounted to US\$ 771.79 million (2017: US\$ 568.63 million) as at 30 June 2018.

**4. Conclusion**

4.1 Management is pleased with the results achieved for the first half of the year and which are in line with expectation. In general, all the key performance metrics were in line with budget and strategic plan targets. The results buttressed the healthy financial standing of the Bank reflected in reported earnings growth, satisfactory profitability levels, high asset quality, solid liquidity and capital levels to support both existing and future business volumes. Expectations are that the Bank will grow the Attributable Income in the second half of the year to meet full year targets whilst maintaining a sustainable balance between a strong capital base, business growth and profitability to deliver sustainable returns to its shareholders.

**NET ASSET VALUE ("NAV")**

The NAV per share at 30 June 2018 was US\$47,243 (2017: US\$46,127).

**DIVIDENDS**

The shareholders approved a dividend appropriation amounting to US\$57,534,000 from the 2017 financial year profit, at the Annual General Meeting held in July 2018. The dividend appropriation equal to 5% dividend yield on fully paid shares. The June 2018 financial statements do not reflect the dividend payable, which will be accounted for in equity as an appropriation of retained earnings in the 3rd quarter of 2018 after the approval obtained in July 2018.
