#### ANNOUNCEMENT OF FIELD POST VACANCY IN THE FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS

**Post title (Post No., Project).**—PROJECT MANAGER P-5 FISHERY SURVEY AND DEVELOPMENT PROJECT, BURUNDI.

**Vacancy Announcement.**—No. 305-F 1-42.

**Date issued.**—10th November, 1969.

**Closing date.**—5th January, 1970.

**Duty station.**—Bujumbura, Burundi.

**Duration.**—Three years.

**Starting date.**—Immediately

**Background information.**—The purpose of the project is to assist the Government in the evaluation of the resource potential of the northern part of Lake Tanganyika and in the development of fisheries in Burundi through research, surveys and advisory services. Of the four countries surrounding Lake Tanganyika, Burundi depends most heavily on fish

production from the lake, fish being practically the only source of animal protein. The per capita consumption is, however, still far below the minimum nutrition requirements. There are three types of fisheries: an inshore fishery by pirogues, an artisanal fishery by catamarans, and a purse-seine fishery. The bulk of the catch consists of two species of small sardine-like fish caught by nets with lights. Although the total fish stocks of the lake would support greatly increased landings, the catch from the heavily-fished Burundi waters has been declining since 1965, resulting in a further deterioration of animal protein supply. Present fishing practices are apparently harmful to the conservation of fish stocks. At the same time, there is much room for improvement in all aspects of the industry.

**Duties.**—To organize and supervise a survey and development programme which will include:—

(a) Evaluation of the fish resources in the northern part of the lake and formulation of proper conservation measures;

(b) Study of the biology of fish species of commercial importance and their environment;

(c) Economic and technical studies of the three types of fisheries and advice on their improvements; and

(d) Study of the conditions preservation, transportation and marketing of the fish caught and advice on their improvements.

**Qualifications.**—(1) Graduation from a recognised university and ten years professional experience in fishery biology or hydrobiology, some of which must have been in a senior supervisory capacity.

(2) A knowledge of stock assessment techniques without necessarily being an expert in this field.

(3) Knowledge of or experience in fishery development work.

**Language.**—Fluency in French is essential, and fluency in English as well would be desirable.

**Emoluments.**—Based on US\$ equivalent, they are payable in the currency of the Duty Station, and, on request, partially in the currency of the Home Station. "Gross salary" represents the amount on which pension contributions and benefits are calculated. "Net Salary" is the amount, normally net of national income tax, payable to the staff member less deductions (e.g., pension contributions, health and life insurance schemes).
