**THE WEST AFRICAN EXAMINATIONS COUNCIL
ANNOUNCEMENT**

MR VINCENT CHUKWUEMEKA IKE
B.A. (LONDON), M.A. (STANFORD)

**ASSUMPTION OF OFFICE AS
REGISTRAR OF W.A.E.C.**

Following his appointment as Registrar by the Council at the 19th Annual Meeting which was held in Monrovia last March, Mr Vincent Chukwuemeka Ike arrived in Accra, Ghana, with his wife, Mrs Adebimpe Ike, and their son, Master Ositadinma Ike, on Thursday, 5th August, 1971, to assume office as the new Registrar of the West African Examinations Council.

Mr Ike formally took over the duties of Registrar of the Council on Friday, 6th August, 1971.

He has succeeded Mr J. A. Cronje, his immediate predecessor, who on his retirement has been appointed Consultant by the Council for a period of twelve months.

Mr Ike brings into his appointment many years of administrative experience, having served as Assistant Registrar at the University College, Ibadan (now University of Ibadan) from January 1957 to October 1960, as Deputy Registrar at the University of Nigeria, Nsukka, from October 1960 to March 1963 and thereafter as Registrar of the University.

After the civil war he was made Chairman of the Planning and Management Committee which was appointed and charged with the responsibilities for the restoration and rehabilitation of the University of Nigeria, Nsukka. He held the chairmanship of this Committee from January to November 1970.

Mr Ike's academic qualifications are B.A. (London) and M.A. (Stanford).

He is an author and has already published two novels—*Toads for Supper* (1965), Harvill Press Ltd. (with paper-back editions by Fontana Collins—1965, 1967, 1970) and *The Naked Gods* (1970), Harvill Press Ltd.

He is also well connected with journalism. He is a Director of the *Daily Times* of Nigeria Ltd., a member of the Editorial Committee, OKIKE (a Nigerian Journal of New Writing), and Editorial Adviser, *The Nigerian Christian* (a monthly newspaper of the Christian Council of Nigeria).

Mr Ike is very widely travelled.

CORPORATIONS STANDING TENDERS BOARD

TENDER FOR MAINTENANCE
DREDGING OF NIGERIAN WATERS

NIGERIAN PORTS AUTHORITY

Tenders are invited from suitably qualified Dredging Contractors for the maintenance dredging of the following Nigerian Ports and Rivers:—

(a) *Lagos Port.*—The main channel is approximately 6 miles long and 600 ft. wide and Customs (Lagos) channel about 1½ miles. In all about 7½ miles of dredged channel, with depth of 30 ft. M.L.W.S. all within the Breakwaters in sheltered water an area of 2½ cables lies outside the breakwaters, with a minimum depth of 25 feet over approximately half the area.

(b) *Escravos River and Warri Port.*—The entrance channel is approximately 5½ miles in length and 600 feet in width. It was dredged to a depth of 21 ft. M.L.W.S. Siltation has occurred and it is now at a mean depth of 17 ft. with a minimum depth of 13 ft. 2½ miles of the channel are outside the Breakwaters.

Warri is 46 miles from the Escravos. Dredging is required at two points in Charomi Creek. At Rugged Point and Harvey Creek with a total length of three miles. In Warri River at Bennett Island with a total length of 4½ miles. The dredged area of the Port of Warri is 0.6 miles in length, depths alongside the berths of 16 ft. have been reported and a least depth of 16 ft. exists in the port area.

(c) *Calabar River and Port.*—A Boundary Committee is presently in consultation to delineate the area of Nigerian and Camerouns territorial waters. A considerable amount of dredging will be required in the Nigerian territorial waters whatever the result of the Commission may be. In the up-river area, dredging will be required in three places with a total length of approximately two miles to a width of 600 ft., and a depth of 19 feet M.L.W.S.

(d) *Bonny Bar River and Port Harcourt.*—Bonny Bar Channel is the dredged channel for the Bonny Oil Terminal. The channel is approximately eight and half miles in length. It is dredged to a depth of thirty-eight feet M.L.W.S. and is six hundred and fifty feet wide. The side slopes are thirteen hundred feet wide with a minimum stability of one in forty. The river is dredged to a depth of thirty feet M.L.W.S. from Bonny to Okrika Refinery with a width of six hundred feet. Okrika is sixteen miles from Bonny. From Okrika to Port Harcourt the channel which is twelve miles in length is dredged to a depth of twenty-six feet M.L.W.S. with a width of six hundred feet. There are two isolated rocks in this channel with a depth of 19 feet over them which have to be deepened to 26 feet. The Port area of Port Harcourt is dredged to twenty-six feet M.L.W.S.

2. Charts of the areas to be dredged will be obtained from the Chief Harbour Master, Nigerian Ports Authority, P.M.B. 12588, 26/28 Marina, Lagos, at a cost of £N1 per chart.

3. It is anticipated that the Contract will be for a period of two years. A firm date for completion of each project must be given before the commencement of the Contract.

Government Notice No. 1462

UNESCO VACANCY

SPECIAL FUND APPOINTMENT

1. *Title of Post.*—Expert in Biochemistry.

2. *Location.*—Faculty of Science, University of Islamabad, Pakistan.

3. *Background.*—Pakistan, with more than 100 million population, and a rather rapid recent growth in industrial enterprises, has given much attention to development of technical and science education, particularly at the technician and undergraduate college and university levels. There are eleven universities, including three in engineering and two in agriculture, 200 Arts and Science degree colleges, 50 professional schools, 128 teacher-training schools and 18 teacher-training colleges. The total number of students is approximately 25,000 in the universities, 300,000 in the colleges and 30,000 in teacher-training institutions.

At the university graduate level, however, only relatively few programmes have been developed, particularly in science and engineering, with the result that hundreds of Pakistanis now go abroad for advanced studies and many do not return. In 1966, there were 3,000 students enrolled in graduate courses in science in Pakistani Universities.

Pakistan has a rather extensive pattern of research institutes which, in all, require the services of some 10,000 scientists with high qualifications. The Pakistan Council for Scientific and Industrial Research and the Pakistan Atomic Energy Commission employ 700 and 500 scientists respectively in various laboratories in East and West Pakistan.

Twelve other Research Councils and Institutes have been established covering fields of agriculture, medicine, health, irrigation and flood control, housing meteorology, forestry, jute, cotton and other fields.

The need for scientific personnel mentioned above and the further need for improvement of science teaching faculties at all levels, coupled with the difficulty of congregating a sufficiently large number of high-level scientists at one institution led the Government of Pakistan to establish in 1966 the University of Islamabad as an autonomous university devoted entirely to science education and research at the graduate level. It is planned by this means to attract the best Pakistani scholars in the country or abroad to form a high-level group of scientists who can establish a graduate university in science equal to any other in the world. It is also hoped to reverse the 'brain drain' of Pakistani scholars emigrating abroad. Some thirty talented scholars have already returned to take up posts and more are under recruitment.

A site of 1,500 acres near Islamabad was acquired, building plans approved and construction began in 1968. As an interim measure temporary buildings in Satellite Town, between Islamabad and Rawalpindi, have been utilized to initiate an instruction programme which began in 1967. Courses in mathematics, theoretical physics and chemistry are given, which started in 1968-69.

From its inception, the University has had counsel and assistance from the Ford Foundation and anticipates continued assistance for the next several years.

To further develop and equip the University, the Government has requested the assistance of the UNDP (Special Fund).

The request of the Government anticipates a first phase of the project for a duration of three years, to be followed by a second phase which will be elaborated at a later date.

The objective of the project is to reinforce the science teaching and research staff in those areas of specialization where fully qualified national staff is not available, to provide further training of national staff and to better equip laboratories for teaching and research.

When fully developed, the University will be composed of six Institutes, namely mathematics, physics, chemistry, biology, earth sciences and social sciences and will be devoted entirely to post-graduate education and research, offering work toward M.Sc., M.Phil. and Ph.D. degrees and post-doctoral research. It is expected that about 50 sciences graduates from other universities will be admitted annually to each Institute. Since work leading to the Ph.D. is expected to require five or six years, depending upon previous preparation, the enrolment in each Institute is estimated to reach 150 in 1975 and 250-300 in 1980.

The UNDP (Special Fund) is requested to supply 16 internationally recruited visiting professors in different specialties for one year each, a number of fellowships of 2 years duration for further training of national staff, equipment for laboratories in physics, chemistry, biology, earth sciences and workshop, and library books, journals and documents for a total amounting to approximately 1.5 million US dollars. Major laboratory equipment items would include a liquid nitrogen plant, mass spectrometer, nuclear magnetic resonance unit, electronic spin resonance

equipment, high vacuum equipment, electronic infrared and ultraviolet spectrometer, X-Ray densitometers, oscilloscopes, equipment for silicon planar technology, etc.

4. *Functions.*—The expert will be expected to participate in all the academic activities appropriate of an institution of higher learning where special emphasis is laid on promoting research in the field of Biochemistry. He should be a specialist in one or more of the following areas: Macromolecular Structure, Intermediary Metabolism, Immunology, Chemistry, Molecular Biology, Photosynthesis, Analytical Biochemistry; Specifically, he should

(a) advise on the installation of laboratories and the purchase of equipment and books;

(b) assist in the development of the department within the university;

(c) provide instruction in biochemistry;

(d) conduct seminars and colloquia;

(e) assist in selecting candidates for the fellowships provided by Unesco;

(f) guide doctoral candidates in their research work.

5. *Qualifications.*—A high university degree; several years' experience in teaching and organizing research as a professor in a recognized university. Some experience in a newly established university or in a developing country would be an asset.

6. *Language requirements.*—Excellent English essential.

7. *Duration of appointment.*—One year, starting September 1972.

8. *International salary and allowances.*—(Net of national income tax—payable partly in the currency of the staff member's home or of the duty station).

Base salary per annum			
equivalent to	Gross	\$22,700	
	Net	\$16,555	
Post adjustment (cost of living, subject to change without notice) at this date: the local equivalent of (\$1,896 if without dependants)		\$2,844	
Assignment allowance (expatriate allowance): the local equivalent of (\$1,100 if without dependants)		\$1,400	
Family allowances dependent spouse		\$400	
each dependent child		\$300	

Travel is provided for the expert and his dependants (spouse and children under 18 years of age). In addition, Unesco contributes towards the cost of installation at the duty station, the education of dependent children, and the medical expenses of the staff member. On separation from Unesco, a repatriation grant is paid.

The present staff of the Department of Chemistry consist of about 15 Pakistanis in the fields of Physical, Organic and Inorganic Chemistry, who have their degrees from abroad as well as post-doctoral research experience. Until the new laboratories are completed, research can be carried out in space provided by the National Health Laboratories in Islamabad. In 1970-71 academic year, Chemistry had 40 students, but this number will increase in the future gradually up to about 100. The two buildings for the Chemistry will be ready for occupation in 1972. Mathematics and Physics are already working and Biology will start soon. Computer will be available from late 1971.

9. *Method of application.*—Applications have to be made on special Curriculum Vitae Forms, which can be obtained, in person or by post, from the Secretary, Nigerian National Commission for Unesco, Federal Ministry of Education, Senate Buildings, Lagos.

All applications for Curriculum Vitae Forms should state:

(a) the particular advertisement for which the forms are wanted,

(b) very brief (2 or 3 lines) summary of applicant's qualifications for the post in terms of:—

(i) basic academic or professional qualifications;

(ii) number of years post-qualification experience;

(iii) Languages spoken.

Please, enclose a stamped addressed envelope (4" x 9").

Pakistan has a rather extensive pattern of research institutes which, in all, require the services of some 10,000 scientists with high qualifications. The Pakistan Council for Scientific and Industrial Research and the Pakistan Atomic Energy Commission employ 700 and 500 scientists respectively in various laboratories in East and West Pakistan. Twelve other Research Councils and Institutes have been established covering fields of agriculture, medicine, health, irrigation and flood control, housing meteorology, forestry, jute, cotton and other fields.

The need for scientific personnel mentioned above and the further need for improvement of science teaching faculties at all levels, coupled with the

difficulty of congregating a sufficiently large number of high-level scientists at one institution led the Government of Pakistan to establish in 1966 the University of Islamabad as an autonomous university devoted entirely to science education and research at the graduate level. It is planned by this means to attract the best Pakistani scholars in the country or abroad to form a high-level group of scientists who can establish a graduate university in science equal to any other in the world. It is also hoped to reverse the 'brain drain' of Pakistani scholars emigrating abroad. Some thirty talented scholars have already returned to take up posts and more are under recruitment.

A site of 1,500 acres near Islamabad was acquired, building plans approved and construction began in 1968. As an interim measure temporary buildings in Satellite Town, between Islamabad and Rawalpindi, have been utilized to initiate an instruction programme which began in 1967. Courses in mathematics, theoretical physics and chemistry are given, which started in 1968-69.

From its inception, the University has had counsel and assistance from the Ford Foundation and anticipates continued assistance for the next several years.

To further develop and equip the University, the Government has requested the assistance of the UNDP (Special Fund).

The request of the Government anticipates a first phase of the project for a duration of three years, to be followed by a second phase which will be elaborated at a later date.

The objective of the project is to reinforce the science teaching and research staff in those areas of specialization where fully qualified national staff is not available, to provide further training of national staff and to better equip laboratories for teaching and research.

When fully developed, the University will be composed of six Institutes, namely mathematics, physics, chemistry, biology, earth sciences and social sciences and will be devoted entirely to post-graduate education and research, offering work toward M.Sc., M.Phil. and Ph.D. degrees and post-doctoral research. It is expected that about 50 sciences graduates from other universities will be admitted annually to each Institute. Since work leading to the Ph.D. is expected to require five or six years, depending upon previous preparation, the enrolment in each Institute is estimated to reach 150 in 1975 and 250-300 in 1980.

The UNDP (Special Fund) is requested to supply 16 internationally recruited visiting professors in different specialities for one year each, a number of fellowships of two years duration for further training of national staff, equipment for laboratories in physics, chemistry, biology, earth sciences and workshop, and library books, journals and documents for a total amounting to approximately 1.5 million US dollars. Major laboratory equipment items would include a liquid nitrogen plant, mass spectrometer, nuclear magnetic resonance unit, electronic spin resonance equipment, high vacuum equipment, electronic infrared and ultraviolet spectrometer, X-ray densitometers, oscilloscopes, equipment for silicon planar technology, etc.

4. *Functions.*—The holder of this post will be expected to participate in all the academic activities of an institution of higher learning where special

emphasis is laid on promoting research in the field of Probability and Mathematical Statistics. He should be a specialist in his field and will be expected to:

- provide instruction at an introductory level in probability and mathematical statistics;
- give advanced lectures and courses in his field for the post-graduate students working towards doctoral degrees;
- conduct seminars and colloquia on specialised topics in his field;
- guide doctoral candidates in the research work;
- assist in the development of the department within the university;
- assist in selecting candidates for the fellowships provided by Unesco.

5. *Qualifications.*—A high university degree; several years' experience in teaching and organizing research as a professor in a recognized university. Some experience in a newly established university or in a developing country would be an asset.

6. *Language qualifications.*—Excellent English essential.

7. *Duration of appointment.*—One year, starting September 1972.

8. *International salary and allowances.*—(Net of national income tax—payable partly in the currency of the staff member's home or of the duty station):

Base salary per annum:			
equivalent to	Gross	\$22,700	
	Net	\$16,555	
Post adjustment (cost of living, subject to change without notice) at this date: the local equivalent of (\$1,896 if without dependants)		\$2,844	
Assignment allowance (expatriate allowance): the local equivalent of (\$1,100 if without dependants)		\$1,400	
Family allowances:			
dependent spouse		\$400	
each dependent child		\$300	

Travel is provided for the expert and his dependants (spouse and children under 18 years of age). In addition, Unesco contributes towards the cost

of installation at the duty station, the education of dependent children, and the medical expenses of the staff member. On separation from Unesco, a repatriation grant is paid.

The Institute of Mathematics of this University offers courses at the M.Sc. and post-graduate levels with a view to prepare the candidates for the Ph.D. programme in different fields of pure and applied mathematics and statistics. The University has nine teachers of whom three are abroad. Some more teachers are expected to join the University in the next academic year. There are three Ph.D. candidates working in statistics and applied mathematics. Two of these candidates are expected to finish their work this year. During 1970-71 there are 36 students studying mathematics. This number is expected to increase to 75 in the 1971-72 academic year.

The University Library is reasonably well equipped in books dealing with recent trends and advances in statistics. There is also a regular supply of 70 research journals of international repute. Computing and Data Processing facilities will be available.

9. *Method of application.*—Applications have to be made on special Curriculum Vitae Forms, which can be obtained, in person or by post, from the Secretary, Nigerian National Commission for Unesco, Federal Ministry of Education, Senate Buildings, Lagos.

All applications for Curriculum Vitae form, should state:

- the particular advertisement for which the forms are wanted;
- very brief (two or three lines) summary of applicant's qualifications for the post in terms of:
 - basic academic or professional qualifications;
 - number of years post-qualification experience;
 - languages spoken.

Please enclose a stamped addressed envelope (4" x 9").

Closing date.—Filled C.V. forms should be returned to reach the Secretary, Nigerian National Commission for Unesco, not later than 11th October, 1971.
