#### "STRENGTHENING OF THE NATIONAL METEOROLOGICAL SERVICE"

The purpose of the project is to assist the government in expanding its meteorological and seismological observation network, modernizing obsolete equipment, improving data processing and applied research and providing advanced training for national technical personnel.

The "Sous-Direction de la Meteorologie nationale" of Tunisia, in the "Ministere des Travaux publics et de l'Habitat" is responsible for meeting the national requirements for meteorological data, as well as for ensuring the country's full participation in international meteorological activities. It is also responsible for geophysics activities, including seismology. In the field of hydrometeorology, the "Sous-Direction" operates in co-operation with the Water Resources Division in the Ministry of Agriculture.

To ensure that the "Sous-Direction" is in a position to fulfil its responsibilities in these fields, the existing observation network, which consists of twelve synoptic stations, twenty-two stations equipped

for agrometeorological data collection, 107 with climatological and 497 with pluviometric equipment, will have to be expanded; equipment will have to be updated and supplemented; hydrometeorological equipment which was destroyed in recent floods must be replaced and a continuous seismological observation will have to be instituted.

By providing the means for improving the quality and quantity of data obtained and assuring its distribution to government agencies, private enterprises and individuals which require it, this project is expected to result in:

(a) Better planning and execution of agricultural and water resources development projects;

(b) Selection of regions and seasons most appropriate for the expansion of tourism;

(c) Progress in solving the special development problems posed by the desertic southern region, and the gradual spread of the desert into the central zone;

(d) Improved fishing, particularly in the Sousse region; and

(e) Reduction of loss of life, property and crops caused by floods, earthquakes and hailstorms.
