**Vacancy announcement.—**No. AGO/AGL/347.

**Date issued.—**27th October, 1975.

**Closing date.—**22nd December, 1975.

**Duty station.—**TOCKLAI, INDIA.

**Duration.—**24 months.

**Starting date.—**As soon as possible.

**Background.—**With 450 million kg. annual production, India is the biggest producer of tea in the world. She is leading in export and has the largest home market. Surveys carried out in the past have shown that drainage can be a major constraint for increased productivity under North-East Indian conditions. Though the adverse effects of waterlogging in tea have been known for many years the extent to which inadequate drainage systems are responsible for low yields has only recently been fully appreciated.

**Duties.—**The Agricultural Drainage Expert should have wide experience in initiating and supervising research in field and laboratory on drainage and some experience in soil erosion. He will organise the project in collaboration with the local staff, and give his recommendations on the basis of the results of investigations on:—

(i) Drainage model studies under controlled conditions;

(ii) Studies on a limited scale (one or two project areas), under actual field conditions;

(iii) Correlation of data observed under (ii) and that of (i);

(iv) Determine parameters like depth, cross section, area and spacing of drains;

(v) Elaboration of a drainage monograph for tea areas. The monograph if possible should indicate cost/benefit as aspects, i.e. an indication of the probable increase in output from recommended drainage practices.

**Qualifications.—**University degree in Engineering or Agricultural Drainage.

**Experience.—**Minimum seven years' experience in agricultural drainage.

**Language.—**Very good knowledge of English.
