Government Notice No. 586

ANNOUNCEMENT OF FIELD POST VACANCY IN THE
FOOD AND AGRICULTURE ORGANIZATION
OF THE UNITED NATIONS

Post title (Post No., Project).—PLANT PHYSIOLOGIST "Jute Seed, Research and Production"—BGD/74/018.

Vacancy announcement.—No. AGO/AGP/435.

Date issued.—12th April, 1977.

Closing date.—7th June, 1977.

Duty station.—Dacca, Bangladesh.

Duration.—12 months (extendible).

Starting date.—As soon as possible.

Background.—Jute plays an important role in both the internal and external economy of Bangladesh. It is the second most important crop after rice. From 1966 to 1973, jute was planted on an average of about 2.2 million acres out of a total of 22.4 million acres of cultivated land in the country. The first Five-Year Plan (1973-4/1977-8) puts particular emphasis on the expansion of jute production. It adopts a strategy of increasing per acre yield of jute and reducing cost per unit of product while keeping the jute acreage stable at 2.2 million acres and as a corollary to the Government's strategy by using the remaining acres to achieve self-sufficiency in rice. The target in jute production is hoped to be achieved by bringing 1.7 million acres of the better land under the Intensive Jute Cultivation Scheme (IJCS) of the Ministry of Agriculture, whereby these areas will receive a package on inputs including improved seeds, chemical fertilizer, improved cultural practices and plant protection.

World consumption of jute and jute products is expected to increase annually by one per cent up to 1980 with most of the demand growth taking place in developing countries in Asia. The demand for jute is expected to decline in developed countries, particularly in Western Europe. There is little possibility in the near future for Bangladesh to find other export commodities to replace jute and jute products.

ASDB have approved technical assistance to this project as a joint ASDB/FAO activity, to the amount of US \$9.5 million. UNDP financing has been sought to provide assistance in the fields of jute research and farm development and management. The UNDP project will complement the ASDB loan and is aimed at increasing jute yield per acre and raising the quality of jute in order to obtain a higher return from jute and to leave more acreage available for rice production. It will strengthen all aspects of jute production research in Bangladesh, develop a high yielding good quality jute variety with added desirable characters such as pest and disease resistance and a short growing season, assist in farm development at the central research station and sub-stations and provide fellowships for jute research staff in the various disciplines of jute production.

Duties.—Under the supervision of the Project Manager, the incumbent will:

1. Assist the Director of Research of the Bangladesh Jute Research Institute (BJRI) in reinforcing the Physiology Department of the Institute and in strengthening national expertise.

2. Advise the Director of Research and initiate physiological studies that could help breeders to develop more efficient jute plants.

3. Undertake studies on photosynthesis and flowering, uptake and translocation of nutrients and metabolites, salinity resistance, resistance to drought and waterlogged conditions, seed viability.

4. Advise the Director of Research on the type and location of overseas training for BJRI candidates.

Qualifications.—Post-graduate degree in plant physiology.

Experience.—Seven years in plant physiology research with special reference to greenhouse techniques, photosynthesis, nutrient translocation, isotope seed viability, etc.

Language.—Full working knowledge of English required.

Emoluments.—Salaries and benefits are liberal, commensurate with the responsibilities of the post and in line with the depth and breadth of training and experience.

Candidates may be requested to provide satisfactory evidence of educational qualifications shown in their application. Appointments to vacant positions may depend upon the candidate selected providing such evidence for inclusion in his/her official personal file.

Method of application.—Applications to reach the Manpower Planning Unit, AGOX FAO, via delle Terme di Caracalla, 00100-Rome, Italy, by 7th June, 1977. Quote: AGO/AGP/435.
