CONSUMER PRICE INDEX FOR MINeworkERS—2ND QUARTER, 1977

The Consumer Price Index for 2nd Quarter, 1977 for mineworkers of the Diamond Mining Areas, Yengema and Tongo Field was 195.8 as compared with 199.3 for 1st Quarter, 1977. This shows a decrease of 3.5 points or 1.8 per cent over the previous quarter.

The most important decreases among the major group items were for "Food and Drinks" and "Housing". The former decreased by 15.5 points or 6.7 per cent while the latter decreased by 7.1 points or 3.5 per cent over the previous quarter. The index (1961=100) indicates the average movement of retail prices of selected items known as "market basket". This market basket represents the purchases of the low income earning African families in the mining areas of Marampa, Yengema and Tongo Field. The temporary closure of the S.L.D.C. Mines at Marampa has however made it impossible for the compilation of indices for that area. Separate indices are computed for the Diamond Mining Areas (Yengema and Tongo Field combined). These are combined into a single index weighted in proportion to the number of workers employed in each area.

Food and Drinks—The index for this group fell by 15.3 points or 6.7 per cent over the last quarter. It should be noted that this index group had not experienced a drop since the 4th quarter, 1975. The decrease this quarter was mainly due to seasonal factors. There were price decreases for palm oil, tinned tomato puree, cassava, onions, potato and cassava leaves. This is a continuation of the trend experienced last quarter. There were however price increases for beef, tinned sardines, tinned milk, small pepper, rice, sugar and coffee. The average price of palm wine was constant.

Housing—The housing index decreased by 7.1 points or 3.5 per cent over the previous quarter. Such a decrease was last experienced during 2nd quarter, 1973. Among the items that had a price decrease were glass tumblers, kettles (buckets) and firewood. There was a small price increase for torch light batteries while the prices of most of the items in this index group remained constant.

Clothing—There was a price increase of 13.4 points or 7.3 per cent compared with the previous quarter. The Clothing index and the Miscellaneous group index were the only 2 indices that experienced a price increase during this quarter. Towel (cotton), shirting, ladies slippers, men's sleeveless vests, men's sandals and tailoring charges were some of the items that accounted for this increase. Two items that remained constant were women's lappas and men's cotton shirts.

Miscellaneous—There was an increase of 2.9 points or 1.9 per cent over the last quarter. Personal care items were responsible for this price increase. Most items remained constant among which were cough and headache medicines.
