Delegation of Governing Bodies

22. The governing body of a transport authority may delegate any of its powers or functions in terms of this Act, except the power of governance contemplated in section 13 and the power conferred by this section, to any member of that governing body.

Provisions Applicable to Delegations

- 23. (1)** A delegation by the governing body under section 22:
- (a) may be made subject to any conditions determined by the governing body;
 - (b) may be given together with the power to sub-delegate, subject to any conditions so determined; and

CHAPTER 10

TRANSPORT PLANNING

General principles for transport planning, and its relationship with land development

24. (1) Land transport planning must be integrated with the land development process, and the transport plans required for that purpose by this Act are designed to give structure to the function of municipal planning mentioned in Part B of Schedule 4 of the Constitution, and must be accommodated in and form an essential part of integrated development plans,

with due regard to section 84(1)(a), 84(2) and 84(3) of the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998), and for this purpose:

- (a) where the relevant planning authority is a municipality contemplated in section 26(1)(c), the plans mentioned in paragraphs (b) to (f) of subsection (1) of section 25 must form the transport component of the integrated development plan of the municipality; and
- (b) where the jurisdictional area of a municipality falls wholly or partly in a transport area or Metropolitan Transport Area, the plans mentioned in paragraphs (b) to (f) of subsection (1) of section 25 constitute the transport component of the integrated development plans of such municipality in respect of that part of its jurisdictional areas that falls within the transport area or metropolitan transport area.

(2) Subject to this section, land transport planning must be carried out so as to cover both public and private transport and all the modes of land transport relevant in the area concerned, and must focus on the most effective and economic way of moving from one point to another in the system.

- (3) Transport plans must be developed so as to:
 - (a) enhance the effective functioning of cities, towns and rural areas through integrated planning of transport infrastructure and facilities, transport operations including freight movement, bulk services and public transport services within the context of those integrated development plans in terms of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000);
 - (b) direct employment opportunities and activities, mixed land uses and high density residential development into high utilisation public transport corridors interconnected through development nodes within the corridors, and

discourage urban sprawl where public transport services are inadequate;

- (c) give priority to infilling and densification along public transport corridors;
- (d) give higher priority to public transport than private transport by ensuring the provision of adequate public transport services and applying travel demand management measures to discourage private transport;
- (e) enhance accessibility to public transport services and facilities, and transport functionality in the case of persons with disabilities; and
- (f) minimise adverse impacts on the environment.

(4) Transport planning must be viewed as a continuous process by which core cities and transport authorities professionally develop and implement integrated public transport services for their areas.

(5) A core city and transport authority must, unless clearly inappropriate or not reasonably practical in the circumstances, in preparing any transport plan, ensure co-ordination and integration within and between land transport modes so as to optimise the accessibility and utilisation of public transport services, facilities and infrastructure.

(6) The MEC must ensure the co-ordination of the planning processes of all core cities and transport authorities under the jurisdiction of the province and, in so doing, must ensure that all plans address:

- (a) public transport services operating across the boundaries of core cities, transport authorities or any particular municipal authority;
- (b) road and rail networks;
- (c) freight movements;
- (d) the needs of special categories of passengers;

- (e) rivalry between neighbouring core cities or transport authorities that may result in the duplication or over-supply of transport facilities and infrastructure in the region; and
- (f) the integration of transport and land use planning within the context of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000), or any other similar provincial law.

Types of Plans Required by this Act

- 25.** (1) The following plans are required for the purposes of this Act:
- (a) provincial land transport frameworks provided for in section 27;
 - (b) current public transport records provided for in section 28;
 - (c) operating licence strategies provided for in section 29;
 - (d) rationalisation plans provided for in section 30;
 - (e) public transport plans provided for in section 31; and
 - (f) integrated transport plans provided for in section 32.
- (2) The relationship and sequence of transport plans are as follows:

- (a) the Department must prepare its initial provincial land transport framework as an overall guide to transport planning within the Province which must be integrated with provincial development planning;
- (b) every transport authority and core city, and every municipality required to do so by the MEC, must prepare a public transport plan which must include-(i) a current public transport record; and
 - (ii) an operating licence strategy; and
 - (iii) if it has subsidised public transport services, a rationalisation plan;

- (c) transport authorities and core cities, and other municipalities requested thereto by the MEC, must prepare an integrated transport plan of which the public transport plan forms a component; and
- (d) the Department must prepare subsequent provincial land transport frameworks that, in addition to the provision of subparagraph (a), must summarise the local plans in the Province.

(3) The provincial land transport framework must include the planning of both intra-provincial and inter-provincial long-distance services, which must be linked where applicable with other public transport services, and may provide for charter services, staff services and tourist services, and in the case of inter-provincial transport, this must be done in consultation with the MEC of the other province concerned.

(4) The planning authority contemplated in section 26 must, by the prescribed date, publish a notice:

- (a) in English and at least one other official language in a newspaper circulating in the area of the planning authority; and
- (b) stating that the plan in question has been completed and is available for public inspection at a place stated in the notice

(5) The MEC may prescribe procedures to be followed in promoting public participation in the transport planning process.

(6) The content of plans mentioned in subsection 25(1)(a) to (f) must comply with the requirements of this Act, but the MEC may modify the requirements for those plans, in the prescribed manner, in relation to rural areas in the Province.

Planning Authorities

26. (1) Plans contemplated in section 25(1)(b) and (c) and, where appropriate, section 25(1)(d), (e) and (f), must be prepared by the following authorities, to be known as planning authorities, subject to subsections (4) and (5), and these plans may be different in respect of rural planning authorities except for those that have subsidised public transport services:

- (a) transport authorities, in respect of their transport areas;
- (b) core cities, in respect of their metropolitan transport areas; and
- (c) other municipalities, not included in the area of jurisdiction of a core city or transport authority and if so requested by the MEC.

- (2) (a) A planning authority may enter into an agreement with any other planning authority or the Department to assist it in performing its functions in terms of this section; and
- (b) Such an agreement does not detract from the responsibility of the planning authority for the functions entrusted to it by this section.

(3) Every planning authority must supply relevant transport plans to the board and make recommendations to that board about the conversion of permits to operating licences, and about applications for new operating licences, as required by Part 9 of the National Land Transport Transition Act.

(4) Where there are substantial public transport services between adjacent transport areas, the MEC is responsible for the effective planning of such services, and must ensure that such services are planned jointly with the respective transport authorities and integrated with their transport plans.

(5) A transport authority may apply to the MEC for it to take over the planning of the services contemplated in subsection (4), and in deciding whether to do so, the MEC must consider:

- (a) the extent to which the services are being operated within the transport area concerned; and

(b) the ability of the transport authority to carry out the responsibilities relating to this function.

(6) In the case of a district municipality as defined in the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998), such a municipality and its relevant local municipalities must agree as to which of them must prepare the plans contemplated in section 25(1)(b) to (f).

Provincial Land Transport Framework

27. (1) The MEC must annually prepare a provincial land transport framework that must be:

- (a) for a five-year period;
- (b) in accordance with any national requirements or, in the absence of such national requirements, in accordance with the format and contents of a provincial land transport framework developed jointly with the relevant core cities and transport authorities in the Province; and
- (c) integrated with provincial development planning.

(2) The initial provincial land transport framework must serve to guide land transport in the Province, including intra-provincial, inter-provincial and cross-border transport and any subsequent provincial land transport frameworks must also include summaries of the local plans within the Province.

(3) The provincial land transport framework must be submitted to the Minister and must be accompanied by copies of all agreements regarding inter-provincial transport concluded between the Province and other provinces.

Current Public Transport Records

28. (1) Every planning authority must as soon as reasonably possible after the commencement of this Act, but by a date to be determined by the MEC, prepare for its area a current public transport record, which must become part of its public transport plan and constitutes the basis for the development of

operating licences strategies, rationalisation plans, public transport plans and integrated transport plans.

(2) The current public transport record must be prepared in accordance with the requirements laid down by the MEC, or by the Minister in terms of his powers under the National Land Transport Transition Act after consultation with the applicable core cities, transport authorities or municipalities.

(3) That public transport record must include:

- (a) all the scheduled and unscheduled services that are operated in the area of the planning authority, and taking into account such services to and from the areas of neighbouring planning authorities;
- (b) all the facilities and infrastructure in place and utilised in the area concerned for the purposes of or in connection with the public transport services mentioned in paragraph (a), as well as the facilities and infrastructure being developed for those purposes within the area concerned.

(4) The current public transport records must be submitted to the MEC by the planning authorities not later than the date determined in subsection (1).

(5) The current public transport records must be updated annually, and in updating it, planning authorities must record changes in the supply of public transport services with regard to their respective areas, including the granting and issuing of operating licences and the amendment, transfer, suspension, lapsing, withdrawal and cancellation of operating licenses or permits by the board.

Operating Licence Strategies

29. (1) A planning authority must prepare a plan known as an operating licences strategy, which must eventually form part of its public transport plan, to assist the board when disposing of applications regarding

operating licences to achieve a balance between public transport supply and utilisation that is both effective and efficient.

(2) An operating licences strategy must set out the policy and strategies of the planning authority in relation to:

- (a) the role of each public transport mode and identification of the preferred road-based modes with regard to its area, including transport into or from the areas of other planning authorities, and inter-provincial transport;
- (b) the circumstances in which operating licences or permits authorising the operation of public transport within any part of its area, should be allowed;
- (c) the use of public transport facilities within its area;
- (d) the avoidance of wasteful competition between transport operators;
- (e) the conclusion of commercial service contracts for unsubsidised public transport services; and
- (f) the conditions that should be imposed by the board in respect of operating licences.

(3) Operating licences strategies must be in accordance with the prescribed requirements.

- (4) (a) The operating license strategy must, subject to paragraph (b), be submitted to the MEC for approval; and
- (b) in granting such approval the MEC must consider procedures, financial issues that affect the Province, provincial policy and principles, transport across the boundaries of the areas of planning authorities, inter-provincial transport and other matters provided for in provincial laws.

(5) In the absence of a public transport plan, a planning authority must ensure that its operating licences strategy is updated on a continuous basis and consolidated at least once a year within two months of completing its current

public transport record, or by a date determined by the MEC by notice in the Provincial Gazette.

Rationalisation plans

30. (1) If in terms of a subsidised service contract or concession it is proposed that a public transport service be continued after expiry of its current terms, a planning authority in whose area the service is operated must prepare a rationalisation plan, which must:

- (a) become part of its public transport plan;
- (b) be done before the service to be operated in terms of the subsidised service contract is put out to public tender; and
- (c) consider the following-
 - (i) rationalising subsidised services within and between modes;
 - (ii) determining where and to what extent subsidies should be paid;
 - (iii) rationalising subsidised services across the borders of planning authorities and in relation to inter-provincial transport;
 - (iv) minimising the level of subsidy;
 - (v) minimising competition between subsidised services;
 - (vi) structuring subsidised service contracts or concessions in such a way as to attract sufficient competitive bidding by qualifying tenderers;
 - (vii) ensuring that routes and route networks are utilised optimally so as to meet passenger needs effectively and efficiently; and
 - (viii) facilitating the future development of an integrated public transport system.

(2) The rationalisation plan must contain the following:

- (a) The proposed changes to the existing route or network;

- (b) the proposed changes to the passenger-carrying capacity of the services operated on the route or network;
- (c) the policy proposed for the structuring of contracts or concessions for competitive tendering;
- (d) a statement setting out the potential impact of the rationalisation on the various transport modes;
- (e) an indication of the improvements to be effected for the benefit of passengers; and
- (f) an indication of the obstacles foreseen with regard to the implementation of the plan, and the strategies proposed to overcome them.

(3) Rationalisation plans must be in accordance with the requirements the MEC, or by the Minister in terms of his powers under the National Land Transport Transition Act, may prescribe.

(4) Rationalisation plans must be submitted to the MEC for approval, which approval must relate only to the matters mentioned in section 29(4)(b).

(5) In the absence of a public transport plan, a planning authority that has subsidised public transport services must ensure that its rationalisation plan is prepared or updated and submitted to the MEC at least once a year and within four months of completing its current public transport record, or by a date determined by the MEC by notice in the Provincial Gazette.

Public transport plans

31. (1) A planning authority must, by the date determined by the MEC, prepare a public transport plan with a view to determine and specify the public transport services that it requires to have provided in terms of the matters mentioned in section 28(3)(a) and (b).

(2) The public transport plan must be prepared with a view to develop and implement the integration of public transport services and must contain the following:

(3) An integrated transport plan must be in accordance with requirements and in the manner and form the MEC, or the Minister in terms of his powers under the National Land Transport Transition Act, may prescribe.

(4) The plan must be submitted to the MEC for approval, which approval must relate only to the matters mentioned in section 29(4)(b).

(5) A person may not transport hazardous substances contemplated in section 2(1) of the Hazardous Substances Act, 1973 (Act No. 15 of 1973), in the area of a planning authority, except on a route determined under paragraph (h) of subsection (2), where such a route has been determined and published under section 34(1).

(6) Any person who contravenes subsection (5) is guilty of an offence.

Approval of commuter rail components of transport plans

33. Until the function of commuter rail is devolved from the national to another sphere of government, the transport plans contemplated in section 25(1)(a) to (f) must be submitted to the Minister for approval of the commuter rail component of such plans, within the prescribed manner and time.

Publication of Transport Plans and substantial changes in Land Use and Public Transport Infrastructure and Services.

34. (1) On approval of the provincial land transport framework, a public transport plan or an integrated transport plan, the MEC or planning authority, as the case may be, must publish, in the Provincial Gazette, the prescribed particulars of such plans, which must include particulars of routes determined under section 32(2)(h).

(2) All persons, including the State and parastatal institutions, agencies and utilities are bound by the provisions of plans published under subsection (1), and:

- (a) no substantial change or intensification of land use on any property may be undertaken without the written consent of the relevant planning authority;
- (b) developments on property within a transport area are subject to traffic impact assessments and public transport assessments as prescribed by the MEC;

- (d) no action may be taken that would have the result of substantially decreasing the quantity or availability of land transport infrastructure or services, unless the owner of the land on which the infrastructure is situated, or the holder of the relevant operating license, as the case may be, has notified the relevant planning authority in writing not less than 30 days before the action is taken.

(3) Despite any law to the contrary, any authority with responsibility for approving substantial changes or intensification in land use or development proposals which receives an application for such change or intensification, must:

EXPLANATORY MEMORANDUM

ON THE OBJECTS OF THE GAUTENG TRANSPORT FRAMEWORK REVISION BILL, 2001

1. REASONS FOR THE BILL

The Gauteng Transport Framework Revision Bill (GTFRB) sets out the transport planning system for Gauteng including the functions of the MEC relating to transport, the functions and powers of transport authorities, finances of core cities and transport authorities, dissolution of such authorities, transport executives, various transport planning provisions and a number of sections on cooperative governance on transport matters. The GTFRB repeals the Gauteng Transport Framework Act, 1998 (Act No. 8 of 1998), which was originally drafted to cover the provincial matters required to match the national land transport legislation then being prepared. The GTFRB has been drawn up to take into account the National Land Transport Transition Act, 2000 (Act No. 22 of 2000), which allows Chapter 3: Matters of Provincial Concern to be replaced by appropriate provincial legislation. The GTFRB will allow the Province's transport system to be planned in an orderly manner and will ensure that transport authorities are established where local authorities deem it necessary.
