Annexure B

1. MONITORING AND REPORTING TOOLS FOR SCHOOLS

The tools will be used to assess all public ordinary schools annually to determine the level of functionality and capacity to manage section 21 functions.

The monitoring and reporting tools consists of a set of indicators with a scoring system for each of the three functions allocated by the GDE currently. It is envisaged that the monitoring tool be used once a year in order to determine whether schools have the capacity to perform its function or the HOD should consider withdrawing functions applied for due to non-functionality of the SGB.

Schools achieve a rating on each of the indicators, and cumulatively this gives a capacity score (out of 100). The monitoring tool also includes criteria for the analysis of the school's annual financial audited statement, which in conjunction with the functions score, should give a clear indication to the HOD whether the school has or has no capacity to discharge functions allocated to the SGB. This would also give the Department an indication of the kind of capacity building needed in particular schools.
