LOCAL AUTHORITY NOTICE 1445 OF 2022**NOTICE OF REQUEST FOR PUBLIC COMMENTS ON THE AMENDMENT OF THE ELECTRICITY BY-LAWS FOR THE CITY OF JOHANNESBURG**

The Council of the City of Johannesburg hereby gives notice that it intends to amend the Electricity by-laws. The public is invited to submit written comments on the proposed amendments of the By-Laws in terms of section 7(5) of the Rationalisation of Local Government Affairs Act 1998 and Section 12 of the Local Government Municipal Systems Act no 32 of 2000. The draft Electricity By-laws are amended and reviewed in order to be consistent with legislative requirements and to ensure effective implementation.

The current City of Johannesburg Electricity By laws were promulgated in 2000. In accordance with Section 11, 3(m) of the Municipal Systems Act 32 of 2000, the municipality in executing its executive mandate of provision of electricity is required to pass the by-law pertaining to this service. Chapter 7 Section 156 subsection 2 of the Constitution, states that “a municipality may take and administer by-laws for the effective administration of the matters which it has the right to administer.”

The main objective of the electricity by-laws is therefore to strengthen electricity regulations within the municipality amidst rapid changes taking place in the electricity sector.

Customers as conventionally and previously governed as consumers are now prosumers of energy, i.e., they generate own electricity and use the grid as backup. This is known as the digitization and democratization of the network. These changes therefore require some regulatory framework to enable the City to control and manage customers in accordance with best practices available locally and abroad. Although the amendments cannot be claimed to have covered all eventualities possible but have however looked at the existing trends prevailing in and out of the city. Some of the unknown factors involve the following:

- ☐ Electricity grid codes that are still being developed.
- ☐ Licensing relationship between the prosumers and Council.
- ☐ Likely changes to the standard transfer codes (STS) for prepaid meters, including telecommunication between the meter and grid etc.

Copies of the Electricity By-laws may be obtained from the website: www.joburg.org.za and can be inspected at the City's Regional Offices during the business hours from 08:00 –15:00 on weekdays. The public has 30 days commenting period from the date of this advert, until close of business day on 26 September 2022
