Matched areas are areas of very low population density that large in geographic size that could not be divided by the independent Electoral Commission into voting districts because the precise location of the resident population was unknown and the voting district demarcation criteria could not be applied. Voters in these areas were advised to register and vote at a voting station closest to them.

Cadastral data are based on digital information supplied by the Surveyor-General's Office. Place names information supplied by Statistics South Africa. Voting Districts and Boundaries supplied by the Independent Electoral Commission. Hospitals and Police Station information supplied by the Human Sciences Research Council.
